SUPER UTILITIES AUTO-RUN AND LISTER RUNTERM PLUS, PART II

entire career on little Bobby's Commodore. Mr. Walker had never used a computer when he read about Info Designs' Negotiation Edge.™ He'd been meaning to ask for a raise and was looking for an "Edge."

It began innocently, but soon Mr. Walker

was running his

Negotiation Edge

That night, as Bobby slept, Mr. Walker's career turned. "Hey, Info Designs software makes Commodore® a terrific business computer."

The Edge line is people-insight software that's easy-to-use and only costs \$79.95.*

He got the raise and bought the rest of the Edge line: The Sales Edge,™ Management Edge,[™] and Com-munication Edge.[™] His new love affair with Info Designs software was paying off.

Bobby's room became Mr. Walker's office away from the office. He bought Info Designs' WordPro III Plus[™] package for \$49.95 when he began issuing memos. And the complete Integrated Software Series for accounting: General Ledger, Payables, Receivables, Inventory, and Payroll for \$49.95* each when he became a partner.

The ISS accounting modules are powerful, easy-to-use, and easy-tolearn. They include every business feature.

Mr. Walker was ecstatic with his new computerized business. And Bobby was happy because the monsters stayed in the closet while dad was in the room.

Don't let your Commodore and career sit on the shelf, Info Designs business software can help you get ahead. Buy it at your local software retailer. It makes good business sense.

*U.S. Currency. Accounting series marketed in different packaging for Canada.

Find the entire line of Info Designs business software at a dealer near you.

The 10 power-packed products of Info Designs business software line:

The Sales Edge™

Provides individually tailored strategy reports to improve customer relationships.

After the sales executive has completed the self-assessment and the customer-assessment, a sales strategy report is generated instructing the salesman in aspects of business style and personality most likely to strike responsive chords with the style of a given client.

The Negotiation Edge™

Designed to help the user prepare, develop, and successfully complete any negotiation or bargain.

On the basis of information provided by the user about himself and a specific counterpart, the program produces a detailed negotiation plan. The plan includes a step-bystep blueprint for winning negotiations in a variety of personal and business situations.

The Management Edge™

Advises the manager how to get results by increasing productivity, successfully motivating subordinates, and resolving on-the-jobconflicts.

After the manager agrees or disagrees with a series of statements, the machine assimilates information from a bank of proven management tactics and selects those most appropriate to the specified subordinate. Suggestions are printed in a detailed management strategy report on how to work with the individual and get the desired results.

The Communication Edge™

Prepares you to work more effectively in meetings and conversations. It enables you to emphasize your communication strengths and avoid the potential pitfalls built into any conversation.

The program presents a series of simple questions to assess your communication style and the styles of counterparts. A strategy report is generated detailing ideas for a better relationship and ways to communicate more effectively.

General Ledger

Get a customized chart of accounts and comprehensive management report, including financial statements and trial balances. This integrated program maintains present months, quarter- and year-todate, plus previous guarter and year balances. (Interfaces with Receivables, Payables, and Payroll.)

Receivables

Makes it simple to maintain complete customer master files, including year-to-date activity, credit limit, authorization, and current balance. Provides reports on aged open receivables, invoices, statements. and customer activity lists. (Interfaces with General Ledger for automated posting.)

Pavables

Build a master vendor file, including year-to-date purchases, current balance, and recurring vendor

invoice information. Provides automatic aging of open items, check with full remittance information and check register. (Interfaces with General Ledger for automated posting.)

Inventory

Perpetual inventory records for all items include stock numbers, average cost, three retail prices, reservations, economic order quantity and re-order levels. Processes stock receipts, issues, orders and adjustments with full audit trails. Provides kev management reports, including stock status, shortage and recommended re-order reports.

A master record for each employee includes current period, guarter- and year-to-date pay activity. Automatically calculates period pay amounts, including miscellaneous pay and deductions, federal, state, and local taxes and FICA.

Provides comprehensive reports, including W2s, 941s, payroll checks with full pay/deductions detail and payroll journals. (Interfaces with General Ledger for automated postings.)

WordPro III Plus™

An easy-to-use, full-functioned word processor with an installed base of 50,000 units. It includes built-in mail merging for form letters and global search & replace. It provides automatic page numbering, headers, footers, and automatically totals columns.

RUNNING RUMINATIONS

We are witnessing a flurry of activity in the telecommunications field that marks an exciting spread of interest in this dimension of home computing.

Sure, telecommunications capability has been around for several years, but it has only recently reached the point where it is the fastest-growing application for home computers. Each day, hundreds of computer users are discovering the world of telecommunications, and major companies are counting on this spark of excitement to ignite renewed interest in the home-computer market.

The competition among the various electronic information networks to service this burgeoning field is heating up, as major companies establish an on-line presence.

For example, within the past few months, we've seen such heavyweights as General Electric and Knight-Ridder enter the telecommunications field with their own on-line services—GEnie and Viewtron, respectively. Also, Commodore has severed its association with the popular CompuServe network to set up its own network with QuantumLink. And there are over a half-dozen other on-line services from which to choose.

There are several reasons why telecommunications has become such an attraction:

 Computer users are more serious about applications; they want their machines to do more than just play games.

2. Setting up a computer system for telecommunications is relatively inexpensive. Users need only add terminal software and a modem to get on-line.

3. The information and services offered by on-line networks are varied and plentiful.

4. Electronic information services are convenient and easy to use. The services offered allow you to interact with other computer users and to access information and perform chores from the comfort of your own home.

With more computers entering the home and people discovering on-line networks, more and more services are being offered—at-home shopping and banking, trivia games, college courses, library information services, special areas of interest to programmers, musicians, artists and others, and much, much more.

For over a year now, *RUN* has kept a close watch on this growing telecommunications phenomenon. We were one of the first computer magazines to set aside space each month for the telecommunications topic, and, as we enter 1986, we will continue to be the only Commodore-specific magazine with a monthly telecommunications column.

We have also been actively involved in discussions with these electronic networks regarding the use of *RUN* material on these systems. *RUN* is currently represented on Viewtron, American Videotext Services and Quantum-Link, and it is our aim that *RUN* will be represented on any and all major national networks in the near future.

As more services become available for telecommuters, the home-computer market will continue to develop and grow. We contend that telecommunications will give the industry a much-needed shot in the arm.

Also, the introduction of the C-128 will provide aid in the development of the telecommunications field. Its 80-column features, CP/M mode, capacity to handle faster baud rates and increased memory storage are all features that make the C-128 an advanced telecommunications machine.

db

Wanted: Articles on Disk

For those of you anxiously waiting to break into the big time by being published in *RUN*, here's a bit of news that will improve your chances. When you send us your article submission, make sure you include both your program and manuscript on disk. This will facilitate the preparation of your article for publication. Also include a printout of your program listing and article.

It doesn't matter what word processor you've used to generate the text. We are able to read most commonly available word processors for the C-64 and C-128.

Consider this an invitation to share your knowledge and computing experiences with thousands of other Commodore users.

To give you an idea of what kinds of articles we're looking for and to take you step by step through the process of preparing your article for submission, we provide the *RUN* author's guidelines (newly revised).

For your free copy, send a self-addressed stamped envelope to:

VIZASTAR for the C128

Vizastar, the integrated spreadsheet, database and graphics program that has the Commodore 64 world raving, is now available for the C128. It boasts 80 columns, and has over 40K of free memory in the spreadsheet. Those who already own Vizastar 64 will be pleased to know that your existing files can be read by Vizastar 128. Also, you can upgrade to the 128 version. Call us for details and pricing.

"The only other comparable product would be Lotus 1-2-3 for the IBM PC; nothing in the C64 world comes even close to the features of Vizastar."

AHOY July 85

"I found Vizastar would do anything Lotus 1-2-3 could, and then some. It's my Commodore choice to become the standard against which the others will be judged." INFO 64 Magazine, Issue #7

"Vizastar is an exceptional package that rivals the features of programs such as Lotus 1-2-3 and offers C64 owners the kind of integrated software previously only available for higher-priced systems."

RUN Magazine, June 1985

"I scrutinized, tested and experimented with Vizastar extensively, but could find no weaknesses whatsoever. It is the most comprehensive, most flexible, most powerful and easiest to use integrated software package I've worked with."

Commodore Microcomputer, Sept/Oct 1985

"I use an IBM PC at work with Lotus 123. I feel Vizastar is just as good and in someways better than 1-2-3."

Steven Roberson, NC. End User

"I have used Multiplan and Superbase; both are good pieces of software, but are inadequate when compared to Vizastar." Jim Mathews, WA. End User

"So good, I bought a second C64 and Vizastar for my office. A wild bargain! You've saved me from having to buy IBM and Lotus."

Philip Ressler, MA. End User

VIZAWRITE CLASSIC for C128

This is the new word processor from Vizastar's author, Kelvin Lacy and is the successor to Omniwriter, which he also wrote. All the features of Omniwriter are there, plus many significant enhancements, like auto pagination, on-line help, pull-down menus, full-function calculator and more. Up to 8 'newspaper-style' variable-width columns can help with newsletters.

Three different proportionally-spaced "near letter quality" fonts are also built-in for use with Commodore or Epson compatible printers. You can merge almost any other word processor file directly into Vizawrite, including Paper Clip and Omniwriter. Naturally, it is also compatible with Vizastar. At all times, what you see on the screen is exactly the way it will be printed out. Vizawrite can do mail-merges and has an integrated 30,000 word spelling checker that you can expand yourself.

PROGRAM SPECIFICATIONS

Both Vizawrite and Vizastar are written in 100% machine language and run in the 128's FAST mode, making it lightning fast. They require a C128 with 80 column color or monochrome monitor. Both come with a cartridge, a diskette, a backup, and a reference manual. Vizastar also includes a 50 page tutorial book. Both work with 1541 or 1571 disk drives.

RISK-FREE OFFER

Vizastar 128 is priced at \$119.97. Vizawrite's price is \$79.97. Vizastar 64 XL8 is now available for \$119.97. We are so positive you will be satisfied with our programs that we offer a 15-day money-back guarantee. Try it Risk-Free. Call us today or send a check or money order. VISA/MC accepted.

Calif. residents add 6.5% Sales Tax. Add P&H: UPS-\$4; COD/Canada-\$7.

MAGIC

Compiled by LOUIS F. SANDER

MAGIC is tricks, MAGIC is fun. MAGIC is doing what cannot be done.

Every month, Magic brings you brief and useful computer tricks from around the world—tricks to make computing easier, more enjoyable or more exciting. We number our tricks in hex, the counting system of sorcerers and computerists.

Magic solicits your simple hardware ideas, short programs, useful programming techniques, little-known computer facts and similar items of interest. We look for new or recycled material that can be implemented with a minimum of time, effort or theoretical knowledge and that is of current value to Commodore computerists (Plus/4 and C-16 owners, too). RUN will pay up to \$50 for each trick accepted. Send your tricks to:

> MAGIC c/o Louis F. Sander PO Box 101011 Pittsburgh, PA 15237

If you enclose a self-addressed stamped envelope, we'll send you a Trick Writer's Guide. Readers outside the United States may omit the stamp.

This month, as usual, magician readers from around the world have favored us with an incredible variety of computorial delights, applicable to every Commodore machine. Since Magic's inception two years ago, we've printed 1024 tricks from every state in the U.S. and Australia, from every province in Canada, and from 37 other countries. There's no limit to our interest in your creations, no matter where you live. Send them in and see—fame and fortune may find you.

If you like the tricks on these pages, you'll love RUN's second Special Issue, available in stores right now. Along with a wealth of other material, it features 512 Magic tricks—all those we printed in 1985, plus more than 200 you've never seen before. Many of the reprinted items have been enhanced and improved, and all the tricks are organized and indexed for exceptionally easy reference.

Commodore-128 owners will appreciate our efforts in converting some of the older tricks to work on their machines. Also, the flow of new C-128 tricks is starting to look like a river; in months to come you'll see some spectacular sorcery, 2^{τ} style. But for now, no matter which machine you own, behold the wonder of Magic... **\$290** Christmas card—Type in this program on your C-64 or C-128 right now. If Christmas hasn't come yet, run it and enjoy it. If it's December 26th or later, put the program away with the ornaments, and take a look at it next year.

\$291 Zaxxon zap—If you type RED on Sega's Zaxxon when the score shows up, you will be able to fly through walls and will not be damaged by anything.

Moien Jawaid Zobairi Riyadh, Saudi Arabia

\$292 1541 Unscratch—This miraculous utility resurrects programs and datafiles that have been inadvertently scratched from the disk! As it runs, it examines the disk in the drive, displaying the name of every file in the directory, including the recently scratched ones. When it finds one of the latter, it asks if you want to unscratch it. If you do, it requests a code number for the type of file involved (SEQ, PRG, REL or USR), then performs the resurrection.

We're dealing in *very* strong magic here, and if things don't go just right, you can easily corrupt your disk. Unscratching is possible, since scratching a file merely

the terrorist plot to trigger a massive earthquake in this undersea graphic adventure

Command the super heroes in this graphic adventure TORDS OF SMIDNIGHT

Defeat the evil Doomdark in this medieval graphic adventure

Shake, battle & role.

Warm up your Commodore* and get ready for full-screen graphic action.

Save the industrial world from going off the deep end of the Richter scale in *Quake Minus One*. Stop the terrorists from triggering a massive earthquake and toppling civilization. In *Shadowfire*. Ambassador Kryxix has been kidnapped. You have but 100 real-time minutes to assemble a strike force of specialists and elite fighters to rescue him and

cialists and elite fighters to rescue him and then destroy the evil Zoff and his starship. Embark on a quest to defeat Doomdark

in The Lords of Midnight. Choose your role. Capture the source of Doomdark's power or conquer his forces in battle. Over 32,000 different panoramas ensure a challenge. Visit your software dealer. Moy Not Reprint Without Permission

Hagic Magic

sets a flag in the directory; the file and directory entry themselves are otherwise unchanged. Further writing to the disk, however, can overwrite any of this material, leading to unpredictable results when unscratching resets the flag. In addition, Unscratch bypasses several built-in safeguards of your disk recording system; without them, it's easy for troubles to arise.

So, please be careful when working with this program. After you type it in, test it to be certain you haven't made any disastrous errors. Save several programs on a newly formatted disk, then scratch and resurrect them one by one, until you're convinced that Unscratch is working perfectly. By the way, it's normal to experience apparently random delays of 30 seconds or so while running Unscratch-the program needs that time for "thinking.

When actually using Unscratch, it's best to use it just after your program has been scratched, before any new material has been saved to the disk. To do otherwise is to invite corruption (though sometimes it's a risk worth taking). And since the names of scratched files can duplicate those of live ones, you must be extremely careful in choosing the file to unscratch. The safest procedure is this:

 Make a backup copy of the disk you want to work with, then set it aside.

 Unscratch the file from the original disk, then load it and check to see that it's really the one you want.

• Save the file onto the disk you set aside.

If you type the program correctly and use it with caution, Unscratch can be your closest friend in times of real distress. Use it wisely and well, and remember where you got it.

\$293 C-128 bell—You can ring the bell on your C-128 by executing

PRINT CHR\$(7) www.gnn.m.adore.ca May Not Reprint Without Permission Doing this also resets VOL to an intermediate level, probably 7 or 8.

> Louis F. Sander Pittsburgh, PA

\$294 C-128 load and run—One simple command can be used to load a C-128 program from disk and to run it automatically:

RUN "programname"

This does everything you need.

Kenneth H. Hottes Danbury, CT

\$295 C-128 joystick ports-The C-128 boasts a slick appearance, but its designers overlooked at least one small detail. The contour of the molding near the joystick ports prevents insertion of the PaperClip (C-64 version) dongle and other similar copy-protection plugs.

I solved the problem by buying a \$4.95 joystick accessory at a local discount store. The accessory is a Y cable that allows you to plug two joysticks into a single port on an Atari video game. When the Y cable is plugged into the C-128, the dongle can easily be inserted into either of its female connectors.

Others have made extensions from the subminiature D connectors available at Radio Shack, but that requires knowledge of soldering and other expertise.

Harold Gath Brownsville, PA

\$296 Shifted run/stop-On most Commodore computers, when you press these keys in combination, you're prompted with "Press Play on Tape." (The computer is trying to load and run the next program on the cassette.) If you hit the keys by mistake (not an uncommon event), you can correct your error by pressing the stop key.

On the C-128, however, pressing shifted run/stop loads and runs the first program on your disk, without pausing for additional action. If you accidentally hit those keys, whatever is in memory will immediately be overwritten by the new program coming in from disk! If the overwritten program was a valuable one you had not yet saved, you'll be annoyed, to say the least.

You can guard against this disaster by placing a sequential file first on your disk. Since the computer cannot load it, it can't overwrite any programs. You can put such a file on a newly formatted disk by executing this line

OPEN 2,8,2,"INSURANCE,S,W" : CLOSE2

Another, less automatic, way of having this insurance is to leave your disk's door open.

> **Bruce** Jaeger St. Paul, MN

\$297 C-128 MID\$ feature—In C-128 mode, MID\$ has a wonderful but undocumented feature: You can use it to replace characters in one string with those from another! Continued on p. 110.

These type of games are great to play with your kids (sharpens the mind). Rod Phillips Craig, CO Jeweler

Your game is great, just keep on coming out with more. Joe Yovino Cincinnati, Ohio Student

SOFTWARE GALLERY

White Lightning

A Graphics-Development System Based On Forth

nyone who's done any programming in machine or assembly language can testify to the frustrations inherent in working at such a low level. Unfortunately, graphics-intensive programs on the C-64 are abysmally slow in Basic. One of the few alternatives is a high-level language called Forth, which can achieve a significant fraction of machine-language speed, while providing a much friendlier programming environment.

White Lightning, from Oasis Software, is billed as a "high-level graphics-development system," and is based on Forth. It provides many powerful tools for generating graphics and animation on the C-64 and is capable of producing impressive results.

Software created with White Lightning can be run without it and marketed without any restrictions. Also included in the package is an extended Basic called Basic Lightning, which duplicates the capabilities of White Lightning at a lower level of performance. Basic Lightning programs require that Basic Lightning be loaded before they can be run. Both disk and tape versions of White Lightning and Basic Lightning are provided in the same package.

White Lightning closely follows the standard established by the Forth www.conno.adage.ca May Not Reprint Without Permission

Compiled by SUSAN TANONA

Interest Group, called FIG Forth, while adding extensions for the generation of sophisticated graphics and sound. A powerful set of extensions, called Ideal (Interrupt Driven Extendable Animation Language), provides for the easy implementation of interrupt-driven programs. A program that plays theme music or scrolls a background can run independently of the program controlling the movement of the players. Timing problems are often much easier to handle if a program is interrupt-driven. Along with numerous other functions, Ideal also includes tools for manipulating software sprites (these can be up to six screens wide), plotting lines and polygons, creating windows, and putting text in a hi-res screen.

Report Card

Superb!

An exceptional program that outshines all others. Very Good.

One of the better programs available in its category. A worthy addition to your software library.

Lives up to its billing. No hassles, headaches or disappointments here.

Mediocre.

Substandard, with many problems. Should be deepsixed!

Now, for the bad news: While I didn't find any bugs in White Lightning itself, I did identify a few problems.

My biggest complaint is the lack of a source listing for the White Lightning demo. A listing of the program would be a very good tutorial, but no lines of source code are provided on the disk. The only way to see examples of code is to list the Basic Lightning demo program and translate it into White Lightning, since the demos are nearly identical. The White Lightning version simply runs faster.

I would also like to see the source listing for the Ideal commands and other extensions as well, but realize why Oasis would be reluctant to give them away. Like most Forth programmers, I dislike the kind of programming that lets you feed a function an argument and get back a result without having any idea of what happened in between.

Another indication of the company's protective attitude is the paper on which the manuals are printed. Rather than protect the disk, they've printed the manuals on paper tinted a particularly noxious shade of orange-red, which is supposed to prevent photocopying. Perhaps it would foil some copy machines, but the only real result of their effort is eyestrain for anyone who purchases the product.

I was also disappointed with the lack of an assembler, which is a normal part of almost all Forth implementations, and the very small editor. Also, besides being extremely complicated and difficult to understand, the sprite editor included in the package is written in Basic Lightning and its performance suffers as a result.

THE CONPACTOR OF A CONTACT OF A

To All IBM, APPLE, COMMODORE and More. RITEMAN PRINTERS from C.ITOH Digital Products.

Whatever your needs, from home to business, Riteman has a printer for you. From Commodore to IBM PC, there is a model designed to fit your needs.

The Riteman family also offers lots of features you won't find on the competition. You'll use the exclusive compact ribbon for more than a million characters and then change it without getting your hands dirty.

The C+ and F+ models offer unique front loading paper feed, while the whole family features short tear off to save paper. They

Aside from its few drawbacks, White Lightning is a high-performance development system. Buying a graphics-development system for your C-64 won't make you a games designer, but you can certainly benefit from the application of tools such as White Lightning. (Oasis Software, 377 Oyster Point Blvd., South San Francisco, CA 94080. C-64/\$49.95 tape, disk.)

> Jon Bryan Albuquerque, NM

Winter Games

No frostbite. No landing on your head. No years of grueling training. Just the possibility of bringing home the gold for you and your country. In short, the occasional thrill of victory, with no agony.

To qualify for Epyx Software's Winter Games, you need only one or two joysticks and a competitive spirit (though quick hand-eye coordination is helpful).

Six events are offered: ski jump,

bobsled, figure skating, freestyle skating, hotdog aerials, speed skating and the biathlon (cross-country skiing and rifle shooting).

You may compete with the computer (a surprisingly fit opponent) or with up to seven other players. Those of you in less than tip-top shape may practice all the events as much as necessary, lest you shame your country with a shoddy performance.

Most events are accompanied by upbeat music, and all events feature finely detailed graphics. The biathlon isn't the most exciting event (I like the bobsled and the hotdog aerials), but its setting, which consists of snowy terrain, mountains, pine trees, a gurgling river under a wooden bridge and blue skies dappled with white clouds, is pleasantly picturesque.

A consistent part of each setting is the audience, which will whistle and applaud you if you score a 10. (It's nice to have fans, even if they do exist only on disk.)

The variables on which scores are based differ according to the event. In the skating and hotdog aerial events, your score is based on style and difficulty (there are several maneuvers you may perform). In the biathlon and bobsled, your score is based on the speed of your performance. In the ski jump, points are awarded according to distance and form. That you can always improve your score (unless you're always a perfect 10) or try different movements or combinations of movements makes the game more interesting and enjoyable. The novelty of a game whose options are quickly and easily exhausted soon wears thin.

Winter Games provides well-written documentation that is easy to understand. The game's features are explained, along with instructions on how to participate in each event and how you can acquire the highest score. There is even a short but informative explanation of how winter sports began.

Ultimately, Winter Games is just plain fun. And its sound and graphics, which certainly win a gold medal, greatly contribute to the game's entertaining quality.

Moving the little figure skater around the rink, urging her into double axel jumps, sit spins, whatever, is fun (though you may not think so when you become a serious competitor). And watching her fall is, I'm sorry, amusing.

In the hotdog aerials, sending the tiny skier flipping through the air and landing, *plop*, every which way in the snow, is also, I'm sorry, funny.

And it's satisfying and oddly thrilling to move your skier effortlessly from a back scratch into a back flip and have him land on his feet to the sweet sound of applause and whistles.

Who knows. . All this vicarious activity might even inspire you to jump on your snow saucer and do a little sliding. (*Epyx*, 1043 Kiel Court, Sunnyvale, CA 94089. C-64/\$29.95 disk.)

Stunt Flyer

So, you've flown the F-15 Strike Eagle and Flight Simulator II. You consider yourself good. But has anyone ever shown you just what you look like up in the air?

Stunt Flyer will do just that, and,

WINTER GAMES... THE QUEST FOR THE GOLD CONTINUES...

You've captured the gold in Summer Games[®] and Summer Games II[™]. Now it's on to the *Winter Games*! And what an incredible setting—a completely realistic winter wonderland featuring *seven* action-packed events.

At the Ski Jump you control your form in mid-air, knees straight, leaning forward. Hot Dog Aerials challenges your courage and your sense of humor. In Figure Skating you leap into Double and Triple Lutz jumps-wow the crowd with a perfect Camel into a Sit Spin. It's timing and style that counts. Free Skating lets you choreograph your own routines. In Speed Skating it's you against a fellow speed demon-the fastest human beings on level earth! And the Bobsled-still faster as you fly around hairpin turns, leaning hard to stay in the tube. Finally the Biathlon, the ultimate challenge to your endurance in cross-country skiing and marksmanship.

All of this fun and excitement is easy to learn and play. You control the action with the joystick, animating your player for style and rhythm. You choose the country you want to represent. Listen to its national anthem. Then it's practice, training and learning a winning strategy for each event. Now the *Opening Ceremony* and the competition begins—against your friends or the computer. Will you be the one who takes the gold at the *Awards Ceremony*? Will your name be etched amongst the *World Record* holders?

The quest for the gold continues... And it's all here—the strategy, the challenge, the competition, and *pageantry* of Winter Games!

■ Software Gallery

until you really learn to fly, your ego is going to take a beating from it.

This simulator also just might teach you to fly. The manual is the best tutorial I've seen on the aerodynamics of flight.

The manual fully illustrates such stunts as rolls, loops and Immelmanns, and tells you what to do with the controls at each point in the maneuver. Read it carefully: It's like being in ground school and there will be a test.

From the main menu you may choose to watch an air show, fly freely or perform a stunt. Both joystick and keyboard may be used to control your craft.

If you decide to perform a stunt, you're presented with another menu from which you may choose one of about 15 classic moves. Select one and you're on your way.

Your view is out of the cockpit, looking at a green landscape that is sketched with mediocre graphics. The instrument panel is drawn much better than the landscape and contains a few gauges you may never have seen on other flight simulators.

