## WHO Is the Most Creative Programmer?

## WHAT Is the Best Printer?

## WHERE Is the Most Active Computing Area?

# IT WILL HOLD YOU CAPTIVE FOR DAYS.

Welcome to the world of Bantross. Where monsters don't just *look* menacing. They lunge directly at you, ready to wound, paralyze or kill.

Where whistling wind, roaring surf and echoing footsteps mix with the sound of your own heart pounding.

Where earthquakes, floods and a treacherous baron wreak havoc on entire continents.

Where you'll need exceptional

skill, cunning and magic to survive.

You'll wander through

labyrinth. Play games of chance, arcade games and far more.

The Legend of Blacksilver provides all the depth and challenge worthy of a skilled adventurer. Intrigue.

Danger. Complexity. Unparalleled realism. All others are tame by comparison. *Advanced Hint Book available. Details on package.*

Scores of maps give a global perspective. You'll see geography change with earthquakes and floods.

ancient archives where torches glow against damp walls. You'll venture into 40 levels of dungeons. Journey to 16 different towns. Explore a mysterious

Torches flicker and crackle in the archives, where you'll acquire secret knowledge and strategic skills.

3-D effects and incredibly realistic first person views make the action even more spine chilling.

To order your preview disk, send a check or money order for \$3.75 (Canada: add 50¢) to: Legend of Blacksilver Preview Disk, Softmail Code 155-013, 2995 Woodside Rd., Ste. 400-383, Woodside, CA 94062. Allow 4-6 weeks for delivery. Offer expires 3/31/90. Valid only in continental U.S. and Canada. Void where prohibited. Specify: Commodore 64/128.

Apple II and compatibles, Commodore 64/128, IBM PC and compatibles. Screens from Commodore. © 1988 Epyx, Inc.

**NEW**  
For the  
C-128!

HOW TO FILL  
YOUR DAYS  
WITH FANTASY,  
ADVENTURE,  
PERCEPTION,  
FINANCE,  
INFORMATION,  
EXCITEMENT,  
AND MUCH,  
MUCH MORE...  
EVERY MONTH.

**BLOW YOUR MIND FOR ONLY \$9.97**

**WHAT A WAY TO GO, 128!**

LOADSTAR 128 is a totally new quarterly software collection designed specifically for the Commodore® 128 by the editors of LOADSTAR, the best-selling monthly disk for the Commodore 64. Every three months you will receive a new 5 1/4" disk filled with new 128-only programs *not found* in our monthly LOADSTAR collection.

**USE THE FULL POWER OF YOUR 128**

LOADSTAR 128 issue #1 contains eight great programs for your C-128, taking advantage of the 128 features like the 80-column format, larger memory and a more powerful BASIC.

[www.commodore.ca](http://www.commodore.ca)  
May Not Reprint Without Permission

**CONTENTS OF ISSUE #1**

- CHART 128**-Design professional looking charts.
- CARBUYER'S SCRATCHPAD**-Make the best deal on your new car.
- TREASURE TROVE**-Unique card solitaire game.
- WIZARD WIND**-Battle Wizards as they try to blow you away.
- BORIS**-Play chess on nine levels.
- QUESTOR**-A great graphic adventure game.
- POTPOURRI**-Test your knowledge and trivia IQ.
- 80-COLUMN MONOCHROME CABLE**-Build your own cable.

**THE BEST SOFTWARE VALUE FOR THE 128**

LOADSTAR 128 is delivered direct to you four times each year for only \$39.95. That's only \$9.97 an issue. So order today with the coupon below or call **1-800-831-2694**.

**YES!** Please rush me my first issue of LOADSTAR 128 and start my one year subscription (4 quarterly issues) for only \$39.95 (Canada/Mexico \$49.95, Overseas \$59.95). Make checks payable to Softdisk, Inc. (Specify U.S. funds). Louisiana residents add 4% sales tax.

# DATEL COMPUTERS

## FINAL CARTRIDGE III

- Give your 64/128 an "Amiga Look-Alike" environment. Pull down windows/icons.
- FILES a huge range of utilities all built into this one cartridge ... including:
  - Freezer option to freeze and copy most any memory resident program.
  - Full machine code monitor with all the usual commands and more.
  - Usage picture print dump - compressed/enlarged
- Plus other effects.
- Fast loader - loads commercial software at up to 15 times normal speed.
- Range of desk-top type tools - clock, calculator, Onkix etc. etc.
- Final Cartridge 3 is a superb utilities cartridge with an added bonus of a freezer function.

ONLY \$54.99

## TOOLKIT IV

The ultimate disk toolkit for the 1640/1641

A disk toolkit is an absolute must for the serious disk hacker. Toolkit IV has more features than most for less.

- DISK DOCTOR V2** - Read and write any track and sector including extra and remembered tracks. Repair damaged sectors. Look underneath read errors.
- HEADER/GAP EDITOR** - Decode and displays ALL header information including off bytes and header gap. Rewrite the entire header and header gap. Remember sectors. Also edit any sector tail gap.
- DISK LOOK** - Sort directory. Recover lost files. Display file start/end addresses. Disassemble any file program directly from the disk to SCREEN or PRINTER including undocumented spooles. Edit Ram. Much, much more.
- FILE COMPACTOR** - Can compact machine programs by up to 50%. Saves disk space. Compacted programs run as normal.
- FAST DISK COPY** - Copy an entire disk in 2 minutes or less using single 1541.
- FAST FILE COPY** - Selective file copy. Works at up to 6 times normal speed.
- FORMATTER** - 10 second format an entire disk or format any individual track or half track 0 to 41. Redefine any of 30 parameters to create or recreate unique disk formats.
- ERROR EDIT** - Quickly find and recreate all read errors including extra and remembered tracks or sectors and half tracks from 0 to 41. Even recreates data under errors and allows you to redefine any necessary parameters.

ONLY \$14.99

## DIGITAL SOUND SAMPLER

- The new sampler allows you to record any sound digitally into memory and then replay it with astounding effects.
- Playback forwards/backwards with echo/reverb/ring modulation.
- Full 8 bit D to A # ADC conversion.
- Midi compatible with suitable MIDI interface. (see Ad)
- Full sound editing and realtime effects menu with waveforms
- Powerful sequencer plus load/save functions
- Line In/Midi In/Line Out/Feedback controls
- Complete hardware/software package

ONLY \$89.99

## MIDI 64

- Full specification MIDI interface at a realistic Price.
- MIDI IN
- MIDI OUT
- MIDI THRU
- Compatible with most leading MIDI software.

ONLY \$49.99

## TURBO ROM II

Turbo Rom II is a replacement for the actual kernal inside your 64. It provides superfast load/save routines.

- Loads/Saves most programs at 5-6 times normal speed.
- Improved DOS support including 10 sec format.
- Programmed function keys- load, directory, old, etc.
- Return to normal kernal at flick of a switch.
- POOPY - 250 block file copier.
- FLOAD - special I/O loader.
- Plus lots more.
- Fitted in minutes - no soldering usually required. (On some 64's the old ROM may have be desoldered).

ONLY \$24.99

## 256K SUPEROM EXPANDER

- Now you can select from any of 8 32K EPROMs
- 8 sockets to accept upto a 32K EPROM in each.
- On board operating system - no programs to load.
- Program your own EPROMs using our EPROM programmer.
- No need to have loads of cartridges - just make a selection from the Superom menu.
- Directory of utilities on power up.
- Fully menu driven on power up.
- Select any slot under software controls.
- Unique EPROM generator feature will take your own programs - basic or m/c and burn them into autostart EPROMs. (EPROM burner required).
- Accepts 2764/27128/27256 EPROMs.

ONLY \$49.99

## EPROMMER 64™

- A top quality, easy to use EPROM programmer for the 64/128.
- Fully menu driven software/hardware package makes programming/reading/ verifying/ copying EPROM's simplicity itself.
- Will program 27256 chips. 12.5, 21 or 25 volts.
- Fits into user port for maximum compatibility with cartridges/Superom Board etc.
- Full feature system - all functions covered including device check/verify.
- We believe Eprommer 64 is the most comprehensive, most friendly and best value for money programmer available for the 64/128.
- Ideal companion for Superom Board. Cartridge development System, our kernal expanders or indeed any EPROM base project.
- Comes complete with instructions - plus the cartridge handbook.

ONLY \$69.99 COMPLETE

## DEEP SCAN BURST NIBBLER™

- The most powerful disk nibbler available anywhere, at any price!
- Burst Nibbler is actually a two part system - a software package and a parallel cable to connect the 1541/1570/1571 to 64/128 (state type).
- What gives Burst Nibbler its power? Conventional nibblers have to decode the data from the disk before it can transfer it using the serial bus - when non standard data is encountered they are beat. Burst Nibbler transfers data as raw GCR code via the parallel cable without the need to decode it so you get a perfect copy of the original.
- Will nibble upto 41 tracks
- Copy a whole disk in under 2 minutes.
- Full instructions.
- Regular updates - we always ship the latest.
- Fitted in minutes - no soldering usually required.
- Full or 1/2 tracks.
- No need to buy parallel cable if you have Professional DOS etc.
- Cable has throughbus extension for other add ons.

ONLY \$39.99 COMPLETE

SOFTWARE ONLY \$19.99 CABLE ONLY \$19.99  
BURST NIBBLER PARAMETER DISK

- Burst Nibbler is the most powerful Nibbler around - but even the best can be better
- This disk contains dozens of parameters specially written for the protection schemes impossible to Nibble. These are mainly "Ymax" and "Rapidlock" and include titles such as "Defender of the Crown", "Gauzlet" etc.
- Regularly updated to include any new titles.
- This disk is by no means a necessity - the standard Burst Nibbler will copy 96% of software as is - if you want to go to the limits, this is the product for you!

ONLY \$14.99

## SMART CART

- NOW YOU CAN HAVE A 32K CARTRIDGE THAT YOU PROGRAM LIKE RAM THEN ACTS LIKE ROM!
- 32K pseudo ROM - battery backed to last up to 2 years (lithium battery).
- Simply load the program you require - then flick the switch. The cartridge then acts like a ROM cartridge and can even be removed.
- Make your own cartridges - even auto start types, without the need for an EProm burner.
- Can be switched in/out via software.
- I/O2 slot open for special programming techniques.

ONLY \$59.99

## DUPLIKATOR

- Duplikator is a mass disk copier ideal for clubs, user groups etc.
- Comes with 256K on board RAM and it's own built in operating system - no software to load.
- Makes entire backups in 8 seconds!
- Multiple copies from one original - over 250 disks per hour. Full verify option.
- Copies upto 40 tracks and can cope with standard disk errors 21.29.
- The most price effective method of mass duplication available.

ONLY \$189.99

## EXTERNAL 3.5" DISK DRIVE

- Streamline extra low profile unit - only 6" long!
- Top quality NEC drive mechanism.
- Throughport allows disassembling other drives.
- A superbly styled case finished in amiga colours.
- Fully compatible.
- 1 meg unformatted capacity.
- Good length cable for positioning on your desk etc.
- Complete - no more to buy.

ONLY \$169.99 SINGLE  
ONLY \$299.99 DUAL

## MIDIMASTER

- Full Midi Interface for A500/2000/1000 (Please state model).
- Compatible with most leading Midi packages (inc. D/Music).
- Midi In - Midi Out x 3 - Midi Thru.
- Fully Opto Isolated/Full MIDI.

ONLY \$59.99

Circle 154 on Reader Service card.

# TOTAL BACK UP POWER TAKES A QUANTUM LEAP!

## ACTION REPLAY IV THE ULTIMATE UTILITIES/BACK-UP CARTRIDGE FOR THE 64/128

• Action Replay allows you to Freeze the action of any memory Resident Program and make a complete back-up to disk or tape – but that's not all . . . Just compare these features

- ❑ Simple Operation: Just press the button at any point and make a complete backup of any\* memory resident program to tape or disk.
- ❑ Turbo Reload: All backups reload completely independently of the cartridge at Turbo speed.
- ❑ Sprite Monitor: View the Sprite set from the frozen program – save the Sprite – transfer Sprites from one game to another. Wipe out Sprites, view the animation on screen. Create custom programs.

- ❑ Sprite Killer: Effective on most programs – make yourself invincible. Disable Sprite/Sprite/Background collisions.
- ❑ Unique Picture Save: Freeze and save any Hires Screen to tape or disk. Saved in Koala, Blazing Paddles Format.

**ONLY \$59.99**

**POWERFUL DESIGN WITH ON-BOARD LSI LOGIC PROCESSOR CHIP PLUS 60K OF ON-BOARD ROM/RAM**

- ❑ Compact: Efficient compacting techniques – 3 programs per disk side. 10 programs if you use both sides.
- ❑ Single file: All programs saved as a single file for maximum compatibility.
- ❑ Extra commands: A host of additional commands: Quit, Append, Old, Delete, Linesave, Printer, etc.
- ❑ Screen Dump: Print out any Screen to Host or Printers. 16 Gray Scales, Double size print options.
- ❑ Unstoppable Reset: Reset button to Retrieve System and Reset even so called Unstoppable Programs
- ❑ Fully Compatible: Works with 1541/C, 1581, 1571 and Datacassette with 64,128, 128D (in 64 Mode)
- ❑ Compatible: With Fast DOS and Turbo Rom Systems
- ❑ Disk Utilities: Fast Format, Directory, List, Run and many other key commands are operated by Function Keys
- ❑ Unique Restart: Remember all of these utilities are available at one time from an integrated operating system. A running programme can be Frozen to enter any Utility and the program is restarted at the touch of a key – without corruption.

LSI Logic Processor: This is where Action Replay IV gets it's power. A special custom LSI chip designed to process the logic necessary for this unmatched Freeze/Restart power. No other cartridge has this power!

### UNIQUE FEATURES:

#### ❑ WARP 25

Loads 60K in under 5 seconds!!

The 1st true action replay features "Warp 25" the world's fastest disk serial Turbo. A typical backup will reload in under 5 seconds.

- No additional hardware required
  - No special formats
  - Super reliable
  - Remember this is not a system where files have to be converted – with action replay you simply save directly into Warp 25 status – reload in seconds
  - Backup all your existing programs to load at unbelievable speed!
  - Because AR4 has on board ram it can also load commercial disks directly at 25 times speed.
- This is unique to Action Replay!!
- Warp Save/Load Available straight from Basic.

#### ❑ Plus Unique Code Cracker Monitor

- Freeze any program and enter a full machine code monitor
- Full Monitor Features – Disassemble, Hex, Find, Jump, Compare, Replace, Two Way Scroll, Full Disk Load/Save, Printer Support etc. In fact all usual monitor commands plus a few others.
- Because of Action Replay's on Board Ram the Frozen program can be looked at in it's ENTIRETY! – in it's Frozen state. That means Video Ram, Zero Page etc. and remember you see the code in it's Frozen state not in a Reset state as with competitors products.
- Restart the program at any point.
- No corruption
- An absolute must for the program Hacker – make changes and see your result's instantly!

#### ❑ Action Replay Graphics Support Disk

To help take advantage of action replay's unique power to freeze any screen and save it into your favorite graphics package we have prepared a suite of graphic support facilities.

- Screen Viewer View screens in a "slide show" sequence – joystick control simple to use.
- Message Maker Add scrolling messages to your saved screens with music, very easy to use.
- ProSprite A full sprite editor; modify/save/load feature, full edit facilities.
- Zoom Lens Explode sections of any saved screen to full size including Border – Superb fun and very useful.

**ONLY \$19.99**

#### CENTRONICS PRINTER LEAD

- ❑ Take full advantage of Action Replay or Final Cartridge screen dump features with this centronics lead.
- ❑ Connects user port to any full size Epson compatible printer.

**ONLY \$18.99**

#### ❑ SUPERCRUNCHER

- ❑ A utility to turn your Action Replay into a super powerful program compactor: Reduce programs by up to 50%! Save disk space and loading times. Can even further compact programs already crunched by Action Replay's own compactor.

**ONLY \$9.99**

**NOW WITH RAMLOADER™**

❑ Not only can Action Replay load your backups at 25 times normal speed . . . Now with the new RAMLOADER™ feature you can also load more of your commercial originals also at 25 times normal speed!

❑ Make use of our special LSI logic processor and 64K of on-board Ram when in Replay mode offers the world's fastest Disk Serial Turbo.

## YEAR IN REVIEW

It's been a long, hard year—elections, Olympics, America's return to space. So much happened, and yet, in the Commodore computing industry, 1988 may be best remembered not for its interesting developments, but for what didn't happen.

\*The president of Commodore was *not* canned. No heads rolled, no major management shakeups occurred, no major layoffs transpired at Commodore this year, as Gould, Toy, et al, continue with their successful turnaround strategy.

\*Commodore did *not* introduce any new products in 1988 for the multitude of eight-bit Commodore users. Their definition of an innovative technological breakthrough for this market is changing the color of the C-64 to match that of the C-128.

\*Commodore also appears oblivious to the threat from video game manufacturers. We thought that 1988 would be the year Commodore would introduce new pricing and/or software bundling for the C-64 to make it an attractive alternative to the video game machines. Instead, they are contentedly letting that market slip away.

\*Even existing products weren't really there. Forget about products that weren't developed in 1988. The 1670 modem was virtually non-existent in mid-year, and the 1750 RAM expander, due to the scarcity of memory chips, was hard to come by at year's end.

Thanks, Commodore, for your non-support.

Other 1988 high(low)lights:

\*Nineteen eighty-eight will be remembered as the year of the games—for 64 owners, that is. On the 64 productivity side, GEOS remains the dominant force.

\*Greetings to several new software developers, including video game manufacturers who have converted their software to the C-64. Welcome aboard!

\*It was a year in which many users experienced laser printer envy. Although prices are coming down, they remain just out of the reach of the average Commodore user's budget.

\*It was a year when computer viruses, of all things, made the cover of *TIME* magazine.

\**RUN* quietly celebrated its fifth anniversary (but we promise a noisy bash for our ten-year celebration, to which you will be invited).

\*It was a year in which Commodore owners were asked to trade in their pitiful, decrepit 64s, 128s or 128Ds for a whopping \$100 allowance towards the purchase of an Amiga 500 or 2000. Any takers?

\*This was a year in which, if you needed your computer serviced, your patience and faith in the American enterprise system were severely tested.

\*This year saw Commodore discontinue manufacturing the standard 128 in favor of the 128D.

\*Any support for Commodore eight-bit users comes from some online networks, BBSs, magazines, computer shows, some software developers and, of course, the user groups, the backbone of the Commodore computing industry.

\*It was a year in which smoker-bashing stooped to new depths. The National Center for Health Statistics discovered that, among their other despicable habits, smokers are less active physically and apt to get less sleep. This probably describes 90 percent of the computer users I know. (Other bad habits include tendencies to pick up hitchhikers and to drive without a seat belt. How disgusting!)

As I gaze into my murky crystal ball, I predict more of the same in store for Commodore owners in 1989. Sorry, folks.

*In the  
Commodore  
eight-bit  
market, 1988  
was a  
non-year.*

Editor-in-Chief

**ENCOUNTER HIGH  
SPEED ACTION IN  
AN INTELLIGENT  
GAME OF TACTICAL  
WARFARE.**

**THE TIME:** The 22nd Century.

**THE PLACE:** 64 islands in the Southern Ocean.

**THE PROBLEM:** A worldwide energy crisis.

**THE MISSION:** Gain control of the islands, set up centers to mine, recycle and produce materials to form a large network of power plants.

**JUST ONE MORE PROBLEM:** Enemy terrorists are destroying the islands... one by one.

# CARRIER COMMAND

**FAST-PACED ARCADE ACTION:**

You are in control of up to 4 aircraft and 4 amphibious vehicles simultaneously. Capture enemy islands and destroy its forces.

**STRATEGIC TACTICAL WARFARE:**

Conduct war maneuvers in a huge territory that includes over 60 islands. Protect your ship with defense drones and 360-degree turret mounted laser cannon with telephoto tracking.

**SENSATIONAL GRAPHICS:**

Three-dimensional solid filled graphics, smooth scrolling, fabulous sound and special effects.

**ADDICTIVE, HOURS OF PLAY:**

Your choice of action game or strategy game, plus save-game option provides hours and hours of extraordinary adventure!

# MAGIC

Need better control over your cursor? Want to highlight menu options on both the 64 and 128? These and other tricks will help you get more use out of your computer.

Compiled by TIM WALSH

## \$4F8 64 WINDOWS

Programmers have been writing window utilities for the C-64 since the first one rolled off the assembly line. Now there's a machine language windowing system for the C-64 entitled 64 Windows. It's short, easy to use and simple to incorporate into your own programs.

I've included a demonstration program that creates two windows and shows how windows are created. Although the program is fully relocatable in memory, its default location is 49152. Consequently, SYS 49152 will copy screen memory, SYS 49263 will create a window and SYS 49335 will replace screen memory. After activating 64 Windows, poke the following locations with their respective values to color and position windows on the screen:

Left side: Poke 251, (0-38)  
Right side: Poke 252, (1-39)  
Bottom: Poke 253, (1-24)  
Character color: Poke 254, (0-15)

## \$4F9 128 WINDOWS

This trick shows a few shortcuts for making windows on the C-128 in both 40- and 80-Column modes. Because the syntax of the Window command is so confusing and difficult to remember, I've simplified it here by listing the four easily remembered Poke commands you'll need in order to create windows:

POKE 228, (0-24) Bottom of window  
POKE 229, (0-24) Top of window  
POKE 230, (0-79) Left margin of window\*  
POKE 231, (0-79) Right margin of window\*

\*Note: A maximum value of 39 can be used with the 40-column screen.

After you've created a window using any of the above Pokes, you can deactivate it by pressing run-stop/restore or by pressing the home key twice.

—JOHN COLGAN, RAYTOWN, MO

## \$4FA 64 MEMORY SAVER

While the C-64 lacks a BSave (binary save) command for saving areas of memory to disk, this shortcutting can be overcome with only six lines of Basic code. The listing, 64 Memory Saver, saves a section of memory containing a machine language routine to disk as a fast loading machine language file.

New, exciting creative software from the company that brought you the world famous, best selling "Pocket™ Writer".

Pocket™ Author breaks new barriers. Now you can create your own software applications without an in-depth knowledge of programming.

With Pocket™ Author you can:

- create your own applications with pull down menus, screen management and mouse or joystick control.
- design pop-up menus with as many as eight overlays.
- move an arrow to select an "icon" or image area to be filled with text or pictures.
- "multi-task" sound and animation.
- draw or paint images.
- use the many, many other excellent features.

With Pocket™ Author, you can create games, question and answer programmes, business and educational applications, animation sequences, music, and almost anything you can imagine. The manual contains a tutorial to get you started. There are over 20 help screens summarizing how to use Pocket™ Author. Also included are examples and utilities to facilitate making your own icons and help screens.

Don't wait! Order Pocket™ Author today! You can get the newest breed of "Creativity Software" only from Digital Solutions. Send in the Order Form below or call 416-731-8775 [credit cards orders only].

Regular price is \$59.95 U.S. (\$69.95 Cdn.)

Circle 46 on Reader Service card.

As an example, let's say you have a utility that resides in locations 49152 to 49252 and is activated with SYS 49152. Just load and run the utility, then load and run 64 Memory Saver. Enter a starting address of 49152, an ending address of 49252 and a filename, such as "49152 UTILITY".

After you've saved the utility to disk with 64 Memory Saver, you can load it with LOAD "49152 UTILITY",8,1 and activate it with SYS 49152.

```

## \$4FB JOYSTICK-CONTROLLED CURSOR

If you've ever wanted to move the C-64's cursor with something other than the cursor keys, then 64 Cursor Joystick is for you. Once typed in and enabled with SYS 49152, a joystick in port 2 lets you move the cursor anywhere around the screen.

You'll find that this program will never interfere with other program operations. It can be disabled with run-stop/restore, and the cursor speed can be adjusted by entering POKE 49174, X, where X is a value between 3 (fastest) and 15 (slowest).

### \$4FD 64/128 HIGHLIGHTED MENU ROUTINE

While there are programs for creating menu systems for both the C-64 and C-128, most have some limitations, and that's usually a lack of compatibility with both computers. You'll find my 64/128 Highlighted Menu Routine has virtually no limitations and is completely compatible with both the C-64 and the C-128.

The 64/128 Highlighted Menu Routine highlights and selects menu options as you scroll through them with the up-down cursor key. Configuring this routine for your own programs is remarkably easy—just substitute your own menu options in the Data statements at the beginning of the routine and change the variable NI to one less than the number of items in the menu.

For added flexibility, you can change the variables X and Y at the beginning of the program to set the horizontal (X) and vertical (Y) locations of the menu.

```

—REX DAY, MOUNTAIN HOME, ID

### \$4FE WHEN ALL ELSE FAILS...

It's Sunday night, and you need to print a report or paper due Monday morning just as your printer ribbon breaks. Magic can help. Remove the broken ribbon and, if needed, set the print head gap for three sheets of paper. Then put into the printer two sheets of paper with a sheet of carbon paper in between. The top sheet will be illegible, but the bottom sheet will print as a carbon copy. While this is a great trick in emergencies, it's still no substitute for having a second printer ribbon handy.

—KEN ASTON, L'AMABLE, ONTARIO, CANADA

### \$4FF THE OLD PROGRAM FILE DILEMMA

In the January 1988 issue of *RUN*, Magic trick \$464, "Lou's Sequential Saga," showed how to convert a Basic program into a sequential file that could then be read by word processors and telecommunications programs. The code was a simple Direct Mode command as follows:

```
OPEN 8,8,"FILENAME,S,W":CMD8:LIST:PRINT#8:CLOSE 8:
```

While this is a handy bit of magic, if your word processor or terminal program can't read sequential files, novice computer users won't be able to load the sequential file. If you're one of the hapless souls whose word processor can't read sequential files, just substitute a ,P,W for the ,S,W that follows the word FILENAME in the above example. You'll then be able to read the file into your word processor. However, it won't be as "clean" and well-formatted as the sequential file versions.

A lowercase m will be substituted for all returns in your file. All you have to do is use your word processor's Search-with-Replace function to scan the document and replace the m's with returns.

