The Future's in Computer Service, So Start Preparing Now!

Only NRI could give you training this complete, experience this practical. You actually build a powerful 486sx/25 MHz computer system—including a 200 meg hard disk drive and Super VGA color monitor—while gaining the hands-on skills you need to service today's most sophisticated computers with confidence.

Over 220,000 jobs! That's what the Department of Labor forecasts for computer service technicians by the year 2005, a 38% increase over today's level. For you, that means tremendous opportunity if you have the training and the skills to get into this high-paying, top-growth field.

Now you can cash in on this opportunity — full-time, part-time, or in a computer service business of your own — once you've mastered electronics and computers the NRI way.

Get inside a 486sx/25 MHz computer system...and see for yourself the potential of today's computer technology!

Now NRI includes a high-speed 486sx/25 MHz mini-tower computer system as the centerpiece of your course to give you real-world training with state-of-the-art technology. You build this 1 meg RAM, 32-bit CPU computer from the keyboard on up. Plus, we've recently added two important features to this already powerful system: a 200 meg IDE hard disk drive, for extra storage capacity, and a Super VGA color monitor, to add impact and drama to all your computer's applications. But that's not all!

You also learn to diagnose and repair IBM-compatible computers with the remarkable Ultra-X hardware and software included in your NRI training. Plus, NRI's computer training now covers more troubleshooting procedures than ever, including upgrading, printer repair, recovering lost data, fixing RAM problems, and more.

Understanding you get only through experience

You need no previous background in electronics to succeed with NRI. You start with the basics, rapidly building on the fundamentals of electronics to master advance microcomputer concepts.

Best of all, you learn by doing — performing hands-on experiments with your NRI Discovery Lab and digital multimeter, then actually building and testing the powerful 486sx/25 MHz computer system you train with and keep.

Learn at home in your spare time

With NRI, you learn at your own convenience in your own home. No classroom pressures, no night school, no need to quit your present job until you're ready to make your move. And all throughout your training you've got the full support of your personal NRI instructor and the entire NRI technical staff.

Get all the facts from NRI's free full-color catalog. Send today!

Now, at an affordable tuition, your incomparable NRI hands-on training program includes even more than ever before:

- Discovery Lab you use to design and modify circuits, diagnose and repair faults
- Hand-held digital multimeter with "talk-you-through" instructions on audio cassette
- Digital logic probe that lets you visually examine computer circuits
- A powerful 486sx/25 MHz computer, featuring a 32-bit Intel 80486sx CPU, "intelligent" keyboard, and 1.44 meg, 3.5 inch high-density floppy drive
- 1 meg RAM, 64K ROM
- Super VGA color monitor
- 200 meg IDE hard disk drive
- DOS, QBasic, and Microsoft Works software
- Ultra-X diagnostic package including R.A.C.E.R. plug-in card and QuickTech menu-driven software for fast, professional troubleshooting
- Reference materials, programming guidelines, and schematics

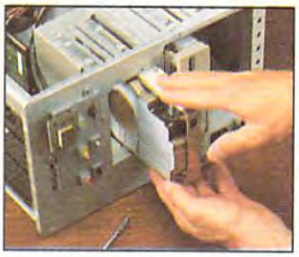
Get In-Demand Computer Servicing Skills With NRI "Hands-On" Training

You set up and perform electronics experiments and demonstrations using your NRI Discovery Lab. You even interface the lab with your 486sx computer to "see" keyboard-generated data.

After you build this digital logic probe, you explore the operation of your computer's 101-key, detached "intelligent" keyboard and its dedicated microprocessor.



You install the 1.44 meg, 3-1/2" floppy disk drive, learning disk drive operation and adjustment. Later, you dramatically improve your computer's data storage capacity by installing a powerful 200 meg IDE hard drive.

You learn to quickly diagnose and service virtually any computer problem with the extraordinary R.A.C.E.R. plug-in diagnostic card and QuickTech diagnostic software included in your course.

NRI training is so complete, hands-on mastery is "built-in"

No other training — in school, on the job, anywhere — prepares you so thoroughly for today's money-making opportunities in computer service. And only NRI builds meaningful training around the kind of powerful computer system you'll be called on to service and repair in the real world.