You can choose to review your completed stunt and watch your performance from outside the plane as a ground observer would see it.

Without this instant replay feature, Stunt Flyer would be only a mediocre simulator. With that feature, it becomes a constant challenge as you try to improve your performance and better your score. (Judges evaluate your performance and award points accordingly.)

In the competition section of the game, you put together your own series of stunts, save them to disk, and then enter them in Sierra's Stunt Flyer Contest and try for the big money.

The program's graphics are only adequate in execution, and the crash scene—you'll probably see a lot of this—is a static rendering that looks as if it were lifted out of a coloring book. Sound is limited to the buzzing of your engine, and the instant replay feature isn't really instant, for it requires disk access to put your moves and gyrations into coherent form. (However, we can't blame Sierra for slow disk access.)

Even with these faults, Stunt Flyer

accomplishes its goal, which is to provide you with new challenges. Although you'll be humbled by the instant replay feature, it's the saving grace of the game and the feature that will make you determined to try it again and get it right. (*Sierra, PO Box 485, Coarsegold, CA 93614. C-64/ \$24.95 disk.*)

1541 Disk Drive Alignment Program

This Package Lets You Diagnose and Cure Your Drive's Alignment Woes

f you use software with a copyprotection scheme involving intentional read errors that produce a rattling sound when loading, you're probably on the road to disk drive alignment problems. If you have trouble loading programs, especially commercial software, you may already be there.

There's little solace in knowing that you're not the only person to suffer this particular type of problem. However, there is reason to cheer. You can realign a balky drive at home (it takes only an hour or two) and get right back to your computing.

CSM's 1541 Disk Drive Alignment Program walks you, step by step, through the alignment process. All you need are a few screwdrivers, a little time and patience, and the courage to open up your disk drive.

Following instructions in the 18page manual, you learn to disassemble the drive (remove 12 screws), check and adjust the motor speed, check alignment and make the adjustments necessary to return your 1541 drive to peak operating condition.

The manual is adequately illustrated and the directions are easy to understand. While the hazard is minimal, the author is to be commended for clearly pointing out the potential danger of working on a device with exposed 117-volt wiring.

CSM provides two disks. One contains the alignment program that operates the drive during testing. The other is a precisely recorded calibration disk that provides the standard to which your drive will be aligned.

TEMPLE OF APSHAI TRILOGY" BIGGER. MEANER. AND RICHER THAN EVER.

You know Temple of Apshai. The classic. Best-seller for over four years.

You may have friends trapped forever in its dark recesses.

Players have dropped from sight for weeks at a time, searching for the treasures of Apshai.

Well now we've raised the stakes. Introducing the new Apshai Trilogy. The combined wrath of the world famous Temple of Apshai®, Upper Reaches of Apshai[®], and Curse of Ra[®]. All on a single disk. Twelve levels. 568 rooms to explore. More choices. More chances. Best of all, there's faster game play.

The graphics and sounds are new. The challenge of the dungeons is timeless. Are you ready for the most involving role-playing game ever designed?

Temple of Apshai is waiting. Silently lurking. Patiently waiting. For you. At your nearest Epyx dealer.

This package offers a unique method of verifying alignment; this method can also be used to monitor your drive's performance and alert you to future alignment problems before they interfere with the smooth operation of your software.

This alignment check causes the 1541 to read and write to several tracks and sectors on the calibration disk. The total time required to accomplish this task is computed and reported onscreen. A substantial increase in this timing number means it's time to adjust your drive's alignment.

Also included are instructions for "The Fix," a positive method of preventing further alignment errors due to additional slippage of the head-positioning cam. Requiring further disassembly of the drive mechanism, this procedure is not for the mechanically faint of heart. It is, however, certain to provide a more secure repair than the frequently suggested trick of putting a drop of glue on the top of the offending mechanism.

This procedure requires that you drill a hole and secure the head-positioning cam to its shaft with a steel pin. If Commodore had built the 1541 with this type of construction in the first place, alignment problems would probably occur less frequently and alignment programs wouldn't be as necessary as they are.

However, since alignment woes are so common, this package should prove valuable to you. It provides a measure of prevention as well as a cure for your disk drive's alignment problems. (CSM Software, PO Box 563, Crown Point, IN 46307. C-64/\$44.95.)

a doubt, it is the most complete simulation ever devised for the C-64.

Don't expect to jump into a hot rocket and fly by the seat of your pants. In fact, this is not a flight simulator; rather, it is a mission simulator and the mission is the most complex ever undertaken-to build a permanent, working space station by the turn of the century.

You begin far in advance of your first flight, in the planning stage. Here, you must allocate funds for equipment, station modules and operations. As NASA does, you may earn money by selling shuttle space to private corporations for research projects, thus bolstering your budget for future flights.

Next, you select a crew. From a field of 32 candidates, you choose at least six for each mission. Your selection is based upon skills needed for a particular mission, balanced against personality traits that will determine whether your crew can function in harmony.

With this done, you're ready to schedule a launch date. Because many missions will be required, you'll want to set the earliest possible date from the time-line on your screen.

At the launch, you have a colorful view of the shuttle poised at the launch-pad. Your screen shows date, time, seconds remaining to launch and weather conditions. As in real life, a launch may be delayed or even aborted.

What you do in orbit depends upon whatever you had planned to do. You may simply be ejecting modules for future assembly or you may be involved in extravehicular activity in actually assembling your station.

NASA's planning for this project spans years, and your own involvement with the simulation will take days or weeks. Fortunately, you may save missions to disk at any stage.

Documentation is excellent, and the manual is aided by the extensive tutorials within the program. Superb graphics, with dozens of different screens, add to the feeling that you're working on something real-the acid test of any simulation.

Though it won't prepare you for a degree in space engineering, Project: Space Station is very highly recommended for anyone who is interested in just what is involved in a shuttle flight and, especially, for anyone involved in any way with the President's Young Astronaut Program. In fact, it is an absolute must. (Human Engineered Software, 390 Swift Ave. #14, South San Francisco, CA 94080. C-64/ \$39.95 disk.)

The Original Boston **Computer Diet**

Shed Those Extra Pounds and Learn to Plan a Healthy Diet

he Original Boston Computer Diet, written by three medical doctors and a nutritionist, is an impressive and useful program that will be of interest to anyone who has ever tried to wish off a few excess pounds.

This interactive program, originally written for the IBM PC, has been very nicely implemented on the C-64. Crammed into almost every available byte of RAM, this is a quick and easy-to-use program that will help almost anyone plan and maintain a sensible and healthy weightcontrol program.

The first thing that impressed me was the program's speed. I was also pleased with the heavy emphasis placed on proper eating habits and the medical consequences of dieting. The program contains ample warnings about dieting and excessive exercise unless your medical condition permits.

Your first session with the program allows you to choose which of three distinct personality types will be your personal "counselor." Your counselor leads you through a series of questions about your medical history, lifestyle and eating habits.

Daily sessions for the next week are spent reporting your food intake, setting goals and developing your ability to plan meals and regular periods of exercise. Your counselor offers encouragement and also points out bad habits, poor food choices and any excessive consumption of sweets, fats or alcohol.

The Diet's database contains almost 400 commonly eaten foods and can be expanded to include another 100 of your choice.

In subsequent weeks, you are expected to keep daily appointments with your counselor and report exactly what you've had to eat. After the first week, you are no longer given

Fleet System 2[™]. Word processing that *spells* V-A-L-U-E.

— Family Computing

For C-64 and C-128

Full Support of Commodore 128 Mode!

Complete word processing with built-in 90,000 word spell checking-Only **\$79.95**

Up till now, you'd have to spend a minimum of about \$70 to get a good word processor for your Commodore $64^{\text{TM}}/128^{\text{TM}}$ And if you added a small, *separate* spell checking program, you'd be out well over \$100!

Now there's Fleet System 2! It's two powerful programs in one, and it's perfect for book reports, term papers or full office use.

Fleet System 2 combines the EASIEST and most POWERFUL word processor available with a lightning-fast 90,000 word spelling dictionary — all in one refreshingly EASY TO USE integrated system. Finally, spell checking is now available at your fingertips. You can even add over 10,000 "custom" words to the built-in 90,000 word dictionary. And at a suggested retail price of \$79.95, Fleet System 2 really spells

V-A-L-U-E, and 90,000 other words too! Fleet System 2 helps people of all ages to learn to *spell correctly* and *write better* too. It's the ONLY full featured word processor that provides you with helpful writing and VOCABULARY FEEDBACK such as: the total number of words in your document, the number of times each word appears, and total number of "unique" words, just to name a few.

Fleet System 2 has every important feature that will help you make child's play out of the most heavy duty typing tasks. There's Built-in 80 Column Display — so what you see is what you get, Horizontal Scrolling During Typing, Easy Correction and Movement of Text, Page Numbering, Centering, Indenting, Headers and Footers, Math Functions, Search and Replace, Mail Merge, BUILT IN 90,000 word SPELL CHECKING and much, much more!

suggested menus for each of your daily meals, as you are expected to do your own planning.

Any diet requires a great deal of commitment in order to be effective. The simple daily task of keeping an appointment with your computer counselor is an excellent aid in maintaining that commitment.

The Original Boston Computer Diet occupies both sides of the program disk. Side 1 contains all of the preliminary information necessary to begin your diet. Your daily sessions are initiated by booting up side 2. Side 1 is copy-protected, while side 2 is not.

Even though all daily sessions can be run from a backup of side 2, the program occasionally asks you to insert side 1 (the master disk). This is apparently done to prevent the program from being shared or illegally duplicated, but it also prevents other members of the family from using the program. I found the occasional request to switch disks somewhat an-

noying, since the master disk must always be close at hand instead of tucked safely away.

Aside from this flaw, I found The Original Boston Computer Diet to be one of the more innovative and useful software packages released for the Commodore in some time. (Scarborough Systems, 55 South Broadway, Tarrytown, NY 10591. C-64/\$49.95 disk.)

> John Premack Lexington, MA

Success with **Algebra Series**

Here are Four Self-Paced Alegbra Tutorials That are Designed for Grades 7-12

f you were to survey high school students on their least favorite

subject, the chances are that algebra would turn up among those at the top of the list.

While CBS Software's Success with Algebra Series won't bring students to any greater understanding of the discipline's usefulness outside of the classroom, its self-paced tutorials take much of the mystery out of advanced linear equations, binomial multiplication and factoring. The program leads students, step by step, through the operations required to solve specific problems.

During practice with actual equations, students must correctly complete each step in the solution process before continuing to the next step. In this way, mistakes are easily identified as soon as they are made, and the student is guided to the equation's correct solution.

The four packages that make up the series are Binomial Multiplication and Factoring, First Degree and Advanced Linear Equations, Graphing Linear Functions, and Simultaneous Equa-

A Printer For All Reasons Search For The Best High Quality Graphic Printer

If you have been looking very long, you have probably discovered that there are just too many claims and counter claims in the printer market today. There are printers that have some of the features you want but do not have others. Some features you probably don't care about, others are vitally important to you. We understand. In fact, not long ago, we were in the same position. Deluged by claims and counter claims. Overburdened by rows and rows of specifications, we decided to separate all the facts - prove or disprove all the claims to our own satisfaction. So we bought printers. We bought samples of all the major brands and tested them.

Our Objective Was Simple

We wanted to find that printer which had all the features you could want and yet be sold directly to you at the lowest price. We didn't want a "close-out special" of an obsolete product that some manufacturer was dumping, so we limited our search to only those new printers that had the latest proven technology. We wanted to give our customers the best printer on the market today at a bargain price.

The Results Are In

The search is over. We have reduced the field to a single printer that meets all our goals (and more). The printer is the SP-1000 from Seikosha, a division of Seiko (one of the foremost manufacturers in the world). We ran this printer through our battery of tests and it came out shining. This printer can do it all. Standard draft printing at a respectable 100 characters per second, and with a very readable 12 (horizontal) by 9 (vertical) character matrix. This is a full bi-directional, logic seeking, true descender printer.

"NLQ" Mode

One of our highest concerns was about print quality and readability. The SP-1000 has a print mode termed Near Letter Quality printing (NLQ mode). This is where the SP-1000 outshines all the competition. Hands down! The character matrix in NLQ mode is a very dense 24 (horizontal) by 18 (vertical). This equates to 41,472 addressable dots per square inch. Now we're talking quality printing. It looks like it was done on a typewriter. You can even print graphics using the standard graphics symbols built into your computer. The results are the best we've ever seen. The only other printers currently available having resolution this high go for \$500 and more without the interface or cable needed to hook up to your computer.

Features That Won't Quit

With the SP-1000 your computer can now print 40, 48, 68, 80, 96, or 136 characters per line. You can print in ANY of 35 character styles including 13 double width and 3 reversed (white on black) styles. You not only have the standard Pica, Elite, Condensed and Italics, but also true Superscripts and Subscripts. Never again will you have to worry machine will do it automatically, through easy commands right from your keyboard. Do you sometimes want to emphasize a word? It's easy, just use bold (double strike) or use italics to make the words stand out. Or, if you wish to be even more emphatic, underline the words. You can combine many of these modes and styles to make the variation almost endless. Do you want to express something that you can't do with words? Use graphics with your text -- even on the same line. You have variable line spacing of 1 line per inch to infinity (no space at all) and 143 other software selectable settings in between. You can control line spacing on a dot-by-dot basis. If you've ever had a letter or other document that was just a few lines too long to fit a page, you can see how handy this feature is. Simply reduce the line spacing slightly and ... VOILA! The letter now fits on one page.

Forms? Yes! Your Letterhead? Of Course!

Do you print forms? No problem. This unit will do them all. Any form up to 10 inches wide. The tractors are adjustable from 4 to 10 inches. Yes, you can also use single sheets. Plain typing paper, your letterhead, short memo forms, labels, anything you choose. Any size to 10" in width. In fact this unit is so advanced, it will load your paper automatically. Multiple copies? Absolutely! Use forms (up to 3 thick). Do you want to use spread sheets with many columns? Of course! Just go to condensed mode printing and print a full 136 columns wide. Forget expensive wide-carriage printers and changing to wide carriage paper. You can now do it all on a standard 81/2" wide page, and you can do it quietly. The SP-1000 is rated at only 55 dB. This is quieter than any other impact dot matrix printer that we know of and is quieter than the average office background noise level.

Consistent Print Quality

Most printers have a ribbon cartridge or a single spool ribbon which gives nice dark

printing when new, but quickly starts to fade. To keep the printers output looking consistently dark, the ribbons must be changed quite often. The SP-1000 solves this problem by using a wide (1/2") ribbon cartridge that will print thousands of pages before needing replacement. (When you finally do wear out your ribbon, replacement cost is only \$11.00. Order #2001.)

The Best Part

When shopping for a printer with this quality and these features, you could expect to pay around \$500 or more. Not now! We sell this fantastic printer for only \$259.95! You need absolutely nothing else to start printing - just add paper.

No Risk Offer

We give you a 2-week satisfaction guarantee. If you are not completely satisfied for any reason we will promptly refund your purchase. A 1-year warranty is included with your printer. The warranty repair policy is to repair or replace and reship to the buyer within 72 hours of receipt.

The Bottom Line

Be sure to specify the order # for the correct version printer designed for your computer.

Commodore C-64 & C-128, Order #2200, cable included

IBM-PC and compatibles, Order #2100, plus 8' cable #1103, \$26.00

Standard Parallel with 36 pin Centronics connector, Order #2400, no cable

We also have interfaces and cables for other computers not listed. Call Customer Service at 805/987-2454 for details.

Shipping and insurance is \$10.00 - UPS within the continental USA. If you are in a hurry, UPS Blue (second day air), APO or FPO is \$22.00. Canada, Alaska, Mexico are \$30.00 (air). Other foreign is \$70.00 (air). California residents add 6% tax. The above are cash prices - VISA and MC add 3% to total. We ship the next business day on money orders, cashiers' checks, and charge cards. A 14-day clearing period is required for checks.

tions/Quadratic Equations. Each one comes with a pocket-size manual that briefly outlines the program's operation and provides a succinct explanation of the methods involved in solving the problems. More detailed instructions are provided on the program disks, and special help screens and mini tutorials can be accessed while you are actually working out an equation.

While performing binomial multiplication according to the FOIL method (First, Outside, Inside, Last), for example, if you enter an incorrect product for any of the four pairs of terms, you are given a chance to reconsider your answer. If your second attempt to multiply the two terms is also wrong, arrows link the specific pair that should be multiplied and you are told what the product should be. You can then go on.

Success with Algebra also uses your C-64's graphics capabilities for visual emphasis of certain algebraic principles. To graph linear functions, for example, you simply select appropriate values for x and are guided toward finding the corresponding solutions for y. Once you have three pairs of coordinates, you're presented with a graph and instructed to plot the three points of the function by moving a cursor to the proper point and pressing the return key. After all three points have been plotted, the computer draws a straight line through them to illustrate the equation.

After each set of problems you complete, you're provided with a detailed summary of your errors. Although this seems to be a good way of letting students know where they're having the most problems, a percentage of the total that were answered correctly, along with an appropriate message of praise or encouragement, could have been supplied as well.

This minor complaint aside, the Success with Algebra Series is a valuable study aid for high school students, and a great way for rusty college students to brush up on their binomials. (CBS Software, One Fawcett Place, Greenwich, CT 06836. C-64/ \$34.95 each disk.)

WWW.COMMCC012.Ea Moy Not Reprint Without Remission

Add sparkle and excitement to your videotapes with screen displays from your computer. This article tells you how to make the VCR-computer connection.

Let me tell you a sad story.

Some time ago, a man came into my video store looking for advice on how to improve his videotapes of weddings. Since there aren't a lot of us doing that, I was glad of a chance to share some experiences and give him a few tips. After a while, he apparently decided I could be trusted, so he revealed to me his great secret.

"I'm using a computer with video," he said. "I can make titles with it."

Having just begun my own experiments with such titling, I was more than interested.

"Really?" I asked.

"I'll show you," he said, and proceeded to run his videotape, which revealed that he had simply pointed his video camera at a green screen and taped such displays as:

Maid of Honor Kathy McCoy Best Man Herbert Ross

There is a better way.

Making the video connection involves more than the physical hookup of computer to video recorder. My customer had used a word processor because he'd forgotten the computer's ability to generate images and sound. He used it because it was a way to convey information, not knowing that what he really wanted to convey was emotion and excitement.

But you're not going to shoot a wedding, so why bother? Why put computer images on videotape? Sure, you could tape your best game of Pac-Man and replay it whenever you felt frustrated, but there are other reasons.

As I indicated, I videotape weddings, parties, bar mitzvahs...anything a client will pay me to shoot. The titles and graphics are an extra, something the client didn't expect to get, something that gives my work a more professional look.

That look can dress up a variety of video projects. Maybe you want to create your own title for your videotape of, say, classic horror movies. Or you may want to string together computer images and sequences to make an animated short subject. Someday, you may transfer your family's old home movies to VCR tape. Computer titles and captions can do a lot to help the flow and to smooth the transition from, say, the vacation movies of '74 to the Christmas movie of '75.

The Physical Connection

A direct physical connection between computer and

video recorder leads to a sharper image with pure colors. The composite video signal that would normally be interpreted by your monitor or CRT can instead be directly interpreted by any VCR.

With the Commodore family of computers, you have access to the DIN video-out port on the rear of your computer. The DIN plug originally supplied with the Commodore 1701 monitor (and still available in stores) is ideal. It terminates with two RCA plugs-one for audio, one for video. Simply plug the one marked VIDEO into the video-in jack on your VCR (see Photo 1).

In order to see what you're doing, you then use a cord with RCA plugs on both ends to make a connection from the VCR video-out jack to the video-in jack on your monitor. With the Commodore 1702 monitor, this is the video jack on the front, not the back. (Remember, we're talking about composite video. A VCR will neither put out nor accept an intelligent signal broken down into chrominance and luminance. Therefore, the three-terminal cable that came with your Commodore 1702 monitor cannot be used.)

If you're using a television set as a monitor, you're using the RF converter that came with your computer. This is the little box that is attached to your antenna terminals. To use this on a video recorder, you must attach it to the VCR through the tuner.

www.Commodore.ca May Not Reprint Without Permission

Remove the antenna wire that's currently feeding programs into your VCR and attach your computer's RF converter box in its place.

(Since the RF box terminates in a flat, 300-ohm wire, and video recorders have a connection for a 75-ohm cable, an adapter may be required. These are inexpensive, and you can get them at any radio or video shop.)

The cable now connecting your VCR to your TV may remain in place to allow you to watch as your titling is being recorded.

With either connection, simply bear in mind that what goes into the VCR must come out to the TV or monitor. You're simply putting the VCR in line between computer and TV.

With the VCR tuner set (and fine-tuned) to channel 3 (4 in some areas), you'll be able to record computer output as easily as you record a TV program.

That's the physical connection. Now what about the mental?

Plugging into Creativity

The title should fit the subject, so it helps to think about just what you are doing and plan ahead.

For the first birthday party of a boy who was born on July 4th, I used large letters formed from reversed spaces to write on the screen, "Happy Birthday, Donald." The

Illustration by Jack Crompton

Photo 2. A sample of how you can personalize your videotapes. (This display was created with Broderbund's The Print Shop.)

Photo 1. How to connect your computer to your VCR. (This slide was created with DOODLE, from City Software.)

screen then cleared and went to a large red firecracker, with a flickering yellow flame. (For the flame, I changed the cursor to a spade symbol and allowed it to pulse in its usual way.) After a moment, the screen border flashed rapidly through all eight colors, giving the impression of an explosion. Backed up on audio with rousing martial music, it was an extremely effective first effort.

For the sixtieth birthday of another client, I placed a large 5 in the center of the screen, then had it change to 10, 15, 20, etc., until 60 appeared in a larger font. After the screen cleared, I cut to a city skyline with large yellow spotlights forming a "V." "Happy Birthday, Mahlon" was written in the sky between the cones of light, and, just above the skyline, fireworks made of sprites began to flicker.

For the wedding rehearsal dinner of a couple who both happened to be lawyers, the groom's father (also a lawyer) planned to appear in a robe and white barrister's wig and elicit the usual toasts and best wishes by calling upon the guests for testimony.

It was an idea I liked. I opened with a gavel that filled the screen, cleared and went to a bordered announcement that said "Rehearsal Dinner." The screen then cleared and gave the second title card, "And Preliminary Hearing of"; the screen again cleared and gave the names of the defendants—uh, I mean the bride and groom. (See Photos 2 and 3 for samples of my efforts.)

The principle behind this project is to send an image from the computer to the VCR tape, then to the monitor. This allows you to personalize VCR films with titles, graphics screens and other documentation.

If you're doing this kind of video tape recording professionally, don't overlook the opportunity to promote yourself. In the instances I've cited, members of the clients' families will be watching these tapes and, sooner or later, one of them will need my services.

Therefore, at some point, an animated "Videography and Graphics by Erv Bobo" will appear, embellished by sprite drawings of a video camera and a TV set. (Incidentally, I liked my logo so much that I dumped it to a printer, took it to a stationery shop and had it reduced and printed on business cards.)

However, don't allow your logo to dominate the rest W28WIGONIANOGORS, Ca Moy Not Reprint Wilsour Permission of the titles. Get it on and get it off. Although you deserve credit for what you've done, some of your audience will see it as a commercial interruption.

Timing of your titles is important, too. A title should be on the screen long enough for the slowest reader to absorb, but no longer. Audiences get impatient, always in a hurry to see the part where Aunt Tilly falls into the punch bowl.

Another reason for timing is sound. A musical background for your titles helps the flow, and the music should be as appropriate as the titles. Although I have a fairly good collection of records and tapes, I find myself increasingly being drawn to one particular piece of music, for it is, in a sense, all-purpose. Starting slow and melancholy, almost like a hymn, it builds to a bouncy rhythm and crashing crescendos.

By working with this one song, I find it easier to pace my titles and to determine the overall length.

Lest you worry about royalties on music used for such purposes, one of my friends who is knowledgeable about legal matters tells me this does not really fit the definition of "public performance for profit." It is, rather, like reselling a book that is then used for reading aloud to a group.

The C-64 and C-128 have excellent graphics capabilities. You may either create your own graphics or make life a little easier by obtaining one of the many available graphics software packages.

I have only a little programming ability, so the following are my favorite graphics programs:

Designer's Pencil

In Designer's Pencil, by Activision (2350 Bayshore Frontage Road, Mountain View, CA 94043), all programming commands are built in and must be selected with joystick and fire-button. The built-in commands put an end to syntax errors, but I still wish I could select the commands from the keyboard. I dislike any software that forces you to use your joystick as a mouse.

The redeeming quality, for purposes of this discussion, is in the execution of your design. Rather than appearing immediately before you, it is drawn by a little yellow *Continued on p. 109.*

STRATEGIC SIMULATIONS, INC.

The world's first computer assisted computer game.

Floyd the Droid FROM THE WORLD OF RADARSOFT

Deep in the sewers of 6 major cities throughout the world you've got trouble!

Your job is to get them cleaned! But you've got help in the shape of an IDPR (Icon Driven Programmable Robot) called FIOYD THE DROID who has been programmed to clean the dirt and slime and mend the cracks and leaks. But...Floyd's not alone down there! Rats, bats, alligators and hoodlums are making life difficult for him. He's got to be taught how to deal with the unwanted visitors. Your job is to devise a RAT-PROCEDURE for Floyd to use against the Rats and program him with it via your ICON driven control panel. Likewise a BAT-PROCEDURE is needed against the Bats etc. That's only half the story - you've still got to plan the most efficient route for Floyd or you won't get the job done in time, and that could mean you'll be down there with a broom and scrubbing brush!

With complete 8 pages manual. Author Edwin Neuteboom.

*DIFFERENT CAMERA ANGLES TO GIVE TOTAL OVERVIEW OF THE GAME

FREE OFFER FOR COMMODORE OWNERS.