—ANTHONY AGUIRRE, HAVERTOWN, PA

## MAGIC

### \$500 DETECTING THE RESTORE KEY

Detecting most key presses on the C-64 is easily accomplished through the use of one or more Peek commands. However, detecting a restore key press is difficult. You can use my Restore Key Detection Routine in any program without affecting the run-stop/restore combination.

As written, the program monitors the RS-232 port for activity, and it pokes location 673 with a 0 to keep disk access normal. Just don't perform any RS-232 accesses when using this routine in your own programs.

```
Ø REM C-64 RESTORE KEYPRESS DETECTION - DE

                                           :REM*9Ø
7Ø GOTO 6Ø                                   :REM*2Ø2
```

—DENNIS MAGAR, WYLIE, TX

### \$501 1670 AUTO-ANSWER DISABLE

My Commodore 1670 modem is great for 1200-baud telecomputing, except that it lacks a switch to disable auto-answering. 1670 users should keep the following program handy, which can be run when you're finished using the modem. It disables the auto-answer feature without disconnecting the modem.

```
10 OPEN 2,2,2, CHR$(6)+CHR$(10)
20 PRINT#2,"ATSO=0":CLOSE 2
```

—CRAIG STERN, HARTSDALE, NY

### \$502 NO-NONSENSE 1670 AUTO-ANSWER DISABLE

Fellow 1670 users should go to their nearest Radio Shack store and ask for part #43-127, which costs about \$8. The part is a ring silencer, and you plug your incoming phone line into one end and the other end of the ring silencer into your 1670. Then you can plug a line to your telephone from the other telephone line port on the modem.

The silencer keeps the 1670 from answering incoming calls, yet allows outgoing calls. Best of all, the silencer has a light that comes on with each ring. You'll never have to run another auto-answer disable program or unplug the modem again.

—FRED J. SODERLUND, GOLETA, CA ■

*Magic is a forum for RUN's imaginative and inventive readers to share their programming tips, brief software or hardware modifications, shortcuts or items of general interest. If you have an idea to make computing easier, faster, more exciting and enjoyable, send it to Magic, RUN Magazine, 80 Elm St., Peterborough, NH 03158.*

*Magic pays \$10-\$40 for each trick published in the column.*

*If you'd like a copy of the latest edition of RUN's Magic Trick Writer's Guide, send your request with a self-addressed, stamped, business-size envelope; you'll receive a copy in two or three weeks.*

## NEW from Digital Solutions

Templates for Pocket Writer™, Pocket Filer™, Pocket Planner™ and Applications for our newest product, Pocket™ Author for your C-64/128

Now, we've made our "easy to use" programs even easier to use. We did all the "front end" work on these templates and applications so you can use them as they are, or modify them for your own purposes. These templates and application are only available from Digital Solutions and require the appropriate Pocket™ program to run. You will not find them in stores. Please put a check mark in the box next to disk(s) you wish to order.

# MAIL RUN

Setting the record straight about geoWrite Workshop 128,  
64- vs. 128-mode programs and Dark Castle.

## A GOOD SCARE

The animated Pumpkin program in "Scared Silly!" (*RUN*, October 1988) is delightfully humorous and a terrific example of the graphics capabilities of the C-128. Hats off to programmer Joey Latimer!

—GEORGE J. CLARK  
POINTE CLAIRE, QUEBEC, CANADA

## TELL IT LIKE IT IS

When I see a commercial program disk with the legend, C-64/128, I expect the program to run in both 64 and 128 modes. However, such is not the case—it runs on the C-64 and on the C-128 in 64 mode. This is misleading. Software publishers should recognize this and tell it like it is.

—ELMER ROTHFUS  
SUN CITY, AZ

*We agree that it is a misleading practice. You'll note that RUN was one of the early pioneers in clearly distinguishing between programs that run in the 64 vs. the 128 mode.*

—EDITORS

## FAULTY TOWERS

In the Software Gallery of the September 1988 issue of *RUN*, reviewer Tim Walsh stated there was a problem loading Dark Castle in the 1571 disk drive. Of the thousands of copies of the game sold so far, only two were returned with that problem. One was badly scratched; the other disk was fine—the user's 1571 drive heads were out of alignment.

We'll be happy to run a diagnostic test on any disk an owner experiences as faulty, including Tim's, and we'll gladly replace any disk found faulty as a result of manufacturing.

—ANN FELTES  
PUBLIC RELATIONS SPECIALIST  
THREE-SIXTY, INC.  
CAMPBELL, CA

## IS THAT WRITE?

Regarding Marte Brengle's two-part review of geoWrite Workshop 128 (*RUN*, August and September 1988, geoWatch), I have some points and some complaints to make.

Brengle can't understand why Berkeley Softworks' applications all require 1541-mode installment. Would she prefer being restricted to 1571-mode installment? Many 128 owners I know up-graded from the 64 and kept their 1541 drives, so such a scheme would leave them out in the cold.

I'd like to clarify the confusion surrounding 60-dpi printers. No matter what printer driver you use, the first thing you should do is move the right margin to the 6 on the Ruler when printing at 60 dpi. Anything beyond that won't work. Also, when using Paint Overlay to make a multicolumn geoPaint

document, keep all the margins no greater than 6. Otherwise, you'll lose a piece of the right-hand column.

I was shocked to read that the Text Grabber converts the original word processor file and leaves it incomprehensible to its creator. If that were true, would Text Grabber ask for a new filename for geoWrite to create? Take a look at the deskTop after grabbing some text and you'll see what I mean.

Marte also neglected to mention an odd feature of gWW 128: There's a little "P" indicator on the Ruler that you can use to set automatic indents at the beginning of paragraphs. There's a good reason for this: though the manual neglects to mention it, regular tabs don't work in Full Justification mode.

A question: Where can someone without a modem get the double- and quad-strike print drivers that she mentioned?

—AARON PEROMSIK  
WORCESTER, MA

*Marte Brengle states: "First of all, in the matter of 1541/1571 installation, there are many 128 owners who continue to use their 1541s (in fact, I'm still using mine). However, the installation procedure should work regardless of which drive is used.*

*"The Text Grabber information was indeed a mistake. I don't use that feature very often, since I generally stick to one word processor, and I neglected to check on this because I thought I remembered how it worked. Obviously, I shouldn't take my memory for granted!*

*"I talked a bit about the P for paragraph-indent marker in the original text of the article, but didn't go into detail. It's interesting to learn about all these little goodies that have been left out of the manual.*

*"Serious GEOS users should consider getting a modem and a subscription to QuantumLink, whose collection of software for the operating system is second to none. To find the print drivers you need, a good place to start would be Berkeley Softworks or a local users group."*

—EDITORS

## KNOCK ON WOOD

The game Cards-31 ("Knock!" *RUN*, September 1988) can be made more realistic and colorful by incorporating the following changes (changing the colors in the original line 20 makes the background more compatible with the red suits):

```
20 POKE53280,12:POKE53281,15
610 PRINT "{9 CRSR DNs}"TAB(18)"(4)"
1330 SS(1)="{SHFT/A}":SS(2)="{CTRL/3}{SHFT/S}{CTRL/1}"
1335 SS(3)="{CTRL/3}{SHFT/Z}{CTRL/1}":SS(4)="{SHFT/X}"
1372 BZ=(1-1)-10+5
1375 PRINTTAB(BZ)"{1 SPACE}{7 CMDR/@s}"
1380 PRINTTAB(BZ)"{SHFT/N}{7 SPACES}{SHFT/M}"
1390 PRINTTAB(BZ)"{CMDR/G}"CS"{5 SPACES}{CMDR/M}"
1400 PRINTTAB(BZ)"{CMDR/G}{7 SPACES}{CMDR/M}"
1410 PRINTTAB(BZ)"{CMDR/G}{3 SPACES}"SS"{3 SPACES}
    {CMDR/M}"
1420 PRINTTAB(BZ)"{CMDR/G}{7 SPACES}{CMDR/M}"
1430 PRINTTAB(BZ)"{CMDR/G}{5 SPACES}"CS"{CMDR/M}"
```

1440 PRINTTAB(BZ)“{SHFT/M}{7 SPACES}{SHFT/N}”  
1445 PRINTTAB(BZ)“{1 SPACE}{7 CMDR/Ts}”  
1450 PRINT“{10 CRSR UPs}”

—CHARLES W. HAYNES  
BEATRICE, NE

### PRINTER PERFECT

Thank you for author Tim Walsh's article, "Printers on Parade," which appeared in the October 1988 issue of *RUN*.

I know it's impractical to include all the latest printers in one short article, but I believe Mr. Walsh should have included the new Star NX-1000C, made exclusively for use with Commodore computers.

Almost every attractive feature mentioned in your article is incorporated into this printer, which lists for \$299.

—DONALD W. ROSE  
YUCCA VALLEY, CA

*Thanks for the compliment. Stay tuned to RUN for a roundup of Star printers in our Hardware Gallery column.*

—EDITORS

### OOPS!

We appreciated the vote of confidence in our product, the Epyx FastLoad Cartridge ("Rapid Transit Systems," *RUN*, August 1988). However, FastLoad actually retails for \$39.95.

—DEBRA SIMSHAUSER,  
PUBLIC RELATIONS, EPYX, INC.  
REDWOOD CITY, CA

### IN DEFENSE OF C-128 SOFTWARE

This is in response to the three Mail *RUN* letters ("Why So Little C-128 Support?", "My 40/80 Key Stays Down!" and "Come Down From Your Mountain, Commodore!") in the September 1988 issue of *RUN*.

First, for each C-128 sold, a C-64 is also sold. As there are now some eight million C-64s and only two million C-128s, the 64 market is actually ten million units strong (since you can run any 64 program on the 128), and any software company is going to sell to the largest market.

Second, have any of these readers checked their local users groups for C-128 software? And how about Q-Link, whose 1988 Public Domain Software Directory has 37 pages of 128 software, covering applications, CPM, graphics, games, music, telecommunications, programmer's tools, and on and on.

Third, if all else fails, learn to write your own programs. That's the single most important factor about personal computers, that you're not at the mercy of software developers' whims—you can produce your own software.

—L. R. HOLLIS  
RIDGECREST, CA ■

# THE ULTIMATE Word Processor from Digital Solutions

Here it is ...the ultimate in power ...the ultimate in ease of use...the ultimate in speed for your Commodore 64 & 128. All of the on-screen features that made Pocket Writer a 500,000 seller, plus these new exciting additions:

- Multiple columns. Print up to 4 newspaper-style columns.
- Macro capability. Record and invoke.
- Undo. To cancel last command.
- Markers. Mark up to 10 locations in one text.
- Book paging, odd-even and left/right.
- Line and box drawing modes.
- Word, sentence and paragraph count.
- Find/replace in either direction.
- Cursor movement by sentence and paragraph.

## Pocket Writer™ 3

Professional Word Processor  
for the Commodore 128 and 64

Plus all the features you've become accustomed to:

- No complicated format commands embedded in text.
- Reads files generated by Pocket Filer 2 and Pocket Planner 2.
- On-screen text formatting and wordwrap. What you see is what you get!
- Automatic configuration for screen color, format and printer selection.
- Spelling Checker incorporated into both 64 & 128 programs. (Original Pocket Dictionary compatible)

### Special Offer!

If you order your Pocket Writer™ 3 Program from Digital Solutions Inc. before January 31, 1989, you will receive a Free Pocket Writer™ Template Disk (retail value 24.95 U.S. (29.95 Can.))

**Don't wait! Order today!** You can get the Ultimate Word Processor from Digital Solutions. Send in the Order Form or call 416-731-8878 or Fax 416-731-8915 (credit cards orders only) Price is \$69.95 U.S. (\$79.95 Can.) We pay all shipping and handling charges. # NEWS AND NEW PRODUCTS

*Dress to the nines in computer T-shirts; race the fastest cars in the world; or wage battles on earth or in space.*

Compiled by HAROLD R. BJORNSEN

## BAUD-Y MODEM

CAMARILLO, CA—MiniModem-C is a direct-connect Hayes- and 1670-compatible 300/1200-baud modem for Commodore computers. It comes with a complete set of indicator lights that tells you its status at all times. The complete Hayes AT command set is supported and software-selectable. Default settings are switchable, using internal DIP switches. A built-in speaker lets you hear line responses. MiniModem, which can run any Commodore terminal program, is available for \$74.95. Aprotek, 1071-A Avenida Acaso, Camarillo, CA 93010.

Check Reader Service number 400.

## POWER DRESSING

HONOLULU—Computer Lust (PO Box 61734, Honolulu, HI 96839) has released silk-screen T-shirts with humorous computer themes, including Good to the Last Byte, Getting Loaded, Basic Training, RAM-Bo, Miss DOS and Transformer. Prices not available at press time. T-Shirts, which are available in several sizes, can be ordered directly from Computer Lust.

Check Reader Service number 401.

## SPEC-IAL SPECS

CARROLLTON, TX—A Carrollton, Texas, company is developing stereoscopic 3-D glasses to be used with the C-64. Haitex Resources says the X-Specs 3-D glasses, which are cabled to the computer, control what each eye sees independently by closing and opening an optical shutter at 60 frames per second, using a high-speed liquid crystal. The glasses, when available, will not come cheap—the Amiga version costs \$124.95.

## NOT FAST ENOUGH FOR YOU?

CHATSWORTH, CA—Imagine racing a Mercedes 560 SEC at speeds of up to 160 mph. Too slow for you? How about a Porsche 911 Turbo? Still too slow? Maybe a Lamborghini Countach or a Ferrari GTO is more up to par to your driving

Burn rubber in the racing game, *Crazy Cars*, from Titus Software.

tastes. Crazy Cars lets players test their driving skills in some of the world's fastest cars on race courses in areas like Arizona, Florida and Malibu. As players successfully complete all the race courses, they'll graduate to the next level of driving skill, with 72 levels in all. Priced at \$39.95 for the C-64, it's available from Titus Software, 20432 Corisco St., Chatsworth, CA 91311.

Check Reader Service number 407.

## BACK TO THE FUTURE

LONDONDERRY, NH—In 2400 AD, the Robot Patrol has been given full authority over the city of Metropolis on the planet XK-129. Metropolis was once a flourishing city where intellectual, scientific and cultural growth was in abundance. It is now in a state of siege where research is prohibited and martial law prevails. As a new arrival on the planet, you are chosen by the underground resistance to lead the revolution and restore freedom to Metropolis. The game features futuristic weaponry and a holoprojector to create a duplicate image of yourself in order to divert robot attacks. For the C-64, it's available for \$39.95. Origin Systems, 136 Harvey Rd., Bldg. B, Londonderry, NH 03053.

Check Reader Service number 404.

## 3½-INCH DISK HOLDERS

CHELTENHAM, PA—DisKeeper, a storage method for 3½-inch disks, uses a standard three-ring binder. The edged-

tabbed, plastic page holds four disks locked in place while its design lets you remove a disk with one hand. The pages are light and durable, leaving labels and the write-protect switch accessible. DisKeeper is available in two packages: five pages, self-stick index labels and a black, padded, three-ring binder for \$19.95; or three DisKeeper pages and self-stick index labels for \$6.95; add \$3 s/h. Cobar Inc., 301 Highland Rd., Cheltenham, PA 19012.

Check Reader Service number 406.

## BACK TO SCHOOL

SPRINGFIELD, MO—ACS Software (2135 E. Sunshine, Suite 106, Springfield, MO 65804) is offering Grade Manager, a grading management software package for teachers. The C-64 and C-128 versions provide automatic conversion of grades to 100-point scale, allow searching for students by name, I.D. number, assignment date and name, and auto-advancing through the roster starting at a desired roster number. It also has a generic search capability to allow searches based on partial names. A variety of reports can be printed out, including class and attendance rosters, gradebook sheets, grade lists with or without names, mid-term and final average sheets, and student grades sheets listing each student's grades, category averages and mid-term and final averages. It's available for \$69.95.

Check Reader Service number 402.

## HOLM, SWEET HOLM

GRANADA HILLS, CA—MicroIllusions (17408 Chatsworth St., Granada Hills, CA 91344) has released Faery Tale Adventure for the C-64. Fear and death have come to the once-peaceful land of Holm. Ogres plague the roads and wraiths walk the night. The Necromancer has stolen the Talisman that once kept the world safe. Yet not all hope is lost. With your help, brothers Philip, Julian and Kevin may venture forth into woods and mountains, across oceans and bogs in search of the Necromancer

and a way to defeat him. The game features over 17,000 screens to make up a 3-D world full of castles, cities and dungeons, and talking turtles and magic swans can help you. \$49.95.

Check Reader Service number 405.

### ITS MASTER'S VOICE

EUGENE, OR—In *Escape from Planet X*, a C-64 text adventure, a player uses voice commands to control his moves. You begin the game strapped to a table in the Human Research Lab of the noseless and mad Professor Schism. If you manage to escape, you may then explore planet X, confronting exotic ocelots in alien jungles, digging for treasure on far-off islands, co-existing with aliens or blasting them to pieces. The game is included with the Voice Master Jr. (\$49.95) or the Covox Voice Master (\$89.95). Or, players may obtain the game alone for \$19.95 and use the keyboard in lieu of voice commands. Covox, Inc., 675-D Conger St., Eugene, OR 97402.

Check Reader Service number 409.

### WHAT A GAS!

REDWOOD CITY, CA—Space Station Oblivion, a science fiction thriller from Epyx (PO Box 8020, Redwood City, CA 94063) is set many millennia hence, when Earth has been destroyed and generations of innerspace immigrants have found a new home on the planet Evath. There, the felonious Ketars live a blue-collar life, mining for precious metals. But their mining has left pockets of gas that threaten to annihilate them and throw planet Evath out of orbit. Your mission is to place a drill in each of 18 different sectors to release the vapors and save Evath. Available for the C-64 for \$39.95.

Check Reader Service number 408.

### MUSIC, MAESTRO

ST. PAUL, IN—The SID Symphony Stereo Cartridge from Dr. Evil Laboratories (PO Box 190, St. Paul, IN 47272) provides you with three additional voices over the C-64's three voices, along with true stereo sound capability. The cartridge is powered by a replaceable 9-volt alkaline battery. The only extra hardware required are two RCA male-to-male cables to connect the computer outputs to a stereo system. \$34.95. Also available, for those who don't have access to SID music libraries, is the Stereo SID Music Collection Volume 1 disk. It

includes public domain music for use with the cartridge. \$1.

Check Reader Service number 410.

### JET BOYS

SAN JOSE—In *Jet Boys*, a one- or two-player arcade-style action game for the C-64, you take the role of a jet pack-equipped commando whose mission is to enter and deactivate an enemy-con-

trolled reactor room, all the while trying to survive waves of deadly galactic terrorist attacks. The game features four increasingly difficult levels of play, and at the end of each level you must destroy a megabeast that blocks the way before proceeding to the next level. *Jet Boys* is available from Accolade (550 S. Winchester Blvd., Suite 200, San Jose, CA 95128) for \$14.95.

Check Reader Service number 411. ■

# SOFTWARE GALLERY

It's time to ring in the New Year with a look at word processing, submarine warfare, mystery and comics. Plus, start 1989 off right with RUN's new capsule-review section!

Compiled by BETH S. JALA

## RED STORM RISING ..... A+

*This WW III Novel-to-Screen Transition Really Makes the Grade*

Give MicroProse credit. While some companies can't seem to resist the urge to branch out into new areas, MicroProse is a company that knows what it does best and, with few exceptions (Pirates!, Airborne Ranger), sticks to it. Quite simply, what MicroProse does best is creating sophisticated simulations that put the user in charge of his/her own piece of multi-million dollar military hardware.

In Red Storm Rising, you get to command any of five classes of modern nuclear attack submarines. Which classes you'll have to choose from depends on the time period (ranging from 1984 to 1996) you select for your mission. Sub classes and weapons systems available for scenarios set in the future are based on actual technologies that are either under development or soon to be deployed.

After choosing the level of challenge, you're ready to tackle either a training mission or the campaign. This is a multiple-mission game in which you command a nuclear attack submarine in the Norwegian Sea for the duration of World War III.

While each of the battle simulations begins with your sub already within sonar contact of the enemy forces, the campaign starts at your home port of Holy Loch, Scotland. As you sail north-eastward to engage the Soviet naval forces, you must be careful to avoid discovery by Russian Tu-142 "Bears" and military reconnaissance satellites.

Fully monitoring and controlling your sub's various systems requires a thorough understanding of the boat's capabilities, and the use of nearly every key on the keyboard! Fortunately, as with most MicroProse simulations, the program is superbly documented and comes with a keyboard template that shows, both graphically and in

In Red Storm Rising, just as in real submarine warfare, working with sonar analysis increases your chances for a successful mission.

text, the functions of most active keys. I must compliment the game's designers on a logical layout that groups related functions together.

Red Storm Rising is based on Tom Clancy's novel of the same name, which describes events leading up to, and the dramatic unfolding of, World War III.

## REPORT CARD

### A Superb!

An exceptional program that outshines all others.

### B Good.

One of the better programs available in its category. A worthy addition to your software library.

### C Average.

Lives up to its billing. No major hassles or disappointments here.

### D Poor.

This program has some problems. There are better on the market.

### E Failure.

Many problems; should be deep-sixed!

While both the simulation and the novel involve fictional scenarios, in both cases the weapons, strategy and tactics used are based firmly in reality. For players who've not read the book, an animated introduction showing the major events leading to the outbreak of the war sets the stage for the game.

What makes Red Storm Rising such a successful simulation, however, isn't the fact that it's based on a best-selling book. It's the care that was taken to ensure that things work in the game, just as they would in real submarine warfare. The realistic wargaming environment, combined with the wide variety of scenarios and play options, make Red Storm Rising the best military simulation to be released for the C-64 since Gunship. And while Red Storm Rising may not be the only submarine simulation to be based on a Clancy best-seller, there's little doubt that it's number one. (MicroProse, 180 Lakefront Drive, Hunt Valley, MD 21030. C-64/\$39.95.)

SOUTH BOSTON, MA

## INFOCOMICS ..... A

*Gadzooks! I Can't Wait to See What Happens Next!*

Infocomics are not games. They are a line of computerized comic books that have a beginning, middle and ending that the reader/user cannot alter. The computer is supposed to be interactive, so why then, you ask, should I buy this product? Well, you may not be able to alter the outcome, but you can determine the path and pacing of an Infocomic.

Somewhat like a "living" play, the reader follows a particular individual, experiencing things from that person's standpoint. At certain times in the narrative, the user has the option of jumping to another character's point of view. This usually happens when a new character is introduced, or an on-screen character exits. A musical note ▶

# YOUR BATTLESHIP JUST BIT THE BIG ONE.

Now, you're mad. Really flamed. So assess your losses, aim your guns and turn your enemy into fish food.

**ONE OF THE MOST POPULAR GAMES OF ALL TIME COMES TO LIFE ON THE COMPUTER.**

As commander of a powerful naval fleet, you'll see destroyers and carriers sinking in a cloud of smoke. Watch planes strafing by so low, you'll practically feel the pilots breathing.

Commodore 64/128, Amiga, Atari ST, IBM PC and compatibles. Battleship is a trademark of Milton Bradley used under license. © Milton Bradley. All rights reserved. Screens from Atari ST.

Commodore.ca  
May Not Be Used Without Permission

See shrapnel flying through the air like it's the 4th of July, without a picnic.

If you're still floating when it's all over, you'll be honored in a glorious, well-deserved victory celebration.

**EPYX**  
**BATTLESHIP**  
NOW FOR YOUR COMPUTER™

Battleship. So real, you'll taste the salt water. Sink your opponent faster and easier using an EPYX high performance joystick.

Circle 12 on Reader Service card.

sounds and a visual cue appears, letting the reader either branch off to the new path or continue on the existing one. No matter what path is chosen, however, you eventually reach the same ending. If this sounds a little confusing, remember this sort of storytelling already exists, via flashbacks, in both written and visual fiction.

Infocomics successfully combine written words and visual images in much the same manner as printed comics. The actual on-screen image looks like a page of a book, with the pictures appearing above a caption. Whenever people speak, their words appear in a panel. The art comes alive through limited animation, zooms and pans as both the visual perspective and the characters move and change.

With virtually no written instructions, Infocomics are simply booted up and read on-screen. There is a short explanation of what an Infocomic is and how it works. You can then move right into the story and methodically advance to a conclusion.

However, so as not to miss out on some important details and relevant interrelationships, jump to another character whenever you're given the option. In addition to being able to move between characters, you can also fast-forward or rewind the story to watch something again or choose a different path.

One of the Infocomics I looked at, *Gamma Force in Pit of a Thousand Screams*, follows the interplanetary adventures of Ratchet, Eskobar and Elana as they oppose the forces of the evil Nast, who has overthrown King Franz and sentenced him to the pit of a thousand screams. Ratchet, Eskobar and Elana are chosen by fate to receive special powers and become the Gamma Force. Their first mission is to rescue King Franz, overthrow Nast and reunite the King with his long-lost daughter, Sambina. Without revealing the outcome, let me just say that, while good triumphs over evil (naturally), the way has been laid for sequels.

In *Zorkquest: Assault on Egreth Castle*, Gurthark the Stout, along with his small band of travelers, chance upon the dark Egreth Castle that's inhabited by the evil magician Radnor. When Radnor kidnaps Guthark's charge, a battle breaks out as the good magician, Frobnit, and his apprentice, Dirin, lock horns with Radnor. Here again, there's no real doubt about the outcome, but rest assured that a part two will probably follow.

Undoubtedly, Infocom has hit upon a

An evil magician lurks beyond the walls of Infocomic's *Zorkquest: Assault on Egreth Castle*.

new application. In their own way, they've redefined the parameters of what interactive fiction is and can do. Future products in this line can only hope to improve the genre and perhaps even lead to new and even more innovative applications. Still, possibly the most exciting aspect of this software is its low \$12 price tag. With that figure, who will be able to resist trying this truly innovative piece of entertainment software? (Infocom, Inc., 125 Cambridgepark Drive, Cambridge, MA 02140. C-64/\$12.)