As you assemble your 486sx/25 MHz mini-tower computer system — complete with monitor, floppy drive, hard drive, operating and applications software — you'll perform hands-on demonstrations and experiments that bring theory to life, giving you a total mastery of computer operation. But NRI doesn't stop there.

Now! Includes diagnostic hardware and software for quick, accurate troubleshooting

Your NRI training now includes a remarkable diagnostic package that allows you to quickly locate and correct defects in IBM-compatible computers.

You'll use the Ultra-X R.A.C.E.R. diagnostic card to identify individual defective RAM chips, locate interfacing problems, and pinpoint defective support chips. Experts call the R.A.C.E.R. card the easiest to use, most powerful tool for PC troubleshooting available today!

With your QuickTech diagnostic software package, also from Ultra-X, you'll go on to test the system RAM and such peripheral adapters as parallel printer ports, serial communications ports, video adapters, and floppy and hard disk drives.

This ingenious diagnostic package is just one more way NRI's real-world, hands-on training gives you both the knowledge and the professional tools to succeed as today's in-demand computer service technician.

Free catalog tells more... send today!

Send the postage-paid card today for NRI's big, free catalog that gives all the facts about NRI computer training. See for yourself how NRI hands-on training can help you cash in on the growing opportunities for skilled computer service technicians.

If the card is missing, write to NRI at the address below.

AVAILABLE FOR MAC, DOS AND MICROSOFT WINDOWS™

Try America Online—Free.

There's only one way to get the big picture about America Online. Try it. That's why we make it so easy. We give you the software and let you try it, absolutely free. You'll be impressed by everything you can do with your computer, a modem, and America Online, and how easily you can do it.

Just Point And Click.

Get advice from hardware and software developers, experts and reviewers — even ask them questions directly. Download any of the thousands of programs from our software libraries and use them off-line. Monitor your investments and the latest news. Manage your business better with the help of our Microsoft® Small Business Center. Save time and money in hundreds of different ways, from browsing for gifts in our online shopping area or booking your own airline tickets to using our great computing support forums.

Featuring COMPUTE Magazine Online.

And now America Online offers COMPUTE Magazine Online. From the opening screen, you'll find COMPUTE Online is more than just an electronic version of the magazine — it's interactive. You can share your views with COMPUTE editors and writers in real-time discussion forums. Find in-depth reviews of the latest software in the "Test Lab." Download software programs from COMPUTE's own Top 10 list. Or, use America Online to reach out to the world beyond — our e-mail gateway to the Internet links you to members of other e-mail and online systems for no additional cost. When you connect to America Online, you connect to the electronic community of the future — today.

As Easy To Try As It Is To Use.

If you've never tried America Online, now's the time. If you have in the past, try us again — America Online is available for Mac, DOS and now, the new Windows version for Microsoft Windows 3.1 users — with multi-tasking, flashbar navigation, and much more. But don't take our word for it. Give us a try and find out what you can accomplish when you open a few of our windows.

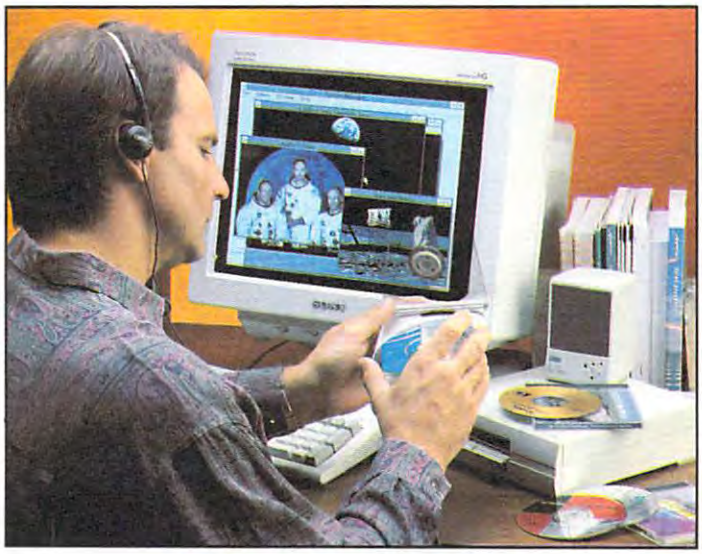
Another NRI Training Breakthrough!