ANNOUNCING A NEW, EASY WAY TO GET MORE OUT OF YOUR COMPUTER...FROM ON-LINE STOCK QUOTES TO PERSONAL MESSAGING.

Owners of Commodore 64 or 128 computers are invited to go on-line with Viewtron® - and step into the future.

What does the future hold for you as a Viewtron subscriber?

Simply accept this free offer, and see for yourself. Put this unique, advanced generation, on-line service to the test - as Viewtron's guest.

Put Viewtron to the Test - Free. Now see how easy it is to give your Commodore capabilities it's never had before.

Simply load the diskette Viewtron will send you. Then sit back and explore a huge database of useful time-saving, money-saving information packaged for you by America's leading communications company.

Suddenly, your computer is a powerful information center. For the first time, at almost any time, you have push-button access to:

Instant financial information including one-button access to stock quotes.

On-line banking services that you can even use to pay your bills!

Instant airline schedules - complete with fare updates.

A complete encyclopedia that's constantly updated electronically.

Electronic shopping at discount prices on everything from computer software to new cars.

Instant sports reports - including late scores, standings, and statistics.

Instant news, national and international or even your own customdesigned news report.

Electronic messaging so you can talk on-line to fellow Viewtron subscribers for less than it costs to talk by phone.

Even electronic auctions where prices keep dropping instead of rising.

Special services exclusively for Commodore owners who'd like to "Ask the Experts" for answers to Commodore questions, order bargains on Commodore software and hardware. Plus, Viewtron is the only complete on-line service that runs in color on Commodore machines.

Viewtron makes all these services and more "yours to command" whenever you wish. And commanding them is so easy.

You issue these commands in plain English. In fact, part of Viewtron's sophistication is simply to make it easy for you to get exactly the information you want!

Of course, this speed and ease of use saves you time. And that, in turn, saves you money. But that's only part of the Viewtron "savings story."

Pay only for what you use. For all its sophistication, Viewtron is the least expensive on-line service you can use.

Viewtron charges no subscription

fee and no monthly minimum. You pay only for what you use. Just 9 cents a minute weekday nights (after 6 pm) and weekends; 22 cents a minute weekdays* And unlike other services, we don't charge extra if you use a 1200-baud modem.

You can access Viewtron on any of the three major communications networks at no extra charge. (A local call for most people.)

Step into the future – free! Taking your first step into the future with your Commodore is easy and affordable, too. All you need is the computer itself, a disk drive, a modem, and the Viewtron Starter Kit.

Order your Starter Kit now for just \$9.95, and you'll get your first hour of service free.

If you haven't already invested in a modem, that's no problem. Viewtron can save you up to 50 percent on a modem! Mail the coupon today. Or call anytime toll-free. Then take a long step into the future.

To get both your Viewtron Starter Kit and 1 Free Hour of On-Line Service CALL TOLL-FREE Or mail this coupon.

Commodore Carousel

Connecting your Commodore to a carousel slide projector opens up exciting avenues in education and home entertainment.

By DANIEL MORRIS

Picture a study carrel that contains a Commodore computer, a disk drive and a monitor. Sitting beside this is a slide projector with a small projection screen. As pictures appear on the projection screen, a student responds to them by interacting with the computer. As the student progresses through the program, the slides automatically lead his progress, changing as the program changes and advancing in response to the answers that he gives to certain questions in the program.

In greater numbers than ever before, educators and home users are becoming aware of the potential of the microcomputer as a powerful learning tool. Until recently, the computer was viewed as some sort of superior calculator, scientific instrument or medium for teaching computer languages. This attitude still persists to some degree; however, new interactive technologies such as the video disk systems, which allow users to access visual material by use of the computer, are causing some educators to reexamine the computer as a teaching medium. (Home users can also apply this video/computer combination to entertainment purposes.)

Early teaching programs, some of which are still in use, relied heavily on text and simple graphics that were not much more effective than simple printed workbooks. Admittedly, these programs were, and are, *initially* effective, probably because they sparked the excitement of something new. (Such excitement was generated by the shortlived video game craze of a few years ago.) Some educators believe that once the initial rush of enthusiasm subsides, computerized instruction will be equally short-lived, and computers will begin to gather dust in classrooms.

Instructional programs that include pictorials and other more sophisticated graphics seem to have the most potential for growth and survival. The future of this technology lies not so much in the initial "gee whiz" factor, but in the possibility for the inclusion of a broader range of subject matter, which, by its very nature, must include sophisticated visual material.

For example, by using text and computer-generated graphics, it's possible to design a computer program that will teach students to identify works of art, tissue samples or microscope slides. However, given the amount of memory and cost involved in producing the high-resolution images that would be required, such a project is prohibitive.

This type of programming could be more easily accomplished by using the less expensive interactive video disk systems, rather than digital graphics. However, these systems and their software cost in excess of \$40,000, an

Photo 1. A four-channel output interface board with four relays.

Photo 3. Remote slide-advance cord with advance-reverse unit removed. (The cord has been prepared to be attached to the output board.)

investment that is often beyond the means of small schools and training centers. Given the limited number of students who might benefit from this sort of system, it might be difficult to justify such an expenditure.

The personnel in the schools or corporations who have invested heavily in interactive video disk systems know that the programs for them are expensive. The greatest problem, however, is the difficulty of adapting video systems to individual needs and differences. Only broadly based educational programs that allow for mass marketing are inexpensive enough for appreciable cost effectiveness.

One might hope for an interactive system that is simple and cost efficient, and that satisfies the following needs.

1. It should be relatively inexpensive to put into place.

2. The computer programming should be simple, straightforward and easily modified.

3. The visuals should occupy little memory and be immediately accessible. Waiting for an intricate graphic to load from digital disk memory takes ages.

Photo 2. Original remote slide-advance cord with advance-reverse unit still attached.

Photo 4. The advance (left) wire and the return (right) wire (polarity is not important) attached to the output board. (All photos by Daniel Morris.)

 The visuals should be of high resolution, and easy to create and replace. Long hours are required for programming any graphic, even if one uses a graphics tablet.
 The visuals should be easy to rearrange and update.

All of this and more can be achieved by interfacing an auto-advance slide projector with the computer.

What You'll Need

To do this, I used a C-64 computer, a 1541 disk drive, a 1702 color monitor and a Kodak carousel projector.

I selected this equipment because of its availability, low cost, dependability and simplicity of operation. The C-64's graphics and sound capability made it preferable to some other microcomputers. Another reason for choosing the carousel projector is because its advance mechanism is easily accessed and it is available in nearly any school or training area.

Almost anyone using a 35mm camera can easily create the visual material required for an instructional program.

THE Premier Word Processing Package - CREATIVE COMPUTING

"PaperClip is easy to use, yet offers the advanced features of programs designed for the IBM PC. These include: block move, copy, delete, macros, automatic page numbering, headers, footers, underlining, boldface, super and subscripts, variable character pitch, and custom character sets. The editing screen can be set up to 130 columns wide, & text can be scrolled in any direction. A preview mode displays formatted text exactly as it will appear on the printed page. You may further define your own formatting parameters, including margins, line lengths, page length and spacing.

PaperClip contains over 30 printer files for all the current major models. The documentation is excellent and the disk itself unprotected, though keyed through a joystick port. This means you can make as many back-up copies as you like, but can use the program only when the key is inserted."-CREATIVE COMPUTING

"PaperClip is one of the easiest of the professional word processors to use, with a sensible manual and plenty of aids for the accident-prone."-COMPUTING NOW

With the amount of slide material or number of film strips that can be mounted as slides, the problem of visuals is easily solved. Original slides can be created from art work; non-copyrighted illustrations can be copied; and original photography can be used.

To write an accompanying program is easy in Basic. Most teachers can readily write programs that offer multiple-choice questions mixed with text and a few screen graphics. For example, let's take a look at a possible test program. (Lines 5 and 300 will be explained later.)

5 (This line is used to initialize the interface.) The first slide is on the projection screen
10 PRINT "{Shift Clear}"
20 PRINT "WHICH OF THE FOLLOWING PAINTED THIS PICTURE?"
30 PRINT "(A) DAVID (B) INGRES"
40 PRINT "(C) POUSSIN (D) GROS"
50 PRINT "(E) NONE OF THESE"
60 PRINT "CHOOSE ONE"
70 INPUT A\$
80 IF A\$ = "C" THEN GOSUB 300
90 IF A\$ <> "C" THEN GOSUB 200
200 PRINT "INCORRECT": FOR N = 1 TO 400: NEXT N; GOTO 10

300 (This line contains the subroutine for advancing the projector.)

The second slide appears on the projector screen.

This is, of course, only a simplified example. Actual programs can be far more sophisticated and complex, but the principle is the same. (Some programmers may prefer a Get statement to the Input statement in line 70.)

With the visuals and the programming accomplished, we can take a look at the task of connecting the computer

with the projector. This is not nearly as difficult as it may appear. The most difficult work lies in creating the programming.

Preparing for the Connection

For those of you with *RUN*'s 1985 Special Issue, p. 8 provides information on various connectors.

For those who have some basic electronics experience, a good book on interfacing should provide the information for constructing a board that can access the eight bits of input/output data that are available through the C-64's user port. To keep it simple, though, commercially constructed input/output boards are available from a number of suppliers who advertise in *RUN*.

Whether the board is a homemade or commercial item, it is the output portion of the board that controls the slide projector. This portion consists of a connector that makes contact with one of the I/O lines at the user port. A conductor carries information from that contact to a transistor. The transistor amplifies the information from the user port, so that it will have enough strength to close a relay. (A relay is an electronically operated switch.)

We now have what is essentially a switch that can be opened and closed by a command from the computer. More importantly, the opening and closing of the switch can be included in a program.

It is a simple matter to connect the projector-advance switching circuit to the board relay (see Photo 1). The remote advance controller that comes with the projector could be used, but I recommend that you use either a spare advance extension cord or an old slide-advance controller. You need to obtain the proper cord and the male connector, which plugs into the projector. Connectors that will fit carousel projectors are available (I get mine from J.T. Simpson, 188 Elizabeth St., New York, NY 10012), but the following procedure is simpler and saves time.

Making the Connection

Making sure that the cord is not plugged into the projector, cut the plastic advance controller off the cord. If an extension cord is used, cut off the female connector (see Photos 2 and 3).

Beginning on the cut end of the cord, strip back the outside covering and find the advance conductor and its return. (The red wire is the advance wire and the yellow wire is the return.)

Connect these two wires to the output relay, so that when the relay closes, they will make a complete circuit (see Photo 4). If a commercially built board is used, you may wish at this time to identify and connect the slide projector's reverse conductor to another relay. The reverse conductor is the remaining white wire.

Now, on to programming the opening and closing of the electronic switch. Line 5 in the sample program contains the commands that are necessary for initialization of the CIA chip—the computer's complex interface adapter. These commands should occur early in the program, since the projector may not advance properly if initialization doesn't occur before an advance is attempted.

The command POKE 56577,255 is used to assure that the I/O lines are off and will not turn on until a command is used to turn them on.

The command POKE 56579,255 is used to designate the I/O lines as output lines.

So, line 5 in the sample program should appear as:

Technical Breakthrough #29

What you see is what you get!

You're playing HitchHiker's Guide to the Galaxy™, and you're presented with an option never before revealed to the human life form. You know, when you hit the key, it's going to be gone for all eternity. What do you do?

Freeze Frame!

It takes an instant "snapshot" of your screen. Dumps it to your printer, so you can file it for future reference . . . and returns you to the game, **exactly where you left off!**

Works with	Freeze Frame	Other Screen Dumps
Disk programs	Yes	Sometimes
Cartridge programs All programming	Yes	Seldom
languages	Yes	No
Absolutely everything	Yes	No way

Freeze Frame is Cardco's greatest technical breakthrough yet. It is the first totally transparent screen dump utility for Commodore computers. We mean absolutely, positively, 100% TRANSPARENT... to any program in any language. Period. As if that weren't enough, Freeze Frame also gives you ...

- Cartridge-based program for instant-on (with female connector for chaining cartridges)
- Standard, Reverse, and Mirror imaging
- Multiple printer adaptability. Works on any printer or printer interface

combination that emulates Commodore 1525 operation! High-

speed options are included for Epsoncompatible and Okidata-compatible printers.

The Wizards from the Land of Oz Have Done It Again!

5 POKE 56577,255: POKE 56579,255

The only problem in advancing the projector is that the advance button on most projectors must be held down until the projector cycles. That is, the interface relay must be held closed for a short time and then opened. This is accomplished by the use of a For. . .Next loop.

If you assume that the relay is connected to the computer through I/O line PB0, which is pin "C" of the connector, then you can close the relay connected to PB0 with the command, POKE 56577,254.

Remember, you turned off all the output lines with the command, POKE 56577,255. Well, you can use that same command to open the relay.

Line 300, below, is the subroutine for closing the relay, keeping it closed for the cycle of the projector, and then opening the relay.

300 POKE 56577,254: FOR N = 1 TO 200: NEXT N: POKE 56577,255: RETURN

This subroutine can be called up at any point in the computer program where a slide advance is desired.

Final Steps

To set up the system, connect all of the computer components together for normal operation. Then, push the interface board's connector into the user port. (The user port is on the left rear of the computer.)

At this point, you may wish to run the initialization program and the program to close and open the relay. An ohmmeter or continuity tester can be placed across the relay contacts to see if the circuit is closing. If everything is working properly, connect the projector advance cord to the projector and start your program.

All programs should include text that explains the operation of the slide projector. To make sure the images don't get out of synchronization with the text, the number of the slide that is on the projection screen should appear on the computer screen in a second color. This provides a quick reference that allows the operator to rapidly adjust the projector to the correct slide.

Home Entertainment

The computer/slide system is by no means limited to educational uses. Think of the possibilities of a trivia game that uses old movie stills or bubble gum cards. The beauty of this system is that it is limited only by the programmer's imagination.

Other devices such as sound or videotape drives can be similarly interfaced, and For. . .Next loops can be used to allow the tapes to run for specified periods. The advantage of having interactive sound without the loss of memory is similar to the advantage of slide graphics.

Assuming that you already own a C-64 system (a VIC will also support an I/O interface) and a carousel projector, the additional cost should be less than \$150.

KEYMASTER

The easiest-to-use, most-powerful disk backup program ever written for the 64.

With one 1541 drive:

- FAST FILE COPIER up to 5 times faster!
 FAST full protected disk GCR nibble copier
- FAST full unprotected disk copier
- KEYMASTER protected disk unlocking kit**
- FAST 10 second disk formatter

With two 1541 drives (NO disk swapping required during copying):

- FAST file copier up to 6 times faster!
- FAST full protected disk GCR nibble copier
 FAST full unprotected disk copier
- .. KEYMASTER unlocks protected disks by ELIMINATING the protection scheme originally written on the disk.
- Once one of KEYMASTER's KEYS has unlocked a disk, the program can generally be FILE COPIED onto another disk (also making the program compatible with non-1541 drives). If it is not file copyable, it can be fast nibble copied.
- 50 KEYS for popular programs will be provid ded on the first KEYMASTER disk.
- Frequent updates of 25 to 50 additional KEYS will be available (no original disk return required for updates!).

ALL OF THIS AT THE RIGHT PRICE! ONLY -\$29.95 for KEYMASTER \$10.00 for update disks

KEYMASTER created by Jim Drew.

The Creative Computer

This is one man's story of how he used his Commodore creatively. What's yours?

Several hours after the introduction of the home computer, I received a first-hand demonstration from my friend, Richard, who will always be the first on the block to own anything new. He was as proud as a new papa whose offspring could read, write, walk and talk at the moment of birth. I was polite, but not impressed.

Exactly where the right half of my brain was at that time, I do not know, because it took me quite a while to

By ANDREW M. COHN

realize how that bucket of bits and bytes, that overpriced slide rule, could be of use to me—a fine arts major whose problem in life was not how to balance a checkbook electronically, but, rather, how to unleash a creativity that clamored for expression. Let me explain...

Ten years ago, when I became media director for a hospital in Washington, DC, I was given the task of producing educational videotapes. By the time I acquired the basic tools of my trade, funds had become very tight. My requests for new production equipment had to compete with requests for medical instruments. I lost.

Making a Wish List

Operating on a restricted budget, I could only fantasize about new ways and means to create videotapes that could add interest and excitement to the process of learning. My growing wish list included:

1. A television title generator. Using rub-on instant lettering took an eternity.

2. A graphics design computer, to create illustrations, graphs and charts—not only for video, but for 35mm slides as well.

3. A speech synthesizer. After all, this is the computer age; why not jazz

up the narration with an occasional comment by a computerized voice?

4. A word processor for writing and editing scripts. I'm a fast typist, but I make errors and have a short memory. So why spend five minutes per mistake waiting for the correction fluid to dry and lose my next idea?

5. A music synthesizer. Wouldn't it be nice to create original theme and background music to edit into my videotapes?

In the world of industrial video,

this is not a cheap wish list. We're talking thousands of dollars here. I saw no point in submitting requests for this stuff!

In the Meantime

So I bided my time, and, before I knew it, the VIC-20 was introduced. At \$300, it was a bargain. In spite of my original skepticism, I knew intuitively that this machine would somehow get me out of my rut.

I quickly dumped some of our obsolete audiovisual equipment and raised the money for the VIC, knowing that surely someone would have the software to enlarge the size of the computer's screen text and allow me to use it as a title generator. I was wrong on that count, but a few hundred hours later I became both a programmer and the proud owner of the necessary titling software.

To this day, the sturdy little VIC and its Datassette companion sit at my editing console, ready to provide whatever titles I might need for my videotapes. This brand new capability kept me contented for at least two years. The remainder of my wish list, however, simply would not go away.

And the hospital was still not buying me any expensive new toys.

Granting Your Own Wishes

I knew that to achieve my goals for my work, I would have to purchase my own equipment. While this may sound unusually altruistic, it occurred to me that such an arrangement would permit me to work at home from time to time and avoid the brutal commute. Besides, it was about time a gadget lover like me acquired his own computer. So that is exactly what I did.

Within six months I had accumulated a complete C-64 system plus the essential software to complete my wish list and add some pizzazz to my media productions.

To create original artwork, such as cartoons and illustrations, I chose the KoalaPad with the KoalaPainter software. For video titling, over and above what my VIC-20 can accomplish, I selected Doodle!. This program allows me to display fonts of various sizes and, for charts and graphs, to combine text with graphics.

After the artwork is created and safely stored on disk, I simply carry home a ¼-inch portable videocassette recorder, feed into it the video from the Commodore, and tape a minute or so of each illustration or title set. The next day, the videotape is placed into the editing deck and integrated into the main production. If I need to prepare 35mm slides, I simply photograph the image directly off the computer's monitor.

For me, artifical speech is a novelty that may never wear off. Even without my work projects in mind, I believe that the cost of the computer could be justified by the potential of this amazing capability. The technology still needs refinement, but, with enough patience and phonemes, I have learned to create quite acceptable recordings, which, like the illustrations, are taped and edited into the master videotape. For this item on my wish list, I selected Tronix's S.A.M.

Word processing turned out to be more terrific than I had ever imagined. The addition of a printer and software has made typing, an area that I previously left to others possessing the patience to cope with correction fluid and incessant revisions, much more pleasurable.

Years ago, when I was studying television production in college, I was taught that most musicians do not go through the trouble of scoring a masterpiece for me to copy and incorporate into whatever training film I happen to be producing at the time. As tempting as it might be to open a film with the theme from M*A*S*H, I am deterred by the spectre of incarceration with copyright violators and similar hardened criminals.

Like many folks, I can sort of "play by ear" and pound out an original melody, which can actually fool some of the people some of the time. During my pre-computer years, I did this on a pair of Casio synthesizers in my office. I am now looking into the various music software available for the C-64. I suspect that I will soon be creating my own little masterpiece on the keyboard, in the comfort of my own home. The possibility that Beethoven might shift slightly in his grave is not important here.

What *is* important is that, for a relatively small investment in a home computer, I gained the ability to do exactly what I wanted to do at a fraction of the usual cost.

Unleash Your Creative Spirit

However, should the real point of this story be lost in the maze of gadgets and gimmicks, let me say that what we are really talking about here is not what I do for a living, but, rather, the process of setting free the inventive spirit that wanders aimlessly along the back alleys of our minds.

One need not be an artist, musician or writer to fulfill the fantasy of creation; I derived the most fun from using my speech synthesizer to

send very strange audio tapes to my friends. What's important is the sharing and sense of satisfaction and accomplishment.

For you and me, the home computer—that bucket of bits and bytes can be the key that unlocks the chains which restrict our thoughts and limit our achievements.

By GEORGE TREPAL

Now you can put a little movement into your screen displays by using this low-resolution keyboard graphics animation program.

RUN It Right

C-64; C-128 (in C-64 mode) Disk drive W 48W RUNI FANDARD HEBOCA May Not Reprint Wilhout Permission Unlike conventional keyboard graphics programs, this program produces movement, so you can have waterfalls, moving belts, wheels, flashing patterns and many other effects. You can also use this program for advertising and making special announcements.

If you haven't used keyboard graphics before, look at your computer's keyboard. Most keys have two little pictures, or graphics, on them. To print a key's left-most graphic, hold down the Commodore logo key (bottom left of keyboard) and press the desired key. To print a key's rightmost graphic, hold down the shift key and press the desired key. To change to color, hold down the CTRL key and press the color key (upper row) of your choice. For other colors, press the Commodore logo key and a color key. Key 1 is orange, 2 is brown, 3 is light red, 4 is dark gray, 5 is medium gray, 6 is light green, 7 is light blue and 8 is light gray.

You can combine the little pictures to make drawings, borders and other things. You can also put text on the screen. The very bottom right-hand corner is forbidden territory. If you print a character here, the screen will scroll up and you'll lose the top line of your picture.

Pulsing Pictures

When you run the program, the screen will clear. The keyboard graphics work as usual, except for the numbers and some punctuation marks. The program will explain which characters are different when you run it. Pressing any of these altered keys will put a moving character on the screen. These characters can be combined with letters and normal keyboard graphics to produce striking pictures. I won't describe which key does what, since that would ruin the fun of discovery and experimentation.

Here's something to try. Hold down any number key to make a row of moving images. Press the return key to move the cursor to the left margin

through the whole process again if you want another A.

Custom characters are made by designing a character and telling the computer to look at it, rather than at a letter. So, though the computer thinks it's getting the instructions to draw the letter A, it's really getting instructions to draw, say, a tiny alien, or whatever you designed.

All of this is controlled by the VIC-II chip, which can look at only 16K of memory at a time. Since a complete character set takes up 2K of memory, there's room for eight complete sets. However, since I've used low memory in this program, there's room for only six sets, since a lot of the Basic operating system and the screen take up the first 4K. I've allotted the next 4K to my program, leaving the last 8K to hold my four character sets.

The program rapidly switches among the four sets, and a different custom character appears on the

on the next line. Type your name and press the return key again. Now use another number key to make a bottom row to highlight your name. The English pound key stops the program. Simultaneously pressing the shift and CLR/home keys clears the screen.

To save a screen, press the f1 key, give the computer the name of your picture and press the return key. Any name will work, provided there isn't another picture of the same name on the disk. The disk drive's red light will come on, and the screen will stop pulsing. When the pulsing starts again,

the screen will be saved. Loading a picture from disk is almost like saving one, except you use the f7 key instead of f1.

When saving or loading, you'll lose the character in the upper left-hand corner when the cursor returns to the home position after disk access.

How the Program Works

The program demonstrates a novel use of custom characters. The computer does almost a million things a second, but none of those things amounts to much. Also, in human terms, the computer does things the hard way. For example, to put the letter A on the screen, it has to look up how to make an A. After doing that and drawing the A, the computer forgets what it just did and has to go

Illustration by Phil Geraci

screen with each switch. Like the frames in an animated cartoon, each character is a little different from the last, to achieve the illusion of movement. The non-custom characters are the same in each set, so they don't appear to change. The change itself is controlled by telling memory location 53272 which set to use.

When you run the program, its first task is to copy the entire character set from ROM four times into RAM. After doing this, it Pokes the custom characters into the RAM character sets.

This is a demonstration program, so I've used only 20 custom characters. You could use far more. The advantage to character switching is that you get a lot of animation for very little work. Note that most of the program is taken up by data to make the 20 characters. More of it is taken up with the synthetic cursor. In a game featuring a maze with electric walls (don't touch!) you could make the walls with a single custom character, alternating just two character sets. The resulting animation would add greatly to the appeal of the program.

If you want to make your own program using my sets, you'll be limited to 4K of Basic memory. Sprites can be put in higher memory. The essentials of my program are reserving memory by Poking locations 52,32 and 56,32, putting the custom characters into the reserved memory and switching character sets. The switch is accomplished by Poking 53272, (PEEK(53272) AND 240) + X. X cycles through 8, 10, 12, 14, 8, 10, 12, ...

To make your own program, modify my program so it only Pokes the data statements into the right places. Run my program, then enter NEW. The program will be gone, but the character sets will remain in place. You'll then be able to write your own program in the empty 4K of memory. Be sure that the first line of your program reserves memory. When you cycle values at the magic address (53272), your pictures will pulse.

If you don't want to use my custom characters, you can make your own. Programmable characters are covered in the *Commodore 64 Programmer's Reference Guide.*

SWIFTAX ... ONE GOOD REASON FOR PREPARING YOUR OWN TAXES

You don't have to know much about accounting or computers to prepare your own taxes. With Swiftax, Timeworks' easy-to-operate, menudriven program, you'll complete your

1985 Federal income tax returns quickly and painlessly. And, our easy-touse manual provides the information you'll need to keep your returns accurate and up-to-date.

Features: Guides you through every step of the tax preparation process with full user prompts, and instructs you on which forms you must complete.

Automatically checks your tax alternatives, such as income averaging, etc., and calculates the lowest

amount of income tax you must pay.