—ROBERT J. SODARO  
FAIRFIELD, CT

### THE WRITE STUFF, C-128 VERSION ..... A+

*A Computing Phenomenon:*

*Quality Plus Low Price!*

Imagine using a word processor that indents each paragraph and capitalizes the first letter of new sentences... automatically! How about one that converts from Qwerty to Dvorak keyboard layout, offers optional Roman numeral page numbers, or pops the result of a mathematical calculation into your text, all at the touch of a key? Wouldn't it be nice if you could teach your word processor to spontaneously type the names, words, phrases and page layout commands you use all the time?

All of these conveniences and a host of other powerful features have been incorporated into the C-128 version of *The Write Stuff*, BB Writer. This word processing package has been drawing a lot of well-deserved attention since it was first released as "userware" for the C-64. (Editor's note: see the review of the C-64 version of *The*

*Write Stuff* in *RUN*, June 1988.) An exceptionally versatile word processor, it's the most exciting piece of new software for the 128 that I've seen in a long time.

A complete list of BB Writer 128's capabilities would take pages. Whether it's the ability to support Commodore's RAM expansion units and the 1581 drive's sub-directory system, the double-column output, or mail merge to churn out form letters, this package has it all.

BB Writer 128 has all the right moves. Most word processors let you move the cursor in increments that relate to the computer screen—a space, a line or a screen at a time. BB Writer 128's function keys speed editing by moving the cursor logically—it takes you from one word, sentence or paragraph to the beginning of the next.

If your word processing chores involve more than an occasional letter, you'll love BB Writer 128's macrotyping feature. First you create a list of words or sentences that you frequently type and assign a one- or two-character abbreviation to each. Then, type the appropriate letter or number, hit the space bar and presto! Two keystrokes can replace 250 keystrokes, causing your name and address to appear, centered at the top of the page. You can also put your signature block at the end of a letter or pop in a word you always misspell with this remarkable feature.

Another way to make this feature work for you is to define frequently used words as macros. Co becomes Computer and yr becomes you're as soon as you hit the space bar. In addition to the typing macros, 60 definable keyboard macros let you create your own one-key shortcuts for entering formatting instructions and other operating commands.

Once you get acquainted with its many functions, you'll discover that BB Writer 128 is capable of almost any task. You can create outlines with up to seven levels of detail, print and preview documents up to 250 columns wide, work in ASCII or PETASCII, read and write sequential, program or user files, and translate files from many other popular word processors. You'll even find that BB Writer can integrate data from Superbase, the powerhouse database, into form letters.

If you aren't already convinced that BB Writer merits serious consideration, how about this? R. Eric Lee, *The Write Stuff*'s author, has just completed a version which, when installed in a programmable plug-in cartridge, is ready to go ▶

# JUDGE A GAME BY ITS COVER.

Licensed by The Major League Baseball Players Association.

The action-packed statistically enhanced computer game with all 26 major league teams, and all the stars like Dave Winfield, Ozzie Smith, Jose Canseco, Roger Clemens, George Brett, Alan Trammell and Fernando Valenzuela.

## SOFTWARE GALLERY

as soon as you turn your computer on.

The Quick Brown Box (QBB) permanent memory unit makes using this word processor so convenient that you'll find yourself switching on your 128 just to jot down a few notes. I only had the QBB version of BB Writer on my computer for a few days when it mysteriously disappeared, only to turn up in the user port of the machine my 10-year-old son usually uses for games. Fortunately, Busy Bee sells the QBB at a significant discount.

Speaking of discounts, while the mail order price for BB Writer 128 is certainly reasonable, Busy Bee also makes this software available through user groups for as little as \$12. (Add \$3 for the excellent 60-page manual.)

BB Writer 128 can't make your coffee (although it can time your eggs with its built-in alarm clock) or check your work for spelling errors. However, it certainly makes writing easier. Menu driven, with a pair of pop-up command reminder screens and several dozen easily ac-

cessed help files, BB Writer is a cinch to use. The thousands of C-128 owners who spend their workdays at the keyboard of a PC or mainframe computer will probably be wondering why their business software lacks some of BB Writer's capabilities.

BB Writer 128 reminds me of software that costs ten times as much. At \$29.95, this feature-laden package is a great buy. At \$12, it's a steal. You can't afford not to try it. (*Busy Bee Software, PO Box 2959, Lompoc, CA 93438. C-128/\$29.95.*)

—JOHN PREMACK  
LEXINGTON, MA

### WHERE IN EUROPE IS CARMEN SANDIEGO? ... A

*An On-Screen Version of  
"To Catch a Thief"*

Where in Europe is Carmen Sandiego? is a nearly perfect computer

learning tool. Map reading, problem solving, research skills and geographic facts are taught within the confines of an enjoyable, fast-moving game. The sound effects are little more than adequate, but the graphics are colorful, distinctive and animated. Also, nearly 1000 clues to sift through, 16 possible villains to encounter and 34 countries to visit make each case different.

Somewhere in Europe, Ms. Sandiego or one of her criminal cronies is engaged in the theft of Ireland's Blarney Stone, Mozart's metronome, Good King Wenceslas's stocking cap or some other precious item from a European city. As an operative for the Acme Detective Agency, your assignment is to discover the identity of the culprit, to obtain a warrant for his or her arrest, and to track down the felon before time runs out.

Initially, your chief of detectives lets you know what was stolen, where the crime occurred, the sex of the criminal and your deadline. Intelligence per-

## SOFTWARE GALLERY

taining to the suspect's hair and eye color and favorite types of books and movies appears on the screen periodically throughout the game. These should be entered into your electronic notebook. After three or more clues are obtained, feeding these into the crime lab computer might reward you with the name of the evil doer.

Unless you're better in geography than most Americans, following the suspect from country to country is not going to be an easy task. But, you can always refer to the *Rand McNally Concise Atlas of Europe*, which is included with the game. Some players might rely on the atlas more often, as on-screen hints use up precious time, while others might find the program more challenging by putting the book aside.

A concise, well-written user's manual provides essential instructions, as well as numerous hints on how to successfully complete the game.

The play system employs a series of menus easily accessed by either joystick

**Where in Europe is Carmen Sandiego?  
Could it be Denmark?**

or keyboard. While a seven-year-old should have little difficulty operating the program, it's best to have an adult on hand to monitor the youngster's learning and to help with the atlas and some of the trickier clues.

For anyone with school-age children, or for someone who thinks that Paris is

around the corner from Poland, Where in Europe is Carmen Sandiego? offers solid value as an educational and entertaining program. (Broderbund Software, Inc., 17 Paul Drive, San Rafael, CA 94903-2101. C-64/\$39.95.)

—LEN POGGIALI  
SYRACUSE, NY

## MONOPOLY ..... B

"Go Directly to Jail..."

Do Not Collect \$200"

"The object of the game is to become the wealthiest player through buying, renting and selling property."

While that statement might sound like a philosophy for everyday life in a competitive marketplace, most people will recognize it as each player's objective in Monopoly.

Monopoly isn't new to the C-64. Considering the world's fascination ▶

## IT'S WAR.

And the fate of the free world rests in your capable hands. Take hold of the controls and your wits. Because 20,000 feet below you thunders the most feared battleship in all of Germany's fleet: The Bismarck.

Fasten your seatbelt. You're in for the dogfight of your life.

Enemy fighters zoom above you, anxious to turn you into fish food. And all around you lurk treacherous U-Boats, E-Boats and mine fields.

Steady, mate. Remember all those practice flights?

With these details, it's no wonder we fly in the face of F-15 Strike Eagle.

Now it's for real. You've got position reports to monitor incoming intelligence. A fully detailed instrument panel. And you can fire from one of two gunnery positions. All of which'll come in mighty handy when you've got 42,000 tons of riveted killing machine in your sights.

WELL CAPTAIN, IT LOOKS LIKE F-15 STRIKE EAGLE™ ISN'T SO STRIKING, AFTER ALL.

	DIVE BOMBER	F-15 STRIKE EAGLE
Easy to use, fully detailed instrument panel	Of course	Nope
Look of enemy planes & ships	True to life	Stick figure
Pace of enemy attacks	Constant	Lagging
Takeoffs	Breathtaking	Nonexistent
Landings	Brace yourself	Limited

Circle 85 on Reader Service card.

with this popular board game, it isn't surprising that a public domain version appeared almost as soon as home computers became popular. Now Leisure Genius has released a version licensed through Parker Brothers, the game's owner.

The computer Monopoly follows all the rules of the board game with the exception that from one to eight players can play, and that you can save a game and reload it to continue play at a later time.

You're currently positioned on Vermont Ave. in the on-screen version of Monopoly.

Knowing what the C-64 is capable of, I wasn't especially impressed by the graphics. The main board, shown in the center of the screen, is seen from above at about a 45-degree angle. None of the property names can be read, but the significant landmarks like Railroads, Jail, Free Parking, and Community Chest and Chance squares are easily recognizable.

Four cards, indicating the neighborhood in which the current player is traveling, are on the bottom right of the screen. On the bottom left is an enlarged representation of the square the player occupies, and it shows the pertinent facts about the property, including ownership, mortgage value, building prices and rent.

There's an option bar at the top of the screen that lets the player choose things like Quit, Mortgage, Owners (a list of all properties and their owners), Houses (to buy or sell), Trade and Rent. One interesting option, called Short Game, sets a time limit for the game.

My only real complaint about Monopoly is the absolutely agonizing amount of time it takes to load—almost three minutes. However, game play is smooth and fast moving. Monopoly is an enjoyable piece of software and one of those rare games that can be enjoyed by the whole family. (*Leisure Genius*; distributed

by *Electronic Arts*, 1820 Gateway Drive, San Mateo, CA 94404. C-64/\$29.95.)

## NAPOLEON IN RUSSIA— BORODINO 1812 ..... C-

*You are Napoleon—  
You Must Defeat  
The Russian Army*

Borodino is a military strategy game that recreates Napoleon's attempt to defeat the Russian army in September of 1812. You are in command of Napoleon's Grande Armée during one of seven variations on the three days at Borodino. Your ultimate goal is to completely destroy the Russian forces. Infantry, cavalry and artillery units with varying attributes are all at your disposal.

Once you've chosen the scenario, difficulty levels, speed, morale and fatigue effects, the screen shows a portion of the battlefield. You scroll around and issue orders via joystick.

In most strategy simulation games, commands are given, and after a series of move, combat, retreat and melee phases are carried out by the computer, everything stops. Borodino, however, is designed so that the action doesn't stop while you select units and give orders, which accords you a better sense of the realities of battle. You don't have time to constantly give orders; instead you tend to concentrate on one area of the battle and occasionally scroll to other sections.

Unfortunately, this constant-action game system is also the major drawback to Borodino. The manual warns you about falling into an "arcade game" mentality while playing. But even if you overcome the urge to fight the battle with fast joysticking, most of the subtleties are drowned out. While there are the usual dozen or so factors—terrain and fatigue, for example—that modify combat and movement, you almost never take the time to calculate them.

Other problems in the game include the lack of options in the actual manipulation of your forces. You move or you shoot and that's it: No changing modes, no evaluating the costs in movement points or calculating the arrival times of reinforcements.

There are so many units on the map at the same time that traffic tends to

get jammed. Units that have been routed wander around of their own accord and it's hard to clear a path for them. It's also difficult to rotate fresh troops to replace weary ones.

Another flaw in the game is that artillery is effective only to a certain point—beyond that, you can shell a unit ten or 20 times with no more loss of men.

The scenario of Napoleon's battle at Borodino is an intriguing one that war gamers should enjoy. Napoleon made

It's September 5, 1812; do you know where your units are in Borodino?

some tactical and strategic mistakes while still winning. Trying to achieve the kind of victory that he needed could've been a fascinating challenge. Unfortunately, Napoleon in Russia—Borodino 1812 doesn't provide a playable simulation that lets you explore the nuances of battle. It isn't a strategic simulation—it's just a game and only a fair one at that. (*Datasoft*; distributed by *Electronic Arts*, 1820 Gateway Drive, San Mateo, CA 94404. C-64/\$24.95.)

## STOCKER ..... D+

*Racing Runs  
Rampant*

I don't understand what Stocker's appeal is or why anyone would think it would make a good translation from the arcade to the home computer.

It bothers me to say that. Contrary to what some people think, good software reviewers don't enjoy ripping a program. Personally, I try to find something good to say about every program. But despite my best efforts, it was very difficult finding things to praise about Stocker.

The game's premise is interesting ▶

Presenting the **Red Storm Rising™** Ultimate Challenge

# Win a Trip for Two to Scotland & England!

Your skill in *Red Storm Rising* — the gripping World War III nuclear submarine simulation by MicroProse Software for the Commodore 64 — can win you and a companion an unforgettable visit to Great Britain!

MicroProse Software has convened a Board of Naval Examiners to find the *Admiral of the Fleet* — the very best *Red Storm Rising* nuclear submarine commander in the world.

In September, 1989, the *Red Storm Rising Admiral of the Fleet* and a companion will embark on a 7-day expense-paid trip to Dunoon, Scotland, home of the US submarine base at Holy Loch from which *Red Storm Rising* players operate. Then they will visit London for the international Personal Computer Show. The *Admiral of the Fleet* and nine Runners-Up will receive other terrific prizes as well.

To enter, obtain your *Official Log Form* and complete *Rules* by sending a letter or postcard to the *Red Storm Rising* Board of Naval Examiners, 180 Lakefront Drive, Hunt Valley MD 21030. While you're waiting for the *Official Log Form*, start playing the full *Red Storm Rising* campaign game and learn to achieve maximum Efficiency Rating (ER). You can protect the ER of your campaign in progress by choosing the "Computer Log" option at the "Contact Screen" (see below) preceding each battle, and then saving your game. If your performance in the ensuing contact does not meet your standards, you can re-play it (before going on to another battle) without losing your previous score.

On the *Official Log Form* you will fill in the details of each of your most successful battles in your best campaign. The deadline for the Board of Naval Examiners to **receive** your entry — your completed *Official Log Form* and final game save disk — is March 31, 1989.

The Board of Naval Examiners is making every effort to ensure that the *Red Storm Rising Ultimate Challenge* is a fair test. As you proceed into the higher levels of competition, the Board of Naval Examiners will advise you of specific examination procedures. If you intend to win you must be available for certain arrangements during the weeks of April 10 and 17, 1989, and on April 30 and May 1, 1989.

The *Rules*, included with your *Official Log Form*, explain the details.

Dunoon, Scotland with a 14th US Navy Submarine Squadron ship and floating dock in the Holy Loch.

Commodore 64 is a registered trademark of Commodore Electronics Limited.

Red Storm Rising by Tom Clancy © 1986 by Jack Ryan Enterprises Ltd. and Larry Bond.

enough: you're in a coast-to-coast race against time, as measured by fuel consumption. You start in Florida with a full tank of gas that lasts 90 seconds. There are four gas stations on your trip to California, and pulling into any one of them refills your tank about 25 percent.

The farther you go without running out of gas, the more points you get. Hitting other vehicles slows you down and subtracts points from your score. Hitting a cop car gets you a ticket; three tickets ends the game.

The graphics are okay, but there's not much detail to them. In fact, about the only on-screen objects are the road, the tiny vehicles, a sprinkling of trees, a few lakes and the gas stations.

Game play is unexciting, despite the frenetic pace required to succeed. It's a bit of a challenge to avoid colliding with the other vehicles that sometimes close the road.

But that challenge is greatly lessened by the fact that, contrary to what you might expect in a road-racing game, *Stocker* lets you drive your car anywhere on the screen. You can stray from the road and drive over lawns, shrubs and lakes; you can even drive right through houses! The only disadvantage to doing so is that it slows down your car.

I might be more willing to accept this off-road capability if *Stocker* required you to make some tough strategic decisions, but that's not the case. Once you have found the quickest way through a screen, all the decision-making is over.

Ironically, *Stocker* comes with an instruction manual that's as complete as any on the market. I commend Capcom for including a scene-setting prologue, thorough instructions and a place to write memos and record top scores. There's even a phone number where "game counselors" can be reached, although it's hard to imagine that anyone would really need much counseling to figure out this game.

In its defense, *Stocker's* simplicity might account for its popularity as an arcade game. The straightforward game play and lack of complexity are arcade-world characteristics, where game plays are limited to the number of quarters in your pocket.

But at home, where only boredom limits the number of times a game can be played, *Stocker* reaches that limit fairly quickly. So, unless you're someone who couldn't get enough of *Stocker* in the arcades, I'd recommend you save your software quarters for something

else. (*Capcom, USA, Inc., 1283C Old Mountain View/Alviso Rd., Sunnyvale, CA 94089. C-64/\$29.95.*)

—SCOTT WASSER  
WILKES-BARRE, PA

*Editor's Note: To give our readers more coverage of the many C-64/128 software products available, RUN will broaden the scope of Software Gallery by presenting more reviews in capsule form.*

## THE FRIENDLY COMPUTER ..... A -

The Friendly Computer is an entertaining way of getting children, ages five through eight, to know their computer. It's the type of disk I wish had been packaged with my Commodore.

The software is also appropriate for helping children to develop spelling skills and a sense of timing and distance on the screen.

The Friendly Computer contains five games, including an introduction to the keyboard, computer parts and graphics capabilities. All have different difficulty levels and various options that the parent/teacher can pre-set.

The sound effects are amusing, but there aren't enough of them; in fact, their absence is why I graded this program a minus. Otherwise, The Friendly Computer achieves what it set out to do. (*MECC, 3490 Lexington Ave. N., St. Paul, MN 55112. C-64/\$19.95.*)

—EDITH CHASEN

## RUSH 'N ATTACK/ YIE AR KUNG-FU ..... B

Yie Ar Kung-Fu is the lesser of these two programs. However, this series of martial arts battles is well done, with attractive graphics and fluid animation.

Rush 'N Attack is definitely the star attraction. There is a real problem, though, with its confusing documentation. Purchasers should be aware of that and also of Rush 'N Attack's high difficulty level. Furthermore, the absence of a pause button may frustrate some players.

Yet, veteran gamers will find much to like in the program. Graphics are colorful and crisp and sound effects nicely complement the action. The necessity of finding ways out of predicaments even provides some mental challenge.

Although not for everyone, many players will want to add this multi-game

disk to their software libraries. (*Konami, Inc., 815 Mittel Drive, Wood Dale, IL 60191. C-64/\$29.95.*)

—WALT LATOCHA

## SONS OF LIBERTY ..... B

Sons of Liberty features three scenarios based on famous battles of the American Revolution: Bunker Hill, Monmouth and Saratoga. You can play against another person or the computer and control either the American or British forces.

Although Sons of Liberty offers gamers many user-adjustable parameters, you'll find that, like most SSI simulations, this one is built on historical detail and accuracy.

Unless you've had a lot of wargaming experience, Sons of Liberty isn't the type of game that you can simply load and play successfully without first giving the well-organized rule books a careful perusal. (*Strategic Simulations, Inc.; distributed by Electronic Arts, 1820 Gateway Drive, San Mateo, CA 94404. C-64/\$34.95.*)

—BOB GUERRA

## DEEP SPACE ..... C

I was disappointed with Deep Space. While it incorporates many features that are interesting and even noteworthy, and some of the graphics are nicely done, it is a game that falters.

Deep Space's flight fighter feels clumsy and unwieldy; I found flying in the fighter rather unsensational and unconvincing. Although the first person, "you are there" scheme has worked for a few space epics, I found the game's flight mechanics and subsequent graphic depictions to be below the C-64's capabilities. While there are many battles to endure and obstacles to overcome in Deep Space, some gamers might not feel like staying with it long enough to find out what they are. (*Sir-Tech Software, Inc., PO Box 245, Ogdensburg, NY 13669. C-64/\$39.95.*)

—JOHN RYAN

## THE BARD'S TALE III: THIEF OF FATE ..... A -

If you're a veteran of the first two Bard's Tales, you'll feel right at home with Thief of Fate. In III, however, ►

IN A HUNDRED YEARS, HACKING WILL GET YOU KILLED.

# NEUROMANCER™

A CYBERPUNK ROLE-PLAYING ADVENTURE

SOUND TRACK  
BY  
DEVO

Nowadays, hacking can get you into trouble. A hundred years from now, it can get you killed.

Actually, death isn't bad. It's better than being a "Wilson". Of course, any hacker in his right mind would rather be a Wilson than lose all his neurons.

So what have you got going for you? About 30 megs on line, several viruses, and a wise-cracking ROM construct tagging along. You're just a cowboy trying to stay a step ahead of the AI's in a world where paranoia's not an illusion, everyone is trying to flatline you.

It's party time in Cyberspace.

- Drawn from the pages of the smash cyberpunk novel "Neuromancer" by William Gibson
- Skill-based role-playing game by the designers of "The Bard's Tale™" and "Wasteland™"
- Original Sound Track by DEVO
- Soon to be a major motion picture from Cabana Boy Productions
- Multiple paths to a successful conclusion

Now available for the Commodore 64/128, Apple IIc, IIe/128K. Coming soon for the Amiga and IBM/Tandy.

If you can't find NEUROMANCER at a local dealer you can order direct at 1-800-227-6900.

## SOFTWARE GALLERY

exploring the game's seven dimensions will lead you to the items you'll need to prepare your adventurers to conquer the game's 84 dungeon levels.

Bard's Tale III features even better graphic animation of its various monsters, the option to save the game to disk and faster operation than its predecessors. Although the game's built-in back-up routines seem to take forever and require countless disk swaps, the entire game is not copy-protected. (Electronic Arts, 1820 Gateway Drive, San Mateo, CA 94404. C-64/\$39.95.)

—BOB GUERRA

### QUESTRON II ..... B+

The setting for Questron II is Lander, an outdoor world made up of several different types of terrain. Creature names like Slasher Boar, Stink Worm and Carrion Creeper are indicative of the kind of welcome you'll receive

when you embark on your intrepid journey through their territories.

Unlike many role-playing games that overwhelm new players, Questron II only has four basic spells in its magic system.

This isn't the most complex role-playing game available, and some die-hard RPG fans may miss some of the more exotic spells like those available in the Ultima and Bard's Tale series. However, Questron II's menu-driven command structure and manageable magic make it an excellent choice for adventurers on their first or second quest. (Strategic Simulations, Inc.; distributed by Electronic Arts, 1820 Gateway Drive, San Mateo, CA 94404. C-64/\$39.95.)

—BOB GUERRA

### BATTLE DROIDZ ..... B-

Imagine the curves, dips and precipices of a Marble Madness landscape

and sprinkle in a few acid lakes. Populate it with nasty droid killers, set up some cyborite-spewing Generator Stations, and you've got a fair picture of the typical Battle Droidz warzone. The challenge here is to traverse a Chinese-checker grid of 37 war zones.

Beginning with the pick-your-own-battlefield idea, Battle Droidz offers numerous strategy options and cleverly contrived, smooth-scrolling, multi-screen gamescapes, along with good detail and lively sound.

Joystick response qualifies as barely adequate. With swarming cyborites and the diagonally oriented landscape (forward is toward the upper-right corner), the "realistically" slippery "remote droid guidance controls" add nothing. Fortunately, the fun still shines through, with lots of addictive, high-action entertainment, even for beginners. (Datasoft; distributed by Electronic Arts, 1820 Gateway Drive, San Mateo, CA 94404. C-64/\$24.95.)

—JEFF HURLBURT

# PURE-STAT FOOTBALL

Screens from Commodore 64™/128™ version of game.

The authors of **Pure-Stat Baseball** and **Pure-Stat College Basketball** introduce their most precise simulation to date, **PURE-STAT FOOTBALL!** This third generation football game has a wide array of innovative features that include: Computer Coaching using artificial intelligence to select offensive/defensive plays, Vertical and Horizontal Scrolling of on-field action, a built-in Stat Compiler, and much more. **PURE-STAT FOOTBALL** will challenge even the most avid fan!

- For zero, one, or two players
- Statistically based program where Pro-Football players and teams perform as they did in real life
- Built-in Stat Compiler that includes League Standings
- Full screen graphics with 22 animated players (No X's and O's)
- Eight types of runs, 12 types of passes
  - Draw Plays, Reverses, Screen Passes
  - Blitz Linebackers, Double Team Receivers
  - Zone Defense, Prevent Defense
  - Use Four Receivers, Insert a Fifth Defensive Back
- Optional Team and Create Team Disks Available

Suggested retail price \$39.95

See your local dealer, or contact:

# S Software Simulations

## FLIGHT SIMULATOR

\$49.95

Nearly 1.5 million copies of this classic, premium flight simulation program have been sold to date, and there's still nothing even close to it. Compatible with SubLOGIC Scenery Disks.

## STEALTH MISSION

\$49.95

Winner of the 1988 CES "Best Strategy Game" Software Showcase Award. This advanced-technology strategic simulation is a stunning success, with sales challenging those of Flight Simulator. With nothing comparable on the market (despite similar titles), Stealth Mission's programming polish and strategic gaming excellence set new industry standards. Scenery Disk compatible.

## JET

\$39.95

This award-winning jet fighter simulator defines the state of the art in action/combat simulation. Exciting and beautiful carrier-based sea missions complement multiple land-based combat scenarios. Jet's quick-reading documentation and easy flight controls provide unequalled action and fun. Scenery Disk compatible.

Special "Discover the World of SubLOGIC" promotional packaging:

- \* Jet for the Commodore 64/128 now includes a FREE beautiful Japan Scenery Disk, a \$24.95 extra value!
- \* Jet is also available without Japan Scenery Disk for the special low "discover SubLOGIC" price of \$29.95 through selected discount channels.

## SCENERY DISKS

\$24.95 each. For use with all SubLOGIC flight simulation products.

### WESTERN EUROPEAN TOUR

Our latest and hottest! Detailed scenery covering southern Great Britain, northern France, and southern West Germany. The basis of our fun "Find Red Square" promotion.

### JAPAN SCENERY DISK

Detailed scenery from Tokyo to Osaka. Delightful international adventure!

### SAN FRANCISCO

Concentrated scenery covering San Francisco and the Bay area. A consistently best-selling favorite!

### SCENERY DISK # 7

Eastern Seaboard. Includes: Washington, Charlotte, Jacksonville, Miami. Another best-seller!

### SCENERY DISK # 11

North-Eastern Border. Includes: Detroit, Lake Huron. Incredible variety, from industrial Detroit to beautiful Niagara Falls!