Be a Part of Today's Fastest-Growing Computer Field— Be a Multimedia Specialist

Multimedia. It's cutting edge technology that's being talked about everywhere — in magazines, on TV, even at your office. Perhaps you've used a multimedia application yourself at an airport kiosk or in a retail store. Now you can be a part of this fascinating new technology that's given the PC voice, sound, animation, and even full-motion video!



It's a fact: Multimedia is rapidly changing the way we learn, communicate, get information — even the way we do business. Only NRI gives you exclusive, hands-on training with the latest peripherals that turn your present computer into a "Multimedia PC" and turn you into a Multimedia Specialist. Only NRI prepares you so well to take advantage of the myriad career opportunities opening up in this dynamic new field. Whether you're looking to create programs that educate, inform, entertain, or train, opportunities to move up, make more money, even start your own business are virtually unlimited.

Your NRI training starts with a review of computer hardware. Using your own 386 or higher model computer with 3.5 inch drive and Windows 3.1, you first get hands-on experience evaluating your equipment for a better understanding of how it works. You go on to examine how today's most sought-after peripherals — CD-ROM drive and sound card — work together with multimedia software to give sensory qualities to your PC. What's more, you install, train with, and keep a Mitsumi CD-ROM drive, 16-bit SoundBlaster® Pro II-compatible sound interface card, Autodesk Animator®, and Asymetrix Toolbook® software — all included in your course.

Your Multimedia Training Includes Everything You Need to Create Multimedia Applications With Your Own Computer

Get in on the ground floor of today's most dynamic computer technology: Multimedia

Your very first lesson has you and your computer up and running with a review of the many opportuniutes in the exciting field of Multimedia. But before you begin to design your own program, you first learn about the various types of multimedia applications and CD-ROM titles that have been developed commercially. With a full understanding of the elements that make up a successful multimedia application, you're ready to try your hand at your own multimedia program. Using your own computer and the exclusive worksheets and sample reports included in your hands-on training projects, you prepare an Analysis Report and Preliminary Design Document that lay the foundation for your own multimedia program.

With your NRI instructor available to guide you every step of the way you move on to examine the components that combine to make your multimedia program visually engaging: text, graphics, video, and animation. You install Autodesk Animator software on your computer and then use its paintbrush feature to create objects that move across the screen, rotate, or change perspective, keeping in mind the creative approaches you will use later in your multimedia program.

Now you're ready to go on to explore the elements of multimedia that make it multisensory: audio and video. Your lessons cover the break-through technology of CD-ROM and new digital data storage devices on the horizon. Then you get first-hand experience with the very equipment that enables your computer to speak, play music, and generate a host of sound effects — Mitsumi CD-ROM drive, 16-bit SoundBlaster Pro-II-compatible sound card, speakers, headphone, microphone, and software — all yours to train with and keep.

Your multimedia program takes shape as you learn about interactivity and principles of interface design. You put yourself in the user's shoes: What will make your program exciting so that people will want to use it? What will your interface buttons look like? How will they work? Refer back to your Preliminary Design Document, and you'll find many of the answers you need to help you create detailed flowcharts and storyboards of your program design on paper. Then, using the Flowchart software included in your course, you recreate your program design on your own computer.

You're now ready to breathe life into your program using professional quality Asymetrix ToolBook® software included in your next project. With its object-oriented technology, this easy-to-use authoring tool has you quickly entering text, graphics, animation, and CD audio – all provided on the exclusive NRI Multimedia Resources CD – to create a content-rich, high-impact multimedia program, one you can use to sell your services to future clients.

What's more, NRI's unique training also includes lessons that show you how to market your services and manage professional projects. By the time you complete your course, you'll have the technical know-how, business savvy, and total confidence to take advantage of today's opportunities in Multimedia.