Sets up a unique Taxpayer File, enabling you to make changes to your completed tax return, at a later date.

Includes the most commonly used supporting schedules – A,B,C,D, G, SE, W, and Form 2441 – stores the

More power for your dollar.

totals, and integrates this information onto your Form 1040, 1040A or 1040EZ.

Prints your tax information directly onto tax forms as well as blank paper.

Prints itemized lists of dividends, interest, etc., that are too long for the standard forms.

Prints amortization schedules, summarizing yearly principal and interest payments.

A new program disc and manual can be obtained for one additional year at a nominal charge.

Swiftax. One more powerful productivity tool from Timeworks to help you keep your business (and your life) in order.

Flight Simulator II Scenery Disks

The Challenge of Accomplished Flight

With a realism comparable to (and in some ways even surpassing) \$100,000 aircraft flight simulators, Flight Simulator II includes full flight instrumentation and avionics, and provides a full-color out-thewindow view. Instruments are arranged in the format standard to modern aircraft. All the radios needed for IFR flight are included. Front, rear, left, right, and diagonal views let you look in any direction. Program features are clearly documented in a 96-page Pilot's Operating Handbook.

For training in proper flight techniques, Flight Simulator II includes another 96-page instruction manual, compiled by two professional flight instructors with over 8,000 hours flight time and 12,000 hours of aviation teaching experience. You'll learn correct FAArecommended flight procedures, from basic aircraft control through instrument approaches. To reward your accomplishments, the manual even includes a section on aerobatic maneuvers.

The Realism and Beauty of Flight

Go sight-seeing over detailed, realistic United States scenery. High-speed graphic drivers provide an animated out-the-window view in either day, dusk, or night flying modes.

Flight Simulator II features over 80 airports in four different scenery areas: New York, Chicago, Seattle, and Los Angeles. Six additional Scenery Disks covering the entire Western half of the United States are now available in IBM and C64/128 disk formats. Apple and Atari versions will be released soon. Each disk covers a geographical region of the country in detail, and is very reasonably priced.

The Pure Fun of "World War I Ace"

When you think you're ready, you can test your flying skills with the "World War I Ace" aerial battle game. This game sends you on a bombing run over heavily-defended enemy territory. Six enemy fighters will attempt to engage you in combat as soon as war is declared. Your aircraft can carry five bombs, and your machine guns are loaded with 100 rounds of ammunition.

See Your Dealer. Flight Simulator II is available on disk for the Apple II, Atari XL/XE, and Commodore 64/128 computers for \$49.95. Scenery Disks for the C64 and IBM PC (Jet or Microsoft Flight Simulator) are \$19.95 each. A complete Western U.S. Scenery six-disk set is also available for \$99.95. For additional product or ordering information, call (800) 637-4983.

Seeconn BRS/After Dark and The Knowledge Index

By MARGARET MORABITO and CHRISTINE ADAMEC

When it comes to information services, Americans are one of the most active groups of consumers in the world. The amounts of information available today and the large number of people seeking information for daily needs have led us to a point where information exchange has become a necessary component of our vocations and even our personal lives. We need information in order to make decisions, plan, write reports, and otherwise to be "in the know," and we need it fast.

For several reasons, telecommunications is contributing to rapid growth in this type of consumerism. The on-line information networks can hold massive amounts of varied information in one central location. We don't have to physically move from library to library or wait for inter-library loans to come through.

This centralization of information is compounded with another aspect of telecommunications—speed. Using an on-line network that has sophisticated search features, you can now accomplish in a few hours what used to take up to four or five days to research.

Both of these aspects of telecommunications combine to benefit the professional, the home user and the student by saving time and money, and providing access to much more Do you have a term paper due tomorrow and can't get to the library? Or maybe you haven't researched that article or report as thoroughly as you could have. These two bibliographic on-line services offer a vast source of information, without a lot of legwork or book-toting.

information than any local library can hold.

On-line databases that provide specialized information normally found in libraries and professional research facilities are known as bibliographic services. These services can provide full-text versions of articles from a variety of sources; abstracts (summaries) of books, magazine articles, conference reports, case rulings, etc.; indexes of all materials written about certain topics; and more.

There are hundreds of these databases available to you if you have a computer and a modem. Some of them are directed towards universities, businesses and large professional applications. BRS and DIALOG are two massive networks providing bibliographic information services for large-scale users.

There are also smaller bibliographic networks tailored for the less frequent user, such as the home or professional user, the small-businessperson or student. This month, we will look at two such bibliographic networks: BRS/After Dark and The Knowledge Index. Both of these networks are offsprings of their larger parent companies, namely, BRS and DIALOG.

Let's start off with a look at BRS/ After Dark.

BRS/After Dark

BRS/After Dark is an outstanding and easy-to-use computerized search service based in Latham, New York. Providing literally millions of citations from medical, business, social service and other types of information, BRS/After Dark is comprehensive and fun to use, whether you're a student, doctor, businessperson or anyone who needs information. (BRS stands for Bibliographic Retrieval Service.)

Since March of 1982, BRS/After Dark has offered its services to educators, doctors, businesspeople, researchers and the just plain curious.

unications

RUN JANUARY 1986 / 57

Today this search service provides over 60 databases, ranging from the Harvard Business Review to the American Psychological Association to U.S. Books in Print and many others. (It's adding a Legal Resource Index, a Magazine Index, a National Newspaper Index and more.)

The service is called "After Dark" because of the hours during which you can search. (BRS—without the "After Dark"—is available during the day, but at about triple the price.) Users can access BRS/After Dark on Monday–Friday from 6 PM until 3 AM (Eastern Time), Saturdays from 6 AM until 4 AM and Sundays from 6 AM until 2 PM and 7 PM until 4 AM.

To use this service, you need only your computer, any 300- or 1200baud modem and modem software. (I use the Westridge modem and software for my C-64.) I also recommend a printer, so you can save your information on pages.

New BRS/After Dark users pay a one-time sign-up fee of \$75, and a minimum monthly charge of \$12. You're charged an on-line fee of \$6 per hour, and each database has its own hourly charge—for example, the Books in Print database charges \$14 per hour.

The Education Resource Information Center (ERIC) database costs \$6 per hour (the lowest hourly charge), and the International Pharmaceutical Abstracts database costs \$25. (Most databases run around \$10-\$15 per hour.)

You're charged by the minute, not by the whole hour, and even a novice can whip through a search in faster than 60 minutes. Your bill is charged to your American Express, Master Card or Visa account, and BRS/After Dark sends you monthly statements.

Searches are easy to perform—you can be a first-timer and handle this system. (No fancy courses are required to break mysterious codes everything is very up-front. And BRS also provides a toll-free customer service number.)

Using BRS/After Dark

After you've signed up as a subscriber, you'll receive a very clear manual and your passwords. To access BRS, you'll dial a local phone number, then type in your passwords. BRS will ask you for your computer screen's line length and width length (I use 40 and 25 for my C-64) and then show you the menu.

"Looking for Info?" is the option

you'll select to perform a search. (You can also learn about new additions or change your password, if you so desire.)

Next, you're asked which category you'd like to search. Offerings as of September 1985 included science and medicine, business and finance, reference, education or social science/humanities.

If you've opted for "business," then you're given another menu. As of this writing, the service offers eight different business databases, from ABI/ Inform (produced by Data Courier, Inc., this database covers business and management periodicals worldwide—updated to the current month—for a \$15 hourly rate) to Business Software Data, Patent Data and other selections.

Let's say you want ABI/Inform. That code word is INFO. The computer then asks if you'd like prompts for the code words. If you're a beginner, you'll want to see these prompts, since they explain that "S" is for "Search," "P" is for "Print," "M" is for "Menu," etc.

You will also be asked if you'd like a description of the database. If you do, you'll receive a short description of who provides the service, what they cover, cost, and so on.

You really should plan your search before ever turning on the computer. (Time is money!) Performing a search entails typing in a series of keywords. The computer searches its database for these keywords, and, within seconds, reports back on how many places it found your subject covered. Obviously, if you come up with some huge number of documents, you'll want to narrow your search.

For example, I used the INFO database, and the keyword "computer." I was told that there were 15,262 documents available. Then I used "1985 and computers" and received 1591 hits. Still too many. Then I typed "Commodore 64 and 1985," and learned there were three documents. So I ordered a printout.

The system asks you whether you want a short, medium or long citation. If you've received 45 hits and you're curious about them all, you might pick the short option. That way, you can see whether they're worth scanning at length later. (But with just three, you might as well go with the long option, which provides you with abstracts of about 250 words.)

You'll learn as you go along. For

example, I once wanted to search how weather affected people's behavior, using several social science databases. Therefore, I typed in "weather and behavior," and the system informed me there were 20 documents available.

After ordering a printout, however, I found that almost all the information involved how weather affected insects, cows and other creatures—people were barely mentioned! Since I rapidly realized my mistake, I pressed Q, ordering the computer to quit printing, and changed my search to "human behavior and weather." This time I received mention of fewer documents, but they answered my needs.

You can also search a field according to the names of its various experts. For instance, I once used as a keyword "Seymour Papert," a renowned computer expert; one database failed to find him, but another yielded exactly what I needed.

Keep Informed

BRS/After Dark is fun and much less expensive than what private search companies will charge you. (I speak from experience!) The scope of information is very comprehensive. For example, last night I performed searches on such varying topics as trade shows, color separation and open adoption, and I found highly useful information on all three.

The service is ideal for colleges, high schools, entrepreneurs and many other groups of information addicts. Decide for yourself if this search service could optimize your own information needs. (BRS/After Dark, 1200 Route 7, Latham, NY 12110; 800-2-ASKBRS.)

The Knowledge Index

Another bibliographic network available to home users is The Knowledge Index. Like BRS/After Dark, The Knowledge Index is offered to home users during the nighttime hours. It was created by DIALOG Information Retrieval Service specifically as a service for computer owners who need to gather data about a specific topic and would most likely be working from their homes rather than from their offices.

The Knowledge Index holds about 25 databases, all of which are also available on DIALOG. The Knowledge Index provides quick and easy search methods, and you aren't over-

Model CP290

THE X-10 POWERHOUSE INTERFACES WITH YOUR COMMODORE TO CONTROL YOUR HOME...FOR SECURITY, COMFORT AND ENERGY SAVINGS.

This remarkable Interface lets you run your home through your Commodore 64 or 128 and a keyboard or joystick.

20 POWERHOUSE

When you're away, it makes your home look and sound lived in. When you're home, it can turn off the TV at night and wake you up to stereo and fresh brewed coffee in the morning. It can even turn on your air conditioner and control your heating.

SPECIAL COLOR GRAPHICS MAKE PROGRAMMING A SNAP.

You simply pick a room from the display screen. Use your key-

board or joystick to position graphics of lights or appliances. Then follow onscreen instructions to program any light or appliance to go on or off whenever you choose. You can even control thermostats, light intensity and more.

HOOSE

THE WAY IT WORKS. The X-10 Powerhouse Interface is cable- connected to the Commodore "User" port and plugged into a standard 110V outlet. After it is programmed, the Interface sends digitally encoded signals through your home wiring to special X-10 Modules. To control a lamp or appliance COH simply plug the electrical device into a Module May Not Reprint Wilhoud Permission

There are plug-in Appliance Modules, Lamp Modules, Wall Switch Replacement Modules and Special 220V Modules for heavy duty appliances such as water

heaters and room air conditioners. Plus Thermostat Controllers for central heating and air conditioning, Telephone Responders to control your home from any phone, and much more.

IT WON'T TIE UP YOUR COMPUTER. Use your computer only for programming. When you're finished, disconnect the Interface from the "User" or RS-232 port and keep it plugged into any convenient power outlet in your home. It will operate as a stand-alone controller with battery back-up and will run your home automatically.

SURPRISINGLY INEXPENSIVE. A Powerhouse System including the Interface, software and connecting cables costs less than \$150. X-10 Modules are less than \$20 each.

For the Dealer Nearest You Call: 1-800 526-0027 or, write to: X-10 (USA) 185A Legrand Avenue Northvale, NJ 07647

Commodore 64 and Commodore 128 are registered trademarks of Commodore Int'l Ltd. Circle 77 on Reader Service card.

powered or confused by highly complicated search features that often accompany the larger bibliographic networks. If you need to find certain information, you can log on to this network and quickly find it.

For example, if you wanted to know all of the magazines that specifically cover the C-64 computer, you could search through the Magazine Index using keywords such as "Commodore" and "home computers." You would be told how many magazines deal with Commodore home computers, then you would be given their names and all pertinent information. The Magazine Index covers such topics as current events, recreation, travel, business, science, technology, consumer product reviews, sports, art and more.

If you needed to find out who published a particular book that you are trying to locate for a research paper, you could search the Books in Print database. This would give you the title, author, publisher and other details about that book. You could also locate other related books that have been published in the U.S. and any that are going to be published within the next six months. There are over 14,000 U.S. book publishers covered in this database.

Educators and students will find ERIC on The Knowledge Index. This database includes Resources in Education, which covers noteworthy educational research projects and reports. and the Current Index to Journals in Education, which is an index of more than 700 educational periodicals.

Legal professionals or people wanting to learn about law can access The Legal Resource Index on this network. This database provides over 700 legal periodicals, five law newspapers, legal publications on specific topics and government publications from the Library of Congress.

For medical information, Medline offers indexed articles from over 3000 international journals covering biomedical topics, and cites about 600,000, references to articles that have been written and published in these journals.

Furthermore, there is the Biosis Previews and Backfile database. This covers the areas of biology, medicine and interdisciplinary life sciences and provides citations from Biological Abstracts and Biological Abstracts/RRM.

If you are interested in finding out what software is commercially available for your computer, you can access

the International Software Database. The information within this database is gathered from computer journals worldwide. Records contain two- or three-line descriptions of the software items. Each item is tagged with the names of compatible computers. Purchase price and suppliers' names and addresses are included.

To give you an idea of the breadth of coverage on The Knowledge Index, some of the subject areas covered include agriculture, books, business, computers, electronics, corporate news, education, engineering, government publications, legal research, magazines, medicine, news and psychology. Within each subject area, you may find two to three major databases. providing information that totals over five million references and abstracts available throughout the network.

Subscription and Rates Info

To subscribe to The Knowledge Index, you can contact DIALOG Information Services, Inc., 3460 Hillview Ave., Palo Alto, CA 94304. Or, you can phone 800-528-6050 to order information about the network.

There is a \$24 per hour (40 cents/ minute) on-line charge and a \$35 sign-up fee for The Knowledge Index. When you sign up, you get a password, an instructional user manual and two free hours of on-line time. There is no monthly minimum charge.

The hourly charges on a network like this are slightly higher than the general-interest networks because of the highly specialized information offered as well as the high-speed search features, which save you time and money.

When you look at this hourly cost inperspective, you will see a large saving in effort and money, especially if you live in a rural area. Rather than driving 80 miles to a large city university library that holds the articles that you need, you can log on and get your own copies of them.

Next month, we'll take a look at several databases available for those people wanting information and advice about medical questions. R

Christine Adamec (1921 Ohio St., Palm Bay, FL 32907) wrote the BRS/After Dark review.

Margaret Morabito (c/o RUN editorial, 80 Pine St., Peterborough, NH 03458) wrote the introduction and The Knowledge Index review.

BECOME A PUBLISHED AUTHOR IN 6 EASY STEPS WITH THE PLAYWRITER SERIES

3

Select Your Topic

Choose from 4 PlayWriter titles: Tales of Me, Adventures in Space, Mystery!, Castles & Creatures. Each turns your computer into a creative writing assistant who asks you questions and

asks you questions and offers suggestions. In this way PlayWriter walks you step by step through the entire story writing process.

Edit With Built-In Word Processor

Read your "first draft" on the screen and then use PlayWriter's edit option to make changes and corrections. You can make simple changes – such as spelling or grammatical

4	Milling Overlag 1 Personal 4
	Not only at the age of He like had
	seriel. Its had built a mean ship that smid brend threadest and over beend our mirr motor. Its wood the ship
	Benedictier's Income I
	attings a feer daigs attinte then been

corrections – or even do major revisions. You can revise and rewrite any parts of the story you'd like.

Create Your Own Hardcover Book

Publish your story by printing it out on the special paper included, and put the book together using the **bookjacket**, **colorful stickers**, **and full page illustrations** in-

cluded in each package. (To make extra books, refill packs of book materials are available but not necessary.)

Send to Woodbury S 127 White Oa	oftware ik Lane, CN 1001, Old Bridge, NJ 08857

Write 1-1000 Different Stories

Create your own unique tales of intrigue and adventure with the guidance of PlayWriter's computer-assisted writing software. Remember, YOU'RE IN THE AUTHOR'S SHOES, and

you can use PlayWriter again and again to write hundreds of different stories that will be yours and yours alone.

Print Your Stories

Print your stories onto any standard computer paper. PlayWriter will automatically organize your story like a regular book. It will print title and dedication pages, set the margins, num-

ber the pages, leave spaces for illustrations, and even print out a page all about the author – YOU!.

ENTER THE GREAT AMERICAN WRITING CONTEST

Win over \$1,000.00 in prizes ... PLUS publication and distribution of your book ... PLUS "new author treatment" including multimedia attention ... PLUS a computer for your school.

Winners will be selected in 3 age categories: Adventures in Space (Grades 4 and below); Castles & Creatures (Grades 5-6); Mystery! (Grades 7-12). EVERY ENTRANT WINS A PRIZE.

Get Started Now: Send for rules and entry forms. For dealer location or Visa/Master-Charge orders call: **(201) 679-0200.**

SOME HISTORIC BREAKTHROUGHS DON'T TAKE AS MUCH EXPLAINING AS COMPUSERVE.

But then, some historic breakthroughs could only take you from the cave to the tar pits and back again.

CompuServe, on the other hand, makes a considerably more civilized contribution to your life.

It turns that marvel of the 20th century, the personal computer, into something useful.

Unlike most personal computer products you read about, CompuServe is an information service. It isn't software. It isn't

hardware. And you don't even have to know a thing about programming to use it. You subscribe to CompuServe —and 24 hours a day, 7 days a week, it puts a universe of information, entertainment and communications right at your fingertips.

A few of the hundreds of things you can do with CompuServe.

COMMUNICATE EasyPlex [™] Electronic Mail lets even beginners compose, edit, send and file messages the first time they get online. It puts friends, relatives and www.Commodore.ca May Not Reprint Without Remnission business associates—anywhere in the country —in constant, convenient touch.

CB Simulator features 72 channels for "talking" with thousands of other enthusiastic subscribers throughout the country and Canada. The chatter

is frequently hilarious, the "handles" unforgettable, and the friendships hard and fast.

More than 100 Forums welcome your participation in "discussions" on all sorts of topics. There are Forums for computer owners,

gourmet cooks, investors, pilots, golfers, musicians, you name it! Also, Electronic Conferencing lets businesses put heads together without anyone having to leave the shop.

Bulletin Boards let you "post" messages where thousands will see them. You can use our National Bulletin Board or the specialized Bulletin Boards found in just about every Forum.

HAVE FUN

Our full range of games includes "You Guessed It!", the first online TV-style game show you play for real prizes; and MegaWars III, offering the ultimate in interactive excitement. And there are board, parlor, sports and educational games to play alone

or against other subscribers throughout the country.

Movie Reviews keep that big night at the movies from being a five star mistake.

SHOP THE ELECTRONIC MALE[®] gives

you convenient, 24-hour-a-day, 7-day-a-week shopping for name brand goods and services at discount prices from nationally known stores and businesses.

SAVE ON TRIPS

Travelshopper sw lets you scan flight availabilities (on virtually any airline — worldwide), find airfare bargains and order

tickets right on your computer.

Worldwide Exchange sets you up with the perfect yacht, condo, villa, or whatever it takes to make your next vacation *a vacation*.

A to Z Travel/News Service provides the latest travel news plus complete information on over 20,000 hotels worldwide.

MAKE PHI BETA KAPPA

Grolier's Academic American Encyclopedia's Electronic Edition delivers a complete set of encyclope-

dias right to your living room just in time for today's homework. It's continuously updated ... and doesn't take an inch of extra shelf space.

The College Board, operated by the College Entrance Examination Board, gives tips on preparing for the SAT, choosing a college and getting financial aid.

KEEP HEALTHY

Healthnet will never replace a real, live doctor—but it is an excellent and readily available source of health and medical information for the public. Human Sexuality gives the civilization that put a man on the moon an intelligent alternative to the daily "Advice to the Lovelorn" columns. Hundreds turn to it for real answers.

BE INFORMED

All the latest news is at your fingertips. Sources include the AP news wire (covering all 50 states plus

national news), the Washington Post, USA TODAY Update, specialized business and trade publications and more. You

can find out instantly what Congress did yesterday; who finally won the game; and what's happening back in Oskaloosa with the touch of a button. And our electronic clipping service lets you tell us what to watch for. We'll electronically find, clip and file news for you...to read whenever you'd like.

INVEST WISELY Comprehensive investment help just might tell you more about the

stock you're looking at than the company's Chairman of the Board knows. (Don't know who he is? Chances are, we can fill you in on that,

too.) CompuServe gives you complete statistics on over 10,000 NYSE, AMEX and OTC securities. Historic trading statistics on over 50,000 May Not Reprint Wilhoud Remission stocks, bonds, funds, issues and options. Five years of daily commodity quotes. Standard & Poor's. Value Line. And more than a dozen other investment tools.

> Site II facilitates business decisions by providing you with demographic and sales potential information by state, county and zip code for the entire country.

National and Canadian business wires provide continuously updated news and press releases on hundreds of companies worldwide.

GET SPECIALIZED INFORMATION

Pilots get personalized flight plans, weather briefings, weather and radar maps, newsletters, etc.

Entrepreneurs use CompuServe too for complete step-by-step guidelines on how to incorporate the IBMs of tomorrow.

Lawyers, doctors, engineers, military veterans and businessmen of all types use similar specialized CompuServe resources pertinent to their unique needs.

And now for the pleasant surprise.

Although CompuServe makes the most of any computer, it's a remarkable value. With CompuServe, you get low start-up costs, low usage charges and local phone-call access in most major metropolitan areas.

Here's exactly how to use CompuServe.

First, relax.

There are no advanced computer skills required.

In fact, if you know how to buy breakfast, you already have the know-how you'll need to access any subject

in our system. That's because it's "menu-driven," so beginners can simply read the menus (lists of options) that appear on their screens and then type in their selections.

Experts can skip the menus and just type in "GO" followed by the abbreviation for whatever topic they're after. Circle 64 on Reader Service card. In case you ever get lost or confused, just type in "H" for help, and we'll immediately cut in with instructions that should save the day.

Besides, you can either ask questions online through our Feedback service or phone our Customer Service Department.

How to subscribe.

To access CompuServe, you'll need a CompuServe Subscription Kit, a computer, a modem to connect your computer to your phone, and in some cases, easy-to-use communications software. (Check the

information that comes with your modem.)

With your Subscription Kit, you'll receive:

- a \$25 usage credit.
- a complete hardcover Users Guide.
- your own exclusive user ID number and preliminary password.
- a subscription to CompuServe's monthly magazine, Online Today.

Call **800-848-8199** (in Ohio, 614-457-0802) to order your Subscription Kit or to receive more information. Or mail this coupon.

Kits are also available in computer stores, electronic equipment outlets and household catalogs. You can also subscribe with materials you'll find packed right in with many computers and modems sold today.

ASIC LIGHTNING

Totally dedicated to writing very fast video games, BASIC LIGHTNING is a fully structured extension to the Commodore 64's BASIC which adds a staggering 200 new commands and functions to manipulate sprites, sound and screen windows. TIME SLICING Up to five parts of your

program can run concurrently (one in foreground and four in background), a feature never before seen on a micro of this

PROCEDURES AND PASCAL type structured programming commands are fully

255 SPRITES OF USER DEFINED supported. DIMENSIONS As well as the Commodores

own 8 hardware sprites, BASIC Lightning adds 255 software sprites which can be scrolled, spun, mirrored, enlarged or inverted with tremendous speed and smoothness. SPRITE DESIGNER A full sprite designer and library of pre-defined sprites is included

in the package, together with a full demonstration program and comprehensive manual.

HITE LIGHTNING

ALCONTRACTOR

WHITE LIGHTNING is a complete games writing package comprising a high level. Forth

based, multi-tasking games writing language and includes the complete BASIC Lightning package as well, Programs can be written in a combination of Forth, the extended graphics commands and Commodore BASIC. The final program and run independently of the White Lightning package and can be marketed without restrictions and with no royalties to pay - no wonder White Lightning is Europe's biggest selling Commodore 64 utility even and has won both major European software

THE SPEED of White Lightning has to be awords. seen to be believed and a full demo is

included. All the features of BASIC Lightning are supported, but because they re implemented in Forth instead of BASIC. machine code speed and smoothness is achieved with a fraction of the effort.

MULTI TASKING is White Lightning's most important feature - this plices two programs to be run concurrently and makes those smooth landscape scralls erc. effortiess

and and the second second

ACHINE LIGHTNING Commodore Machine Lightning is

probably the most advanced games writing utility available on any micro. It comes in 4

MACRO ASSEMBLER/MONITOR/ parts DISASSEMBLER This is probably the most comprehensive machine code development system available for the Commodore 64 and 128 with features too numerous to mention. BASIC LIGHTNING BASIC Lightning, the

multi-tasking BASIC is also provided to facilitate experimentation in preparation for

SPRITE GENERATOR Used to develop all later assembly. the graphics for the final game. The Sprite Generator has numerous functions including enlargement, rotation and reflection.

OBJECT LIBRARY This is Machine Lightning's most powerful feature. 10k of re-

entrant code with more than 130 documented entry points. These are the routines that pravide all the superfast graphics routines in White and Bosic Lightning. They contain virtually every routine you'll ever need to write an Arcade Game and multi-tasking in Machine Lightning is covered in the comprehensive accompanying manual

MASTER LOCK

STATISTICS .