See your dealer, or write or call for more information. All products are available on disk for the Commodore 64/128 computers. For direct orders please indicate which product you want, and enclose the correct amount plus \$2.50 for shipping and handling (\$1.50 for each additional package). Please specify UPS or first class mail delivery. Visa, MasterCard, American Express, and Diners Club charges accepted.

**RUN Works: A One-Disk Software System for Everything Commodore 64 and 128 Users Need**

1. **RUN PAINT** Full-Feature Paint and Drawing Program
2. **MONEY MANAGER** for Business and Home
3. **LABEL BASE** Create Address Labels
4. **RUN TERM** Telecommunicator
5. **RUN SHELL** Disk Utility
6. **GRAPHMAKER** 3-D Bar Graphs
7. **FORM WRITER** Forms Design

*Spend a little and get the works...*

# **RUN WORKS.**

As a home-based business owner, I save time and money with LABEL BASE's fast, easy address labeling system. And I really appreciate FORMWRITER'S form creation program when I think of the money I'd spend creating and printing forms professionally.

When I create a proposal for work, GRAPHMAKER'S 3-D Bar Graphs really help me make my point.

The MONEY MANAGER really lets our family plan our finances and save!

I think RUNPAINT is awesome 'cause I can draw on the screen just by moving the pointer with my joystick or mouse. It's easy!

RUNPAINT lets me design and print my own unique creations. Even though I'm not an artist, RUNPAINT makes me look like one!

**Introducing RUN Works.** . . a complete selection of all the software programs you'll ever need.

**On just one disk!**

**RUN Works is easy to use.** But it works hard so you don't have to. Which means you're more productive and efficient.

And you can buy RUN Works at a fraction of the price you'd pay for comparable programs—up to \$50 each elsewhere.

What's more, RUN Works and its fully illustrated documentation booklet are only available through this special offer.

**So order today.** There's no risk. RUN Works is 100% Money Back Guaranteed for thirty days.

**Call 1-800-343-0728**  
Or send back the coupon or order card today.

**YES!** I want to spend just a little and get the software works for my Commodore 64 or 128. Please rush me all seven RUN Works programs on just one easy-to-use disk.

**I'll pay only \$24.97!**

# Learn to troubleshoot and service today's computer systems as you build a fully XT-compatible micro, complete with 512K RAM and powerful 20 meg hard drive

**NEW!**  
Includes  
20 meg  
hard drive!

Your NRI computer training includes all this: • NRI's unique Discovery Lab<sup>®</sup> for circuit design and diagnosis • NRI's hand-held digital multimeter featuring "talk-you-through" instructions on audio cassette • A digital logic probe that lets you visually examine computer circuits • The new Packard Bell VX88 computer with "intelligent" keyboard, 360K double-sided, double-density disk drive, 512K RAM, 16K ROM • 20 megabyte hard disk drive • Bundled software including MS-DOS, GW-BASIC, word processing, spreadsheet, and database programs • Packard Bell reference manuals with programming guidelines and schematics.

## Train the NRI Way— and Earn Good Money Servicing Any Brand of Computer

Jobs for computer service technicians will almost double in the next 10 years according to Department of Labor statistics, making computer service one of the top 10 growth fields in the nation.

Now you can cash in on this exciting opportunity—either as a full-time industry technician or in a computer service business of your own—once you've mastered electronics and computers the NRI way.

NRI's practical combination of "reason-why" theory and hands-on building skills starts you with the fundamentals of electronics, then guides you through more sophisticated circuitry all the way up to the latest advances in computer technology. You even learn to program in BASIC and machine language, the essential language for troubleshooting and repair.

## Get Real-World Skills as You Train With a Powerful XT-Compatible Micro—Now With 20 Meg Hard Drive!

To give you hands-on training with the absolute in state-of-the-art computer technology, NRI includes the powerful new Packard Bell VX88 computer as the centerpiece of your training. As you assemble this fully IBM XT-compatible micro from the keyboard up, you actually see for yourself how every section of your computer works.

You assemble and test your computer's "intelligent" keyboard, install the power supply and 5¼" disk drive, then interface the high-resolution monitor. But that's not all.

Your hands-on training continues as you install a powerful 20 megabyte hard disk drive—the most wanted computer

peripheral—now included in your course to dramatically increase the data storage capacity of your computer while giving you lightning-quick data access. Plus you work with exclusive word processing, database, and spreadsheet software, yours to use for your own professional and personal applications.

As you build your computer, performing key demonstrations and experiments at each stage of assembly, you get the confidence-building, real-world experience you need to work with, troubleshoot, and service today's most widely used computer systems.

## No Experience Needed, NRI Builds It In

This is the kind of practical, hands-on experience that makes you uniquely prepared to take advantage of today's opportunities in computer service. You learn at your own convenience in your own home.

No classroom pressures, no night school, no need to quit your present job until you're ready to make your move. And all throughout your training, you've got the full support of your personal NRI instructor and the NRI technical staff, always ready to answer your questions and help you whenever you need it.

## FREE 100-Page Catalog Tells More

Send today for NRI's big, 100-page, full-color catalog that describes every aspect of NRI's innovative computer training, as well as hands-on training in robotics, video/audio servicing, electronic music technology, security electronics, data communications, and other growing high-tech career fields. If the coupon is missing, write to: NRI School of Electronics, McGraw-Hill Continuing Education Center, 3939 Wisconsin Avenue, Washington, DC 20016.

# What Do You Do With a Dead C-64...

... and 29 other intriguing fun facts about Commodore computing to inform and entertain you.

THE WORLD IS WILD FOR LISTS. Magazines and newspapers headline the ten best-dressed men and women and the ten best-paid executives. The third in a series of best-selling *Book(s) of Lists* features page after page of information guaranteed to enlighten and titillate. For instance:

- the ten healthiest places to live in the U.S.
- the most popular names for boys and girls.
- famous people under 5 feet, 6 inches tall.
- the most hated and feared persons in history.

More recently, there's *The Worst of Everything*—“the official guide to the most loathsome and deficient aspects of every realm of our lives”—sort of a cross between the *National Enquirer* and *The World Almanac*.

The computer community, of course, isn't immune to “listomania,” and we at *RUN* want to make our contribution. The following lists are compilations of facts and opinions about Commodore computing that have been submitted by a select group of Commodore authorities in response to a questionnaire we sent them. You will find that the questions and responses cover such tantalizing topics as:

- best uses for an abandoned Commodore computer.
- recommended word processors.
- little-known companies that produce great products.
- best sources for learning about Commodore computers.

These sometimes irreverent, but always informative, comments provide an entertaining way to start off the new year.

#### LIST OF CONTRIBUTORS

**Fred Bowen**, the senior systems hardware engineer at Commodore, was one of the designers of the C-128.

**Tom Brown** is a freelance programmer with public domain and commercial programs to his credit. He authored *RUN*'s telecommunications program, *RUN Term 128*.

**Jim Grubbs**, author of a half-dozen books (his latest, *APO San Francisco 96525*, about growing up in the military), operates *independent Publishing* of Springfield, Illinois, and produces his own magazine, *iD*. A longtime Commodore enthusiast, Jim uses a C-128 in running his business.

**Peter and Paul Hughes**, the ubiquitous twins who run a computer graphics business out of Canton, Massachusetts, are Commodore enthusiasts who frequent user's group meetings, computer shows and online networks to offer their insights about Commodore computing.

**Loren Lovhaug** is the author of *RUN*'s monthly telecommunications column. He also publishes the *Twin Cities 128* newsletter and is a SYSOP on QuantumLink and GENie.

**Margaret Morabito**, former technical manager of *RUN*, publishes the *CALC* (Computer-Assisted Learning Center) newsletter and heads the Community College and Tutoring Center on QuantumLink.

**William D. Pitts** is one of the graphics SYSOPs on QuantumLink.

**Ellen Rule**, active in New England user's group activities, operates the Home Computer Resource out of her New Hampshire home.

**John Ryan**, a frequent contributor to *RUN*, is an advanced machine language programmer with expertise on a number of computers, including, of course, the C-64 and C-128.

**Erin Wynn** is president of the New Mexico Commodore Users Group.

As you dive into our lists, note that numbers in parentheses indicate the same response from more than one expert.

By DENNIS BRISSON

ILLUSTRATED BY LAURA JOHNSON

THE LISTS

ILLUSTRATED BY KRIS STEVENSON

Uses for a dead C-64:

- Door stop (3)
- Desk lamp—shift-lock key turns it on and off
- Decoy for cats to walk on while I use the 64 that works
- For kids to practice typing
- Send 'em to me
- Decoy to keep kids' attention away from the working computer

ILLUSTRATED BY DAVID GARNER

It's time to quit computing when...

- your friends hire an interpreter so they can understand you.
- your programs make more sense than you do.
- you start talking to your computer.
- you're offered a job as editor-in-chief of *RUN*.
- the images are burned into your eyes as well as the screen.
- your family goes to the movies and doesn't invite you because they know you're working on the computer.
- you pirate software or feel destructive towards your computer.
- you toss and turn the whole night thinking of the same program line over and over.
- you dream about your computer every night.
- your wife walks into the computer room wearing a black teddy, silk stockings and a gleam in her eye.
- your husband walks into the computer room whispering sweet nothings and wearing a gleam in his eye.

Best mail-order companies:

- Briwall (4)
- Tussey (2)

Best descriptions of GEOS:

- Innovative
- Arrgh!
- Powerful
- Expensive
- Revitalizing
- Frustrating
- Poorly documented
- Okay
- Redundant

Best software publishers:

- Electronic Arts (3)
- Rainbird Software (2)
- Berkeley Softworks
- Origin
- Xetec
- Digital Solutions
- Precision Software
- Too many to list

Recommended printers:

- Star Micronics NX1000 (4)
- Seikosha SP1000-A
- Epson, Panasonic and Star 24-pin printers
- Royal Alpha 620C
- Okidata 180
- Panasonic

Commodore products that should never have seen the light of day:

- Plus/4 (6)
- C-16 (2)
- 1526 printer

Creative programmers:

- Bruce Carver (Access) (2)
- Sid Meier (MicroProse)
- Fred Bowen (Commodore)
- Brian Fargo (Electronic Arts)
- Eric Lee (Busy Bee)
- David Darus (Walrusoft)
- Jim Butterfield

Best computer shows to attend:

- World of Commodore, Toronto (5)
- Comdex
- Local shows
- Consumer Electronics Show

Best sources for learning about Commodore computing:

- Online services (4)
- Magazines (4)
- User's groups (4)
- Yourself

ILLUSTRATED BY ANNIE CLISSMAN

Maximum number of hours per week children should be allowed to play computer games:

- 5 (2)
- 7
- 10
- 14
- 15
- 1/2 hour per day, double on weekends
- Unlimited
- Depends on child and type of game
- Just enough so they'll leave me alone to work

**TV shows I'd like to see starring the Commodore computer:**

- “C-64, Where Are You?” (2)
- “Sing Along with SID”
- “Voyage to the Bottom of the C”
- “The Comm-puter Show”
- “RAM-bo (This Time It's Personal)”
- “My Mother the Computer”
- “The Three Amigas”
- “The Morton Downey, Jr., Carl Sagan and Commodore Comedy Hour”

**Year when the computer will be a common household appliance:**

- August 16, 2054, at 3:47 PM
- 2000 (3)
- 1999
- 1998
- 1990
- It already is
- 1986
- 1984

**Best utility programs:**

- Super Snapshot (2)
- Gnome Kit
- Partner 128
- Jim Klitzing's Wedge (public domain)
- Quick Brown Box
- Blitz compiler
- FastLoad
- Disk Whiz 128

ILLUSTRATED BY LAURA JOHNSON

**Biggest complaints about Commodore:**

- Lack of customer support and consideration (4)
- 90-day warranty on Amigas
- Lack of support for vendors
- Lack of follow-through in educational market
- Poor marketing
- Poorly run since Tramiel left
- Lack of support for the 8-bit line
- They never consult me on major decisions

**Recommended word processing packages:**

- Pocket Writer 2 (4)
- The Write Stuff 64 and 128 (2)
- Word Writer 128
- FontMaster
- PaperClip

**Recommended reading:**

- Mapping the Commodore 64*—Compute! Books
- First and Second Books of Machine Language*
- Commodore 64 Programmer's Reference Guide*
- All About the Commodore 64 and Other Commodore Computers*, by Jim Butterfield
- RUN's Special Issues*
- The manual that accompanies your equipment
- Anything by Jim Butterfield
- CAD-128*
- Mapping the Commodore 128*, by Ottis Cowper

**Advice on buying Commodore equipment:**

- Find a knowledgeable, supportive dealer. (3)
- Know what you really need and compare limitations of the various machines against that need.
- Determine needs before buying.
- Buy from a reputed, locally accessible firm.
- Look at software first, then decide on a machine.
- Shop around for good values.
- Determine your needs before buying and try out candidates.
- If you buy cheap, don't expect support.
- Follow every word I've ever written on this topic.

**Lesser-known companies that produce quality software:**

- Patech
- Free Spirit
- Blue Lion
- First Row
- Storm Systems
- Kidsview, BobCo, Busy Bee
- Walrusoft

**Reasons a C-64 owner no longer uses his computer:**

- Lack of interest (3)
- Undergoing psychiatric evaluation
- Death, divorce or blown-up power supply
- Child doesn't need or want a computer
- Seeking more professional software, more memory and speed, better display capability

ILLUSTRATED BY KIRBY VARGO

**Magazine articles you'd like to see:**

- “Best 64/128 Bridge Card for Your Amiga”
- “Commodore Announces Knowledgeable Customer Service Department”
- “Commodore's New Laptop”
- “Making a Million Dollars with Your C-64”
- “Briefcase Portable C-128 for Under \$500”
- “C-64 Laptop”
- “How Commodore Toppled IBM”
- “GeoPublish to Postscript File Utility”
- “My Rise from Impoverished Computer Journalist to the Wealthy Head of Commodore International in One Week”

**Software programs no user should be without:**

- GEOS (2)
- Merlin Assembler
- Word Writer 128
- PaperClip
- Any backup program
- A word processor (e.g., The Write Stuff or RUN Script)
- Fast Hack 'Em backup utility
- Any telecommunications program
- Disk Doctor 64 or 128

**Best integrated software packages:**

- GEOS (4)
- Pocket (Writer, Planner, Filer) series (3)
- Better Working series
- Timeworks (Word Writer, Swift Calc, Data Manager)

**Recommended graphics programs:**

- OCP Advanced Art Studio (2)
- Basic 8 (2)
- Doodle!
- Color Me (Mindscape)
- Print Shop

**Recommended brands of disk:**

- Maxell (4)
- Generic
- Memorex
- Japanese 3 1/2-inch
- Fuji
- Any brand

**Favorite public domain programs:**

- Fun Graphics Machine
- Chris Smeets' Self De-Arc program
- SWINTH
- SID Player
- Garry Label Maker
- Don Peterson's programs for the handicapped
- Grades, by T. Lynch
- A-Plus, by R. Crosswell
- 3-Minute Copier
- Disk Whiz (2)

**Most active Commodore computing areas in North America:**

- Toronto (6)
- West Chester, PA
- My living room
- My office

**What I love about Commodore computing:**

- Variety of low-cost software
- Some of the latest technology available for sound and graphics at reasonable cost
- Lots of power/performance for low cost
- Information services/telecommunications
- Just about any application possible with software currently available
- Price that can put a computer in almost every home; the great equalizer
- Versatility
- Everything
- Keeps me from having to get a real job

ILLUSTRATION BY JAN MILLER

**What I hate about Commodore computing:**

- Entering hex-type magazine program listings
- Working around bugs and lack of foresight in the design of the computer
- Entering program listings
- Lack of respect for Commodores in the business world
- Heavy reliance on machine language, which is discouraging to would-be programmers
- Slow disk access
- Power supply burnout rate
- Lack of reliability
- Lack of real C-128 programs
- Nothing
- Lack of an inexpensive, totally compatible hard drive

**Most exciting future computer applications:**

- CD ROM drives (2)
- Desktop publishing (2)
- Voice recognition (2)
- Plug-in UART chip (with ROM programs) for the C-64 and C-128
- Special user interfaces for the handicapped that don't require eye-hand coordination
- Telecommunications with drawing and text-to-speech capability
- Low-cost laser/copying/fax peripheral ■

Dennis Brisson is RUN's editor-in-chief and listomaniac par excellence.

# KONAMI HITS ARE HEADING HOME.

With our new software, your favorite arcade games come alive on your home computer.

If you own an IBM, Amiga or Commodore computer — Watch out! Because 4 of Konami's most awesome adventures are about to invade.

You'll confront the missions you've dreamed of in Rush 'N Attack, Contra, Jackal and Boot Camp. And you'll find yourself face to face against unequalled challenges, with incredible graphics, awesome music, and sound effects that'll blow you away.

So check out Konami's newest action wherever great software is sold. And be prepared for war.

 **KONAMI**

Konami is a registered trademark of Konami Industry Co. Ltd. Rush 'N Attack, Contra, Jackal and Boot Camp are trademarks of Konami Inc. IBM is

and registered trademarks of International Business Machines Corp. Amiga and Commodore are registered trademarks of Commodore Business Machines Inc. Screens shown were photographed on an Amiga system.

## Genuine IBM® Printer

8½" Letter Size • 80 Column  
Limited Quantities

- Upper & Lower Case (with true lower descenders)
- Advanced Dot Matrix - Heat Transfer
- Graphics With Commodore, & Apple Interfaces
- Ready to Hook Up To Serial Port Of IBM® PCjr.
- Low Cost Adapters For IBM®, Apple, Commodore, & Laser Computers
- Underline & Enlarged

Our Low Sale Price  
**\$49<sup>95</sup>**

List \$199

## 800K 3½" Disk Drive

Commodore 1581 Works With C64/C64c, and C128/C128D.  
Over 800K Bytes of Formatted Storage On Double-Sided 3.5" Microdiskettes.

Our Low Sale Price  
**\$179<sup>95</sup>**

List \$249

## 13" Color Composite Monitor

- Anti-Glare Screen
- Audio Speaker
- Volume Control
- Black Matrix Tube
- Horizontal Resolution 260 Lines
- Includes Composite Cable

Our Low Sale Price  
**\$149<sup>95</sup>**

List \$329

## 300/1200/2400 BPS External Modem

### Modem 2400 Features:

- 2400 BAUD Bell 212A at 300/1200/2400 BPS
- Fully Hayes Compatible
- 7 System Indicator Lights
- Both Tone & Pulse Dialing
- Built-In Speaker with Volume Control
- Buffer That Holds Up To 40 Characters
- Stores Dialed Numbers
- Separate Line and Set Connectors
- Uses RS-232C Interface (Cable Required)

Our Low Sale Price  
**\$114<sup>95</sup>**

List \$349

## 1541-II Disk Drive

Our Low Sale Price  
**\$159<sup>95</sup>**

List \$299

## 300/1200 BPS Migent Pocket Modem

Free Terminal Software

- Hayes compatible
- Runs on AC or battery
- Turns on/off automatically
- Small enough to put in your pocket
- Plugs directly into your serial port on many computers
- Easy to use; no switches to set
- On-screen status lights show call progress

Our Low Sale Price  
**\$99<sup>95</sup>**

List \$413

RUN is a publication of IDG Communications/Peterborough, a division of IDG Communications, the world's largest publisher of computer-related information. IDG Communications publishes over 90 computer publications in 33 countries. Fourteen million people read one or more of IDG Communications' publications each month. IDG Communications' publications contribute to the *IDG News Service*, offering the latest domestic and international computer news. IDG Communications publications include: ARGENTINA's *Computerworld Argentina*; ASIA's *Communications World*, *Computerworld Hong Kong*, *Computerworld Malaysia*, *Computerworld Singapore*, *Computerworld Southeast Asia*, *PC Review*; AUSTRALIA's *Computerworld Australia*, *Communications World*, *Australian PC World*, *Australian Macworld*; AUSTRIA's *Computerwelt Osterreich*; BRAZIL's *Data-News*, *PC Mundo*, *Micro Mundo*; CANADA's *Computer Data*; CHILE's *Informatica*, *Computacion Personal*; DENMARK's *Computerworld Danmark*, *PC World Danmark*; FINLAND's *Tietoviiikko*, *Mikro*; FRANCE's *Le Monde Informatique*, *Distributique*, *InfoPC*, *Telecoms International*; GREECE's *Micro and Computer Age*; HUNGARY's *Computerworld SZT*, *PC Mikrovilag*; INDIA's *Dataquest*; ISRAEL's *People & Computers Weekly*, *People & Computers BiWeekly*; ITALY's *Computerworld Italia*; JAPAN's *Computerworld Japan*; MEXICO's *Computerworld Mexico*; THE NETHERLANDS' *Computerworld Netherlands*, *PC World Benelux*; NEW ZEALAND's *Computerworld New Zealand*; NORWAY's *Computerworld Norge*, *PC World Norge*; PEOPLE'S REPUBLIC OF CHINA's *China Computerworld*, *China Computerworld Monthly*; SAUDI ARABIA's *Arabian Computer News*; SOUTH KOREA's *Computerworld Korea*, *PC World Korea*; SPAIN's *CIMWORLD*, *Computerworld Espana*, *Commodore World*, *PC World Espana*, *Comunicaciones World*, *Informatica Industrial*; SWEDEN's *Computer Sweden*, *MikroDatorn*, *Svenska PC World*; SWITZERLAND's *Computerworld Schweiz*; UNITED KINGDOM's *Computer News*, *DEC Today*, *ICL Today*, *PC Business World*, *IOTUS*; UNITED STATES' *AmigaWorld*, *CD-ROM Review*, *CIO*, *Computer Currents*, *Computerworld*, *Computers in Science*, *Digital News*, *Federal Computer Week*, *80 Micro*, *FOCUS Publications*, *inCider*, *InfoWorld*, *Macintosh Today*, *MacWorld*, *Computer & Software News* (*Micro Marketworld/Lehbar-Friedman*), *Network World*, *PC World*, *Portable Computer Review*, *Publish!*, *PC Resource*, *RUN*, *Windows*; VENEZUELA's *Computerworld Venezuela*; WEST GERMANY's *Computerwoche*, *PC Welt*, *Run*, *Information Management*, *PC Woche*.

## Excellence...

### for the Commodore

## The XETEC Product Family

Look for the name that spells *Quality*, *Affordability*, and *Reliability*.

**Lt. Kernal** - a 20 or 40 Megabyte Hard Drive which supports CP/M.

**Super Graphix GOLD** - the ultimate printer interface including a 32K buffer, 4 built-in fonts, a utility disk with 27 fonts and more.

**Super Graphix** - an enhanced printer interface including NLQ, an 8K buffer, reset button, a utility disk with 27 fonts and more.

**Super Graphix jr** - an economical printer interface with NLQ and graphics.

**FontMaster II** - a powerful wordprocessor for the C64 with 30 fonts ready to use, 65 commands, font creator and more.

**FontMaster 128** - a super wordprocessor for the 128 including 56 fonts ready to use, a 102,000 word spell checker and much more.

*All Hardware is FCC Certified All Interfaces include a Lifetime Warranty*

C64 and 128 are reg. TM of Commodore Business Machines, Inc.

# Wizardry<sup>®</sup>

## Now the world of Wizardry comes to Commodore 64/128

# PROVING GROUNDS of the MAD OVERLORD

Also available for:  
Apple II Series,  
IBM PC & compatibles,  
Tandy 1000 SX & EX,  
Macintosh

With your Commodore 64 or 128 you can now experience an exciting initiation into the internationally-acclaimed world of the Wizardry Gaming System.

Begin with the first scenario\*: Proving Grounds of the Mad Overlord. It challenges you to overcome devious tricks and sudden traps, strange and mysterious encounters, maze upon maze of puzzles, stimulating and intricate subplots and sophisticated themes. Ingenious multi-level, mind-bending tests abound with vile creatures, unspeakable villains, courageous adventurers and strong allies to hinder and help you achieve ultimate victory.

INTRODUCING THE  
INDISPENSABLE ACCELERATOR  
CARTRIDGE FOR YOUR C64 OR C128.

TM

# WARPSPEED

Only Warpspeed loads, saves, verifies, formats and copies files at speeds up to 10x faster than normal!

Imagine copying a disk in as little as 35 seconds!

Warpspeed functions identically on both the C64 and C128 in the 40 or 80 column mode and works with all compatible drives, including the 1581. Built in mode select and reset switches too!

**Attention advanced users:**

An integrated sector editor and drive monitor and a full featured mini-assembler are all included!

Only Warpspeed delivers 55 features that no other cartridge can match.

**Why limp along on impulse power when you can jump to Warpspeed?**

## CINEMAWARE

# 2001: A Calendar Program

*When HAL isn't around to monitor your hectic schedule,  
consult this calendar program.*

By KEN HUEBNER

Life in the fast lane is a hallmark of the twentieth century, and, as we approach the year 2000, the pace is getting even faster. If you're having trouble remembering special events, appointments and deadlines now, how will you cope in the years to come? Well, you should do just fine with the help of Calendar 2001, the twenty-first century calendar program for your twenty-first century lifestyle.

Written in Basic, Calendar 2001 uses relative files for instant reads and writes to its data files. Type in Listing 1, using RUN's Checksum program. Variable MT at the beginning of the program has a default value of 12, which represents the maximum number of reminders you expect to input for each day. Do not change the value of MT once you've run the program and created a month file.

If you have a 1541 disk drive, 12 reminders per day will fill a disk in about one year; with a 1571, 25 per day will fill the disk in about the same period. Larger values will require scratching old reminders to make room for new ones from time to time, or will necessitate the use of a new reminder disk.

Once MT is set, save the program and a backup to disk. Then format a fresh disk to hold your reminders. You could also save a copy of the program to your data disk, so everything's together and easier to use; just be sure there's a backup elsewhere.

To use Calendar 2001, load it, insert the data disk if it's separate and type in RUN. When the program asks "What's the date?", enter today's date in numerical form, with the numbers separated by commas (12,20,1988), and press the return key (it is not necessary to type in leading zeroes with one-digit numbers).