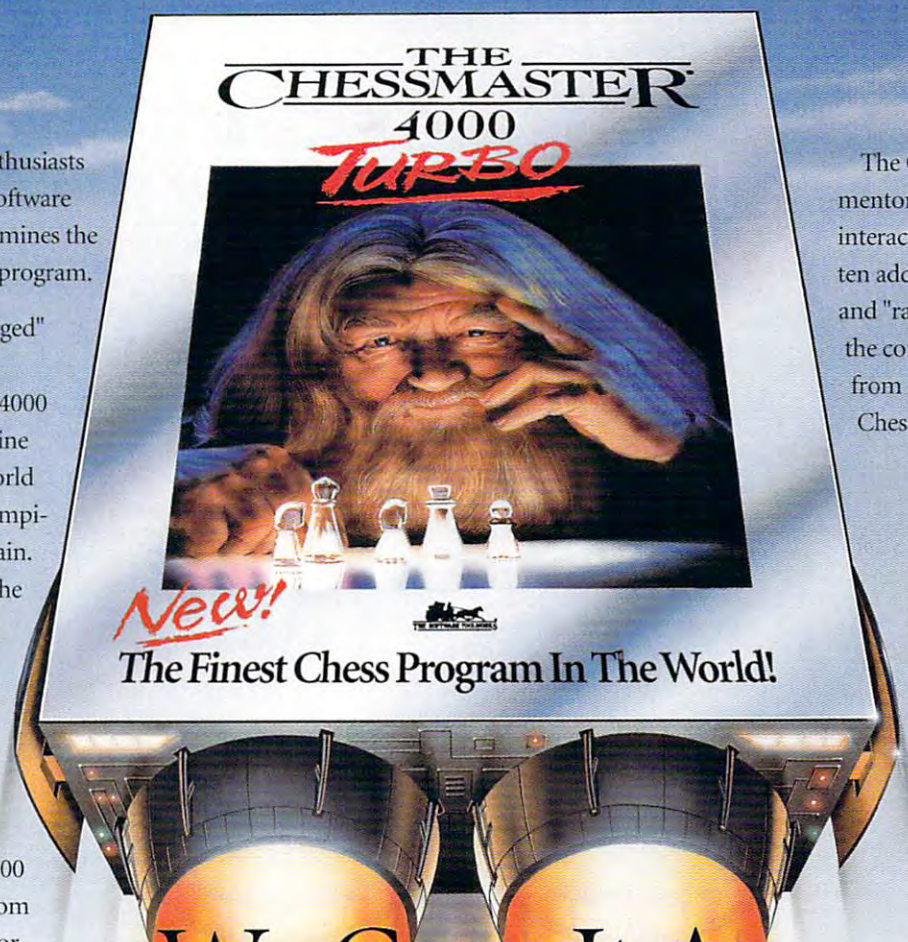
How Could We Ever Improve The World's Best Selling Chess Program?



Computer chess enthusiasts will tell you that the software "engine" is what determines the true power of a chess program.

The new "turbocharged" 32-bit engine in The Chessmaster Version 4000 is based upon the engine that won the 1992 World Computer Chess Championship in Madrid, Spain. Taking advantage of the 32-bit processing capabilities of 386 and 486 processors, chess for the PC has reached a new level of excellence.

The Chessmaster 4000 Turbo has a new custom Windows™ interface for spectacular graphics. Choose between 3-D or 2-D. Rotate the board. Choose from a dozen chess sets or design your own set or board.

The Chessmaster acts as a mentor and provides a new interactive animated tutorial, ten additional teaching displays and "rate my plays;" you predict the correct moves selected from famous games and The Chessmaster will score you.

New views including 3-D and rotating boards

The Software Toolworks has long been recognized as the leader in computer chess programs. Now, we're setting a brand new standard. Truly, The Chessmaster 4000 Turbo is the finest chess program in the world.

We Gave It A Stronger Engine!

THE CHESSMASTER 4000 TURBO

The Finest Chess Program in The World!

Available for Windows