Here, at last, is a program that will protect your software programs from unauthorized duplicating. 1 to 1 million copies can be protected, fast and easy.

- · Specially designed for the C-64 and 1541 Disk Drive.
- · Completely encrypts and protects your programs.
- · Fully compatible with almost all machine language and basic programs can even support chained programs.
- · Contains a special feature which protects your program from being 'broken.
- · Incorporates all the latest techniques in program encryption and protection. · Each system has been specially prepared and is unique from all other systems - only
- you are able to make working duplicates of your own protected programs. · Simple and easy to use - entirely menu drive with prompts
- · Will stop virtually all software copiers from duplicating your programs.
- · Fast and reliable protection routine does not take away any useable space from your disk - all 664 blocks are available for use.
- · Easy to follow step by step instructions are included on the disk
- · A must for all programmers who do not want their programs to be in public domain!

Even the "nibblers" can't copy them. Not even *Disk Maker, *Mister Nibbles, *Copy II, *Ultra Byte or *Fast Hackem. The time to protect you disk is only 5 (five) seconds and each Master Lock makes a different protection scheme. Only.

Disk MakerTM, Basix Mister NibblesTM, Full Circle Copy IITM, Central Point Software 'Ultra ByteTM, Ultra Byte 'Fast HackemTM, Basement Boys Software

TOOL BOX

This disk has over 100 routines, some of them are routines for protection, smooth scrolling, modem routines, and sound and color routines; bootmaker, paddle and joystick; read ter minal, auto dial, auto answer. They can easily be incorporated into all of your programs. It is also fully documented. With this disk alone you could build your own program. This disk has a lot of tricks that are used in commercial software

MAGNUM LOAD

Programed by Jim Drey

MAGNUM LOAD is a new replacement KERNAL (operating system) ROM chip for your Commodor 65 or 128 computer that will load and verify programs up to 6 times faster than before. The tape routines have been removed from the old chip and in their place have been put a high-speed loader, high-speed verify, and disk driver no-head-rattle routine. Unlike the older cartridge fast loaders, no ports are tied up at the rear of the computer, the screen is not blanked during loading and there is no wear-and-tear on the expansion port. For maximum convenience and performance, the chip is installed directly in the circuit board. Generally a socket has already been provided to make the operation easy, but occasionally some solder-ing may be required. Now you can give your 1541 disk drive "1571 speed."

Rather than give you more exagerated claims about how many times faster our ROM chip is compared to the slower cartridge versions, a comparison chart is supplied listing MEASURED loading times.

D-CODER

- Translates any machine language program into easy-to-ready English descriptions with complete explanations of each command.
- Makes complete notations of all important memory locations accessed by the program (SID, VIC, MOS, KERNAL, etc.)
- Gives you three ways of accessing programs:
- 1. Will read and list programs from DISK 2. Will read and list programs from MEMORY
- 3. Direct user input (from magazines, etc.)
- · Can be used to locate and examine any machine language program's protection routines!
- · Can be used to easily break apart machine language programs for study and examination!
- Printer option for complete hard copy listings!

You no longer need to be an EGGHEAD to read Machine Language.

\$**19**95

N-CODER

THE PERFECT COMPANION PROGRAM TO D.CODER!

- Allows you to easily make changes in machine language programs . . . right on the disk!
- Rewrite ability allows code to be altered and then rewritten directly to the disk!
- Features sector-by-sector scrolling assembly language display of machine language programs!
- Notation of ASCII text equivalents for easy spotting of embedded text strings!
- Handy reference display of all assembly language commands and their ML numerical equivalents \$**1 9**95
- Byte splitter for easy splitting of decimal addresses into low byte-high byte format!

SOFTWARE PROTECTION HANDBOOK Third Edition! Now Available!

If you're tired of being harassed by protected software and too many copy programs, then this is the book for you! This 224 page manual covers the gamut from legalities to protection methods to step-by-step back up procedures. Now you can learn both how to protect and unprotect software! The techniques covered include copying cartridges to tape or disk, tape protection, and disk protection. Disk protection covers error numbers 20, 21, 22, 23, 27 and 29 plus single track formatting, header modification, header swapping, half track reading and writing, reading and modified bit densities, formatting illegal track/sectors, sync writing and more! The Third edition explains, tells how to detect and how to write them with included software

CP/M Treasure Trove

Discover a bounteous supply of almost free CP/M programs that you can use on your new C-128. This article reveals the secret of where to call or write. By CHERYL PETERSON

One nice feature of CP/M-compatible computers is that a CP/M program developed for one computer will usually run on another, unless the program contains systemspecific functions.

This spells good news for C-128 owners, because now you can run Osborne or Epson programs, for example, on your C-128. But an even bigger supply of software exists for the 128 owner, if you only know where to look.

Called public domain software, it is uncopyrighted and freely available through user groups and electronic bulletin boards. If you have a modem and terminal software, some of it can be had for the price of the disk to save it on and maybe a telephone call. Some is available for a yearly membership fee in a user group and a small charge to cover disk price and copying. For those who don't mind paying CompuServe connect charges, much of this software can be found in the data libraries of the CP/M SIG.

This article includes lists of some places to look for all this "free" software; but first, let's take a look at the types of groups who give it away.

User Groups

There are several national user groups that maintain a public domain software library. SIG/M (Special Interest Group for Microcomputers) is one of the largest in the world. Headquartered in Iselin, NJ, SIG/M has regional offices throughout the United States and the world.

Since SIG/M suggests that you contact a local representative to buy the software offered on disk, this article includes a listing of local contacts. You can purchase a catalog listing the software currently available in the library by sending \$3 to SIG/M (see address in Table 1). The disk numbered 00 in the library contains the full catalog in electronically readable form.

Although SIG/M software is usually distributed on 8inch disks that cost \$6, many SIG/M groups can provide the disks in 5¼-inch format, if requested. Check with your local group to be sure.

Much of this software can also be found on electronic bulletin board systems run by local groups. You may be able to get some of the software onto 128 disks by downloading it from such a BBS.

First Osborne Group

The First Osborne Group (FOG) was formed soon after the original Osborne computer became available. Although the computer came with a word processor, spreadsheet and other good programs, the documentation left a lot to be desired.

For those new to computers, user support groups became a way of life. Since FOG was one of the first and most active groups formed, it flourished. (Being in the heart of Silicon Valley and a stone's throw from the Osborne corporate headquarters didn't hurt, either.)

Before long, as users took old programs and converted them to run on the Osborne, a library of public domain software was established. FOG offers this software to its members for a small fee.

I highly recommend that you consider a FOG membership, which costs \$24 per year. Besides gaining access to the FOG library, you get a 64-page monthly newsletter. The FOGhorn is one of the best newsletters available for CP/M users. It includes announcements of new products, software reviews by other users and helpful hints galore. While much of the FOGhorn deals with the Osborne computers, it is expanding to cover other CP/M systems.

The executive director of FOG, Gale Rhoades, says the group is already gearing up to help C-128 users. "We've already had several calls from new 128 owners. Eventually, we'll probably add a Commodore 128 disk library. Any time a new group of CP/M users comes along, we just naturally want to include them."

As with other computer user groups, FOG members run a system of electronic bulletin boards around the country. Although these boards allow visitors, only FOG members are given access to the download software areas.

Poseidon Electronics

While many of the public domain programs provided by SIG/M and FOG may run with no modification on the 128, there is no guarantee of this, short of trying them out yourself before buying.

Or, you could contact Poseidon Electronics. Their catalog of software states specifically whether the programs run on a 128, 64 with CP/M cartridge, or not at all. In some cases, the user is forewarned that software on a particular disk is experimental and may need modification to run on the 128. But, at least you know what you're getting in advance.

Electronic Bulletin Boards

You can also obtain software by downloading programs from local electronic bulletin boards. To successfully download programs you need a modem, a reasonably clean telephone line, a program that can speak to other computers (usually called a terminal package or modem software) and a disk on which to save the downloaded files.

On some of these BBSs, downloading software is very easy. The main menu provides an option (generally D for download) that will take you to another menu (or series of menus) that lists the software available. You choose the program or file you want to download and, by either typing the name or a menu choice, you tell the computer to send it to you.

Just prior to typing in the instruction to send, you must open the buffer (storage area in your computer's memory), which will hold the program or file. When the computer at the other end starts sending, all the information goes into the buffer. When the other computer indicates it's through, you save the buffered file to disk.

This is a very basic description of what happens with typical systems. You'll need to know what baud rate, word length and parity options the other computer is using. In some cases, the other computer (called a remote terminal in some software documentation) will be using a special file-transfer protocol. If your computer isn't using the same parameters, you won't be able to download.

Remote CP/Ms and XModem

RCP/Ms generally run a bulletin board system that provides an option to "go to CP/M." But before you can download software, you must usually fulfill an extra requirement. Some BBSs require you to call back again later, pay a small access fee, or be a member of the user group.

RCP/Ms usually use a transfer protocol called XModem, which has become a de facto standard. When you get to CP/M on an RCP/M, the other computer is actually running a program that simulates the CP/M operating system. You'll see the familiar A> prompt on your screen. The commands that you type on your keyboard are interpreted by the other computer as if you were typing on its keyboard. TYPE NEWUSER.TXT, for instance, would cause the contents of the file NEWUSER to be typed out on your monitor.

A DIR command will give you the contents of the A: drive. I recommend opening your buffer and storing the results in a file. Typically, a directory listing of one drive on an RCP/M takes up about 4K on disk.

Each board features a file named DIR.TQT, or something similar, which usually contains the entire directory listing for all drives. The Q in .TQT stands for squeezed. This common naming convention (putting Q as the next to the last letter in a filename) is used to let you know that an unsqueeze program must be used to put the file in a readable format.

This program, usually abbreviated USQ-# (where # is RUN JANUARY 1986 / 69

Saskatchewan

Bob Stek R.O.M.S. 19 Mayfield Road Regina, Saskatchewan S4V 0V7 the latest version number, currently 20), is found on most RCP/Ms and in most public domain libraries. Its companion program, SQUEEZE (SQ-#, currently 17), is as widely distributed. Sometimes the two can be found in an .LBR file called SO-USO.LBR. They will be two of the first programs you'll want to get.

To accomplish the file transfer, you'll need to understand the commands. Check your documentation! If you are actually using XModem, the command to type is "XMODEM R filename," where filename is how you want the file to be saved on disk.

Once you understand how to start receiving a program at your end, you need to know how to get the RCP/M to start sending. Pick the file you want to download and note its name. Type "XMODEM S filename." You must type the filename exactly as it appears in the directory listing. The remote terminal will respond with "Awaiting NAK."

In a second or two you should see the message, "Transmitting sector #." The number will start at one and increment as each piece of the file is successfully transmitted. You may see a message indicating that a sector is being retransmitted because an error was detected. Don't worry about it.

XModem will make ten attempts to transmit an erroneous block. If it doesn't accomplish a successful transfer by then, it halts the transmission and reports the problem. When it gets through sending all the parts, it will give a message indicating the transfer is complete and indicate how many times sectors had to be resent.

That's all there is to it. Your terminal program should have written the file to disk for you under the filename you specified.

Where the BBSs Are

This article includes three lists of electronic BBSs. The first (Table 1) lists three key sources of public domain software. The second (Table 2) consists of the telephone numbers of FOG user groups' boards. The third (Table 3) is a list of regional distributors of SIG/M.

Please be aware that not all of these systems are free. Some require a registration fee or yearly membership fee. Please make note of the times listed for each system. These hours are in local time, so please plan your calls accordingly.

Also, courteous telecommunicators will leave a thankyou message or some acknowledgement for the system operator, if there is a message base available. Leave your name and where you are calling from if the board doesn't ask for it when you first sign on.

CompuServe's CP/M SIG also has a large library available, and, as mentioned earlier, it supports XModem transfers. Type GO CPMSIG or GO PCS-47. Once in the SIG, you'll need to go to the DLs (data libraries) to find the programs you want.

You can use a BRO (browse) command to search through the files one by one; or type INDEX to see a listing of the programs in each library. There are ten DLs available.

As you can see, there is plenty of public domain software. And finding it is half the fun. Good luck in your hunt.

Cheryl Peterson (750 85th St. #3, Miami Beach, FL 33141) is the SYSOP of the Beginner's SIG on Viewtron. Her user number is 266399CCP.

Add Elegance to Your Program Listings

Here's a utility that organizes and clarifies your program listings by providing uniform spacing between words, numbers and symbols.

By MICHAEL BROUSSARD

When you're trying to debug or modify a Basic program, which occurs first—eyestrain or madness?

In Basic, difficult-to-read program listings often result when you crowd statements into program lines to conserve memory and increase execution speed. Under such circumstances, it's not much fun trying to decipher, say, where a loop starts and stops. The accompanying utility, Lister, puts uniform spaces between words, numbers and symbols in your program listings.

Lister is a machine language program that resides in upper RAM. When you run it, it produces a formatted listing of the Basic program currently in memory, making it much more readable.

To use Lister, you must first load it into RAM using the Basic loader (Listing 1), which I'll describe a little later in the article. To run it, you type:

SYS 49152

Lister first clears the screen, then asks:

OUTPUT TO SCREEN OR PRINTER (S/P)?

at which time you type either S or P. If you choose the printer, the program automatically uses device number 4. If you are using a different device number, you can customize Lister by changing the value in line 100 of the Basic loader program. If you choose the printer as the output device, Lister next prompts:

TYPE IN A HEADING TO APPEAR AT THE TOP OF EACH PAGE:

At this point, you type a string up to 60 characters long and press the return key. This string, along with a page number, will appear at the top of each page of the output listing. Lister automatically leaves margins at the top and bottom of each page. If you don't want a heading, simply press the return key without typing in a string. The page numbers and margins will still be printed. To suppress the page numbers and the spacing between pages, simply type the @ character in response to the heading prompt.

At this point, Lister works its magic and produces a neatly formatted listing on either the printer or the screen. Spaces are placed before and after Basic keywords and arithmetic operators. Only one Basic statement is printed per line, making each statement easy to read and allowing room in the right margin for notes or corrections on hard-copy listings.

When a For statement is encountered, all the following statements up to the corresponding Next statement are indented two extra spaces. This lets you see at a glance which statements are part of which loops and how the loops are nested.

During the listing display, you can pause the output by pressing any key. Pressing any other key restarts the listing. (This feature is particularly convenient when you're listing to the screen.) If you press the Q key (for quit) while the listing is paused, the program will print out the rest of the current program line, then return immediately to Basic.

The Basic loader Pokes the Lister program into a safe part of RAM, where it won't be disturbed by Basic. You can then load in the Basic program on which you're working. As long as you don't turn off the computer, Lister will be there, ready to produce elegant output whenever you type SYS 49152.

Since the loader is mostly composed of Data statements that must be typed in exactly, each line of data has a built-in checksum. The loader checks each line of data as it is read; if an error is detected, the program notifies you which Data statement to check and then ends.

I hope you find Lister as useful as I do.

2 MILLION AMERICANS ARE ABOUT TO BECOME 'DANGEROUS'

You could be one.

Play Elite – it's totally stunning. Elite is Britain's 1985 Adventure Game of the Year, an interstellar mind-game with incredible 3D Vector-Graphic space flight simulation

Take command of your Cobra MK III combat craft, trade with alien cultures on over 2000 planets in eight galaxies. Pick your destination on the starmap, checking out the computer's 4-way viewscan – and you're ready for your first jump thru hyperspace.

As a rookie you start with 'Harmless' status but with the right stuff and combat skills, you'll win ratings of 'Average' to 'Dangerous' – with your ultimate objective to become one of the **Elite**.

It's big, it's fast and it's here now for the **Commodore 64™** and **128**™ complete with Manual, Novel, Control Guide, Ship Identification Chart, Keyboard Overlay **and** the opportunity as the US competition winner to get flown to London, England to try for the Elite World Championship.

It's so addictive it's been called "the Game of a Lifetime".

Elite. Be dangerous.

C-64" • VIC" • SX-64" • C-128" • Plus 4" • C-16" • B-128" • PET" • CBM" • LCD" The best deal in Commodore computing just got better.

The Intelligent Software package: an integrated home/business/educational package of **25 programs** on disk or tape at the ridiculous price of **\$29.95** (plus five cents for postage + handling).

The package is not public domain or home-brew software; totaling over 51 pages of source code listings, it is the one product that can take care of all your data processing needs. One customer writes: "... accolades for the authors. This is as slick a deal as I have seen and more than adequate for all except fancy presentations. The best thing is the ease of use . . " The package includes

select (using all relational operators:, = <, AND, OR, NOT, wild card) on any field. perform computations on numeric fields. Any operation can be performed on all, or only selected records. All fields completely user-definable. Can be used for any number of tasks, including accounting, mailing lists, inventory control, record, tape, or book cataloging, expense account maintenance, or as an electronic rolodex. Even if you use your Commodore for nothing else, this program alone might justify its expense.

Word Processor: A full-featured menudriven word processor including: very fast file commands, screen editing, text locating and full control over margins, spacing, paging, indentation, and justification. well done and highly functional . . . Provides an excellent alternative to the high priced word processors . . . this is an excellent buy. Highly recommended." — Midnite Software Gazette. "Provides good basic features." Compute's Gazette.

Copycalc: An electronic spreadsheet. Turns your Commodore into a visible balance sheet; includes screen editor. "Excellent program for budgeting, estimating, or any math-oriented use . . . well worth the money. Highly recommended." - Midnite Software Gazette.

Intelligent Software

Quality Software since 1982

Database: A complete multi-keyed fixed-record-length data base manager. Sort or (interface W/P with Database to create form letters, statements, invoices, mailing labels, other reports.): Baseball Statistician (compiles batting statistics for a base-ball league); several W/P utilities, including Index [indexes W/P's text files]; several Database utilities, including DBmerge (facilitates multi-file database applications.], and DBStat (analyzes D/B files); a programming utility, ASCII, which converts text files (program listings] into program files; also Checkbook: Inventory; Paper Route; Loan Analysis; Breakeven Analysis; Depreciation; Labeler; File Copier; more.

> Versions of the package are available for every Commodore computer having a mini-mum of 10k RAM. All programs will support tape, disk, and printer. Price includes documentation and shipping; Calif. residents add 6%. Add \$3 for credit card, COD, 8050 disk, or cassette orders (cassette not available for Plus4™ and 16™.) No personal checks from outside USA. This ad is the catalog; a sampling of program output is available for \$2

The Second Annual RUN

The Second Annual RUN Special Issue

This is simply the most incredible all-in-one Commodore reference library you can buy. It's the ideal gift for every C-64/C-128* enthusiast, and the perfect complement to last year's hot-selling special edition. In fact, last year's *Special Issue* was so popular, all 200,000 copies were sold within a matter of days.

And this year, there are even more reasons to order early. In this exciting *Special Issue*, you'll get:

An in-depth look at the new C-128...step-by-step information that leads you through every extraordinary C-128 feature: graphics, music, telecommunications, and programming. Plus, an introduction to CP/M, and a C-128 programmer's aid.

- 500 "Magic" hints and tricks for the C-64 from Louis Sander... every entry published in *RUN* in 1985, plus more than 100 *never-before-published tricks* for the C-64 and C-128.
- A free pull-out wall chart-even

bigger than last year's—containing vital reference material for C-64 and C-128 users...keywords, commands, programming codes.

- Learn-as-you-go tutorials for new C-64/C-128 users...everything from graphics to maintenance.
- Commodore Primer...a glossary of nearly 125 commands and terms.
- A complete, up-to-date list of Commodore clubs and user groups.

Remember, this *limited edition* of *RUN* will be in big demand. Hurry and order your copy... and order one for a friend. Simply return the coupon, or call **2 1-800-258-5473.** (In NH, dial 1-924-9471.)

RUN's Great Communicator— Runterm Plus

By ROBERT SIMS

This article, which features Runterm Plus, Part 2, concludes the documentation for Runterm Plus.

Part 2 is a continuation of the code you entered last month. If you remember, in last month's article you were advised to set aside the disk containing Part 1. You then modified Part 1 so it would load normally. Do not use the modified file, Runterm Plus.1, when you type in the code for Part 2. Use the original code, Runterm Plus.

To resume typing in the code, load and run ML Perfect Typist (see p. 50 in the December '85 issue).

Select option 2 from the opening menu and insert the disk containing the unmodified code for Part 1. When prompted for the filename, enter Runterm Plus. When prompted for the starting line number, enter the first four digits from the accompanying listing (Listing 1). Next, type in the lines according to the ML Perfect Typist instructions.

After you've finished entering the code and have saved it to disk as Runterm Plus, clear your computer with SYS64738. Enter

LOAD"RUNTERM PLUS",8,1

and enter the following Pokes in Immediate mode: For those of you who have been anxiously awaiting the conclusion of Runterm Plus, here's your reward... a complete, professionalquality terminal program that lets you communicate with all on-line services, use XModem file transfers, play interactive modem games, transfer hi-res graphics screens, and more.

> POKE 2049,11 POKE 2050,8 POKE 2051,10 POKE 2052,0 POKE 2053,158 POKE 2054,50 POKE 2055,53 POKE 2056,57 POKE 2056,57 POKE 2056,57 POKE 2056,0 POKE 2059,0 POKE 2059,0 POKE 2060,0 POKE 9808,1

Now insert another disk into your drive and enter

SAVE"RUNTERM PLUS",8

The first 12 Pokes are the same ones entered when Part 1 was modified to insert the Basic line

10 SYS2594

This allows you to load, save and back up Runterm Plus as you would a Basic program. (If you ordered a disk copy from me instead of typing in the program, this series of Pokes is already in the program.)

The thirteenth Poke sets a flag that activates the routines in Part 2 of the code. (You must enter this Poke whether you typed in the program or ordered the disk copy.)

Your copy of Runterm Plus is now complete and ready to use.

The Opening Menu

Part 1 was set up to be used as a CBM ASCII terminal program operating in half duplex. Now you can configure Runterm Plus to fit almost any telecommunications format. When you load and run Runterm Plus, you will see an opening screen that gives you six options. You may set the program to call a specific national service, such as Compu-Serve, Delphi or The Source. If you

RUN It Right C-64; C-128 (in C-64 mode); disk drive are calling a BBS, you may choose between standard ASCII or Commodore ASCII. A custom terminal setting is also provided.

Runterm Plus will set up your computer and modem to communicate with the specific service you have selected; you don't have to worry about stop bits, word length or other technical aspects of telecommunications. When using Runterm Plus, be sure to set your modem to the Originate mode. If you have a modem with a data/telephone (voice) switch, first make the call, listen for the carrier signal, then move the switch to data.

The selection of any option, except #6, will cause the screen to clear, signifying that Runterm Plus is ready.

If you choose option 6, you'll be asked to specify the parity, word length, stop bits, duplex and ASCII settings and the deletion character. Once you set these parameters, the screen will clear and you'll be ready to go on-line.

In Part 1, I discussed how to use the capture buffer to upload and download data. Now we'll look at the other two options Runterm Plus gives you for error-free file transfers.

XModem Transfers

To transfer a file directly to or from your disk, use the Logo-X command. The sequence for an XModem transfer is as follows.

You select download or upload from the other computer's menus. The other computer will prompt you when it's ready. You then press Logo-X, select X for XModem and type U or D.

If you select U for upload, Runterm Plus will ask you to supply the name of the existing file to be uploaded. You will be told when the transfer is completed, and keyboard control will resume.

If you select D for download, you will be asked for the filename and file type. (You must not use an existing filename.) The program then creates the new file on the disk. The downloading process then becomes automatic. You need only wait until the program notifies you that the transfer is complete.

If noise on the phone line or some other problem causes the transmission to become garbled, then the garbled portion will be retransmitted to you. If Runterm Plus and the other computer are unable to complete the transfer, Runterm Plus will abort the transfer and return keyboard control to your computer. A note about CompuServe: Using the XModem feature of Runterm Plus, you can download all files in CompuServe's Commodore Information Network. The special handshakes that are required to download programs with the extension .IMG are handled automatically by Runterm Plus.

High-Resolution Graphics Screens

Runterm Plus can transfer and display high-resolution graphics screens. To view the screen while you're downloading it, it must be in what is commonly called Doodle format. That is, the file must be constructed so that the high-resolution color area is placed first in the file, followed by a bit-mapped screen.

Although the file will transfer without problems, this hi-res feature will not give you a true copy of a multicolored high-resolution screen, which is longer and in a different format than the regular bit-mapped two-color screen.

There are two ways to use this feature. You can either send a hi-res screen or receive one. Keep in mind, however, that your buffer contents will be overwritten during this process. Before viewing a screen, save your buffer contents to disk or print them out before viewing a screen. If your local bulletin board uses Bozart protocols, you will be able to do graphics downloads from the board, too. Check with your SYSOP.

When Runterm Plus is booted, the hi-res feature is turned off. To activate this feature and view a hi-res screen while downloading, use the Logo-A command before you begin the downloading process. You can toggle on and off the Hi-Res Graphics mode by typing Logo-A.

To transfer a hi-res screen, first type Logo-A, as previously discussed, then, when the other computer is ready, select Logo-X to begin the transfer. Select Bozart protocol and then D for download, and the rest is automatic.

The special Bozart graphics protocol is similar to XModem, but faster, more accurate and more automatic. The protocol switches your computer to Hi-Res mode and back to regular screen mode. Also, it includes a handshaking feature, which checks to make sure that the incoming file will fit on your disk. (If the file won't fit, Runterm Plus will abort the file transfer and return to Terminal mode.) In viewing hi-res files, you may experience a few seconds' delay while the two programs make the initial connection before transferring the file. During this delay, you'll be looking at the bit map of whatever was in the capture buffer. As the transfer progresses, you will see the background color change; then, while the file is being stored to disk, the bitmap screen will appear.