Soon a menu will appear with the

date you input at the top. There are six menu options:

- 1.— See the Calendar
- 2.— Read from Calendar
- 3.— Make an Appointment
- 4.— Save a Note
- 5.— Erase from Calendar
- 6.— Exit to Basic.

Option 1 displays a calendar showing the days of the current month. Press the cursor-up key to move forward to the next month or the cursor-down key to move back a month. When you've finished viewing the calendar, press return.

Option 2 lets you read a selected day's reminders. Just enter the date, again in numerical form, and the list will appear on-screen. On the left are numbers you'll need for identifying your reminders when using other options. On the right are the date, and perhaps a time, for each reminder, along with the contents of the reminder.

You can review the list any number of times by pressing the space bar. You can also make a hardcopy by just pressing P. Press the return key when you're finished.

Option 3 is for creating an appointment reminder and saving it to disk. At the query, enter the date of the appointment to load that day's file into the computer. This load will take longer when you're first using the program or starting a new month, because the program has to open a new file first. Once the file is available, Calendar 2001 will ask "Appointment with whom?" Reply

with a name that's no more than 20 characters long. Then, at the queries for time, enter a number from 1 to 12 for the hour and a number from 0 to 59 for the minutes.

You also need to indicate whether you want to be reminded of the appointment in advance. If not, answer no or press return, and the reminder will be saved only to the date of the appointment. If you answer yes, you'll be asked how many days ahead of time you want the reminders to start. Enter a number from 1 to 14, and the reminder will be saved to the actual date, plus the specified number of days before.

Option 4 is for creating other types of reminders and saving them to disk. Except that there's no query for time, this option works just like option 3.

Option 5 erases reminders. Type in the date concerned, and, when the reminders appear on-screen, locate the one you want to erase, note its I.D. number and press return. Then, at the query, type in the I.D. number and press return again to erase the reminder from your data file.

When you're finished using Calendar 2001, press 6 to exit to Basic.

This program is most effective if used daily, so try to get into that habit. Then you'll be on a clear-charted course into the twenty-first century! ☐

*Ken Huebner is a software designer who runs his own business, called Softrek, out of Watertown, WI.*

# ANNOUNCING ACCOLADE'S NEW SPORTS GAMES.

*Bud*  
BUD COLLINS  
Television tennis analyst

“What do I expect from a computer tennis game? Realism. I want to sense the power of a strong forehand, the ease of a smooth backhand. Accolade’s Serve & Volley gives me that realism—and more.

“Serve & Volley truly captures the essence of the game—the action, the strategy, the pressure. You can select and place your shots via the animated “Strobe-O-Stroke” graphics. There’s match or tournament play, three levels of difficulty, even three different court surfaces.

“Why should I leave the office to cover a tournament? Now I can play one on my computer with Serve & Volley.”

*Hank*  
HANK STRAM  
Radio voice of NFL Monday Night Football

“I’ve seen some great moves on the football field but nothing compares to the moves you’ll find on 4th & Inches computer football. This is real pro football action with 11 animated players per side. It’s great! The ball’s snapped and you have 22 guys running around the screen buttin’ heads!

“But the best part about 4th & Inches? The control. I pick the starters. I control the key players on offense and defense. Heck, this is a head coach’s dream come true! And the playbook?

Fantastic. You get a pro style playbook with 20 plays and 11 different formations.

“Somebody at Accolade really knew their X’s and O’s when they drafted 4th & Inches. Great game plan, guys!”

*Marv*  
MARV ALBERT  
1988 Olympic boxing commentator

“I used to think my broadcast booth at ringside was the closest I’d ever come to the true boxing experience. Then I played T.K.O.

computer boxing. Talk about “up close and personal!” T.K.O. put me right in the ring, face to face with a heavyweight champ.

“During a fight I like to do all the jawing. With T.K.O. I got to jab at a fighter’s jaw. I threw a right... it landed! I could actually see those familiar signs of wear and tear on the champ’s face. At the bell, the champ had a black eye, a fat lip and—I suspect—a bruised ego.

“It’s a unanimous decision. Accolade’s T.K.O. captures the feeling of boxing like no other game.

*Jack*  
 JACK WHITAKER  
 ABC golf announcer

"Jack Nicklaus is unquestionably the greatest golfer of his time and I've been fortunate enough to follow his play on the greatest golf courses in the world.

"Jack Nicklaus' Greatest 18 Holes Of Major Championship Golf is the Golden Bear's personal selection of the most challenging holes in all of golf. Holes that have decided the four major championships.

"Accolade has come up with a simulation that not only recreates each hole with stunning accuracy—but it allows the player to golf against a computerized Jack Nicklaus. Quite an accomplishment.

"Jack never settles for second best. This is the computer golf game that others will be judged by for years to come."

*Chick*  
 CHICK HEARN  
 Voice of the Los Angeles Lakers

"To play championship basketball, you've got to have a great fast break. To play three-on-three, full court computer basketball you've got to have Accolade's Fast Break.

"No other computer basketball game gives you this much control and playability. You run the offense and defense. There are more plays, more players and more shots. And the thing that really impressed me was the network television court perspective. The animation was so fluid—I thought I was watching my monitor at The Forum!

"Take it from a guy who's seen his share of great fast breaks—Accolade's Fast Break is a slam dunk."

# ANNOUNCING ACCOLADE'S

# PLAY BY PLAY

## SWEEPSTAKES

Win your choice of a Sports Fan Fantasy for two!

### OFFICIAL ACCOLADE MAIL-IN ENTRY FORM

Complete and mail in time for receipt by 3/31/89 to: ACCOLADE PLAY-BY-PLAY SWEEPSTAKES, PO. Box 914, Wilton, CT 06898-0914.

*My choice of Sports Fan Fantasy is an opportunity to... (check ONE please):*

- Visit with and attend a boxing match broadcast by Marv Albert.  
 Visit with and attend a Los Angeles Lakers game broadcast by Chick Hearn.  
 Visit with and attend an NFL Monday Night Football game broadcast by Hank Stram.  
 Visit with and attend a tennis tournament broadcast by Bud Collins.  
 Visit with and attend a PGA golf tournament broadcast by Jack Whitaker.

Offer good only in U.S.A. Offer void wherever restricted or prohibited by law.

**ACCOLADE**

### OFFICIAL RULES—NO PURCHASE NECESSARY

**How to Enter.** Provide all the information called for on the official entry form (including your choice of Sports Fan Fantasy prize), or print this same information on a plain 3" x 5" piece of paper and mail your entry in time for receipt by March 31, 1989 to: Accolade Play-By-Play Sweepstakes, PO. Box 914, Wilton, CT 06898-0914. Enter as often as you wish, but each entry must be sent in a separate envelope via First Class Mail.

**Prize Awards.** The five (5) different Sports Fan Fantasies listed on the entry form comprise this program's prize offering, each fantasy to include such transportation arrangements and other accommodations as may be necessary for two persons traveling together, including the sports event tickets. All arrangements shall be made by Accolade at its discretion as to announcer visit time and place and event selection. Applicable period for fan fantasy arrangements shall be 4/15-12/31/89. Each winner will be offered the option of receiving \$1,500 cash instead of the fan fantasy prize for two.

**Winner Drawings.** One winner will be chosen for each of the five different Sports Fan Fantasy prizes by means of a series of random drawings to be conducted on 4/1/89 by AMA, Ltd., an independent judging organization whose decisions are final. Prize winners will be notified by mail by 4/8/89. Odds of winning the Sports Fantasy indicated as an individual entrant's choice depend on the number of entries received indicating that same event choice. Winners will be required to provide social security number and to sign an affidavit of eligibility and publicity/travel release. Tax liability on prize winnings is responsibility of each winner. Prizes are not transferable, although any prize won by a minor will be awarded in the name of a parent or legal guardian.

**Eligibility.** Sweepstakes open to all U.S. residents except employees of Accolade, Inc., its marketing agencies, this program's suppliers, and their immediate families. Void wherever prohibited or restricted by law. To request a list of the prize winners, send a stamped, self-addressed envelope before 4/1/89 to: Accolade Play-By-Play Winners, PO. Box 7160, Wilton, CT 06897-7160.

# THERE ARE SOME THINGS YOU JUST CAN'T DO WITH GEOS... ...UNTIL NOW, THAT IS.

only  
\$24.97

Introducing **GEOS Power Pak\***, a collection of the most useful GEOS desktop accessories, utilities and applications ever assembled on one disk.

The editors of *RUN* magazine have packed this two-sided disk with over a half-dozen useful programs, a wide variety of fonts and over a hundred illustrations to use with GEOS. It features the work of some of the **BEST** talent in the GEOS market, including telecommunications expert Bill Coleman; font designers and artists Susan Lamb, Tom Trevorrow and Shaun Jones; and GEOS programmers Joe Buckley and Wayne Dempsey. This assures you, the GEOS user, of increased productivity and ease of use each and every time you boot up GEOS.

Discover how it feels to be a GEOS power user with the **GEOS Power Pak**. This disk will give you features unavailable anywhere else.

For example:

#### APPLICATIONS

—**geoTerm** is the first terminal program for GEOS. Before the **GEOS Power Pak**, this application had the experts stumped. But now you can telecommunicate to BBSs and online networks, sending and receiving messages, attending confer-

*"The editors of RUN have assembled the best talent in the GEOS community for this disk!"*

ences and uploading and downloading programs.

—**CardFile** is a file manager that comes in handy to maintain lists. Use it as an address book or to keep lists of tapes, records or household items... the possibilities are endless.

#### FONTS

—Choose from a wide selection of character fonts and point sizes. All the fonts are original and unpublished. Suitable for letter writing, headlines or to spruce up any newsletter, memo or sign.

#### CLIP ART

—Pick from over one hundred illustrations to use in your own documents.

#### ACCESSORIES

—**Thumbnail** is a unique program that reduces full-page geoPaint images for display on the screen and to save to disk. Catalog your geoPaint collection or paste images into a geoWrite document.

—**geoOrganizer** is a disk utility that lets you rearrange your GEOS files quickly and easily.

—**Pattern Editor** lets you create your own fill patterns for use within geoPaint.

—**geoBreak**. Enjoy this classic arcade game.

—**Convert 2.2**. Convert GEOS data and programs for uploading and downloading with geoTerm.

—**Write Hand Man**. Word and document analyzer.

—**AutoView**. geoPaint slide show maker.

—**PaintView II**. View geoPaint pages.

Like the original GEOS program, the **GEOS Power Pak** greatly enhances the capabilities of your C-64.

Let's face it. You've invested lots of time and energy learning to use GEOS. The **GEOS Power Pak** returns this investment tenfold with easy applications, expanded capabilities and increased productivity.

**GEOS Power Pak** revolutionizes the program that revolutionized your C-64.

\*GEOS Power Pak is a product of *RUN* magazine and is not connected with Berkeley Softworks, creator of GEOS, or Commodore, manufacturer of the C-64.

**YES!** I want to add more computing power to my Commodore 64. Send me the **GEOS POWER PAK** from *RUN* magazine for \$24.97.

# Demystifying DOS

*Get on the right track with this  
disk drive tutorial.*

By JOHN RYAN

I bought my first C-64 in early 1983 and, at the time, marveled at the power and versatility this machine offered in comparison with its little brother, the VIC-20. I also found the cassette recorder that used to be OK for the VIC totally unacceptable for my shiny new treasure. After several agonizing months, I finally bought the then new 1541 disk drive.

Dreaming of hyperspacing through data zones never traversed before, I was astonished when, as I tried to save a short three-line program, I was greeted by a Drive Not Ready error! Two hours later, a quick (and rather curt) phone call left me feeling a bit doltish. . .

"Well, did you format the disk?" the salesman asked.

"Format?" I replied.

"Yes, you know—did you "new" the disk from DOS?"

"Doss? Doss? What's a Doss?"

"Disk operating system," the salesman sighed impatiently. "The 1541 is an intelligent drive that possesses its own microprocessor."

"Well, it can't be that smart if it won't save anything!"

I think you get the picture. I suffered from a malady common to neophytes: ignorance. It comes from the exuberance of owning a new toy, coupled with reading only the first three pages of the manual. The 1541, 1571 and 1581 family of disk drives are indeed intelligent, but, like computers, only as intelligent as their owners.

Because a Commodore disk drive is equipped with a microprocessor of its own that runs DOS, you aren't required to "babysit" file operations as with many personal computer systems. For the most part, you can type a command and the drive will do all the work.

DOS is there as soon as you turn the disk drive on, and all you need to know to access its features is a handful of commands. Of course, as your comput-

ing savvy grows, you can use more advanced commands and programming tricks to delve into the heart of the disk drive's microprocessor and data storage areas. Here, I'll deal with the basics—simple commands that all new drive owners should know how to use.

## THREE VERSIONS

To make using DOS a bit easier, Commodore includes a handy utility, called

the DOS Wedge, on the Test/Demo disk that comes with the disk drive. This program is intended primarily for C-64 users, as Basic 2.0 has hardly any commands designed to handle DOS, unlike Basic 7.0 in the C-128. With the DOS Wedge, you'll find sending disk commands very simple—usually taking just a keypress or two.

For the purpose of comparison, I'll include the commands for the DOS ▶

# NO QUARTER

*Just Endless Arcade Action*

Now you can take home some of the best Arcade games you've ever played,  
to play on your own personal computer!

Skillful programming has taken the superb graphics and addictive game play of Arcade hits Double Dragon and Sidewinder and faithfully reproduced them in home computer versions.

Join in deadly combat with the savage street gang of the infamous Shadow Boss in Double Dragon. Indulge in an orgy of action and destruction in the high-energy shoot-em-up Sidewinder (part of the Awesome Arcade Action pack on Amiga and Atari ST). Go on the rampage and smash buildings and munch tiny natives in Aaargh!

Nothing but endless Arcade action – Arcadia has spared no quarter!

Double Dragon is a joint publication of Arcadia and Tradewest.

# DEMYSTIFYING DOS

Wedge (see Table 1), Basic 2.0 and Basic 7.0 in this tutorial. Any time that you're in doubt about a command, keep in mind that the Basic 2.0 DOS commands will work with any of the Commodore disk drives.

When using Basic 2.0, you must ensure that the command channel is open before sending a disk command. You accomplish this by entering:

```
OPEN 15,8,15
```

The first number, which specifies the channel through which your data will travel, could be any number from 1 to 255, but 15 has become standard. The second value is the device number. For a second or third disk drive, this would probably be 9 or 10. The third numeral specifies the secondary address, or channel, over which commands will travel.

You should be aware that the command sequence

```
OPEN 15,8,15
PRINT #15, "disk command"
CLOSE 15
```

can also be entered as:

```
OPEN 15,8,15,"disk command":CLOSE 15
```

## FORMATTING A DISK

The following are the commands to format a disk:

```
Basic 2.0: OPEN 15,8,15,"N0:disk name,
id":close15
Basic 7.0: HEADER "disk name,id"
DOS Wedge: @N0:disk name,id
```

Before anything can be stored on a disk, it must be formatted, or "newed." This procedure creates a pattern of

tracks and sectors on the disk, as well as a fresh disk directory, which includes the drive's internal guide to the disk directory called the block availability map, or BAM (more on this later).

To format a disk, just enter a header name of 16 characters or less and a unique two-letter I.D. code. This I.D. is mandatory only when the disk you use is being formatted for the first time or has been erased using a magnetic eraser. If the disk has been used before and you don't mind using the same I.D. again, you can reformat it by entering only the header name.

This operation, commonly known as a short "new," just renames the disk header and clears the BAM. Unlike a full "new," which formats every track and creates a new BAM—and takes its own sweet time in doing so, I might add—a short "new" affects only two sectors on track 18 (sectors 0 and 1, which deal with the BAM and directory) and takes just a few seconds. Because of its more limited effect on the disk, you can recover lost files accidentally wiped out by a short "new" by using a disk utility designed for that purpose.

## INITIALIZING A DISK

Here is the command sequence for initializing a disk:

```
Basic 2.0: OPEN 15,8,15,"I0":CLOSE 15
Basic 7.0: DCLEAR
DOS Wedge: @I0
```

The Initialize command does not reset the disk drive, as is commonly believed. All it does is force the disk drive to read the BAM into the drive's random access memory. With Commodore disk drives, this normally happens au-

tomatically each time a disk is inserted (triggered by an optical write-protect switch within the drive).

To understand why the Initialize function is important, whether automatic or not, it's necessary to know how data storage is handled. The DOS would soon become hopelessly confused if it had no way to keep track of which sectors (blocks) have been used and which are available for storage. This is where the BAM comes in. It is simply a storage area on the disk filled with 1s and 0s for corresponding sectors—1 if the sector is used, 0 if it's free. The BAM is usually read into the drive's RAM only once and then updated to the disk when changed by a file write or erase operation. When this happens, DOS checks the disk I.D. prior to writing a new BAM. If the I.D. on the disk corresponds to the I.D. in the drive's memory, the BAM is rewritten and all is well—or is it?

This is why unique disk I.D.s are important. Suppose, for some reason, you possessed two disks with the same I.D., and, after you removed the first disk and inserted the second, the drive didn't initialize automatically. What would happen? As you tried to write new information to this second disk, the drive would assume, from the duplicate I.D., that everything was fine and use the BAM of the first disk to assign data blocks on the second. This, in effect, would allocate sectors already being used and vice-versa. Such scrambled directories aren't recoverable, unless you're really talented with a disk sector editor.

Although the chance of this happening (because of automatic initialization) is small, it's always a good idea to reinitialize a disk after a disk error or when you suspect that drive memory may be corrupted in some way. (A momentary power glitch comes to mind.)

## SCRATCHING A FILE

The commands for scratching any file are:

```
Basic 2.0: OPEN 15,8,15,"S0:filename":
CLOSE 15
Basic 7.0: SCRATCH "filename"
DOS Wedge: @S0:filename
```

This DOS function eliminates a filename from the disk directory by "zeroing out" its file type and releasing to the BAM those sectors that were used by the file. In other words, the file isn't actually erased from the disk. Files that have been accidentally scratched can be restored by a restoring utility, as long as you don't write anything else to the disk beforehand. Some or all of the old

Table 1. DOS Wedge quick-reference chart.

Command	Function
@	Displays the current disk status
@\$	Displays the directory
@# <device>	Sends DOS commands to this device
@Q	Quits the DOS Wedge
@C0:new file = old file	Copies a file to the same disk
@I0	Initializes the drive
@S0:filename	Scratches a file
@N0:disk name,id (optional)	Formats a disk
@R0:new name = old name	Renames a file
@V0	Validates a disk
@UI	Resets DOS
/filename	Loads a Basic file (same as LOAD "name",8)
%filename	Loads a binary file (same as LOAD "name",8,1)
!filename	Loads and runs a file (from Basic)
-filename	Saves a file (from Basic)
--@0:filename	Saves-with-replace a file

WELCOME TO COMPU SERVE.  
THE LARGEST COMPUTER INFORMATION SERVICE IN THE UNIVERSE.  
(AS FAR AS WE KNOW.)

More people use CompuServe than any other online computer information service on Earth.

Half a million members access hundreds of information, communications and entertainment services online.

Thousands with similar interests and special expertise converge regularly and exchange ideas on an ever-expanding list of special-interest Forums.

They have access to a combination of more financial information, a greater variety of shopping services, and deeper research resources than any other online computer service. Anywhere.

Of course, it's conceivable that there's a service like ours somewhere that could give you more for your money. But you may have to travel a few light-years to find it.

Instead, all you have to do is visit your nearest computer dealer today. To order CompuServe direct, or for more information, write: CompuServe, 5000 Arlington Centre Blvd., Columbus, OH 43220. Or call, 800 848-8199. In Ohio and Canada, call 614 457-0802.

# DEMYSTIFYING DOS

file might get overwritten by the new. (Please, don't use the Validate command if you have hopes of ever seeing your scratched file alive again!)

You can use wild-card expressions to scratch a range of similarly named files. The \* wild card instructs DOS to scratch files whose names begin with the same sequence of characters. For example:

```
@S0:TEST*
```

would scratch any filename starting with TEST, such as TESTING and TESTER.

Conversely, the ? wild card scratches files whose names end with the same sequence of characters and which contain the same number of characters. For example:

```
OPEN 15,8,15,"S0:EST"
```

would scratch TEST, REST and NEST from a directory.

You can also mix the wild cards. For example:

```
SCRATCH "?RAM*"
```

would scratch any filename with RAM

as the second through fourth letters, such as GRAMMY or DRAMA.

An asterisk next to a file type (\*PRG, \*SEQ) in the directory indicates an improperly closed, or "splatted," file, which you should not scratch. Since the file was improperly closed, and thus the BAM not correctly calculated, scratching it could release sectors being used by other programs. Instead, use the Validate command below.

## RENAMING A FILE

To rename a file, enter:

```
Basic 2.0: OPEN 15,8,15,"R0:new
```

```
name = old name":CLOSE 15
```

```
Basic 7.0: RENAME "old name" to
```

```
"new name"
```

```
DOS Wedge: @R0:new name = old name
```

This operation gives a file a new name in the directory. Except in Basic 7.0, you may enter a filename of any length, but only the first 16 characters will be used in the filename. Any characters except asterisks, commas, question marks, colons and quotation marks are acceptable. Using shifted characters

(especially spaces) will result in unpredictable directory listings. Note that the Basic 2.0 and DOS Wedge commands are very similar, but the sequence of names is reversed.

## VALIDATING A DISK

Repeated scratch operations often fool the BAM into believing that certain disk sectors are being used, when, in fact, they are not. Since a scratch operation doesn't actually erase any file data, after a time you may have more blocks free on a disk than the directory indicates. Other causes of an incorrect BAM are scratching improperly closed files and using the Save-with-Replace command on a full disk. Occasionally, using Save-with-Replace creates a splatted file.

When you issue the powerful Validate command:

```
Basic 2.0: OPEN 15,8,15,"V0":CLOSE 15
```

```
Basic 7.0: COLLECT
```

```
DOS Wedge: @V0
```

the DOS reads through the files on the disk, determines which sectors are being

## DEMYSTIFYING DOS

used and frees the unused ones, thereby updating the BAM. It's interesting to note how this is accomplished. When the drive receives the command, it creates a blank BAM in its own memory, then begins to read the disk directory, tracing each entry's track and sector pointers. Every block that's part of a file is then marked, or allocated, in this new BAM. Splatted files aren't marked and are skipped over. Once all the directory files have been traced, this new BAM is written to track 18, sector 0.

Don't use the Validate command on commercial disks, which may have certain tracks allocated for specialized uses, such as copy-protection schemes. Likewise, there's no need to validate a write-protected disk. Finally, don't attempt to validate a disk containing random-access files (I'm not talking about relative files). Programs such as databases use this type of file most often.

### COPYING A FILE

The following Copy command duplicates files, including relative files, on the same disk:

Basic 2.0: OPEN 15,8,15,"C0:new filename = old filename":CLOSE 15  
Basic 7.0: COPY "old filename" to "new filename"  
DOS Wedge: @C0:new filename = old filename

It can also combine up to four files into a single file—most often sequential files, such as small word processing files. Copy will not merge two program files into one recognizable program, and don't attempt to combine relative files!

The syntax for combining two files is:

Basic 2.0: OPEN 15,8,15,"C0:new file = old file1,old file2":CLOSE 15  
Basic 7.0: CONCAT "add file" to "master file"  
DOS Wedge: @C0:new file = old file1, old file2

### TIDYING UP

Anyone who's owned a Commodore for a while probably knows how to load a directory by entering LOAD "\$",8 (C-64) or DIRECTORY (C-128). DOS Wedge users can bring a nondestructible directory listing to the screen by

entering @\$\$. They can also slow the screen scrolling by pressing the control key, and stop and start it by pressing the space bar.

The DOS Wedge always assumes device #8 and directs all communication with it, but you can easily change the control device number by entering @#<device number>. Likewise, C-128 owners can access device 9 or higher by adding the suffix ",D0,U<device number>" to many disk commands.

Also note that the DOS Wedge can be disengaged by the command @Q, then reinitialized by the command string: SYS 52224:@#<device>. This is most useful to C-128 owners who love to push the reset button in C-64 mode!

The Commodore disk operating system is a very powerful and flexible computing environment, with ease-of-use its major strong point. Experiment with DOS, but use an expendable disk! You'll find it a ready friend in time of need. ■

*John Ryan, one of RUN's contributing editors, sufficiently overcame his fear of DOS to share his hard-won knowledge.*

# Multitasking Comes To the C-64

*This amazing program enables you to run three Basic programs  
at the same time.*

By MICHAEL INGRASSIA

**S**o, you thought your C-64 could never do multitasking! Well, think again. Now that capability of its more expensive big brother, the Amiga, is yours with MOS (multitasking operating system) 1.0, which lets you edit and run two or three Basic programs at the same time. As a bonus, MOS 1.0 is short and easy to type in. In fact, the code is amazingly compact for all that it does.

Possible applications of MOS are myriad and challenge the imagination. How about playing background music with one program while playing a game with another or printing a clock on one screen to keep track of your time running a program on another?

Maybe you'd like to display a document file while checking the code that accompanies it; compare two versions of a program by running them alternately; examine a disk directory without destroying the program in memory; or display variable values while a program is running? All are within easy reach once you start using MOS.

And even if you never use MOS for multitasking, its ability to load three programs at once so you can run or edit them in any order without accessing the disk drive makes it worthwhile to have on every disk you use.

To explain multitasking, here's an analogy from college life. If, as frequently happens, two adjunct professors share a desk, at the end of the first professor's office hours, he gathers up his materials from the desktop and puts them into his briefcase, leaving the desktop free for his colleague's use. Then the second professor comes in, removes the materials he needs from his briefcase and sets them out on the desk. Changing the contents of the desktop constitutes a context switch.

My desk, on the other hand, is single-

The MOS 1.0 start-up screen, showing the three spreads.

tasking. I don't share it with anyone, and it's covered with all sorts of things—books, correspondence, a nameplate, my wedding picture. I couldn't possibly pop all those things into a briefcase to give someone else a place to work.

The Basic operating system that's built into the C-64 is like me. It "takes over the desk," getting out its wedding picture and nameplate and generally making itself at home in memory. Or, to be more exact, it fills memory with data, values and addresses of routines needed to run a program. To make Basic multitasking, so context switches can take place between Basic programs in the C-64's memory, these values and addresses must be saved and restored at each switch. That's what MOS does.