When the transfer is complete, Runterm Plus will pause for three seconds, to allow you to view the hires screen, then the screen will clear and you'll be back in Terminal mode.

Keep in mind that the Bozart protocol can only be used to swap files with another terminal program that uses Bozart protocol. Just as you can't speak English and expect to be understood by someone who speaks, say, only French, you can't expect two different transfer protocols to communicate.

Bozart protocol can be used to get an error-free transfer of *any* file, not just graphics files. (The only difference is that you don't use Logo-A to view the non-graphics screen; you go directly to Logo-X for the transfer.)

Although the speed of transfer depends on the file being exchanged and, especially, on the number of repeated characters in the file, as a general rule you can expect to transfer a file 20 percent faster using the Bozart graphics protocols instead of XModem. For example, a typical 9000-byte graphics screen that takes about ten minutes to transfer with XModem will transfer in about seven minutes with Bozart protocol. Faster speeds are not possible, due to the constraints of the 300 bits-per-second speed of the modem.

An interesting side effect of this hi-res capability is that you can get a bit-mapped representation of any non-graphics file being transferred. Use Logo-A before the transfer, just as you would if the file were a graphics screen.

As the file is transferred, you'll see a kind of abstract design being built on your screen. Only actual hi-res screens will show you an organized picture. However, the abstract designs generated by a non-graphics file are more interesting to watch than the constant waiting/transferring messages that normally accompany a file transfer.

Changing Terminal Settings

There are times when you'll want to change your terminal settings **RUN** JANUARY 1986 / 85

www.Commodore.ca May Not Reprint Without Permission

without restarting the program. To redefine your delete key, use Logo-K. The standard delete character is an ASCII 127. However, some services require you to use a backspace (ASCII 8), and you may need to revert to the Commodore delete character, ASCII 20.

Depending on which service you select from the opening menu, Runterm Plus sets the delete character. For CompuServe and for linkups using Commodore ASCII, the setting is the regular ASCII 20; for Delphi and The Source, the setting is ASCII 127 (true delete).

To reset any or all of your terminal parameters, use Logo-T. This command will review each setting and prompt you to reset it.

Modem Games

The Logo-G command allows you to load and run a special game program while on-line. This feature lets two people with copies of Runterm Plus play a game over their modems during a regular telecommunications session, without breaking the connection or switching programs.

To use this feature, both parties

must have a game written specifically for Runterm Plus. Ordinary games will not work, because they load into the same locations in memory where Runterm Plus code resides.

Runterm Plus is designed to accommodate games that use the normal screen and keyboard cursor controls, as well as games that use multiple high-resolution screens and very fast action. If high-resolution graphics are not used in a game, Runterm Plus will accommodate a game program up to 30K in length. With hi-res screens, Runterm Plus will accept a game program of up to 20K, while leaving some memory still available.

RUN will be publishing a game that you can play using Runterm Plus. In the meantime, if you are interested in writing your own modem games, write to me, and I'll tell you how to obtain instructions, programmers' guides and assembly language modules to help you make use of all the gaming features of Runterm Plus.

Other Modems

With a few Pokes, you can use Mitey Mo, HESmodem II or other com-

0735 5B 41

E0

01 D0

patible modems with Runterm Plus. You should make these Pokes, then save the program to disk before running it.

The Pokes for Mitey Mo and HES II are:

POKE 9812,38 POKE 9813,32 POKE 9814,38

Mitey Mo to call a friend, one of you will have to be in Originate mode, and the other in Answer mode. Runterm Plus will ask you to choose either Answer or Originate when you run the program.

The 1520 Printer/Plotter

If you have a 1520 Printer/Plotter, two Pokes will allow you to use it with Runterm Plus. The first—POKE 9810, 6—changes the device number to 6. The second—POKE 9811,n—changes the secondary address at location 9811, where n is the number for the secondary address that puts the plotter in the mode you want.

Use your **Commodore 64** to improve your performance at the track! These fine programs for **Thoroughbreds**, **Harness Horses** and **Greyhounds** combine the power of your computer with the savvy of a veteran handicapper. Spend a few minutes entering data, and The Handicapper will rank the horses or dogs in each race. All the information you need is readily available from the Thoroughbred Racing Form, harness or greyhound track program. We even provide a diagram that shows you where to find it!

Horse racing factors include speed, class, past performance, post position, stretch gain, beaten favorite, jockey or driver's record, weight (for thoroughbreds) and parked-out signs (for trotters). **Greyhound factors** include speed, past performance, class, favorite box, kennel record, breaking tendencies, beaten favorite.

Instructions and wagering guide included. **Thoroughbred**, **Harness or Greyhound Handicapper**, only \$34.95 each on tape or disk. Any two, just \$54.95. All three only \$74.95.

STAR-TECH SOFTWARE

proudly presents the most revolutionary new Modem utilities ever.

XAVIAN TERM

LEXAS formally MULTI-TERM by JOHN WATSON

by

The first revolutionary terminal program ever to allow UPLOADING and DOWNLOADING of individual blocks, not just file for file. Do the entire disk from track 1 to track 36. Even send multiple files, And here is what all COMMODORE 64 owners have wanted. "UPLOAD AND DOWNLOAD AT THE SAME TIME ON THE VERY SAME DRIVE." ALL YOU NEED IS ONLY ONE 64, ONE MODEM, AND ONE DRIVE. It does not slow down, in fact would decrease time spent uploading and then downloading by half. Just perfect for the long distance caller.

We call it "CROSS SECTION PROTOCOL." But we didn't stop there. We devised the fastest protocol to date, it's name is "XAVIAN". It's like having 1200 baud on a 300 baud modem, and 3000 baud on the new 1670.

The CROSS SECTION and WATSON protocols incorporates XAVIAN so it is even faster yet.

Here are more extra features: It has high-lighted menu's, windows. full disk functions, full color and graphics, and full modem parameter manipulation, including variable baud rates from 40-1800 push the protocols even faster

It supports the following protocols: PUNTER, WATSON, XAVIAN, and of course CROSS SECTION!!

THIS IS THE MOST REVOLUTIONARY NEW TERMINAL PROGRAM TO HIT THE MARKET SINCE COMMODORE WAS FIRST BORN

FOR ONLY \$39.95

XAVIAN BBS by

LEXAS

THIS MULTI-FEATURE BULLETIN BOARD SYSTEM is unique and different, you construct your own. YOU CAN HAVE UP TO 999 USERS with full statistics.

HAVE UP TO 7 DRIVES online...even dual drives.

FULL SYSOP CONTROL both directly and in remote mode, a sysop can control virtually all high access data and parameters

It supports, XAVIAN protocol, the fastest protocol ever. PUNTER protocol the most widely spread protocol in the United States.

Other features included are: Optional download credit system, support of all popular modems, multitude of menus. sub-menus, functions, text, etc. all totally definable by you. It is like a Bulletin Board LANGUAGE.

EVERY MODEM OWNER SHOULD OWN XAVIAN BBS.

A MUST at

\$39.95

PROTOCOL = The type of transfer code used. punter protocal by steve punter commodore and commodore 64 is a trademark of the commodore business machines inc.

BASIC IS FOR WIMPS!

If you're serious about programming, it's time you moved up to **pascal**. BASIC is fine for beginners. But **pascal** is the language used by professionals. Here's why

- **pascal** is compiled/BASIC isn't . . . **pascal** programs run 30 times faster!
- pascal is structured/BASIC isn't ... pascal programs are easier to write and debug.
- pascal can get you ahead in school/BASIC can't ... pascal is required by the College Entrance Exam Board for advanced placement in computer science.
- pascal can get you a job/BASIC can't . . . professional software isn't written in BASIC.

PASCAL Don't Waste Any More Time! kyan pascal is a full implementation of standard pascal. It

features a compiler which generates 6502 machine code; builtin assembler which allows in-line or included assembly source code; and, a complete tutorial manual. *kyan pascal* runs on any C64 or 128 with a single disk drive.

(California residents add 6.5% sales tax)

TYMAC PRINTER INTERFACES GIVE YOU MORE FOR YOUR MONEY... And That's What It's All About

"The Connection"™ A Fully Intelligent Parallel Printer Interface for Commodore® Computers

Now, TYMAC provides a parallel printer interface designed exclusively for Commodore Computers, including Commodore 64[™], Commodore 128[™], Plus/4[™], Commodore 16[™] and VIC 20[®]. TYMAC's "The Connection" gives you complete control over your printing capabilities and offers you top-notch quality, unequalled by other interfaces of its kind. "The Connection" is compatible with virtually all Commodore software.

"The Connection" makes your investment in a printer interface worthwhile. "The Connection" simply plugs into the serial disk port to ultimately produce refined, finished documents. TYMAC has applied leading computer technology to equip "The Connection" with two

modes: an emulation mode (imitates Commodore 1525 printers) and a transparent mode (information goes straight through—no interpretation). For a suggested retail price of only \$69.95 (non-Epson) or \$73.95 (Epson), TYMAC gives you the best printer interface available for your money.

With "The Connection," you can execute standard print commands (OPEN, PRINT#, and CLOSE) and create finished documents and graphics to your own specifications. Various options include column tabbing, dot tabbing, graphic repeat, dot addressable graphics, and more. Full printer self-test, LED status indicator, printer reset switch, skip over perf, margin set, and programmable line length give you maximum flexibility for optimum performance. "The Connection" also features a 2K buffer. "The Connection" is compatible with any parallel printer that is equipped with a standard Centronics interface, including Star, Riteman, Smith-Corona/Epson, Panasonic, BMC-80, Mannesman Tally, Olympia/ Okidata, Canon/C. Itoh, NEC/Seikosha, Gorilla Banana/and Universal.

TYMAC backs "The Connection" with an outstanding reputation in the computer field since 1973. TYMAC tests every product 100% before it leaves the factory to guarantee flawless performance and the best value for your money. Each "Connection" comes with a full, one-year warranty. For information and literature about "The Connection," write or call TYMAC today. Or contact your local computer retailer to purchase "The Connection."

TYMAC CONTROLS CORPORATION 127 Main Street Franklin, NJ 07416 201-827-4050 Circle 13 on Reader Service card.

Tymac is a registered trademark of Tymac Controls Corporation. Commodore, Commodore 64, Commodore 128, Plus/4, Commodore 16, and VIC 20 are registered tradmarks of Commodore Electronics Limited.

Sing Along With Your Favorite Party Songs

Here's a great new way for you and your friends to have fun with your Commodore 64[™] or 128[™]. Our exciting Party Songs disk features 18 classics you'll love to sing. They are loaded with humor and nostalgia—just right for when friends get together.

For sing-along fun, the lyrics appear in easy-to-read verse on your TV or monitor. Play just your favorite song or set your computer to play them all.

If you've seen our Christmas Carols, then you know Party Songs will be a treat. Your computer's vast musical capabilities are used to their fullest to create lively music in three-part harmony. The colorful and entertaining graphics make every song a visual delight.

SONGS INCLUDE:

- Auld Lang Syne
 I've Been Workin' on the Railroad
- Oh My Darling Clementine
 Blow the Man Down
- For He's a Jolly Good Fellow
 Bill Groggin's Goat
- Hail! Hail! The Gang's All Here! My Wild Irish Rose
- My Old Kentucky Home
 Turkey in the Straw
- My Bonnie Lies Over the Ocean Goober Peas
- Red River Valley
 Oh! Susanna
 Dixie
- The Yellow Rose of Texas
 Yankee Doodle
- Who Threw the Overalls in Mistress Murphy's Chowder?

	_			-
7	WWW.C	ommoc	ore.ca	7
	May Not Re	print Without	Remission	

For fun throughout the Christmas holidays, order our Christmas Carols, too! The disk contains 18 favorites, including O Come All Ye Faithful, Joy to the World, Jingle Bells, Silent Night, What Child is This?, and more.

As always, you can trust John Henry Software to bring you quality software at the lowest price. We specialize in prompt delivery and guarantee our product.

ReRUN's WINTER EDITION

Just Imagine It.

Then Watch It Come True!

Turn your great ideas into reality with **ReRUN's Winter Edition***—our most creative software package yet! You'll get more than a dozen programs for the C-64/C-128 (in C-64 mode)** that will help you create everything from an essay or term paper to a novel piece of art!

Programs That Get Results

Does your mind paint a picture faster than you can sketch it? Then try "High-Spirited Sprites", a utility that lets you rapidly draw, animate view, and save sprite graphics!

** C-64 and Inc.	C-128 are registered tradem	arks of Com	modore Busine	ss Machines,

You can even create, save, load, and print colorful screens with three easy-to-use programs: "Screen Maker," "Screen Viewer," and "Screen Booter"!

Have you been dreaming up an interesting approach to a term paper or feature article, but the pieces just won't fall together? Then you'll love "Brainstorming," a thought-processing program that classifies your thoughts into groups and then prints an outline of your idea.

Or, if music is your specialty, you'll enjoy "Make a Little Music," a utility that lets you create, save and load songs into your own programs by using a joystick!

Programs with Variety

And that's just the beginning! **ReRUN's Winter Edition** also has programs to print your checks and teach you the fundamentals of assembly language, as well as **RUN**'s new checksum proofreader, for accuracy in typing in programs.

Of course, every **ReRUN** cassette and disk is in ready-to-run format, which means you can enjoy each top-quality **RUN** program without time-consuming keyboarding or debugging. Your **ReRUN Winter Edition** comes complete with a booklet of easy loading instructions and documentation.

Why not start bringing your great ideas to life today? Get creative! Get the **ReRUN Winter Edition!** Cassettes are \$11.47, and disks are just \$21.47. Make your choice, and then return the coupon or attached order card with payment. Or, call **1-800-258-5473.** (In NH, please dial 1-924-9471.)

To order by mail: We accept money order, certified check, personal check, Allow 2 weeks for personal check to clear.

Shipping: \$2.50 for software and accessories/\$10.00 for printers and color monitors/\$8.00 for disk drives and other monitors/Add \$3.00 per box shipped COD. Call for other shipping charges. Additional shipping required on APO, FPO, AK, HI, and foreign orders.

Melodian will teach you to play, compose, record and print music in just one evening!!

The Melodian Musical Keyboard for the Commodore 64 and 128.

A True Breakthrough In Music Education

At last, a program that makes it not only easy but fun to learn music. The Melodian keyboard and software were designed by Harry Mendell who designs custom synthesizer electronics and software for professional musicians such as **Stevie Wonder** and Eric Himy, an award winning concert pianist. The Melodian boasts many of the professional features found only on more expensive equipment. These features include multitrack recording, the ability to create custom instrument sounds and most importantly, ease of use.

Start your lesson with **RhythmMaster** Software. With its built-in metronome, RhythmMaster will display the treble and bass musical staffs and a picture of a piano keyboard. RhythmMaster will then play a measure of music and you must try to play the same measure back on the Melodian keyboard. You're not familiar with the keyboard or can't read music? No problem. RhythmMaster displays the notes you are to play on the musical staff and on the keyboard pictured on the monitor. If you strike the wrong key the note on the musical staff turns red and shows you which key you played wrong, making it ever so easy to correct what you played.

If you should hold a key too long a turtle runs across the screen. Inversely if you should release a key too quickly a rabbit scurries by. If you don't play it correctly Rhythm-

May Not Reprint Without Permission

Master knows it and repeats the measure for you to play.

Sounds easy doesn't it? Now add the fun. You start with six composers (Bach, Handel, Mozart, Beethoven, Schubert and Wagner). The object is to attain the next level of difficulty without losing a composer. You lose a composer each time you accumulate ten mistakes. There are twelve levels of difficulty attainable ranging from tyro to maestro.

ConcertMaster teaches you how to play 35 pre-recorded songs from Bach to Rock. With ConcertMaster you can analyze music note by note, instrument by instrument and learn how a music composition is put together. Then you can compose your own music and record it right onto your floppy disks.

There are nineteen different instrument sounds to choose from in over a seven octave range giving you a wide choice of instruments to suit your musical taste and expression. You can also create your own instrument sounds.

ScoreMaster enables you to print out your music in standard music notation for other musicians to play, or for yourself.

AHOY! Magazine Says . . .

Peggy Herrington of AHOY! said "The system is so easy to use that I didn't need the documation". "It's fun, challenging, and educational, and for playability and ease of use it is nothing short of spectacular."

New York Times Says . . .

Erik Sandberg-Diment of the New York Times states "really useful and instructive item ... Tanya, our to year old beginner quickly caught the spirit of matching the dance of her fingers to the measured metronome." "One piece of educational software that, unlike most of its kinfolk, actually delivers. These software-hardware combinations offer a lot of entertainment to the Commodore owner."

RUN Magazine Says . . .

Tom Benford of RUN notes "Whenever a selection of products of the same genre is available, one among the bunch rises head and shoulders above the rest. Such is the case with Melodian ConcertMaster keyboard and software. The combined features of RhythmMaster and ConcertMaster give you a complete music tutorial."

Satisfaction Guaranteed When You Buy Direct

By selling directly to you, we are able to give you the Melodian Keyboard and Software at far lower prices than ever offered before. You take no risk. If the Melodian keyboard or any of the programs don't please you, for any reason whatsoever, send it back within 60 days for a full refund!

Melodian Musical Keyboard \$99.95

Keyboard

40 Keys (A-C) in professional gauge spring loaded to give the feel and response of a real keyboard instrument. Polyphonic.

Registers (with ConcertMaster) Organ, Trumpet, Flute, Clarinet, Piano, Harpsicord, Violin, Cello, Bass, Banjo, Mandolin, Calliope, Concertino, Bagpipe, Synthesizer 1, Synthesizer 2, Clavier 1, Clavier 2, which can be played over a 7 octave range. Programmable sounds as well.

Recording (with ConcertMaster) Three track sequencer (recorder) with over-

dubbing and multitimbral (different instrument sounds at the same time) effects.

Interface

Built in interface for Commodore 64, Commodore 128, plugs right in to joystick port no. 2 and user port.

Power Supply

Powered direct by the computer, no batteries and cords required.

Finish

Table Model in white high-impact material, with carrying handle, protective key cover, and built in music stand. Size 29 -1/8 X 9-9/16 X 3-11/16, weighs 9 pounds.

Melodian ScoreMaster sm-01 \$29.95

With the ScoreMaster program your music can be printed out in music notation, which other musicians can read and play. Any music recorded with the ConcertMaster program can be printed by ScoreMaster.

ScoreMaster Requires:

- Commodore 64 or Commodore 128 with disk drive and printer compatible with the Commodore graphics mode such as the Commodore MPS 803, 1515, and 1525.
- Melodian ConcertMaster program.

May Not Reprint Without Permission

RhythmMaster teaches a beginner how to read music and play it correctly and in rhythm on the musical keyboard.

RhythmMaster will have you reading and playing musical notes in minutes with fun and excitement.

RhythmMaster Features:

- Trumpet, organ, violin, and synthesizer instrument sounds.
- Built in metronome
- Pause/Play control.
- Set-up menu for customizing RhythmMaster.

RhythmMaster Teaches:

- How to read notes on the treble and bass musical staffs.
- · The names of the notes.
- Where the notes are on the keyboard.
 How to play whole notes, half notes, quarter notes, eighth notes and sixteenth notes in combinations, in both 3/4 and 4/4
- How to play in different tempos.

Phythe Master Desire

- RhythmMaster Requires: • Commodore 64 or Commodore 128
- with disk drive.
- Melodian Musical Keyboard kb-oi is required to study the reading and playing of musical notes. However, RhythmMaster can be used without the Melodian Musical Keyboard to study rhythm, by playing the notes on the computer keyboard.

Programmer's Tool Kit \$29.95

Contains programs, and BASIC source listings for reading the Melodian Musical Keyboard, and for reading and creating music files for Melodian ConcertMaster.

The new, fast way to learn	blay and compose music

ConcertMaster Software cm-01 \$29.95

ConcertMaster teaches how a composition is put together, note by note, instrument by instrument. You learn to play 35 pre-recorded songs from Bach to Rock. Then you can compose your own songs and record them right onto your floppy disk.

ConcertMaster Teaches:

- Scales
- Bass lines
- Familiar Beginner Songs such as "Jingle Bells"
- Easy classical songs such as "Bach Minuet" and Ravel's "Bolero"
- Advanced classics like "A Midsummer's Night Dream" by Mendelssohn
- · Popular hits such as "Thriller"

Instruments Sounds

Organ, Trumpet, Flute, Clarinet, Piano, Harpsicord, Violin, Cello, Bass, Banjo, Mandolin, Calliope, Concertina, Bagpipe, Synthesizer 1, Synthesizer 2, Clavier 1, Clavier 2, which can be played over a τ octave range. Programmable sounds as well.

Recording Functions:

Three track sequencer (recorder) with overdubbing and multitimbral (different instrument sounds at the same time) effects. Each track can be set to one of seven different functions:

- Monitor: Lets you use a track to play music live, without recording it.
- Record: Records a track as you play.
 Playback: Lets you hear whatever has been recorded or loaded into the track. You may playback one track while recording another to build layers of instruments.
- Mute: Turns a track off. This is useful when you want to listen to or record one or two tracks at a time.
- Save: Stores a track to the disk.
- · Load: Loads a track from the disk.
- Protect: Write protects a track.

Create New Instrument Sounds

- Choose from pulse, sawtooth, triangle and noise sound sources.
- Control the sound envelope with attack, decay, sustain, and release times.
- Ring Modulation and Syncronization effects.
- Set Low pass, band pass, and high pass filter frequencies.

ConcertMaster Requires:

- Commodore 64 or Commodore 128
 with disk drive.
- Melodian Musical Keyboard kb-oi is required to study the reading and playing of musical notes. However, ConcertMaster can be used without the Melodian Musical Keyboard to playback the recorded musical examlpes, record music played on the computer keyboard, and to create new instrument sounds.

For our International customers:

Please send credit card number or international money order in U.S. dollars, or call **305-979-3777.** For Canada and Mexico, add \$15.00 for air mail. Overseas add \$16.00 for surface mail, and \$70.00 for air mail.

Auto-Run

Protect your programs from prying eyes with this handy utility that instantly begins execution of your programs after they are loaded.

By ALEJANDRO KAPAUAN

Some professional software houses feature programs that automatically run when they are loaded into the computer. This makes the programs easier to use and protects them from being listed and examined.

Now, you, too, can make your programs self-running with Auto-Run, which allows them to begin execution the moment you load them.

Self-running programs must be loaded with the "1" command of the Load statement, as in LOAD"PRO-GRAM",8,1. After the program is loaded, it starts execution.

If you load the program without the "1" command, it will not automatically start execution; however, you can neither list nor save the program to produce a working copy.

Self-running programs are possible due to various operating system subroutine vectors in low memory. You can change these vectors to point to machine language routines. Auto-Run creates a program file that actually loads right over these vectors.

One important vector, the warmstart link at location \$0302-\$0303, is changed to point to a small machine language routine in the cassette buffer. After the program loads, this new warm-start routine issues a Run command to Basic and starts execution of the program.

Program Details

Auto-Run (see Listing 1) starts off by printing a header on the screen and Poking the auto-start machine language routine into the cassette buffer. The sum of the data in the Data statements is checked against a checksum to ensure accuracy.

At line 50, the program asks for the filename of the program for which an auto-start copy is to be made. The program file is then opened for reading.

At line 80, you are asked for the name to be given the output file; that is, the auto-start version of the program. The output file is then opened for writing.

At line 110, the machine language routine in the cassette buffer is customized for the machine the program is running on—C-64 or VIC-20.

At line 130, the first two bytes, which represent the start address of the program file in low-byte, highbyte format, are read from the input file. These two bytes will vary, depending on whether the machine is an unexpanded or expanded VIC or a Commodore 64. The variable L is

RUN JANUARY 1986 / 101

www.Commodore.ca May Not Reprint Without Permission

then set to this start address minus 1.

Next, at line 140, the two characters CHR\$(2) and CHR\$(3) are written to the output file. These two bytes represent the start address assigned to the output file. The value is \$0302, which is the location of the warmstart vector.

Then the characters CHR\$(60) and CHR\$(3) are written. These represent the value \$033C, which will be loaded over the warm-start vector; \$033C is the address of the start of the cassette buffer in which the autostart code is present.

Lines 150 and 160 Poke the command to be issued to Basic by the auto-start code into the proper place in the cassette buffer. In this case, the Basic command is Run. Advanced programmers who wish to create auto-start machine language files might want to change "RUN" to a "SYSxxxxx" command, where xxxxx is the address of the machine language program.

Next, at line 170, the contents of memory from just above the warmstart vector up to just below the start of the input program are copied to the output file.

Finally, at line 190, the remaining portion of the input file is copied to the output file. The disk files are then closed and the program stops.

Typing the Program

Auto-Run is a fairly short program, so it should not be much trouble to type it in. However, you must watch out for the semicolons in the Print statements. Any auto-start program you create will not work if you leave out any of the semicolons.

As always, be careful with the Data statements. If you get an Error in Data message when you run the program, check to see that you have entered the Data statements correctly.

Using Auto-Run

To use Auto-Run, first load it into your machine and run it. Then, insert the disk that contains your program into the disk drive. Type in the name of your program. When you are asked for the output name, type in the name you want to give the autostart copy of your program.

The screen will clear and the program will start working. The program takes a couple of minutes to create the output file—longer for long programs. When the program is done, you can test your new program file. Type in

LOAD"progname",8,1

where progname is the name of the auto-start copy of your program. Immediately after loading, the program should start running.

To copy an auto-starting program created by Auto-Run to another disk, you may use any one of various filecopying programs or machine language monitors. You cannot load the program and save it in the normal manner.

If you cannot copy such a file, you can always copy your original pro-

gram to the disk, run Auto-Run to produce an auto-starting copy, then delete the copy of the original file.

Be sure to remove any cartridges or expansion boards before you run Auto-Run if you expect the auto-start program to run in an environment without them. Or leave them in place if you expect the program to run with them.