## PROGRAM OVERVIEW

The C-64 provides only 38K of Basic workspace, but most Basic programs occupy only a fraction of that, so workspace is not a major limitation for MOS. (Divide the number of blocks a program fills by 4 to determine roughly how many K it fills. Most of my Basic programs are under 7K in length.) MOS chops the 38K into three areas called "spreads," plus an area for its own workings. Spread 1 can hold a 10K program,

spread 2 a 12K program and spread 3 an 11K program.

To run three programs at once without becoming hopelessly confused, you need more than one screen. The Amiga, for example, "partitions" the screen into individual windows for the programs that need to display output. However, this would be difficult to accomplish on the C-64, so I've used "window shades" instead of windows. Pull the top shade all the way down and that's all you see. Raise it halfway and pull the second shade all the way down, and you see half of the first shade and half of the second. Lift both shade screens, and the third screen appears as a backdrop. (See below for information on the keys to manipulate these shaded areas.) The top shade shows spread 1's output, the second shade shows spread 2's output and the stationary backdrop shows spread 3's output.

You're probably wondering how the CPU can execute three programs at once. Well, of course, it can't really, but by dividing its processing time equally among the three programs, it gives that illusion. This division of effort is called time-slicing, because each program gets slices of the CPU's time in "round-robin" fashion. If one of the programs fin- ▶

## WORLD CLASS LEADER BOARD Pro Golf Simulator

Now you have the opportunity to play the same courses that have challenged golf's greatest legends. "WORLD CLASS" LEADER BOARD features three famous 18-hole golf courses and each hole authentically reproduces the distance, traps, trees, rough and water hazards of:

St. Andrews - "The Most Revered Course in Golf"  
Doral Country Club - "The Florida Blue Monster"  
Cypress Creek - "The Largest and the Finest!"

The fourth course, designed specifically for "WORLD CLASS" is the "GAUNTLET COUNTRY CLUB". Only those who have mastered the best courses in the world should expect to come close to par at "THE GAUNTLET".

"WORLD CLASS" will challenge you with the same strategy and option decisions you face in your real game. And because the look and feel are so life-like, it may improve your actual golf game as well!

C-64/128, AMIGA, IBM PC, APPLE II SERIES, MACINTOSH

## HEAVY METAL Modern Land Combat

Do you have the courage, skill and intelligence to move up the ranks in today's modern army? Here's your chance to find out.

Find yourself in a full simulation of an M1 A1 Abrams tank, the U.S. Army's most sophisticated and powerful main battle tank.

Or how about behind the wheel of an XR 311 FAV (fast attack vehicle) going over 100 mph attacking enemy supply depots. Trying to defend your supply stations is going to be less difficult using an ADAT (air defense anti-tank) system, but it will never be easy. You'll face a challenge you never expected to get in OTS (Officer's Training School). Add to this the fact that battles are going on at three different fronts at once and you'll soon find out what you're made of. Do you have what it takes? TAKE THE HEAVY METAL CHALLENGE TO FIND OUT!

C-64/128, AMIGA, IBM PC

## ECHELON Space Flight Simulator

As a top ISF pilot you are given command of a C-104 Tomahawk and are stationed in Patrol Zone 106. Yours is the only patrol craft in this zone and you must fly daily reconnaissance missions and search for artifacts and clues that may reveal the location of the Space Pirate Stronghold.

ECHELON is a true simulator that puts you at the controls of the C-104 and in the heart of the action. The craft can be operated inside the patrol zone under 3 different classifications. These include:

- (1) Scientific - This level is for those who wish to fly, explore and gather information without being attacked.
- (2) Patrol - Encounter enemy spacecraft while exploring the unknown.
- (3) Military - Non-stop action facing hostile enemy spacecraft.

## MULTITASKING

ishes executing before the others, the CPU just shifts to dividing its time between the two still running.

You'll notice the time-slicing, because each of your programs will run about one-third slower than normal. Actually, it will run even a little slower than that, due to the complexity of context-switching. Still, MOS is cheaper than buying three computers!

Normally, only the current screen is affected by input and output, including input from the keyboard. Whichever program gets to the keyboard buffer first gets any input from the keyboard, so make sure you never have two programs wanting input at the same time. In Interactive mode, there's no problem, because you can specify which spread gets the input by using the Spread command (see below).

### USING MOS

Listing 1 is the main MOS program in the form of Basic hex Data statements. Type it in, using RUN's Checksum program, and save it to disk. Next, run it, and it'll write to disk a seven-block ML file named "+MOS ML". Then boot this ML file by entering:

```
LOAD "+MOS ML",8,1
SYS 37891
```

The second line directs the computer to load MOS at memory address 37891.

Portions of all three screens will appear, with green for the top shade, orange for the middle shade and purple for the backdrop. The cursor will be blinking on the green screen, indicating that you're ready to begin working with spread 1.

Use the following function keys to raise and lower the shades:

**F1**—Lowers the top shade.

**F2**—Raises the top shade.

**F3**—Lowers the second shade.

**F4**—Raises the second shade.

These keys operate in both Direct and

Program modes, and they're also placed in the keyboard buffer for use by your programs. If you wish, you may write your programs in such a way as to ignore the function key input or disable shade-moving before your program executes by entering POKE 38226,0. To restore use of the function keys, enter POKE 38226,255. For now, hold down F1 until the top shade has descended completely.

To witness three programs running simultaneously, type in Listings 2 and 3 and save them to disk. Listing 2 is a Basic clock program, and Listing 3 is a program that displays the values of variables as they execute in spread 1. Load each into a spread as follows:

```
LOAD "LISTING 2",8
SPREAD 2
LOAD "LISTING 3",8
SPREAD 3
LOAD "LISTING 3",8
```

Naturally, you need to substitute whatever filenames you're using in place of "Listing 2" and "Listing 3." Next, type SRUN <return>, and all three will execute. This sequence assumes you're starting with spread 1, but you can change the order if you want. Also, if you're running only two programs, there's no need to load anything into an empty spread.

### MOS COMMANDS

**SPREAD n** (n *must* have the value 1, 2 or 3) lets you switch from one spread (spread 1, by default) to another.

**SRUN** actually runs the programs simultaneously. You can be in any spread when you enter this command. To stop one program from running, tap the run-stop key as usual, but to stop all the programs, you may need to hold the key down. Immediate mode is locked out until you get the message SRUN FINISHED.

To run a single program, just go to

the desired spread and type RUN; SRUN is unnecessary.

Note that you may accidentally execute a SPREAD or an SRUN if you have a syntax error in a command with READ or RUN in it. That's how MOS characterizes the new commands.

### MISCELLANEOUS NOTES

You'll notice that the separate screens have steady raster edges until you perform a disk operation. Because of the flickering during disk accesses, I recommend that you have only one screen visible at those times.

The background color of the spreads 1, 2 and 3 can be changed with a POKE 38213, POKE 38214 or POKE 38215, respectively. Avoid poking 53281, because you can't tell which screen will change color.

Should you accidentally press run-stop/restore while using MOS, reinitialize it by entering

```
SPREAD 1 <return>
SYS 37891 <return>
```

whether you can see your input on the screen or not.

You may experience some difficulties with program compatibility when using MOS. More than one program, including MOS, may need the same locations in memory. Also, the spread programs may want to divert some of the low-memory vectors that MOS has diverted for its own purposes.

Programs (even machine language programs!) that stick to Basic-style memory management are most likely to run with no problem. Your best bet is to run only programs that you thoroughly understand. And keep in mind that MOS doesn't use any of the 4K of memory from location 49152 up. R

*Michael Ingrassia is a member of the mathematics and computer science faculty at the State University of New York, New Paltz.*

# Announcing a Special Software Offer From *RUN* Magazine

## GREATEST HITS VOL. I

*RUN* Magazine's editors have compiled a disk with 12 of the best programs published on our ReRUN disks. These outstanding programs are a "must" for the software library of all Commodore 64 and 128 users. GREATEST HITS VOL. I includes the following programs:

PROGRAM TITLE	DESCRIPTION
▶ HOME RUN DERBY	One or two players can test their batting and pitching skills
▶ SONGFEST	Compose songs and music with this keyboard program
▶ PULSING PICTURES	Create the illusion of waterfalls, spinning wheels and a variety of other moving patterns
▶ STACK	The famous "Towers of Hanoi" game with four levels of difficulty
▶ AUTORUN	Create self-running programs that automatically begin execution after loading
▶ AUTONUMBER	Automatic line-numbering utility
▶ LABEL MAKER	Create and print out multiple copies of mailing labels
▶ ARITHME-SKETCH	Great educational programs for elementary school students
▶ MURDER BY BYTE	Find out who committed the crime in this colorful "whodunit" for your 128
▶ DISK KEEPER	Maintain your disks with this handy all-purpose program
▶ NEEDLEGRAPH	Let your computer help create needlepoint and other design work
▶ HOME INVENTORY	Keep track of your household inventory of valuables on your C-64 or 128

INCLUDES DISK-BASED DOCUMENTATION

# IS YOUR FAMILY THIS WELL RELATED?

**SPECIAL BUY ONE GET ONE FREE!**  
See your local Commodore dealer for details from 1/1/88 thru 1/31/89

other instruction manuals.

**Marry into the family.** Now, when it comes to improving your looks, the best way is by marrying into our family. Because GEOS Text and Graphics Grabbers take your old data (like Word Writer,† Paper Clip,† Print Shop,† or Newsroom,†) and convert it into GEOS format so that your C64 or 128 can deliver beautiful offspring quicker than you can say, "Yeah, but how am I gonna convert all my non-GEOS files?" And that's pretty darn quick.

So if you'd like your software to relate to each other better, why not move in with us? After all, the last thing you need from your software is family problems.

If your productivity programs don't relate to each other, it's time to consider adopting GEOS,™ the totally integrated software system that magazines like *Commodore*, *RUN*, *Info* and *Compute!*'s *Gazette* have recognized as Commodore's first family of software.

Like any good family, GEOS products work together and grow together. In fact, for every application you add, your capacity for production actually multiplies.

**A strong family resemblance.**

All GEOS products work and look pretty much the same.

Same menus. Same icons. So once you learn how to point and click a mouse, you pretty much know how geoPublish, geoFile, geoCalc and every other family member works, too. Pretty simple, huh?

Well, that's the idea. GEOS family members freely swap data with one another, too, so importing text and graphics between programs is never a problem. Which means you spend more time creating stuff and less time deciphering all those

All GEOS programs look and work the same way.

The brightest minds are working with Berkeley.

## THE GEOS FAMILY

- GEOS 2.0\*** \$59.95  
The Graphic Environment Operating System for C64's and C128's. With WYSIWYG word processing, spell checking, mail merging, full color painting, fast-loading disk-Turbo and support for all GEOS-compatible applications. GEOS 128 available at \$69.95.
  - GEO PUBLISH\*** \$49.95  
The desktop publisher with a host of professional features for creating flyers, newsletters, brochures and more.
  - DESKPACK PLUS\*** \$29.95  
Graphics Grabber for importing art from Print Shop, Newsroom and Print Master; Calendar; Icon Editor; Blackjack; geoDex and geoMerge. Runs in both 40 and 80 column mode.
  - FONTPACK PLUS\*** \$29.95  
A collection of 53 fonts for use with GEOS applications. Runs in both 40 and 80 column mode.
  - GEOCALC\*** \$49.95  
Spreadsheet for analyzing all types of numerical data. Available for 128's at \$69.95.
  - GEOFILE\*** \$49.95  
Database manager that sorts, edits and prioritizes data. Available for 128's at \$69.95.
  - GEO PROGRAMMER 2.0\*** \$69.95  
An assembly language authoring tool and debugger. Takes full advantage of memory space in both C64's and C128's.
- To order, call 1-800-443-0100 Ext. 234 or see your local Commodore dealer.  
\*Trademarks of Berkeley Softworks.  
†Registered trademarks of others.

All GEOS products work and look pretty much the same.

# RUN SPECIAL ISSUE

Get A Jump On The 5th Annual RUN Special Issue—

**ORDER  
NOW!**

And catch this runaway best seller for only \$3.95!

The RUN Special Issue has become a must-have for every Commodore C-64 and C-128 user. And this year's issue promises to be our hottest RUN yet—supplies won't last long so don't delay. Rush your order in today.

## DON'T WALK. **RUN**

### VALUABLE REFERENCE CARD FREE WITH EVERY ISSUE!

A GIANT pull-out programmers' guide chock full of handy codes, peeks, pokes, commands and more for both the C-64 and C-128. With the latest info for the 1351 Mouse, RAM Expanders and 1581 Disk Drive.

## PLUS

### FAST START SPECIAL ISSUE PROGRAM DISK

To really RUN with speed, order the Special Issue Program Disk—every program in the issue on disk ready to load and run.

PLUS YOU'LL RECEIVE THESE FREE BONUS PROGRAMS:

- C-128 Sprite Librarian
- C-64 Sprite Database
- A Show Of Hands—sign language tutorial with graphics

### A Head Start For Both Beginners and Pros

Be the first to enjoy these tips, utilities, games and tactics—priceless programming information and applications that will boost your productivity and computing power. Here's just a quick glimpse of what you'll get...

#### ● The Best of Commodore Clinic

Ten pages of the most-asked questions on programming, hardware and software from RUN's readers—with insightful and revealing answers from Commodore computing expert Lou Wallace.

#### ● 100 Never-before-published "Magic" Tricks

We've thrown in a dozen of our favorite computing tricks from 1988, PLUS a hundred dazzlers you've never seen before.

#### ● Arcade Games—Including The Gravitron, an Exciting Space Adventure.

Test the limits of your skill and coordination with a challenging variety of new arcade games.

#### ● Programming, Utilities and Tutorials

Whether you're a beginner or advanced programmer, you'll add speed, power and productivity to your C-64 and C-128, including:

- Adding C-128 sprite commands on your C-64
- Sprite tutorial for the beginning C-128 Basic programmer
- Programming sound on the Commodore
- Writing relative data files in Basic

To Run Away With the 5th Annual Special Issue call 1-800-343-0728 (in New Hampshire, 1-924-9471) Or...look for the convenient post-paid order envelope in this issue!

### RUN! Special Issue

RUSH me \_\_\_\_\_ copies of the 5th Annual Special Issue with my FREE Reference Card.

Enclosed is \$3.95 for each Special Issue.

# Answers to Important Questions About Lyco Computer!

## Why shop at Lyco Computer?

Lyco Computer is one of, if not the largest, and most established firms to provide only quality name brand computer products at prices 30% to 50% below retail. We've set many industry standards, and we are setting the pace for many more in the future. Our standards include: a separate department for customer service; a price guarantee; guaranteed factory fresh merchandise; diverse payment and shipping policies, including a C.O.D. policy which allows customers to have products in their hands before paying anything. Selection places Lyco at the forefront of the industry. Due to our in-stock volume, we cannot advertise all of our products. If you do not see the product you want advertised, call Lyco Marketing toll free.

## How do I know I will get the product I need?

Our marketing staff is well-educated in the computer industry. They receive continuous formal training by our manufacturers which enables them to develop and maintain a high degree of expertise on the products they represent. Though our strict guarantee on providing only new merchandise prohibits free trial periods and a guarantee on compatibility, a wealth of knowledge is available to our customers to help with the purchasing decision. As thousands of people every week capitalize on our savings and services, we hope you too, will make Lyco Computer your first choice.

## What about warranty or service?

We decided several years ago that a Customer Service Department was needed in the industry. Unfortunately, few of our competitors offer this service. Our Customer Service Department is available at (717) 494-1670 to provide assistance in all warranty matters. Our product line enjoys "name brand recognition," and we back all of our manufacturer's stated warranty terms. Many manufacturers will allow defective products to be exchanged. Before returning any item that appears to be defective, we ask that you call our Customer Service Department to assist you in determining if the product is defective. If the product is determined defective, they will give you a special authorization number and speed processing of your order.

## Will you rush an item to me?

Since 1981, we have set the standard in the industry by processing orders within 24 hours — not 4 to 6 weeks. We offer next day air, two day air, standard UPS, and postal international shipping services. Our records show we fill 95% of our orders daily. Temporary shortages are normally filled within 10 days. If an order cannot be filled within 60 days, we refund your money in full, unless you choose to wait for the order and benefit from the price savings. Any time prior to shipment, you may cancel or change the out of stock product by contacting our Customer Service representatives.

## How do I order?

Send your order to Lyco Computer, P.O. Box 5088, Jersey Shore, PA, 17740. Or, call 1-800-233-8760 or (717) 494-1030. We provide four payment methods. We have always accepted C.O.D. orders through UPS. Prepaid orders over \$50 are shipped freight-free. For orders under \$50, please add \$3 for freight. Orders prepaid by a certified check or money order are shipped immediately. Personal and company checks require a 4 week waiting period prior to shipping. Visa and Master Card orders are accepted for your convenience, but we cannot pass along the 4% discount offered for cash. Purchase orders are accepted from Educational Institutions. We only charge sales tax on items delivered in Pennsylvania. For APO, FPO, and international orders, please add \$5 plus 3% for priority mail. Advertised prices and availability are subject to change.

**Sales: 1-800-233-8760 or 717-494-1030**

“ For my money, RERUN DISKS are the greatest.

I've tried others, but found that the quality and number of programs offered on the ReRUN disk can't be beat. My two teen-aged sons agree. They enjoy the games and educational programs. The time and money that I've saved with ReRUN has helped me—and my entire family—become more productive computer users.

—Jim Palmieri, ReRUN Subscriber  
Farmingville, NY

Discover the value, variety and ease-of-use that ReRUN disks offer. Join the thousands of RUN Magazine readers who subscribe to ReRUN. Each disk is packed with programs from the two most recent issues of RUN, plus never-before-published BONUS programs. ReRUN is great software at an affordable price, including:

- Word Processing
- Spreadsheets
- Data Bases
- Educational Applications
- Home Entertainment

# RE RUN

# LEARN TO WALK BEFORE YOU RUN

WE RECEIVE MANY LETTERS from new Commodore owners who want to type in program listings from *RUN* and need help in getting started. To answer many of the questions novice users have, we present the following guidelines.

1. First, keep in mind that as a beginner you should enter only short Basic programs. Avoid machine language listings and lengthy Basic programs until you get the hang of what you're doing.

2. To help you catch mistakes in typing in listings, we publish *RUN*'s Checksum program elsewhere in this issue.

3. If you intend to save the program you're typing in on a brand new disk, you must format that disk. To do this, insert the disk in your drive and type:

```
OPEN15,8,15 <press return>  
PRINT#15,"N0:NAME,##" <press return>
```

The ## is a two-character identifier that can be any combination of letters or digits. NAME can be any title for the disk that you choose, as long as it's 16 characters or less.

After entering the above lines, wait for a few minutes while the disk spins inside the drive. When the disk stops, the formatting is done. Then type:

```
CLOSE15 <press return>
```

In 128 mode on a C-128, you can shorten this procedure by typing:

```
HEADER "NAME,##" <press return>
```

*Caution:* The formatting process erases any material already on the disk, so if you're formatting a used disk, make sure it doesn't contain any programs you want to keep. See item 11 below, on reading the disk directory, if you need to find out what's on the disk.

4. Before you start typing in a program listing, your computer's memory needs to be empty. To make sure it is, turn the computer off, wait a few seconds, and turn it on again.

5. As you type in the listing, remember to press the return key after typing each line. This enters the line into memory.

6. If you want to review what you've entered, type LIST and press the return key; all the lines you've entered will scroll by. You can slow the scrolling on the C-64 by holding down the control key, and on the C-128 by pressing the no-scroll key. To view certain specific lines, type LIST, followed by the line numbers you want; then press the return key. For example, LIST 10-50 displays lines 10 through 50, and LIST 20 displays only line 20.

7. If you find an error in a line, delete the incorrect characters with the insert-delete key, then retype that portion and press return to enter the new line in memory.

8. Be sure to save the program to disk fairly often during the typing process. Otherwise, you could lose all your work if a power glitch wipes out your computer's memory. To save a partial or complete Basic program listing, type:

```
SAVE "NAME",8 <press return>
```

In 128 mode on a C-128, you can press F5, type in NAME and press the return key. Here, NAME is the filename you want the program to have, not the disk name you used when formatting.

Each time you save a revised program to the same disk, you must change its filename, or a disk error will occur, even if only one character is changed. An easy way to vary the filename is by adding version numbers to the end of the basic name (Program.1 and Program.2, for example). The numbers will also tell you which version is the latest.

9. If you wish to erase (scratch) unwanted programs from a disk, type:

```
OPEN15,8,15 <press return>  
PRINT#15,"S0:filename" <press return and wait a few seconds>  
CLOSE15 <press return>
```

In 128 mode on a C-128, you can type:

```
SCRATCH "NAME" <press return>
```

*Be sure not to erase the final version!*

10. Always save the final version of a program to two disks, so you have a backup copy in case one of the disks gets damaged. When saving to two different disks, you can use the same program name in each case.

11. To view a complete list of the filenames on a disk (i.e., read the disk directory), type:

```
LOAD "$",8 <press return>  
LIST <press return>
```

In 128 mode on a C-128, you can just press F3.

12. When you know what program you want to load, next make sure you know *exactly* how its filename is spelled in the disk directory, including punctuation, special characters and spaces. A mistake in the filename will keep the load from working.

If the disk directory is still on the screen when you enter the Load command, you can refer to that for the spelling. If the directory will be gone from the screen by the time you enter the Load command, jot down the exact spelling of the filename for reference. Once you're sure of the filename, load the program by typing:

```
LOAD "NAME",8 <press return>
```

In 128 mode on a C-128, you can just press F2, type in the filename and press the return key.

13. After you've loaded the program, enter RUN to use it. ■

# Raising Rainbows

*Mary, Mary, quite contrary,  
see how her garden grows.*

By MARY WILSON

**A**re you tired of crawling in dreadful dungeons and fighting off incredible creatures? Tired of zapping aliens, gobbling dots and frantic races against the clock? Relax with this slow-paced, nonviolent game that will test your skill at windowsill horticulture. Here's the scenario:

You've just returned from an expedition to the Amazon jungle, where you happily stumbled upon a few specimens of the rare and jealously guarded rainbow plant, so named because a single plant produces flowers of various colors. After wading through miles of red tape, the government finally rewarded you for locating the elusive plant by giving you permission to take one small specimen out of the country.

Now that you have your plant safely at home, your top priority is to carefully nurture it and coax it to bloom, so you can gather seeds to start more plants to sell. Success in this venture will assure your fortune, as flower growers around the world will pay fabulous sums for even two or three seeds. So, grab your watering can and box of fertilizer, and let's see if your thumb is green.

## HOW MUCH WATER?

Rainbow Plant for the C-128 is written entirely in Basic 7.0. Type in Listing 1, using *RUN's* Checksum program, and save a copy to disk. Then enter RUN to play.

Since you're a horticulturist, it's assumed that you've potted your plant in the proper soil with the proper drainage. Now you must maintain a delicate balance of light, water, fertilizer and pot size. Your first decision is in which window to place the plant. After you choose, a window will be drawn, with your plant on the sill and the plant's condition printed in red in the lower-right corner of the screen. At the lower left you'll see

**It takes patience and care to coax the rainbow plant into bloom.**

a menu of things the plant might need. You can select one or just leave the plant alone for a while.

As your rainbow plant grows, more decisions will be necessary. For example, it will occasionally need a larger pot so it doesn't get rootbound and die. Be careful, though: If you choose a pot that's too large, the plant won't be able to absorb the water in so much soil and will, in effect, die from overwatering. If the plant does die, the program will tell you why, so you can avoid the same situation the next time.

You can move your plant from window to window to get the best exposure. As you do so, the color of the curtains will change to help you remember from which direction the light is coming.

You may notice some unusual screen characters in the curtains. These are standard keyboard graphics, but some of them look strange because of the distortion that occurs when printing to a hi-res screen. In this case, the distortion is an advantage.

If all its needs are met, your plant will grow ten leaves, and then flower stalks and buds will appear. Finally, if it's still in good condition, it will burst into bloom. Your C-128 screen will be full of color, and your thumb will be green!

*Mary Wilson is a great-grandmother who formerly worked for the Florida State Health Services, so she knows a lot about nurturing living things.*

### Things you should know.

We place these ads months in advance, so prices and availability can change (usually for the better). We accept charge cards, cashiers checks, money orders, and personal checks (3 weeks clearance). Free shipping on orders over \$100 in the continental U.S. On orders under \$100, add \$3.00. For AK, HI, FPO, APO, add \$5.00 to all orders. For Canada & Puerto Rico, add \$7.50 to all orders. You must call for a Return Authorization # before returning defective merchandise. We will replace defective merchandise with the same merchandise; other returns are subject to a 20% restocking fee. Order lines open M-TH 9:00 AM-7:00 PM; FRI 9:00 AM-5:30 PM; SAT 10:00 AM-4:00 PM Eastern Time. For information or customer service, call 412-361-5291 M-F 9:00 AM-5:30 PM Eastern Time.

# Screen Basic

*If you've had a hard time programming video screens,  
here's a pleasant surprise!*

By JOHN RYAN

**N**ormally, video programming on the C-64 entails a myriad of Peeks and Pokes to accomplish the simplest task, and multiple-screen processing can be a daunting challenge to even the most seasoned programmer. Screen Basic alleviates this problem by adding 13 video programming commands to Basic 2.0. These commands provide an easy-to-use programming environment that even includes multiple screens and raster interrupts.

Screen Basic runs in both Program and, to a limited degree, Direct modes. It features three separate video screens, each with semi-independent color RAM, as well as separate background and border colors, and, by setting up raster interrupts, you can display two of the screens simultaneously. The program also provides a command to copy the Commodore character set from ROM into bank 0 or 2. This, used with the Raster command, will display two full custom character sets at once. You can save, load, "grab" and "call" video screens with Screen Basic, as well as read the error channel of your disk drive—without a line full of cryptic commands.

The program in Listing 1 creates the machine language program you actually use. Type in Listing 1, using *RUN's* Checksum program, and save it under any filename. Then run it to generate the executable machine language object code.

To load Screen Basic, enter LOAD "SB +", <device number>, 1. Then enter NEW and SYS 50176 to install it in the C-64's operating system.

## THE COMMANDS

Below are explanations of all the new commands Screen Basic provides. Each command must be preceded by an @

symbol, or a syntax error will result. Also note that most of the commands require one or more parameters.

**@VIDEO <screen number>**. As I mentioned, Screen Basic provides three separate video screens. Video 1 starts at memory location 1024 (\$0400), video 2 at 32768 (\$8000) and video 3 at 33792 (\$8400). These addresses must be used when poking information to the various screens. Print operations to the screens are handled automatically by the program.

Since there's only one memory area for color RAM information, each time you switch from one screen to another, the current color RAM is stored in memory before the switch is made. When you return to the first screen, the color is restored. This scheme ensures the integrity of your color display, regardless of the screen you're on. (See the @Type command, below, for special considerations.)

**@HUE <screen number, color number>**. The Hue command changes the background color of any video area. The colors are numbered 1-16, just as they're listed on the C-64 keyboard. If the screen specified is the current video area, the change is immediate; if not, it becomes apparent when you bank to the specified screen. (Screen Basic remembers the color of each screen.)

**@BRDER <screen number, color number>**. Use the Brder command to change the border of a screen to a specified color. The rules are the same as for the @Hue command.

**@TYPE <screen number>**. This handy command lets you print to any of the screens, regardless of which one is currently displayed. For example, by entering @TYPE 2 you can send information being printed to the video matrix starting at 32768, even if video 1 is on the screen.

Note that even though the characters are being printed to a different area of memory, color RAM for both video areas is the same. Whenever possible, you should do your printing in the same foreground color as your current screen, or use the @Raster command (below) to "hide" the color changes.

You can return to your current screen only by issuing another @Type command. @Video won't work in this instance, since your original video area won't have changed.

**@ERASE <screen number>**. The Erase command clears a specified video area without clearing the color RAM of your current screen. It's a good idea to use this command during program initialization, as the video areas may be filled with random data. It works for all video areas, regardless of the one you're currently in.

**@GRAB <screen number>**. Grab stores the screen and color information for the current video area in memory. Three distinct storage areas are set aside for this purpose, so all three screens can be stored at once. Note that the screen number must be the same as your current video area for this command to work properly, and @Grab won't store hi-res screens. (Also see @Call, next.)

**@CALL <source screen number, target screen number>**. This versatile command lets you move previously grabbed screens to any video area. By calling two or more screens in succession, you can even achieve "page flipping" animation effects. Be careful of the syntax for this command: The source number is the number of the area previously grabbed, and the target number is the screen you're calling it to (your current screen, if color RAM preservation is important—this is not a swap command).

**@RASTER <beginning scan line, ending scan line>**. This powerful com-

RUN it right: C-64

mand displays two screens simultaneously. The two parameters, which can range from 1 to 254, tell the program where the division between the screens should be and where to restore the first screen. For instance, @RASTER 100, 254 will display video area 1 up to scan line 100, then video area 2 to scan line 254. When the screen is divided, the background and border colors of both video areas are displayed at once.

Note that only scan lines 40-253 are visible, so anytime you use parameters 1-39 or 254, the interrupt will take place off the visible screen. Keep in mind, too, that this command can be used only while you're on video screen 1 or 2, because those are the screens the raster interrupt displays.

To achieve a rock-solid division, don't specify a scan line that will cut through the middle of printed screen characters. Also, if you wish to move sprites across the raster "seam," remember that two individual banks of memory are being displayed. In order to display a sprite in video bank 2, the sprite definition must also be stored in video memory from 33784, for sprite 1, to 33791, for sprite 8.

The formula for finding the sprite pointer is (storage address - 32768)/64. Thus, a sprite image stored at 40960 (\$A000) would have a pointer of 128—(40960 - 32768)/64. The best place to store sprite images in bank 2 is from 40960 to 45056, if a full alternate character set is not being used, or at 33792, if video screen 3 is not being used.

Don't reinitialize Screen Basic with the Raster command activated.

@OFF. This command turns off the raster interrupt.

@MEM <1 or 2>. The @Mem command makes it easy to use custom character sets. (In fact, it's the only way you can use custom character sets with Screen Basic.) If 1 is the parameter, the character set will be copied from ROM into RAM, starting in bank 0 at location 12288 (\$3000). If the parameter is 2, the set will be copied into memory starting at 40960 (\$A000). With an @Raster command, you can display both sets simultaneously, as demonstrated by the program in Listing 2. Just remember to protect the bank 0 character set from Basic by lowering or raising Basic mem-

ory, if your own program is very big.

To return to the standard character set, just reinitialize Screen Basic with SYS 50176.

@PUT <"filename">. The @Put command saves the video area you're viewing to a special disk file denoted by the suffix .scn. Both screen RAM and color RAM information is saved. Don't include the .scn in the command, because the program supplies it automatically. The device number is also supplied automatically. To change it from default 8, see Program Notes, below.

@SLD <"filename", screen number>. This screen loading command reads a previously saved screen file from disk. With @Sld, it's easy to load several files at once when a lot of information must be presented and color RAM preservation is important. The file can be read into any video area specified after the filename, regardless of which screen was saved with the @Put command. If you specify the video area you're currently viewing, you'll see the loaded screen immediately; if not, the screen and color information will appear when you bank to the video area the screen was loaded to. As with the @Put command, don't include the .scn filename suffix in an @Sld command.

@DISK. Use this to view the error status of the last device accessed.

#### PROGRAM NOTES

Screen Basic occupies memory locations 50176-52162 (\$C400-\$CBC2) and uses locations 32768-50175, so both areas are unavailable for your use. The

#### Examples of the commands used in Screen Basic.

program protects these memory areas by lowering the top of Basic to 32768, which chops about 8000 bytes off the top of free Basic memory.

You can change the disk drive device number for screen loads and saves by poking 1 into location 52126.

If you use the run-stop/restore key combination on any screen but video area 1, you won't be able to see what you're typing, and the computer will seem locked up. You can get out of this by entering @TYPE 1, thus returning the screen editor to video area 1; but, better yet, disable run-stop/restore with POKE 808, 239: POKE 792, 193.

You can't use variables as parameters for any of the Screen Basic commands.

To include Screen Basic commands in a Basic program you're writing, place the following three-line routine at the beginning of your listing:

```
10 IF FLAG = 1 THEN 30
20 FLAG = 1:LOAD "SB +", <device
   number>, 1
30 SYS 50176
```

Due to the nature of video programming, I originally wrote Screen Basic to operate in Program mode only. However, after realizing that some of the commands (@Hue, @Brder) could be useful in Direct mode, I added a limited Direct Mode option. In this option, only one Screen Basic command is permitted per line, and it must be first. You can still have multiple Basic 2.0 commands in a line, as long as they follow the Screen Basic command. For example, @RASTER 1,100: PRINT "test" is legal, while PRINT "test":@HUE 1,1 and @RASTER 1,100:@HUE 1,1:@BRDER 1,1 are not. In Program mode, any combination of commands may be used. ☐

*John Ryan, an air traffic control instructor by profession, is a freelance computer programmer in his spare time.*

#### Listing 1. Screen Basic program.

```
Ø REM SCREEN BASIC ML DATA LIST 3Ø I=5Ø176:X=Ø :REM*219

# COMMODORE CLINIC

Discover how you can access the 80-column chip through Basic, connect a 1702 monitor to a VCR or copy single programs from ReRUN disks.

By LOU WALLACE

**Q** You mentioned in your July Clinic that the 1702 makes an excellent monitor for a VCR system. Exactly how would one connect them together? Also, how can I copy single programs from the ReRUN disk to another disk, so I can have all games on one disk, utilities on another, etc?

—GEORGE GOODWIN  
COCOA BEACH, FL

**A** Exactly how to connect them will depend on your particular system. On mine, I connected the two (using a pair of gold-plated shielded RCA cables) from the video-out plugs on the VCR to the front (not the back) connections on the 1702. In this way, I can use the 1702 as a TV, with the VCR supplying the tuner.

As for copying files, no problem. On the 1541/1571 Test Demo disk is a two-drive copy program by Jim Butterfield that will do the job for you. The 1571 Test Demo (for C-128 owners) has the DOS Shell program, which will make single-drive file-copying a snap. If you have a C-64 with a single 1541, you'll need to get another single-drive file copier, many of which are available in the public domain.

RUN published a C-64 version of the DOS Shell (November 1987), and our recently released RUN Works disk contains a version called RUN Shell, which works on a 64 or 128 (40- or 80-Column mode), and will work with one or more drives, including the 1541, 1571 and 1581. It also supports the 1700, 1750 and 1764 RAM Expansion Units as RAM drives. It's a program I recommend.

**Q** As I understand it, the VIC-II chip occupies 1048 bytes of the C-64 memory map and consists of 47 registers each. What are the remaining 1001 bytes for? Also, is the VIC-II a ROM or RAM chip?

—S. E. FELLERMAN  
KENSINGTON, MD

**A** You are correct. The VIC-II chip consists of 47 registers, no more. And yes, it does have an extended addressing space (53248-54271). But the

way the computer hardware mapping is set up, addresses of 53295 (\$D02F) and above are just duplicates of the original 47 registers. Writing to them has the same effect as would writing to the first 47 registers. The VIC is neither RAM nor ROM. It's a controller device designed to create the various video displays the C-64 (or C-128) can produce.

**Q** I want to program my C-128's 80-column screen. I can handle Basic 7.0, but machine language is beyond me. Is there any way to access the 80-column chip through Basic?

—TED KROLL  
SPRINGFIELD, MA

**A** There are several ways. While Basic 7.0 does not support the 80-column display with its graphics commands, you can still use the Print command combined with the Window command, character graphics, embedded color and cursor quote-mode commands and the extra 80-column character attributes of underlining (CHR\$(2) or CTRL/B) and flashing (CHR\$(15) or CTRL/O) to generate a wide variety of 80-column displays.

Also, even if you aren't a machine language programmer, you can still access the 8563 VDC chip (the 80-column chip) from Basic, using some of the built-in ROM routines (make sure BANK 15 is in context with the BANK command). The most important routine for this can be found at \$CDCC. This routine will let you store a number (0-255) into any of the VDC's registers. The syntax is:

```
SYS DEC("CDCC"),Value,Register
```

If you want to read the contents of a VDC register, use this command:

```
SYS DEC("CDDA"),0,REGISTER NUMBER:  
RREG A
```

With these two commands, you can return the contents of any of the registers to a variable (I used A in this case). The zero in the first part is a dummy variable, which can be any value.

You can use these to experiment with the C-128's 80-column display. For example, if you wanted to turn on Bit-mapped Graphics mode, you'd set bit 7 of register 25 like this:

```
SYS DEC("CDCC"),128,25
```

You can return to Text mode with:

```
SYS DEC("CDCC"),64,25
```

The 8563 VDC has 37 registers for you to play with, so there are a lot of new things to discover about it. Have fun!

**Q** I typed in RUN Copy, (RUN, February 1988) using RUN's Checksum program, and everything checked out okay. But whenever I try to run the program, my disk light blinks and the computer locks up. Am I doing something wrong?

—ERNEST WILSON  
LANTZ, NOVA SCOTIA, CANADA

**A** The RUN Copy listing is a form of Basic loader that uses hexadecimal Data statements. The listing you typed in was not RUN Copy, but rather a program that created a file called RUN Copy on your disk. From your description, my guess is that you saved the first program you typed in with the filename RUNCOPY. So, when you ran the listing, it tried to create the real RUN Copy file. Instead, it encountered the Basic listing you named RUNCOPY, and it generated a File Exists error.

If that's the case, the simplest way to correct the problem is to rename the Basic loader you typed in, using, for example, RUNCOPY.BAS. Assuming the disk is in drive 8, use this command to rename the file:

```
OPEN 15,8,15,"R0:RUNCOPY.BAS=0:  
RUNCOPY":CLOSE 15
```

This will change the filename to something other than RUNCOPY. Now load and run RUNCOPY.BAS. If you typed it in correctly, your drive should run for a time while the new file is being generated on your disk. When it finishes, you can then load and run the real RUN Copy program. ■

# GAMES GALLERY

By LOU WALLACE

*Let the games begin!*

*Whether you're into arcade games, adventure games, strategies or simulations, tune in each month to this column for reviews, game-playing hints and insights into the companies and programmers who bring you some of the hottest entertainment in the games market. We kick off our column with a look at a genre of fast-action games that provide an up-to-date twist on an old theme.*

If you stretch your memory back to the prehistoric days before personal computers, you might remember a game called Breakout. Created for the cartridge-based game machines of the 1970s, it was an exceptionally successful game idea. The object was to keep a bouncing ball in motion while it slowly chipped away at layers of little blocks, eventually to "break out" and get behind them, whereupon you could rack up huge numbers of points in a few seconds. While it's basically a simple concept, somehow it hit a nerve with arcade gamers, and we played it over and over.

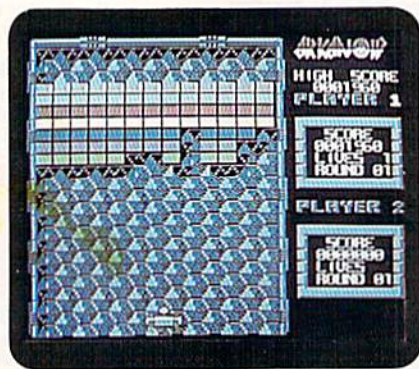

I remember saving the money my wife graciously allowed me for lunch so I could finally buy one of those game machines. Finally, I had enough money. The machine I selected came from Sears, and, incredibly, had built into it a total of seven variations of Breakout. I played those games for months, until I was recognized (in my household, at least) as the greatest Breakout player in all the known universe.

A lot of time and electronic evolution has gone by since then, so I have to admit that I was surprised by the wide current interest in Breakout-style games. Taito's Arkanoid was a huge commercial success as a stand-alone arcade game, and it's no wonder they've transported it to the C-64 (and other personal computers).

Mindscape subsequently released Blockbuster, another game in the Break-

out tradition, and this month I'll take a quick, comparative look at these two games. Just for fun, I'll also look at two Breakout clones that are in the public domain, which means you're free to copy and distribute them to your friends. The results might surprise you.

Arkanoid has received rave reviews all year, and with good reason. The game is a great example of what can be done on a C-64 when you put talented

**With its high quality of graphics and sound, Arkanoid is the clear winner.**

programmers and artists on a project. The graphics are colorful, the sounds are excellent, and the speed of the animation is fast and fluid. It also has 33 different levels, enough to keep you busy for quite a while. Most important, it supports a variety of controllers, including the keyboard, joystick, paddles and the 1351 mouse. It's a pleasure to

use, especially when played with the mouse, and I wish more companies would support it.

Arkanoid offers the same basic game idea as traditional Breakout games, but the layout used for the bricks is different with each level. It also offers a couple of new twists.

One is that "energy blocks" drop at certain times in the game. There are seven types of these blocks, which you must collect with your paddle to produce different results. For example, one makes your paddle longer; another slows the speed of the ball; still another gives you a laser you can use to destroy more blocks. There's a fourth that gives you three balls, which allows you to hit more bricks; but of course it's tougher to follow all three.

The other twist is that odd-shaped creatures appear and work down toward you. If these are hit by your ball, they will deflect it in another direction.

Blockbuster has even more levels than Arkanoid. It starts off with 80 different screens, and has an additional option for you to create 48 custom screens. You can use either the keyboard or joystick, but unfortunately there is no option for either mouse or paddle. That's too bad, for I found the joystick unwieldy and difficult to use.

Blockbuster's graphics are good, but they're not as high in quality as those of Arkanoid. The background is quite dynamic, sporting a fast-moving starfield. While they're novel, I quickly began to dislike those moving stars as unnecessary distractions. Again, while the sound effects are adequate, they're not as good as Arkanoid's.

Blockbuster doesn't have energy blocks, but it does have something similar. When you shoot some bricks, they drop little U-shaped tokens that you can catch and use to "purchase" one or more of the nine weapons and enhancements available. Some of these, such as paddle elongation, lasers and ball slow-down, are similar to those in Arkanoid, but others are entirely different. These include a Torch option, which shows hidden bricks, smart bombs that zap

# UTILITIES UNLIMITED, Inc.

12305 N.E. 152nd Street  
Brush Prairie, Washington 98606

Orders taken 24 hrs. a day;  
seven days a week.

If you wish to place your order by phone please call 206-254-6530. Add \$3.00 shipping & handling; \$2.00 for COD on all orders. Visa, M/C accepted. Dealer inquiries invited.

**WORLD'S BIGGEST  
PROVIDER OF  
C64/128  
UTILITIES**

**Software Submissions Invited**  
We are looking for HACKER STUFF: print utilities, parameters, telecommunications, and the unusual. We now have over 1,000 parameters in stock!

## SUPER PARAMETERS 1000 Pack #1

Utilities Unltd has done it again!!! We have consolidated and lowered the prices on the most popular parameters on the market . . . SuperParameters, now you can get 1000 parameters and our 64/128 nibbler package for just \$39.95!!! This is a complete 10 disk set that includes every parameter we have produced.

## SUPER PARAMETERS 500 Pack #1 and #2

**500 Pack #1 - \$24.95** has the vintage parameters on it that no one else has. This pack comes in a 5-disk set. **500 Pack #2 - \$29.95** has all the most current parameters on it. And put together as only Utilities Unltd. can. All Super Parameter Packs are completely menu driven, fast and reliable. Included on both 500 Packs is our state-of-the-art 64/128 Super Nibbler at no extra charge.

## PARAMETERS CONSTRUCTION SET

The company that has **THE MOST PARAMETERS** is about to do something **UNBELIEVABLE**. We are giving you more of our secrets. Using this **VERY EASY** program, it will not only **READ, COMPARE and WRITE PARAMETERS FOR YOU!** it will also **CUSTOMIZE** the disk with your name. It will impress you as well as your friends. The "PARAMETER CONSTRUCTION SET" is like nothing you've ever seen. In fact you can even **READ PARAMETERS** that you may have already written; then by using your construction set rewrite it with your new **CUSTOMIZED MENU. DON'T WAIT** for months for that one special parameter. **WRITE IT! \$24.95**

**REMEMBER FOLKS, YOU SAW IT HERE FIRST!**

**OVER 5000 UNITS SOLD.  
IF ANYTHING CAN COPY EVERYTHING, THEN THIS IS IT!  
SUPERCARD \$44.95**

Unlike our competitors, we at Utilities Unltd. have been concentrating all our time and effort in developing the latest technology, not on putting third party software in our product line. SuperCard is the product of all that effort. SuperCard is simply the most effective way to back up the latest software releases. It's fast (you can backup an unprotected disk in as little as eight, that's right - 8, seconds. SuperCard works with 1 or 2 1541s and, if you have one, a Ram expander. They say that imitation is the greatest form of flattery. Well, SuperCard is at the forefront, and on the cutting edge of this technology. The cheap imitations are already hitting the streets. There's even one well-known software developer that has produced similar hardware, and then suggests that you steal our software to make their board work. BEWARE. U.U.Inc. will see to it that our software does not work with that cheap imitation!!! U.U.Inc. guarantees that SuperCard will outperform any and all backup utilities on the market or we will gladly refund your purchase price. If there is something you are not able to back up, please call and we will let you know if SuperCard will do it.

## THE 128 SUPERCARD - A, B or C

**(Another first!) A** There is an empty socket inside your 128 just waiting for our **SUPER CHIP** to give you 32K worth of great **BUILT-IN UTILITIES** all at just the **TOUCH OF A FINGER**. You get built-in features: **FILE COPIER, NIBBLER, TRACK & SECTOR EDITOR, SCREEN DUMPER** and even a 500/1200 baud **TERMINAL PROGRAM** that's 1650, 1670 and Hayes compatible. Best of all, it doesn't use up any memory. To use, simply touch a function key, and it responds to your command. **B** Has super 81 utilities—a complete utility package for the 1581. Copy whole disks from 1541 or 1571 format to 1581. Many options include 1581 disk editor, drive monitor, Ram writer and will also perform many CP/M & MS-DOS utility functions.

**C** "C" is for combo and that's what you get. A super combination of both chips A and B in one chip, switchable at a great savings to you. **ALL CHIPS INCLUDE 100 PARAMETERS FREE!**  
Chips A or B: **\$29.95 @**  
Chip C: **\$44.95 @**

**V-MAX, RAPID LOCK  
DIGITAL SOLUTIONS™**

## ADULT GAME & GRAPHICS DATA DISKS

**GAME:** A very unusual game to be played by a very **OPEN MINDED** adult. It includes a **CASINO** and **HOUSE OF ILL REPUTE**. Please, you **MUST BE 18** to order **EITHER ONE**.  
**DATA \***: This **POPULAR** disk works with **PRINT SHOP** and **PRINT MASTER**.  
Now version 1+2 **\$24.95 ea.**

**For product support, call  
between 10 a.m. to 4 p.m.  
Pacific Time.**

**SIMILAR PRODUCTS MAY APPEAR ELSEWHERE LATER. JUST REMEMBER YOU SAW THEM HERE FIRST!!**

## THE FINAL CARTRIDGE III versus super snap shot

The Cartridge war heat up. Well folks, here's the real story!!! In their latest ad, our competition claims they are getting better reviews. Well, that's partly true . . . but mostly false. First of all, they are comparing reviews written about the old Final Cartridge and not the current version III. We at Utilities Unlimited Inc. are so sure that you would choose The Final Cartridge over that other one we make the following offers:

For those of you who bought the super snap shot believing that you were buying the best, then saw the Final Cartridge III, we offer you **\$30.00 for your super snap shot, as a trade in for the BEST . . . The Final Cartridge III.**

Every Final Cartridge III now includes many features not found in super snap shot as well as our newest 64/128 nibbler and 100 Super Parameters.

**(NOW W/ CLOCK) Still only \$54.95**

## SUPER GRAPHICS 1000 PACK

That's right! Over 1000 graphics in a 10-disk set for only **\$29.95**. There are graphics for virtually everything in this package. These graphics work with Print Shop and Print Master.

## LOCK PICK—THE BOOKS—for the C64 and C128

Lock Pick 64/128 was put together by our crack team, as a tool for those who have a desire to see the **INTERNAL WORKINGS** of a parameter. The books give you **STEP-BY-STEP INSTRUCTIONS** on breaking protection for backup of 100 popular program titles. Uses **HESNON** and **SUPEREDIT**. Instructions are so clear and precise that anyone can use it. **\* OUR BOOK TWO IS NOW AVAILABLE \***

**BOOK 1:** Includes HESNON and a disk with many utilities such as: **KERNAL SAVE, I/O SAVE, DISK LOG FILE** and lots more, all with instructions on disk. A long-time favorite. **BOOK 2:** 100 NEW EXAMPLES. HESNON on disk and cartridge plus more utilities to include: **A GENERAL OVERVIEW ON HOW TO MAKE PARAMETERS** and a **DISK SCANNER**.  
**\$29.95 each** OR BUY BOTH FOR ONLY **\$29.95**

Now with FREE HESNON Cartridge.

## GAMES GALLERY

**Blockbuster has a great variety of game options and levels.**

aliens, and force fields that protect you from the ever-present aliens.

Now, while both of these games are fun, there are, as I mentioned above, public domain games that offer many of the same features. You can find one of these, called Zix, on QuantumLink. It was programmed by Pierre Messier, and is practically a clone of Arkanoid in terms of game play and options, but it

does have unique game screens. The graphics are surprisingly good, the sound is adequate, and, considering the price, it's really an excellent game. It requires a joystick and does not support the mouse. Zix can be downloaded from QuantumLink's C-64 arcade-game software library. Its access number is S# 2583.

Another public domain Breakout-style game that is well worth your attention is Krackout. I haven't been able to find out who programmed it, but the uploader's name on GENie is Jeoper. Krackout is a big game with lots of options. It has sound effects, music, scrolling backgrounds, aliens and many levels, but its orientation is somewhat different from the others, as the paddle is on the left or right side of the screen instead of at the bottom. Like Zix, it is joystick-controlled only. You can find Krackout in the Commodore libraries on GENie; its reference number is 6045. Both these public domain programs are also available on RUN's BBS, The Running Board (phone 603-924-9704) and

**Zix, a public domain game, is of nearly commercial quality.**

you can download them at any time.

As you can see, there is a wide variety of good Breakout games to be had. If pressed to pick the best, I would say that it's Arkanoid. But, frankly, I like both Zix and Krackout better than Blockbuster. Before you spend any money on the commercial games, I suggest you try the freebies. You might decide to keep your money!

One final note. I thought it might be fun to have game-playing tricks and hints from the companies that produce Arkanoid and Blockbuster. When I called, however, neither one was forth-

**Krackout is another example of an excellent public domain game.**

coming, saying they thought no one would be interested in tricks and programmers' backdoor secrets. Do you agree with those marketing types? If not, and you've discovered some super-secret gaming trick for these or other popular games, write in and tell me, and I will pass them on to the world! ■

Lou Wallace, RUN's technical manager, is the author of *Commodore Clinic*. Address your game tricks or comments to Games Gallery, RUN Magazine, 80 Elm St., Peterborough, NH 03458.

# COPY II<sup>®</sup> 64/128

**NEW  
Version  
3.4**

### BACKUP PROTECTED SOFTWARE FAST.

From the team who brought you Copy II for the Apple, the Macintosh and the IBM comes a revolutionary new copy program for the Commodore 64/128 computers.

- Copies many protected programs — automatically. (We update Copy II 64/128 regularly to handle new protections; you as a registered owner may update at any time for \$15 plus \$3 s/h.)
- Copies even protected disks in under 2 minutes (single drive), 1 minute (dual drive).
- Improved support for ROM updates on 1571 drives.
- Maximum of four disk swaps on a single drive.

- Includes fast loader, 12-second format.

Requires a Commodore 64, 128, or "D" computer with one or two 1541 or 1571 drives.

**Sales/Information:** call 503/690-8090, 8-5 P.S.T., M-F. We accept . Or send a check for \$39.95 U.S. plus \$3 s/h, \$8 overseas.

# GEOWATCH

*geoTips returns with some inGENiOuS hints and advice on the care and feeding of GEOS.*

By TIM WALSH

AS PROMISED THE LAST TIME I authored this column (May 1988), I'm including a handful of geoTips that have been submitted by RUN readers. More importantly, I'm giving you a sneak peek at Berkeley Software's new products, along with some geoAdvice answers to questions posed by GEOS-using readers. Since I've earned the dubious distinction of being both RUN's geoWatch columnist and printer expert, this gives me the opportunity to address a few queries concerning the use of printers with GEOS.

## FIRST, THE NEW STUFF

The latest version of GEOS, 2.0 (reviewed in this column, November 1988), has largely met with approval from the folks who use it. Now, there is more news from Berkeley in the release of geoChart, a chart-making application that's compatible with nearly all of the other GEOS applications. GeoChart is designed to let users create a wide variety of charts and graphs by incorporating the data created with the other applications. With a suggested retail price of \$29.95, geoChart is sure to be a hot-selling item. RUN will feature a full review in next month's column.

**Q** I use GEOS primarily for word processing, therefore, I'm in the market for a letter-quality or NLQ printer to replace my now defunct Commodore MPS-801. Which GEOS-compatible printers represent the best dollar value?

—DAVID W. BROWN  
TALLADEGA, AL

**A** To the newcomer, it would appear that few things in the world of computers are more mysterious than the relationship between GEOS and printers. In reality, GEOS is fairly flexible within a wide range of printers. It does have its limitations, however. Because GEOS prints by employing your printer's graphics capabilities, it can't be used with a letter-quality daisy wheel printer, but it will work with a letter-quality dot matrix printer.

While I can't list all the printers that are GEOS-compatible, suffice it to say that virtually all Centronics-parallel and Commodore-compatible printers currently on the market work well with GEOS. To determine whether or not the printer you're planning to buy is compatible with GEOS, check your GEOS disk to see which printer drivers exist on it. If the printer is not listed, try a local user's group, BBS or Q-Link for hard-to-find GEOS printer drivers.

Finally, in my opinion, many of the popular dot matrix printers marketed today are excellent values for the myriad of features they possess. A few of my lower-priced favorites are the Star Micronics NX-1000, Okidata 180, Panasonic KX-P1092 and Epson FX-850, all of which offer varying degrees of GEOS compatibility.

**Q** Why does the pointer disappear from the screen when I'm printing with GEOS 64 and my Seikosha SP-1000VC? Sometimes I can turn off the printer to get the pointer back, but at other times GEOS crashes and has to be re-booted.

—BERNIE WILES  
ALLISON PARK, PA

**A** Unfortunately, I'm not aware of a simple solution that would alleviate the disappearing pointer problem. The Seikosha SP-1000VC is designed to be totally 64/128-compatible and so has a built-in, 6-pin, DIN serial port that negates the need for a parallel interface. While this situation might sound and look good on paper, in reality, it's far from ideal, as I'll explain.

Like you, I've experienced problems with third-party Commodore-compatible printers misbehaving while performing even the simplest of printing chores with GEOS and other software packages. Thorough investigation on my part revealed that the SP-1000VC, like a few older models of Commodore-compatible printers (such as the Star Micronics SG-10C), have a tendency to lock up the computer or disk drive when they finish printing a doc-

ument or are switched from online to off. According to expert sources at Commodore, this occurs because their design does not ground them properly to the computer.

Although electricity is not my forte, I am knowledgeable on the printing limitations imposed by Commodore-compatible printers (and parallel interfaces set to Commodore 1525/MPS-803 emulation) when using GEOS. These limitations exist because most Commodore-compatible printers equipped with serial port interfaces are limited to maximum dot densities of 60 dots per inch. This means that the right-hand portion of your GEOS screen image won't be printed. (I've included Jon Allen's geoTip, below, to help anyone who is experiencing problems printing with 60 dpi printers.)

It's easy to circumvent this problem by replacing your existing printer with a parallel interface and a new Epson-code-compatible dot matrix printer. While this is expensive, a new, high-density printer will produce documents of higher quality, and will print them faster and in their entirety.

**Q** As a GEOS 128 user, I'd like to use my printer's default characters when I create documents with geoWrite and geoPaint. Unfortunately, no matter what I do, I can't get those characters to print. Instead, the characters that appear on the output look the same as those displayed on the screen. How do I get around this problem?

—DAVID R. MEDERT  
ALBANY, OH

**A** A problem really doesn't exist. As I explained in my reply to David Brown, above, GEOS is designed to print using the graphics capabilities of your printer. GEOS fonts are actually bit-mapped images on the screen, so your printer processes them in a completely different way than it processes the input from a conventional word processing program (which uses the printer's character sets to produce a printed page). While this process is no-

# Flight notes

# 3A

ticeably slower than even NLQ printing, it permits the use of a wide range of fonts in various sizes.

GEOS isn't unique in not using your printer's character sets to print text. For example, Newsroom, Outrageous Pages, The Print Shop and a host of other graphics programs also print text without using the printer's characters.

**Q** I've recently upgraded to a C-128, two 1571 disk drives, an RGB monitor, 1351 mouse and 1750 RAM expander. I was almost convinced to invest in GEOS, but the fact that it's copy protected makes me re-think the possibility. I never knowingly invest in copy-protected software, not because of problems making archival copies, but rather to protect my disk drives from potential head-rattling problems.

—THOMAS D. JOHNSON  
SAUCIER, MS

**A** There was a time when I, too, worried about using copy-protected software for fear of damaging my disk drives. After thousands of hours of such use, however, and after many conversations with Commodore service-center technicians, I'm convinced that heat build-up in disk drives is far more likely than copy-protection schemes to cause head-alignment problems. The presence of copy protection should not deter anyone from investing in software, because even the most intensive head-rattling schemes are virtually harmless to disk drives.

If you want complete insurance from disk drive head rattling when loading software, just enter the following command before booting GEOS or any other copy-protected disk:

```
OPEN15,8,15,"M-W";CHR$(106)CHR$(0)
CHR$(1)CHR$(133):CLOSE15
```

## GEO TIPS

### 60-DPI Printers

My Commodore-compatible Okidata 120 has a maximum dot density of 60 dots per inch, which means it will only

print a maximum of 480 horizontal dots when printing geoPaint screen images. This leaves over 160 dots on the right side of the page that are unprintable. To circumvent this, I draw a border 168 pixels to the left of the right-hand screen border and save this as a geoPaint file.

Whenever I want to create a new geoPaint screen, I boot up and use one of these geoPaint borders. Consequently, I have no difficulty staying within the borders and never experience the problem of part of the screen not printing.

—JON ALLEN  
NEWFANE, NY

### GEOS and the SX-64

I couldn't figure out why GEOS wouldn't work with my SX-64 whenever the printer was on. At my wit's end, I finally connected my children's 1541 disk drive to my SX-64 and connected the printer to the remaining serial port, whereupon everything worked fine.

This experiment revealed that before I borrowed the 1541, the serial cable port on my SX-64 was used for my printer interface. GEOS, not differentiating between a C-64 and an SX-64, thought the printer interface cable was connected to a disk drive, which caused everything to lock up. This problem is significant because the C-128D, like the SX-64, also has a built-in disk drive and a similar problem might possibly occur if a parallel interface is plugged into the serial port.

The best solution to this problem, short of getting a second disk drive, is probably investing in Berkeley Software's geoCable, which would be ideal simply because it doesn't use the serial port on either your computer or disk drive.

—BILL CARR  
HARRISBURG, IL ■

*Tim Walsh, RUN's technical editor, requests that you send your questions on GEOS and related applications, along with any geoTIPS you may have, to geoWatch, RUN Magazine, 80 Elm St., Peterborough, NH 03458.*

✈ **Better Loops with Flight Simulator** - While the "Flight Physics" manual description is adequate for most, we get enough calls from frustrated computer pilots unable to perform a loop to warrant the following additional instructions. For those already successful at looping the aircraft, these instructions should help make your loops rounder and more satisfying.

After diving to the suggested looping airspeed (180 knots will do), add as much up elevator as possible without stalling the aircraft. As you pitch up and airspeed slows you will have to reduce some of this elevator pressure. Many people leave the elevator setting on high and become frustrated when the aircraft stalls before pointing straight up. In a perfectly round loop your elevator should be almost all the way back to neutral by the time you're upside down. Since airspeed is very slow at the top of the loop (and the portion of the circle traveled is small), your pitch attitude change should be gracefully slow as well. Start adding up elevator pressure again as airspeed increases. By the time you get to the bottom of the loop, the up elevator setting should be where it was when you began the maneuver and your airspeed should be adequate to begin another loop.

In summary, up elevator setting varies throughout the loop. The faster your airspeed, the greater the up elevator pressure. Flight Simulator is the only simulation on the market that accurately portrays the flight characteristics of a light aircraft when performing this maneuver. In reality there's little room for error in the amount of up elevator you can use, and meeting the challenge of performing a perfectly round loop can be a very satisfying experience. You may even find yourself more knowledgeable about loops than many non-aerobatic pilots who fly real airplanes. Happy trails!

# TELECOMPUTING WORKSHOP

*Continuing his series on networks, the author rubs his magic lamp to take a look at GENie.*

By LOREN LOVHAUG

IN THIS MONTH'S COLUMN, I'll examine Commodore 64 and 128 support and services on the GENie telecommunications network. Unlike Quantum-Link, which was the subject of last month's column, GENie is *not* Commodore exclusive. In fact, the majority of GENie subscribers use other types of computers. This means that only a small portion of GENie's services is targeted directly at Commodore owners.

However, there are a variety of reasons that might prompt Commodore users to go online with GENie. I will focus on the GENie support areas that are specific to C-64 and C-128 owners, along with the generic aspects of the network.

## FAST LANE OR SCENIC ROUTE?

Your terminal package plays a major role in the success of your online sojourns with GENie. At an absolute minimum, your program should support Xmodem file transfers and have some kind of text-capture facility. (For suggestions on terminal software characteristics, refer to this column in the October 1988 issue of *RUN*.)

To log on to GENie, you must first call a local access node in or near your area. Once you have made that connection, you're prompted for your user I.D. (a string of letters and numbers) and a password. Those two steps are easily automated with a sophisticated terminal program. Without any kind of "cruise control," however, recalling, redialing and re-entering can be tedious.

Once online, you're presented with various system announcements and a main menu. You can navigate around GENie by menu or command, which is a big plus for experienced users or for people who know exactly where in the system they want to go.

For example, suppose you want to check out the most recent public domain uploads in the Commodore eight-bit area. You could simply type "move 625;3". Menu #625 is the Commodore eight-bit area and submenu #3 is the software libraries area.

However, if you're new to the system,

or if you're not sure of the various menu numbers, you could reach the same destination by moving from the Main menu to the Computing menu, then to the Commodore and Amiga Roundtables menu, and finally to the Commodore Flagship Roundtable menu, where you can select the Software Libraries menu.

As you might imagine, you can save time and money by knowing and using circumventions. Thankfully, though, GENie's system provides good support for both the neophyte and the telecommunications pro.

Another aspect of GENie that's difficult, but worth taking the time to learn, is the message-editing system. The editor is line based, but uses a series of commands prefixed with an asterisk to perform functions similar to those found in most good post-formatted word processors—search and replace, block delete, and so forth.

In addition, you can easily compose your electronic mail offline and upload it to the GENie text editor by dumping it directly from your terminal program's text buffer or by uploading it via Xmodem. This option can really save you a lot of money, especially if you're a slow typist.

The electronic mail system also lets you forward your mail to one person or send multiple copies. You can even review your Email at a later time, making it easier for those who don't always have the time to reply or the proper answer ready in mind.

The public message editor is similar in operation and function to the Email system, giving GENie a consistent nature as far as text editing is concerned.

## THE FLAGSHIP

Commodore 64 and 128 support on GENie can be found in an area called the Commodore Flagship Roundtable, which contains both the public domain libraries and public message bases.

The public domain software libraries are well-organized and provide excellent file and topic search capabilities. Looking for a specific file or type of

file from among over 5000 in the Commodore Flagship is simple because you can search by filename, topic, uploader, date or even sublibrary.

Downloading public domain software is generally error-free. However, some files, particularly Basic programs that've been compiled, suffer from Xmodem padding. Fortunately, some extremely well-written and detailed online tutorials and "stripping" programs deal with that problem.

Once you learn how to use GENie's sophisticated search capabilities and master the infrequent, but nagging, Xmodem padding problem, downloading public domain software from GENie is a pleasure.

The public message base, which is subdivided into a variety of special sections such as music, graphics, disk drives and rumors, provides interaction and help from other Commodore owners. For the most part, the discussions on GENie are dominated by a core group of intermediate users and SYS-OPs who are helpful, friendly and quite willing to offer assistance and advice.

Rounding out GENie's Commodore Flagship support are its conference areas, which facilitate many live online discussions among Commodore users around the country. Sometimes, these rooms are also used for special guest conferences, with personalities from around the Commodore world.

The real-time conferencing areas are very good, but you need terminal software with some kind of "chat window" to use them effectively; otherwise, incoming text from others in the conference will disturb your typing and make it virtually impossible to communicate.

## A SINKING SHIP?

Unfortunately, the level of support in the Commodore Flagship area on GENie has slipped a great deal over the past few months. This is reflected in the fact that there are fewer and fewer special guest conferences and a general slowdown in answering questions on the public message bases and in processing files uploaded to the software

libraries. I identify two reasons for this deterioration.

The first is the fact that GENie relies on volunteer SYSOPs to staff the Commodore Flagship area; only the primary Commodore SYSOP is paid, and her duties are divided between the Flagship and two Amiga-related areas. This means that the men and women who validate and maintain the public domain software libraries, host and arrange the online conferences and field the majority of questions in the public message areas do so only because they enjoy their Commodores and telecommunications in general. It takes a great

deal of time and effort to be a SYSOP on a national telecommunications network, and over the past year these demands have caused a large staff turnover in the Flagship area.

I think the other reason for the slippage of Commodore eight-bit support on GENie is that many of the SYSOPs now own Amigas, thereby further tending to erode their already limited volunteer time.

You'll probably never see the kind of energy and Commodore talent on GENie's Commodore eight-bit areas that can be found on Q-link. However, what support GENie has to offer is good, and,

combined with the sophistication of its network software, it's an excellent alternative for C-64/128 owners to consider. ■

*Loren Lovhaug is a programmer and writer with lots of telecommunications experience. Along with being SYSOP of Q-Link's C-128 Special Interest Group and co-SYSOP of GENie's Commodore Flagship, he publishes Twin Cities, a newsletter for C-128 users. You can write to him care of Telecomputing Workshop, RUN Magazine, 80 Elm St., Peterborough, NH 03458. You can also send him electronic mail on QuantumLink (LOVHAUG) or GENie (Sparrow).*

VSI was founded in 1984 and has since become a leader in the field of cables and switching devices. We are dedicated to provide top value and quality on a budget. School districts large and small are a specialty of our firm. Complete catalog on request.

### DATA SWITCHES

VSI switches end cable swapping, share equipment. Need extra cables, we stock a broad selection.

- \* ONE YEAR WARRANTY, Deluxe All Metal Case
  - \* Compact Design, Rotary Switch
  - \* Full Shielding, Exceeds FCC Requirements
- AB all models ..... \$29.95  
 ABCD all models ..... \$39.95  
 Switch models available:  
 8 Pin Mini Din, 6 Pin Din, DB9, Parallel, Serial  
 Aa x Bb (crossover), Parallel or Serial ..... \$44.95

Apple cables also available.

### NEW...MODEM LINK by VSI \$15.95

This is the LINK from a Hayes compatible modem to your Commodore. Emulates Hayes or a 1670. The LINK connects to the user port, and has been tested in 1200 or 2400 baud. Compact, full plastic case, why pay more.

### NEW...THE BUTTON by VSI \$8.95

The BUTTON is a deluxe reset for the C64. Plugs into the user port, don't worry the port is duplicated on the outside edge of the case. Comes in a compact case, 3x1 1/2 inches. do not confuse the C64 with the newer 64C.

### BLACK BOOK of C128 \$15.95

The best friend a C128 user ever had... Includes C-64, C128, CPM, 1541, 1571. 261 pages of easy to find information. 75 easy to read charts and tables. The Black Book of C128 is very much like a dictionary, always ready to answer your questions.

### COOLING FAN

Heat is a #1 enemy to your disk drive. Reduce bad loads and costly repair bills with a fan, keep your 1541 or 1571 cool. Quiet, surge and spike protection, EMI filtering

### VOICE MASTER JR. \$37.95

Turn your computer into a talking and listening servant. Get speech and voice recognition in ONE product. Easy to use, write music by whistling a tune. Unlimited uses for fun, education, or business.

## POWER CENTER

The POWER CENTER provides individual control of up to 5 components plus master on or off switch. System protection: EMI/RFI filtering, surge and spike protection, 15 AMP breaker, heavy duty cable, 3 prong plug. Lighted rocker switches, all steel case, size: 1 3/4 H x 12 1/4 D x 15 W.

## OMNITRONIX INTERFACES

**HOT SHOT PLUS \$64.95**  
Printer interface, 8K buffer, expandable to 64 K. 6 fonts plus editor in ROM, prints double or quad density, CPM selection.

**DELUX RS232 INTERFACE \$39.95**  
Connects standard modems or RS 232 accessories to the C64, C128, 64C, SX64, VIC20, or Plus4.

**SERIAL PRINTER INTERFACE \$64.95**  
Use a standard RS232 type printer on the Commodore. Connects to Serial Bus (6 pin).

**IBM to CBM Adaptor \$37.95**  
Now use your C64 compatible printer on a PC compatible. Includes a specially designed cable and software.

## JOYSTICK REDUCER \$3.95

Every once in a while, our buyers find one of those odd gadgets they just can't resist. The Joy Stick Reducer is odd and low-priced. It allows one joystick to be plugged into both ports at the same time. I know you are saying, what's it good for. Stop and think, how many times have you had to try both ports before finding the right one?

## APROSPAND-64

Give your C64 or 128 full expandability. This skillfully designed expansion unit plugs into the cartridge port, this gives you 4 switchable (single or in combination) cartridge slots, includes fuse protection and a reset button!

**\$26.95**

## 12 PLUS 12 in. cartridge port extension \$19.95

### SPECIAL PURCHASE

Chrome plated, heavy duty universal printer stand. Rubber feet, allows front, back, or bottom feed. For 80 or 132 column printers. Original price \$24.95

**Now \$12.95**

VSI 3641 S.W. Evelyn, Portland, OR 97219, Shipping \$3.00, VISA, MC, money orders accepted. Price & stock, subject to change.

## RUN'S CHECKSUM

TYPE IN *RUN'S* CHECKSUM, which serves for both the C-64 and for the C-128 in either 40- or 80-Column mode, and save it to disk before running. When typing in a program from *RUN*, first load and run *RUN'S* Checksum. The screen will display a SYS number that deactivates and reactivates the Checksum. Always disable *RUN'S* Checksum before attempting to run another program. Note: You can abbreviate Basic keywords; spaces affect the checksum only when within quotes; and the order of characters affects the checksum.

With this new version, when you press return after typing in a program line, a one-, two-, or three-digit number from 0 to 255 appears in the home position. If this number matches the checksum value in the program listing, the line is correct. If the number that appears *doesn't* match the checksum value, compare the line with the magazine listing to find your error. Then move the cursor back up to the line and make your corrections. Now, after you press return, the correct checksum value should appear. Continue entering the listing until all the lines have been correctly typed. Then deactivate *RUN'S* Checksum, using the SYS number. Save the finished program.

All the graphics and control characters in the listings in *RUN* have been translated into understandable key combinations. They are the instructions you see inside the curly braces. For example, {SHIFT L} means you hold down the shift key while you press the L key. You do *not* type in the curly braces. What appears on the screen will look quite different from what is designated inside the braces. Here are some more examples:

- {22 SPACES}—press the space bar 22 times
- {SHIFT CLR}—hold down the shift key and press the cl-home key
- {2 CRSR DNs}—press the cursor-down key twice
- {CTRL 1}—hold down the control key and press the 1 key
- {COMD T}—hold down the Commodore logo key and press the T key
- {FUNCT 1}—press the F1 key
- {5 LB.s}—press the British pound key (*not* #) five times [R]

**Listing 1. *RUN'S* Checksum program. This program is available on *RUN'S* BBS for users to download.**

## MINIMODEM-C™ 1200 BAUD MODEM ONLY \$69<sup>95</sup>

What's included? Everything! You don't need to worry about cables, compatibility or anything else! The Arotek Minimodem-C™ plugs directly into your Commodore C-64, C-64C or C-128 USER port. It is unique in that it has two separate (switchable) emulation modes

(Hayes and Commodore 1670®) to make it compatible with ALL available software. The Minimodem-C™ is a full feature, 300/1200 Baud modem with Auto Answer, Auto Dial, Touch-Tone or rotary dialing, has status lights and a built-in speaker. Just plug it into your computer and standard phone jack with the attached cable. Minimodem-C™ is supplied with terminal disk software and includes a free trial subscription to Compuserve.

Do you have more than one computer or do you plan to get another computer? We have your solution. Simply order our new Com-Modem™ adapter (#5100) along with Arotek Minimodem-H™ which you can use with any computer that has a RS-232 serial port as well as with your Commodore. Arotek Minimodems™ are tiny. Only 4 3/4" long, 2 3/4" wide and 3/4" high. Our highly integrated, state-of-the-art circuitry makes this modem the best on the market and a very smart buy.

Built with pride in the USA and fully guaranteed for 1 year.

Order yours today!

## ALL MODEM USERS!

All baud rates—by demand—current up to date listings on toll-free unlisted databases. A network war is allowing these numbers to be distributed for completely FREE access for you. You will find that you can access databases you have normally been spending \$1000's on, such as: Stock reports, news/AP Wire, sports news, weather, educational research libraries, recent popular games to download by the 100's, and more. These numbers will be good indefinitely or your money back. Take advantage of this special offer by sending \$10.00 to: **Scott Case, PO Box 2254, Kingsport, TN 37662.**

Name \_\_\_\_\_ Address \_\_\_\_\_  
City \_\_\_\_\_ State \_\_\_\_\_ Zip \_\_\_\_\_

Enclosed is a \$10.00 ( ) check or ( ) money order. Allow 10-14 days for delivery.

Program computes general numeric solution to electronic circuit of up to 40 nodes and 63 branches. Branches may contain resistors, capacitors, inductors, current sources, voltage sources or 4 types of controlled sources. Computer displays node voltages, branch voltages, currents, powers and power factors. Step function of branch parameters or frequency with graphic display of results. Menu controlled and user friendly.

FEBRUARY

## COMING ATTRACTIONS

### FIRE POWER—

A joystick or mouse can make or break a game or productivity program. So it's important to find a responsive, easy-to-handle device that's right for you. Next month, technical editor Tim Walsh takes a look at the fast-action joysticks and mouse devices available for your C-64 or C-128.

### MARKETING MACHINATIONS—

What does it take to get a product noticed in a competitive market? Sometimes, you need a gimmick. In the software industry, public relations firms have tried just about everything, ranging from invitations to a rock 'n' roll party to mailing fake sticks of dynamite. Tune in next month for an interesting and amusing look at some of the promotional campaigns that have accompanied the introduction of software products.

### THE TALE OF THE MOUSE AND THE RAM—

With the increased popularity of the mouse and RAM expander for the Commodore computers, it's become more and more important for Basic programmers to create programs that utilize these peripherals. Find out how next month.

### A RAINBOW OF ARTICLES—

Next month you'll also be treated to some useful applications and entertaining programs, including a kinetic art program that will mesmerize you with colorful, undulating shapes and designs. We'll also present our regular features and columns, including reviews, news, hints and tips, answers to readers' questions and much, much more to help you get the most out of your Commodore computing system. Don't miss it!

# IT'S A JUNGLE OUT THERE AND DATA EAST PUTS YOU IN IT.

It happens so fast. You're kicking back, you and your best friend, just checking out two of the latest arcade action games from Data East and, zap, you're fighting with full fire power and up to your neck in heart-stopping, eye-popping jungle.

*Victory Road* pits the heroes of the #1 smash hit, *Ikari Warriors*, against a hideous horde that has heroes for lunch—Stonehead and his wrecking crew of bizarre and brutal beasts.

*Guerrilla War* takes you behind the headlines to the battlelines. It's you versus them—and let us guarantee you that "them" is an army of evil that will keep your trigger finger active for hours.

*Victory Road* for the IBM, Commodore and Apple II computers. And *Guerrilla War*, for the IBM and Commodore computers. Addictive action with great graphics. Hey, it's a jungle out there. And now we've brought it home.

# Fly Miss MicroProse with Major Bill

Major "Wild Bill Stealey" MicroProse President, USAF Reserve, graduated from the U.S. Air Force Academy in 1970. As a U.S.A.F. instructor and Pennsylvania Air National Guard pilot, he has flown more than 3,000 hours in jet airplanes.

Now you have a chance\* to take-off into the wild blue yonder with Major "Wild Bill" Stealey, president of MicroProse Software. All you have to do is send us an essay (200 words or less), telling us why you like any one of the six MicroProse products shown below. It's easy!

If you're one of the 3 grand-prize winners, we'll fly you to Maryland, give you a tour of MicroProse and take you on the ride of your life in the company's 1425-horsepower T-28 Trojan airplane — the MISS MICROPROSE. 100 other winners will receive T-shirts, stealth fighter models and a coupon for \$10 off your next purchase of a MicroProse title.

Thrill to a Chesapeake Bay sunset from 5,000 feet or just enjoy the view of northern Maryland's rolling horse farms at low altitude. If you're up for it, you can even fly upside down. It's an adventure ... it's excitement ... and it's real — just like the sophisticated software from:

**MICRO PROSE™**  
SIMULATION • SOFTWARE

180 LAKEFRONT DRIVE • HUNT VALLEY MD 21030 • (301) 771-1151

\* Offer void where prohibited by law. All entries must be postmarked before March 31, 1989. Send to "I cheated death with Major Bill" contest. This offer is not affiliated, sponsored or endorsed by the U.S. Air Force.