If your intention in producing an auto-start program is to prevent your program from being examined, you must take the necessary steps to make your original program airtight. That is, there should be no way of getting out of the program without its consent, short of powering down the machine. Of course, no protection scheme is perfect, so there is always some way of examining any program.

Some simple measures you can take are to disable the run/stop and run/stop and restore keys and to use the New command in the program to delete the program from memory.

To disable the keys, simply type POKE808,234 (normal value is 237) on the C-64 or POKE808,100 (normal value is 112) on the VIC-20. Type these Pokes before you run Auto-Run, and they will carry over to the auto-starting program. A nice side-effect of using these Pokes is that the List function will also be disabled.

A-Maze-ing Word Jumbler

There might be a g-i-r-a-f-f-e in the maze, or there might be an o-n-i-o-n, depending on the category you've selected. Juggle the letters to spell a word and have fun.

By PENNY DeGROFF

In most computer word-scramble games, the computer scrambles a word and displays it on the screen. The player then types in the correct word.

This game, Word Jumbler (Listing 1), is a little different. First, you are presented with eight categories, each dealing with a different subject. With a joystick in port 2, you move a white cursor beside the category you want, then press the fire-button to begin the game.

The playfield, a 12-section maze, will appear on the screen. Some sections will contain a letter; one section will contain a star; the rest will be empty. The letters, when combined in the correct order, will spell a word that relates to the category chosen. (For instance, the "Tm Hungry" category contains the names of various foods.)

To display the letters, one at a time, in their proper order, use the joystick to move the star directly under each letter and press the fire-button. That letter will then appear at the top of the screen. Continue this until all letters are removed from the maze, displaying a word.

At the bottom of the screen is the score section. When the maze is cleared, the word being played is shown along with the score and any bonus points earned. If you've spelled the word correctly, you will earn one point for each letter in the word. There is no time limit for clearing the maze. However, bonus points are awarded if you do this in less than 30 seconds; you gain one point for each of the remaining seconds. Since the star must go around the letters instead of over them, you can clear the screen more quickly by going through the empty sections whenever possible.

Play continues until five words have been unscrambled. The grand total and high score are then shown. The option of playing another game is also presented at this time.

Making Changes

Any or all of the categories or words within them may be changed. Lines 160–200 contain the eight categories currently used. There are 20 words in each category. They are contained in Data statements beginning at line 950. Since the maze contains 12 sections, no word can have more than 11 letters. Have fun!

\$5.95 - 49.95

At TRI MICRO, we only believe in the best value in computer software and books. Our product is highly regarded. **Commodore Microcomputers** writes that our software "gives 64 users some of the sophistication previously the sole province of computers costing five times as much." (August 1985) Although **RUN** magazine wrote that our programs "work so well that the need for any significant improvements would seem unlikely" (July 1985), we continue to improve and evolve the products.

In addition to our top-performing productivity software, we are introducing a new brand, FRENCH VANILLA. This software has been designed for those with discriminating tastes and ordinary budgets. Designed primarily for home use and enjoyment, the software adheres to the principals of quality and ease of use for minimal investment.

The authors of the book offerings are respected authorities in their field in the United Kingdom. They represent the publisher and former editor of Commodore Computing International, as well as frequent contributors to various British personal computing magazines. Several are well-known programmers.

SATISFACTION GUARANTEED OR MONEY BACK 1985 TAX RETURN HELPER Fast and easy income tax preparation

- . This is the 5th annual edition thousands of repeat customers.
- Includes Form 1040, Schedules A, B, C, D, E, G, SE, W, Forms 2106, 2441 and 4562
- · Enter and modify data on a screen copy of the form.
- Works like a spreadsheet all the lines affected by a change are instantly updated.
- Automatic tax computation.
- · Data can be saved on disk and updated.
- · Also included:

TAX DBASE

A data base program to create and maintain files of tax related items (medical, car expenses, etc.) that can be used directly by the tax programs.

 Can be used all year round. Also good for many other accounting jobs (checkbook balancing, etc.)

Price is tax deductible. C64 disk: \$33 (+ \$1.50 S&H)

PROFESSIONAL VERSION - also prints data on IRS forms: \$45 (+ \$1.50 S&H)

Previous customers prices: \$22 and \$30 for pro-version (+ \$1.50 S&H)

KSOFT CO. 845 WELLNER RD. NAPERVILLE, IL 60540 (312) 961-1250

VISA'

C

From p. 28.

pencil. Speed of execution may be varied for effect, and the program allows easy combination of text and graphics.

The Print Shop

Because The Print Shop is geared for output to your printer, many of its graphics designs are never seen on the screen and therefore cannot be output to a VCR.

However, there is a kaleidoscope feature that displays an ever-changing geometric pattern, over which you can superimpose print in two different sizes. I rather like the way the print seems to form itself out of nothing, somewhat like the titles Hollywood used for horror movies.

For speedier execution, you may also use text without the kaleidoscope background. The Print Shop also contains eight different fonts, so you may match the type to the situation.

However, The Print Shop is not a color program, so make the best of black-and-white titles. (Broderbund Software, 17 Paul Drive, San Rafael, CA 94903.)

Graphics Basic

Graphics Basic, by HesWare (390 Swift Ave. #14, South San Francisco, CA 94080), is, without exception, the best extended Basic program ever.

Programming is called for here, but extended Basic is logical and easy. Even I can use it.

Because you are working from a program, taping the execution as the program runs is a good way to achieve animation.

The Fill command, for example, sends color running across your screen to paint an enclosed space. The Line command (from;to) draws a line so quickly you can use it to represent a laser beam.

GPRINT allows precise positioning of text, in a variety of sizes and in one of four built-in fonts. On execution, the letters form across your screen from left to right.

An easy sprite editor and simple sprite commands complete the package. Using sprites, I've created such varied scenes as exploding fireworks and people running to fill theatre seats.

Final Tips

Those are my favorites. In finding your own, I'd suggest the following guidelines:

1. Use software that permits a variety of type sizes. Standard-size type can be difficult to read from the average TV viewing distance.

2. Use something that gives you a variety of fonts. A large selection allows you to match the type to the mood you wish to convey.

3. Unless you're a whiz at programming sound, forget your VCR's audio connection. Use it later to dub in appropriate music from your record or tape collection.

Once you've done all this, you're ready to amaze your family and friends. Or do as I do—give a videotape client something uniquely your own, and use the extra dollars to support your computer habit.

A Magic

From p. 10.

The format is

MID\$(string1,position <, length >) = string2

What happens is the first length characters of string2 replace the length characters of string1, starting at the variable "position." The remainder of string1 is not affected.

The length is an option, but if you leave it out, string2 cannot be longer than the remaining number of characters in string1, or an illegal quantity error results.

> Rick Rothstein Trenton, NJ

\$298 CP/M utilities—If you are using CP/M mode on the C-128, you might think that it came without some of its important utilities, because they don't show up in any disk directory. Flip your disk to the other side, and you'll find them lurking there.

Eugene Cozzi Barre, VT

\$299 C-64/VIC Buffer Saver—Many interesting programs Poke machine language routines into the cassette buffer and adjoining locations, which occupy memory from 820 to 1023, decimal. The trouble with this technique is that you must run the Basic Poker every time you want to load your machine language routines.

The routine below saves the machine language directly from the buffer to disk or tape. To use Buffer Saver, just add it to the end of your Basic Poker program and add the proper program name in line 160. If you have a VIC, you must also change the SYS64738 to SYS64802. As printed, the program saves to disk. To make it save to tape, change the ,8 after the SAVE to a ,1,1.

Once machine language programs have been saved to disk, they must be loaded using the format

LOAD"name",8,1

in order to work properly, and a New command must be executed following the load. If the New wipes out an important Basic program, you can either reload it or use an Unnew program to bring it back to life. If you use the DOS 5.1 wedge, you can load machine language by using % instead of *l*, and, in that case, you need not perform the New command.

- 100 PRINT "{SHFT CLR}{CRSR DN} 64/VIC BUFFE R SAVER - LOUIS F. SANDER{CRSR DN}"

- 16Ø SAVE"PROGRAM NAME",8:SYS64738:REM CHANG E TO SYS648Ø2 FOR VIC

Louis F. Sander Pittsburgh, PA **\$29A** Working with machine language—You can easily tell when a Basic program includes a machine language routine, because you'll see one or more Data statements whose elements are numbers between 0 and 255. Those numbers are the machine language program, and the Basic program always includes some Pokes to put them into memory.

Once the machine language program is in memory, it is activated by a SYS command, which is the machine language equivalent of RUN. Sometimes the SYS causes a one-time action to take place, and sometimes it activates a feature that you can access again and again, until the computer is reset.

Even if you erase your Basic program with the New command, or even if you reset it with stop/restore or a reset button, the machine language program remains in memory! If your reset seems to have killed the machine language, you can usually resurrect it by repeating the original SYS.

> Ilse Payne Cheswick, PA

\$29B Delete a block of lines—If you have a C-64 or VIC, it's never pleasant when a large block of Basic lines needs to be removed from your program. To delete them, you must type each line number individually, then press the return key. Sometimes, you can write a Basic program to automate the task, but such programs usually depend on your lines being numbered in a very regular way.

If you have a C-128, Plus/4 or C-16, or if you own a programmer's aid cartridge, the Delete command is a godsend at times like these—it lets you remove any number of lines, just by typing one command.

The accompanying program provides the Delete command for the rest of us. When run, it puts a machine language program into the cassette buffer. Once that program is in place, blocks of lines can be deleted by typing commands of the following form:

SYS828, starting line#, ending line#+1 < return>

For example,

SYS828,100,200 deletes lines 100–199 SYS828,0,100 deletes everything up to line 99 SYS828,300,63999 deletes everything from line 300–63998 SYS828,300,0 deletes everything from 300 up

Once the machine language is in place, you can use this month's Buffer Saver program to save it directly, so you won't have to bother with the Basic program again. Machine language experts will be pleased to know that the machine language is completely relocatable, making it possible to store in any safe area of memory.

Who needs this?

When you can solve disk drive alignment problems in 60 minutes with the CSM program.

Disk drive alignment problems? Drive out of alignment again? Tired of waiting two weeks or more to get your drive fixed??

WE HAVE THE ANSWER !!

With the 1541 DISK DRIVE ALIGNMENT PROGRAM you can align the drive yourself in an hour or so. Not only that, you can do it at home AND no special equipment is required. Anyone with average mechanical skills can do it!!

Read What Compute!'s Gazette had to say. (Oct., 1984)

"... with 1541 Disk Drive Alignment from CSM Software, you can fix it [the disk drive] yourself in an hour or so and the program will pay for itself the first time you use it ... No technical expertise is required to accomplish the alignment procedures, and the manual accompanying the program thoroughly describes the procedures."

1541 DISK DRIVE ALIGNMENT PROGRAM - VERSION 2.0 - \$44.95 plus shipping

CARTRIDGE BACKER V2.0

IMPROVED AND UPDATED !!

The best cartridge - to disk backup system is now even better. The software has been enhanced to back up many more cartridges and disk programs. Cartridges will run from the disk as-is and do not require any ROM or RAM expansion boards. VERSION 2.0 software update is available to ALL prior purchasers of CARTRIDGE BACKER and CARTRIDGE CRACKER (from BEAR)

Complete system (includes software and expansion board) -

\$54.95 plus shipping

Software update only (call for details) -

\$14.00 plus shipping

PROGRAM PROTECTION MANUAL FOR THE C-64 VOLUME II

Not just a third edition - a new and up-to-date manual covering the latest advances in program protection. Over 275 pages of valuable information. Topics include:

- ENCRYPTION AND DECRYPTION
- UNDOCUMENTED OPCODES
- GCR RECORDING
- CUSTOM DOS ROUTINES
- CARTRIDGES AND EPROMS
 PROTECTING YOUR OWN SOFTWARE
- TIPS FROM EXPERTS ON PROTECTION, BACKUP & MORE
- DISK INCLUDED

\$34.95 plus shipping

* NEW PRODUCT * * EPROM PROGRAMMERS HANDBOOK

Finally, a reference book written for the average user. Until now EPROM programming was simply too difficult for most people. The EPROM PRO-GRAMMERS HANDBOOK will take the mystery out of putting your favorite programs on cartridge. Learn to create your own cartridges and customize your computer and disk drive. Discover the power of programming your own EPROMs.

- Covers beginning thru advanced topics.
 Simplifies EPROM programming so that anyone
- can do it.
- Perfect companion for the PROMENADE and other EPROM programmers.
- Create your own auto-start cartridges, custom KERNAL, modified DOS and specialized EPROMs.
- · Put many programs on a single cartridge with MENU-MAKER
- Disk includes ready-to-use routines and helpful utilities.

VISA AND MASTERCARD ACCEPTED Shipping \$3.50 per item in U.S.: foreign orders extra

SNAPSHOT

SNAPSHOT 64 is a unique and exciting utility that virtually takes a picture of your computer's memory. SNAPSHOT 64 then saves that 'snapshot' to disk and automatically creates an auto-boot loader for the program. Once saved to disk the program may be restarted at the exact same point at which it was interrupted!!!

SNAPSHOT 64 is the perfect answer for those looking for the ultimate backup utility. Think of it, being able to stop most any program after the protection check and then being able to resume the program at the same point, totally bypassing the protection check.

- MOST EFFECTIVE UTILITY OF ITS KIND · EVEN MORE EFFECTIVE THAN THOSE UTILITIES THAT CLAIM TO "COPY ALL MEMORY-RESIDENT SOFTWARE"
- INVISIBLE TO SOFTWARE CANNOT BE DETECTED
- SNAPSHOT FILES RUN BY THEMSELVES THE BACKUP COPY WILL RUN AS-IS. WITHOUT THE SNAPSHOT CARTRIDGE
- WORKS MUCH FASTER THAN OTHER SIMILAR UTILITIES
- EASY TO USE NO COMPLICATED INSTRUCTIONS - EVEN A CHILD CAN DO IT
- SNAPSHOT FILES ARE COMPATIBLE WITH FAST LOAD UTILITIES
- SNAPSHOT FILES WILL LOAD FROM ALL COMMODORE COMPATIBLE DISK DRIVES
- STORE MANY DIFFERENT SNAPSHOTed FILES ON A SINGLE DISK
- FULLY SELF-CONTAINED ON CARTRIDGE -NO DISK TO HASSLE WITH
- EXCLUSIVE FEATURE: THE CODE **INSPECTOR — ALLOWS MOST PROGRAMS** TO BE STOPPED, EXAMINED, MODIFIED AND **RESUMED WHILE STILL IN MEMORY!!**

> James Pellechi Middle Island, NY

\$29C Restore key tip—If you've experienced erratic operation when using the stop/restore combination, you've got plenty of company. Don't call the repairman, though, because there's nothing wrong with your computer. To work properly, the circuitry that monitors the restore key must see a sharp and rapid change in that key's status. So, if restore is pressed gently—in the manner of the other keys—the monitoring circuit often misses the event. The solution is to always use the following keyboard technique:

Press the stop key and hold it, just as though you were using it to shift a letter key. While stop is firmly depressed, give the restore key one sharp tap, as though your finger were a woodpecker's beak.

> Mary Haver Wood Islands, PEI Canada

\$29D Easy-fingered loading—It's common practice to rename frequently used programs with one-character names, to minimize the amount of typing necessary to load them. It's even better when the new name is a single *shifted* character, such as shifted W. With such names, you can press the shift key immediately after the L in the abbreviated Load command, and not release it until the comma before the 8 for the disk drive number. This eliminates the coordinated fingering required with other sorts of filenames. It's not much, but it sure feels better!

David A. Hooyer Bangkok, Thailand

\$29E Detecting keypresses—There is an alternative to the Get statement in detecting single keypresses on Commodore computers. A memory location called LSTX always contains a number that corresponds to whatever key is currently pressed. Here are the locations of LSTX:

C-64 and VIC—197 Plus/4 and C-16—2038 C-128—213

You can determine the values for different keys by executing the following program and pressing the keys. Substitute one of the numbers above for LSTX in the following example.

10 PRINT PEEK (LSTX) : GOTO 10

Feng Yihao Singapore

\$29F Exclusive OR operator—The exclusive OR, also called XOR or EOR, works by comparing the bit patterns of two numbers and then returning a 1 for every case where the bits are dissimilar. In other words, if the compared bits are both 0s or both 1s, a zero will be returned.

"Cecil's 6510 Conditional Macro Assembler" for Commodore 64[®] or Commodore 128[®]

A package of programming tools created for every assembly language programmer.

Fully capable for the professional: "Cecil's Assembler' always EVAL-UATES THE WHOLE EXPRESSION, THEN RETURNS THE CORRECT HIGH/LOW byte".

Clear and direct for the beginner: "Cecil's Editor' provides EXTENSIVE ON-LINE HELP".

- Features 10 built-in macro instructions to complete the branch or jump on condition instruction sets.
- De-bugs and modifies easily by allowing 13 unique label characters.
- Includes full-screen editor with enhanced DOS commands.
- Nests macros to 32 deep.
- Includes 10 pseudo-ops to control the assembly process.
- Stops on error and/or identifies error type and location
- Supports most printers and interfaces and allows multiple disk drives.
- Prints its own instruction manual.

Hagic Magic

But if one is 1 and the other is 0, the XOR will return a 1. The principle is illustrated by this diagram:

	1001
XOR	1100
	0101

Machine language includes an XOR operator, and it is frequently used for flipping bits. (Using XOR to combine one byte with a byte consisting of all 1s gives a new byte whose bits are the reverse of those in the original.)

Commodore Basic doesn't have an XOR operator, but you can easily simulate one by using this:

A XOR B = (A OR B) AND NOT (A AND B)

Georges Elias Tripoli, Lebanon

\$2A0 Cardco modification—I have a Cardco/? + G interface. I use it mainly for printing text, but occasionally I use it with The Print Shop program. Changing between the two applications normally requires opening the interface and flipping DIP switch #8.

I made the job much easier by turning the DIP switch off and wiring a Radio Shack #275-624 toggle switch in

parallel with its terminals. I mounted the switch in a hole in the interface's cover. Now, when I need to change applications, all I do is flip the Radio Shack switch.

> Jim Lynch St. Thomas, Virgin Islands

\$2A1 Screen scrolling—Here are some easy ways to scroll your screen up or down a line, without using any machine language routines. Upward scrolling can be done by:

PRINT " [HOME] [25 CRSR DNs] [HOME] "

Downward scrolling, on the C-64 only, can be accomplished by:

PRINT " [HOME] [CRSR DN] [CRSR LF] [SHFT INST] " : POKE 218,156

Shachar Ebel Rehovot, Israel

\$2A2 Faster-running programs—Here are some hints to make your Basic programs run faster:

• In For...Next loops, type the Next without the variable name.

• If possible, do not use arrays.

• If you have numerous Data statements, put them at the beginning of your program.

Do the same with frequently executed subroutines.

Strip all the spaces and REMs from your program.

Javier Echeverria Santander, Spain

\$2A3 Gemini 10X paper sensor—You can disable this sensor by executing the following command:

OPEN 4,4 : PRINT#4,CHR\$(27);"8" : CLOSE 4

Moien Jawaid Zobairi Riyadh, Saudi Arabia

\$2A4 SFD1001 disks—The Commodore SFD-1001 disk drive looks just like a 1541, but it holds one megabyte of information. The major difference between the SFD-1001 and the 1541 is that the SFD-1001 is a direct drive with a massive heat sink and an IEEE interface instead of a serial bus. The SFD-1001 is made, but not sold, by Commodore; it is only available at a few places. Working with this drive can be a pleasure, but it has more than its share of challenges, mostly due to poor documentation.

Commodore recommends a 96TPI disk for use in this drive, but such disks are extremely hard to find and require a very strong signal to format and write to; the SFD-1001's signal is not strong enough. I've had success with premium-quality DSDD disks, such as Dysan and Maxell.

RUN JANUARY 1986 / 115

Computers in Education

The Resource Center

By MARGARET MORABITO

RUN's technical manager Margaret Morabito has extensive experience in the educational field, having taught college and high school English and writing, as well as Basic programming. She has also been involved in curriculum development and has written educational software for use on the C-64.

Although millions of people use their C-64s at home, credit is not often given to Commodore computers as being tools for serious applications. If you ask anyone who doesn't own a Commodore to describe one, you will invariably get the reply, "Oh, that's the inexpensive game computer."

A Gap in Our Education

One area that has been covered only vaguely in computer magazines is that of serious educational applications. Most coverage of education in Commodore-specific magazines has been limited to spot reviews of unrelated educational software and program listings of math and word games. Furthermore, if you read educational journals, you will find scant coverage of Commodore computers. (Commodore Business Machines is helping to overcome this to a limited extent by placing C-128 advertisements in major educational journals.)

Many educators are looking specifically for information on how to use computers (any computers) in their school systems, from administrative work to classroom teaching to home reinforcement. Community leaders and school board members are constantly being bombarded with the request to get computers into the schools, but they don't have anywhere to turn for advice on what equipment to buy, what software works best, or One of the best-kept secrets in the U.S. is that Commodore computers are ideal for educational applications. So, let's start spreading the word. Through this column, we'll share ideas, methods, success or failure stories and suggestions on how to make the most of your Commodore inside and outside the classroom.

even how to implement computer usage throughout the various disciplines within the school.

People in these positions would be well advised to take a look at the ability of Commodore computers to meet their needs. Unfortunately, there has been no concerted effort to let these people know that the Commodore computer is an excellent choice for educators, and that its capabilities reach far beyond that of just home entertainment. There also has been no effort to teach Commodore owners how to use their equipment and software for practical and directed educational applications, at home or in school.

Those of you who own a C-64 or C-128 already realize the power, versatility and cost-effectiveness of your computer system. Commodore computers are the predominant choice for the home because of these factors. What is amazing is that in the U.S., where C-64s and VIC-20s have been top sellers for four years, Commodore computers are not more prevalent at all levels of education.

If you own a Commodore, then you know that this computer surpasses others in the areas schools need to consider: the price of hardware and software, the availability of both, the versatility of the system and the presence of Commodores in the homes of many students. What you may not know is exactly how the computer can be a useful and productive tool in the educational process.

An Education Column

This month, *RUN* is beginning ongoing coverage of Commodore computers for educational purposes, with the hope of helping to fill this void for all concerned.

In this column, a serious effort will be made to let parents, teachers, administrators and students know exactly how Commodore computers are being used throughout the U.S. and Canada for teaching, learning and administrative projects. The goal is to share information among all interested groups and to help home users and professional educators apply educational teaching and learning concepts through the medium of the computer, particularly Commodore computers. This information will come from those of you who are already using your Commodores for educational purposes; actual case studies will be presented from the information gathered.

All age groups of learners will be addressed, from pre-schoolers through college level, including adults in con-

tinuing education coursework. Furthermore, all disciplines will be covered. Personal computers are obviously used for teaching computer programming, but there are a myriad of other non-computer subjects, such as writing, history, geometry, foreign language study, art, design and music—to name just a few—that can be enhanced with the use of a computer.

Specific peripherals and related hardware combinations will be addressed. Types of software (such as drill and practice, simulations, gradebook managers, etc.) will be mentioned, as well as specific software products that have been tested in real learning and teaching settings. Recommendations from those of you who are using particular hardware, peripherals and software combinations will be shared in this column. Also, whenever possible, summaries of recommended teaching plans will be included.

We would also like to share your experiences in acquiring your equipment. How does a school system with limited money get a computer program started?

Have you been able to measure an improvement in academic perfor-

mance that has resulted from the use of the computer in your home or school? A big question on educators' minds is whether the computer is actually a boon to the teaching and learning process.

If you have been able to measure a change in a child's learning ability that was a direct result of his or her interaction with computers, please let us know. It would be useful to be able to share information that reveals computers as being a positive force and to specify in what areas they are most effective.

Is your school office using computers to keep track of administrative chores? All aspects of the educational realm will be covered in The Resource Center. The end goal is to provide many hints and tips on the combinations of equipment, software, subject matter and lesson plans that work most effectively. When a particular combination doesn't work, we would like to mention that, too.

A Call for Help

If you are using a Commodore VIC-20, C-64, Plus/4, C-16 or C-128 at home or in a school—college, continuing education, high school, ele-

mentary or preschool—send me a letter outlining the equipment you are using, the subject area or areas in which you are teaching or learning, and any other details that you would like to share with our readers. Let me know of your successes and the problems that you have encountered. (Canadians have been in the forefront of using Commodore computers for education, so I am especially interested in letters from those readers.)

I will contact you individually for further details, and if your situation is chosen for this column, I will include your information and (if you don't mind) your name and address, so that others can ask you questions.

Next month, we will take a look at how one school system is using multiuser networking to link together a classroom of C-64s and VIC-20s and how that school initially got started with computers.

COMMODORE CLINIC

By JIM STRASMA

Do you have a problem or question about your Commodore computer? Commodore Clinic can help. Just send your question (limit one per entry) on a postcard to:

> Jim Strasma Commodore Clinic PO Box 6100 Macomb, IL 61455-6100

Queries are answered only through this column, and, due to the volume of mail, only questions that appeal to the majority of our readers can be published.

UPDATES

Update: I'd like to add to your answer to Warren Furman (p. 108, October 1985) about Passport's MIDI interface. Before trying MIDI programming, read (two or three times!) the "MIDI 1.0 Specification." You will also want the Yamaha data for your instrument, and you should be familiar with assembly language, as Basic is probably too slow for serious MIDI hacking.

MIDI is an optically isolated, 5mA current, loop serial interface, running at 31.25K, with one start bit, eight data bits and one stop bit. Data is available from: The International MIDI Association, 11857 Hartsook St., North Hollywood, CA 91607; 818-505-8964.

John Strohm Ft. Worth, TX

A: Thanks for the added information. Thanks to MIDI's speed, hackers are also beginning to investigate it as a way to implement a low-cost network. Update: In your answer to Keith Marshall about 16-bit microprocessors for Commodore machines (p. 100, October 1985), you avoided the issue of chips that have a 16-bit internal design and do a dual 8-bit fetch. The 65802 is a 65xx-compatible chip that does this and accepts all 6502, 65C02 and 65816 codes. You can plug a 65802 into any Commodore that uses a 6502 processor. The approach certainly worked for IBM on their PC. Care to comment?

> Dave English Orange, CA

A: Pseudo 16-bit machines like the IBM PC and Commodore's own 6809based SuperPET are only slightly faster than 8-bit competitors. A 16bit internal design usually allows more memory and streamlines some operations, but an eight-bit data bus limits overall speed. As a result, pseudo 16-bit machines are being rapidly replaced by true 16-bit computers, such as IBM's PC-AT and Commodore's Amiga.

Update: In your October 1985 column, Clara Nash asked for an easy way to alphabetize names from books. I do a great deal of name indexing for genealogical societies, and my son and I wrote a program to do this. I am enclosing a copy and would be glad to send one, free of charge, to Clare Nash.

We've been selling the program through a genealogical magazine, but we're going to quit running the ad, as it's too much bother. The only reason we advertised was because so many genealogists couldn't find a name-indexing program.

Wilfred Bow 489 Old Orchard Drive Essexville, MI 48732

A: Mr. Bow's program, written in compiled Basic, accepts up to 400 names per file, sorts them in memory and prints the results.

If you are dropping it commercially, Mr. Bow, how about releasing your index program as "freeware," allowing people to copy it freely and send you a donation if they keep and use it? That minimizes your costs and keeps the program available.

REPAIRS

Q: Is the read/write head on the SX-64's disk drive on the top or bottom? I read an article that claimed the head is on the bottom (which doesn't make any sense). I need to know this to make sure I put a cleaning disk in properly. (All the articles I read recommend cleaning the head on a regular basis.)

> Seymour Gerr South Windsor, CT

A: The head is on the bottom. Actually, it does make sense; dust and other contaminants are more likely to settle on the top surface (even so, a few other disk drives put the head on top).

As for cleaning the head on a regular basis, I recommend cleaning it no more than once a year. The oftsuggested weekly cleaning with a chemical cleaner causes more problems than it cures.

Commodore Clinic

Q: I have a C-128, an MSD dual disk drive and an MSD IEEE-488 interface, which I cannot get to run in C-128 mode. The turn-on SYS causes it to go dead. Do you have any answers?

> Gordon LaFlash Toledo, OH

A: The MSD interface, like most other IEEE-488 interfaces developed for the 64, incorporates machine language code that would need to be rewritten to work in C-128 mode. Since an MSD drive with an IEEE cable is still slower than a 1571 or 1572 disk, there isn't much point in updating your interface. Instead, I plug my MSD into the C-128 via the serial bus.

Q: After about two minutes of use, my C-64 resets itself and the rest of my system. It's not overheating, as everything is cool. I'd like to know what's wrong.

> Ian Stewart Redlands, CA

A: Even though your system still feels cool, two minutes is enough warmup time for a heat-related problem to show up. It isn't that the whole system is unacceptably hot; rather, one electronic part has become unusually sensitive to heat.

For example, your symptoms could be caused by a failing capacitor in the reset circuit, one that is all right when cold, but shorts out at normal working temperatures. Apart from making sure the problem is in the 64 itself (by unplugging all accessories and trying someone else's monitor and power supply), diagnosis and repair of this type of problem is best left to your dealer.

Q: The drive in my SX-64 squeaks and is much noisier than a 1541. Is this a sign of trouble? Also, my demo disk leads me to believe the drive can store 340K. Can you confirm or refute this?

> J. Gough Fallbrook, CA

A: The drive in the SX-64 shouldn't be any noisier than the 1541. To iso-WWW ROMING AND Reprint Wilhout Remission late the problem could be difficult, though, as removing the cover from an SX and gaining full access to the cramped drive assembly can take an hour, even when you've done it before. This is another job best left to your dealer.

As for storage capacity, the SX-64 drive is identical to the 1541. The only way to get 340K of data on either one is by cutting a second write-protect notch into a disk and turning it over to use the back side as though it were another disk. If you really need 340K, consider adding another external drive to your system. Commodore's SFD-1001, for example, holds over 1M (1000K) of data.

HARDWARE

Q: I have a Commodore SFD-1001 onemegabyte disk drive and have found it to be of fabulous help. However, I have not been able to find out about its operating system, in regard to how many files can be in the directory, and how it handles relative and user files.

> Eric Martin Decatur, IL

A: It uses DOS 2.7, the same as Commodore's 8250 and upgraded 8050 disks. Each disk can hold 244 files and handles relative and user files exactly as they would be handled on the 1541 and other recent Commodore drives.

However, it has more internal buffer memory than the 1541, allowing it to handle more open files at once, and a single relative file may expand as much as needed, spanning both surfaces of the disk if necessary. Also, the 1001's internal memory map is similar to those of the 8050 and 8250 rather than that of the 1541, so most programs for the 64 that directly address internal disk memory will need to be changed for the 1001.

Q: Is there any way the disk drive could ignore the write-protect tab on a disk (maybe by putting in a switch)?

> Adam Kaplan Sunrise, FL

A: Yes, a switch is the way to do it. Get a single-pole, double-throw, center-off switch, and then find the two wires going to the write-protect switch inside your disk drive. They are on the left side, near the front.

Cut one of the wires going to the original switch, and connect the end that goes to the main circuit to the middle pole of your new switch. Connect the other end, from the original switch, to one of the outer poles on your new switch. Then splice one end of a new wire into the other (uncut) wire of the original switch, and fasten its other end to the remaining pole on the new switch.

This gives you three possibilities at the flip of a switch: normal operation of the original write-protect switch, write-through (to rewrite disks whose write-protect notch is missing or covered) and read-only (to prevent changes to a disk even when its write-protect notch is uncovered).

Q: I have a Toshiba TV Model CZ2094 and a C-128. Toshiba offers an RGB cable, type CPA 0908, which I understand works with the IBM PC. Will the same cable work with the C-128?

> Edward Epstein Miami, FL

A: Yes, it should plug right in. I use the same cable for both my C-128 and my PC-compatible Corona. Commodore intentionally made the 128 plug-compatible with IBM color monitors.

Q: I own a 64, Gemini 10-X printer and MW-302 interface. I have no problem with text output, but graphics output is nearly unusable. Can you help with DIP switch settings?

> Keith Wade Yellville, AR

A: The problem is that your MW-302 interface was not designed to handle graphics output. The graphics model from the same company is the MW-350, which should work well with your Gemini printer. The MW-302 will work well for someone with a daisywheel or other non-graphics printer. Circle 118 on Reader Service card.

Circle 223 on Reader Service card.

Hats off to a machine language teaching system that works.

Machine language programming isn't easy, but you don't have to be a genius to learn it. Despite what you may think after getting lost in umpteen "How to program the 6502" books. Let your Commodore 64 teach it to you.

The Visible Computer: 6502 is an awardwinning blend of text and software that thousands have used to master the elusive skills of machine language.

It's an animated simulation of the 6502 microprocessor that lets you see with your own eyes how the 6502 works. You'll be using it as a debugging tool for years to come.

It's a tutorial. The 150 page manual is more than just instructions on running the simulator it may just be the best book on machine language ever written.

It's 30 demonstration programs you'll work through with the 6502 simulator, from simple register loads to advanced graphics programs.

The Visible Computer: 6502

Send me The Visible Computer: 6502 for Commodore 64 (requires disk drive). I've enclosed \$39.95 plus \$2.50 postage and handling.

SOFTWARE

Q: I recently reread your review of terminal programs for the C-64 in RUN's September 1984 issue. One of the programs you reviewed was Midwest Micro's Superterm, which can emulate a DEC VT-100. I have written Midwest Micro at two addresses, but both letters were returned with no forwarding address. Can you supply a current address or a copy of the manual?

> Stan Szyryj 903 N. Damen Ave. Chicago, IL 60622

A: Jim Rothwell, Midwest Micro's president, was at a trade show I attended last summer. At that time, he told me that the company is out of business and that their products were no longer available. I've included your full address in case another reader has a copy he or she no longer uses and is willing to sell to you.

PROGRAMMING

Q: I have written a useful program, but I have a problem with it. When I use the program, the computer freezes up for 10– 40 seconds, and then continues as if nothing had happened. I am confused as to why my computer is doing this.

> Stephen Ritchey New Carlisle, PA

A: The cause is "garbage collection," a procedure performed automatically and unpredictably by Basic itself. Its purpose is to reclaim memory space formerly used by dynamic strings your program no longer needs.

The culprits are strings stored in high memory, between the top of Basic's work space and the end of your Basic program lines. Two statements that put strings in this area are:

100 INPUT A\$

110 A\$ = "X" + "Y"

A common alternative statement is:

120 A\$ = "XY"

VIC and 64 owners can minimize garbage collection delays by replacing lines like 100 and 110 with lines like 120 whenever possible. Garbage collection delays have been nearly eliminated on other current Commodore models.

Q: I am writing a program and need it to start over, but it doesn't reread the data. Is there a way to reset all variables, strings, etc.? Also, can I reset the DIM statements so I won't get a Redimensioned Array error?

> James Soldi El Centro, CA

A: Basic provides at least two ways to do what you ask. One way is by using the Run command. We type it all the time, but many people don't realize you can include it within a program itself. You can even follow it with a line number from which you wish the program to begin running again.

Also, the CLR statement resets all the variables, including arrays. Most new programmers think the CLR key only erases the screen. However, Basic also provides a CLR statement that has nothing to do with the screen. It is called automatically by the Run command, but can also be used manually. Its purpose is to clear all variable pointers, including array pointers.

Q: Have any of your readers developed an easy way to skip lines between pages?

George Lovelace Lakeland, FL

A: Many printers recognize CHR\$ (12) as a command to skip immediately to the top of the next page. To use this feature, simply insert CHR\$(12) whenever you want to begin a new page.

Some Commodore printers require that you send a CHR\$(147) at the beginning of your printout to tell the printer it is at the top of a page and that it should automatically skip over the paper's perforations. You may then send a CHR\$(19) to eject the current page and turn off the automatic skip at the bottom of each page. You can even combine the two, send a CHR\$(147) immediately after CHR\$(19), to immediately turn paging back on for the next page. Q: I have written a Basic program that takes up most of my 64's memory. It gives me an Out of Memory error when run. Is there a way to obtain more memory to run my program?

Robby Guttman West Nyack, NY

A: Yes, there are several ways to fight Out of Memory errors. One way is to split your one large program into two or more smaller ones, and use the chain feature of the Load command to run them one after the other.

Another technique is to shorten your Basic program by deleting REM statements and spaces and use colons to combine Basic lines.

A third technique is to rewrite part of your program in machine language placed in the memory above or behind Basic itself. At least one company is also advertising a program that modifies Basic itself to make memory above address \$A000 available to Basic programs.

Q: The Commodore 64 Programmer's Reference Guide has a table of status values for the reserved variable ST. It is incomplete, as I once had an ST value of 66 when trying to read a disk file. What other status numbers are there?

> Henry Elwell Cleveland, NC

A: ST is actually a binary value, even though we read it in decimal. That means it can simultaneously show several different errors, each contributing part of the value of the error status number displayed by ST. To decode such ST values as 66 without learning more about binary, simply subtract from your ST value the largest number in the ST table that is less than or equal to your value. Your value includes the error listed next to that value. If there is a remainder, repeat the process on it until you have identified all errors.

In the example you cited, an ST value of 66 indicates 64, "End of File," with a remainder of 2, which in turn indicates "Time Out on Input." This combination could result from trying to read past the end of your file.

WANTED: OLD THINKER TOYS.

CW Communications, ComputerLand and The Computer Museum invite you to send in your early personal computers, software, and memorabilia — you could win a free trip to The Computer Museum in Boston

Your old, dusty "thinker toy" may now be ready to become a treasured museum piece. The Computer Museum in downtown Boston — an international museum dedicated entirely to computing — is searching for the very best and most unique relics of the personal computer revolution.

evolution of personal computers and a cata-

log highlighting the Museum's collections. If your submission is accepted for addition to the Museum collection, you will be invited to the grand opening of the exhibit and will receive a bound edition of

the catalog. If your item is selected as one of the five best "finds", you will also receive an all-expense-paid trip to Boston for the grand opening party.

So, get up to the attic, down to the cellar and into your closets, and tell us what you find! Call or write the Museum for an official entry form, or send a photo and description of your items by March 1, 1986

to: The Computer Museum, Personal Computer Competition, 300 Congress St., Museum Wharf, Boston, Massachusetts USA 02110, (617) 426-2800, Telex: 62792318.

The Computer Museum. The museum is es-

pecially looking for kit machines, proto-

types, programs, output, newsletters and memorabilia of early computing from

around the world. A selection of the finest items will be used to create an exhibit on the

> The Computer Museum

of

Computer-

are working together to bring

these early relics out of your attic and into the

collection

Land, CW Communications, and The Computer Museum

Entries will be judged on significance, rarity, date, completness and condition. Items particularly sought include pre-1980 machines, early serial numbers (get those number 1's out), machines made for purchase outside of North America (even modern machines are sought in this category); first releases of software such as first releases of operating systems, languages and mass-marketed and original applications; and pre-1980 photographs, newsletters, manuals and other records. The Computer Museum is a private non-profit educational institution. All donations are tax-deductible according to the provisions of the Internal Revenue Service. Thinker Toys is a registered trademark of George Murrow & Murrow Designs, Inc.

www.Commodore.ca May Not Reprint Without Remission

Here is the conclusion of the Software Buyer's Guide, which includes descriptions of over 200 programs. Part I appeared in the December 1985 issue.

This is Part II of the Software Buyer's Guide, which covers music and voice, personal productivity, telecommunications, tutorials and utilities. All programs in these categories may be used on the C-64 and on the C-128 in C-64 mode.

In each category, programs are listed alphabetically by program name, followed by a short description of the product, the current suggested retail price and the name of the manufacturer. To obtain more information on any product listed, consult the manufacturers' address list at the end of the guide and contact the manufacturer directly.

While RUN has tried to make this

list as comprehensive and accurate as possible, the information was derived from a questionnaire sent to the manufacturers, and we are therefore not responsible for any omissions or errors of fact contained herein.

Music & Voice

MIDI/4 Plus and MIDI/8

Both the four- and eight-channel recording programs feature autocorrect, punch in/out, fast forward/rewind, sequence chaining and sync to tape, MIDI and drum machines. \$99.95 (MIDI/4 Plus); \$149.95 (MIDI/8) Passport Music Software

Allegro

Allows you to create and modify music and incorporate it into your own programs; comes with a library of over 50 pre-programmed instruments. \$39.95 *Artworx Software Co., Inc.*

Bank Street MusicWriter

Beginners, amateurs and professionals can compose, play and print out music with this program. \$39.95 *Mindscape, Inc.*

Cantus, The Music Improviser

Invents its own music in threevoice improvisations. \$54 Algo-Rhythm Software

Casio CZ Patch Librarian Lets you see all the parameters

available on the Casio synthesizer; parameters can be altered and auditioned. \$65 Dr. T Music Software

Chord Power for Guitar

Displays and plays guitar chords. \$39.95 NewArts Co.

Christmas Carols

Sing-along program of 18 holiday songs; verses appear as music plays in three-part harmony. \$15.95

John Henry Software

Computer Hitware

A series of software packages that combine popular music with color graphics. \$19.95 each Passport Music Software

Dancing Feats

Allows you to perform simple pieces of music. \$29.95 Softsync, Inc.

Easy Speech

Allows your text-driven software to "talk"; used in conjunction with Voice Messenger program. \$24.95 Research in Speech Technology, Inc.

Keyboard Blues-MIDI

Presents simple blues chords; requires MID1 interface and synthesizer. \$79.95 Electronic Courseware Systems, Inc.

Keyboard Chord/ Scale Master

This is designed to enhance your keyboard abilities through sight and sound reinforcements of Chord and Scale Display modes, Chord and Scale Review modes and a Compare mode. \$39.95 Valhala Software

Keyboard Chords-MIDI

Presents qualities of simple chords; requires MIDI interface and synthesizer. \$79.95 *Electronic Courseware Systems, Inc.*

Keyboard Intervals—MIDI

Assists in the learning of major, minor, diminished and augmented intervals; requires MIDI interface and synthesizer. \$79.95 *Electronic Courseware Systems, Inc.*

Keyboard Jazz Harmonies—MIDI

Designed to teach chord symbols, seventh chord recognition and chord spelling; requires MIDI interface and synthesizer. \$79,95

Electronic Courseware Systems, Inc.

Keyboard Kapers-MIDI

Consists of three piano keyboard games; requires MIDI interface and synthesizer. \$39.95 *Electronic Courseware Systems, Inc.*

Keyboard Note Drill-MIDI

Designed to increase speed in identifying notes on bass and treble staves; requires MID1 interface and synthesizer. \$39.95 *Electronic Courseware Systems, Inc.*

Listen

Helps you to identify intervals, basic chords and seventh chords. \$29.95

Electronic Courseware Systems, Inc.

MacMusic

This music-composing program consists of a Macintosh-style user interface featuring menus and icons; includes ten hit songs. \$49.95

Passport Music Software

Master Composer

A full-featured synthesizer and music composition program. \$39.95

Access Software, Inc.

The Music Shop

Lets you write, edit, play and print out original compositions. \$44.95

Broderbund Software

MusicWare

A series of software packages that allows you to play, compose and print out music, using a Sequential synthesizer keyboard. Up to \$99 each

Sequential Circuits, Inc.

Party Songs

Sing-along favorite of 18 party songs; verses appear as music plays in three-part harmony, \$15.95

John Henry Software

RhythmMaster

Helps you develop your musical rhythm skills. \$39.95 Melodian, Inc.

www.Commodore.ca

May Not Reprint Without Permission

Songwriter

"Word processor" for music; learn basics of music composition. \$39.95 Scarborough Systems, Inc.

Super Challenger-MIDI

Audiovisual game designed to increase tonal memory of a series of pitches; requires MIDI interface and synthesizer. \$39.95 *Electronic Courseware Systems, Inc.*

Virtuoso

Play or write music of up to 40 pages in length, with lyrics; staff and keyboard music representations. \$20 *TCO Software*

100 00jiwar

Virtuoso +

Same as Virtuoso, but also prints music scores and lyrics. \$29.95 TCO Software

Personal Productivity

IMSI Home Library Series

InfoManager (record management system), 4-Point Drawing Pad (graphics sketch program) and Electronic Address Book (maintains a file of your personal contacts). \$39.95 each *Prentice-Hall*

NB DB

This database program features print and screen-dump options, a search capability and variable line spacing. \$25 NM ジ PP Enterprises

PFS: File

This database allows you to create your own file and store and retrieve information. \$79.95 Software Publishing Corp.

PFS: Report

Sorts, calculates, formats and prints summary tables from files created with PFS: File. \$69.95 Software Publishing Corp.

XPER

Guides you through complex decision-making criteria. \$59.95 *Abacus Software*

XREF-64

Cross-references all variables, constants and line numbers and sorts them alphabetically. \$17.95 *Abacus Software*

Brain Booster

Develops reasoning by visual analogy the skills that are tested on IQ tests and used to determine entrance to gifted programs. \$29.95 *Trillium Press, Inc.*

Brown Bag

Contains a word processor and database program; features merging of text and data and a search-and-replace option. \$49.95 Software Resource Group

Busidata

Allows you to create files with up to 20 fields per record and up to 70 characters per field. \$49.95 Skyles Electric Works

Sujtes Electric Hon

Calc Now!

This spreadsheet has a capacity of up to 64 columns by 254 rows and 39K of free memory for data. \$39.95 *Cardco, Inc.*

Caraco, Inc.

Calc Result Advanced

Thirty-two-page spreadsheet, with built-in help screens. \$79.95 Handic Software

CalKit

A simplified spreadsheet package designed for home and small-business use. \$49.95 *Batteries Included*

Chartpak-64

Prints out professional-quality charts and graphs; eight chart formats; two sizes of hard copy; accepts data from Multiplan, CalcResult; supports statistical functions. \$39.95 *Abacus Software*

Compufile

Data management program. \$29.95

(ABS)olute Software

The Consultant

Allows you to create records of up to nine screen pages with 877 characters each. \$99.95 *Batteries Included*

Creative Problem Solving

Evaluates personal, financial and business problems by weighting your input; ranks information suggesting best solution; produces hard copy. \$29.95 *Harvsoft*

Cut & Paste

Easy-to-learn word processor; includes document disk and reference card. \$50 *Electronic Arts*

Daily Reminder

A year-round notebook and appointment calendar for home or office; features daily printouts. \$39.95 International Computer

Products

Data Base

Creates name and address files, formats for inventory control, mailing lists. \$74.95 Handic Software

Data Manager 2

Provides you with an instant statistical analysis of your files. \$49.95

Timeworks, Inc.

Datamat-64

Data management package uses menu selections; free-form design; 50 fields per record, 2000 records per disk; sort on multiple fields in any combination. \$39.95

Abacus Software

Disk Management System Catalogues your software and protects it from unauthorized

users. \$34.95 Cursor Products

Fab Business

Invoice packing list/label generator; uses plain paper or commercial forms. \$39.95 *Fabtronics*

Fab-Mail

A mailing list program with emphasis on custom labels utilizing Star and similar printing abilities. \$19.95 Fabtronics

The File Converter

Transfers text files or database files from one word processor or database program to another; program, user, sequential or relative files. \$39,95

Applied Technologies, Inc.

Flex File

Allows you to create files with up to 20 fields per record and up to 70 characters per field. \$59.95

Cardinal Software

Flexfile 2.1

Stores thousands of records with 20 or more information fields; sorts, calculates report totals, merges with popular word processors and prints and labels reports. \$59.95 *Cardinal Software*

RUN JANUARY 1986 / 127

Grade Organizer

Stores names and grades of up to 40 students in each of six classes; prints interim and final reports. \$39.95 *Cardinal Software*

The Home Cataloger

A database that features automatic totaling of numeric fields, multiple searches and sorts and one-key command entry, includes ten predesigned record formats. \$49.95

Arrays, Inc./ Continental Software

HomePak

Word processing, information management and telecommunications package; manual included. \$49.95 Batteries Included

Homeword

A word processor that includes an audio cassette with a tutorial on how to use the program. \$69.95 Sierra On-Line

Homework Helper Helps adult or child organize school-related activities. \$39.95 Navarone Industries, Inc.

Index Card Writer

Writes form letters on tractorfeed index cards; uses Mail Pac I program to address reverse side of card. \$29.95

H&E Computronics, Inc.

Intelligent Software Package

Twenty-five home and small-business programs; includes word processor, database and spreadsheet. \$29.95

Intelligent Software

Kid Pro Quo

Illustrated word processor for children; kids can write text, draw, paint, animate and compose music; for ages 8–14. \$29.95 Softsync, Inc.

Mail Pac I

Prints names and addresses in either list form or on one-across mailing labels. \$29.95 H&E Computronics, Inc.

MasterType's Filer

Helps you catalog valuables and maintain address list. \$39.95 Scarborough Systems, Inc.

MasterType's Writer

This word processor uses color highlighting and dual windows. \$39,95

Scarborough Systems, Inc. Name Pro

Database for names, addresses, phone numbers, notes, etc.; prints personal little black book. \$35 Computer Management Corp.

The New Consultant Update

Includes 80-column report space; on-screen help files; enhanced label functions; report systems allowing multiple files and ten predefined templates for mail lists, inventory, recipes and budgets. \$79.95 Batteries Included

PaperClip

A professional word processor that allows you to make backup copies of the program. \$89.95 *Batteries Included*

Peace of Mind

Includes four programs: Home Inventory, Credit Card Guardian, Private Messages and Vital Statistics, \$19.95

Spectrum 1 Network

The Personal Check

Register Keeps track of all deposits and outstanding checks. \$29.95 H&E Computronics, Inc.

Power Plan-64

This spreadsheet includes builtin graphics to display data in chart format; 90 help screens for guidance; includes 200-page handbook. \$49.95 *Abacus Software*

Pro-Data

Create unique screen formats with few restrictions, \$39.95 Nanosec Corp.

Ouickwriter III

Word processor with advanced features. \$19.95 Educomp

Ramstar Filing System

Designed for first-time users for the home and small business. \$35 Ramstar Consultants

The Shopping Manager System

Prints out a shopping list customized to your local supermarket, from a 1300-item database of common grocery items. \$31.45 Serendipity Software

Star*Script

Utilizes 80-column horizontal scrolling format. \$14.95 *Tri Micro*

The Starter Kit

Ten programs for the home user; includes word processor, mailing list, music graphics games and programming tutorials. \$19.95 *Kastel Technology*

SwiftSoft

Contains a spreadsheet and a series of home-organizer packages. \$29.95

Cosmi, Inc.

Team-Mate

An integrated word processor, database, spreadsheet and hi-res graphics package. \$49.95 *Tri Micro*

Telephone Directory

Stores and recalls telephone numbers, including address information; records can be printed out. \$49.95 *H&E Computronics, Inc.*

Textomat-64

Word processor displays 40 or 80 columns, with horizontal scrolling, moves from editing to formatting to merging to utilities; supports any printer. \$39.95 *Abacus Software*

Transogram Writer

Prints messages on outside of Transogram envelopes and prints carbon copy on inside. \$29.95

H&E Computronics, Inc.

Trio

Integrated word processor, spreadsheet and database; includes Help windows. \$49.95 Softsync, Inc.

Vizastar 64

An integrated software package that offers spreadsheet, database and graphics programs. \$120 Solid State Software

The Whole Bit

Menu-driven word processor, with 80-column view, custom-tailored print commands, global search and replace, file merge and chain-print file copies; manual included. \$39.95 *Applied Technologies, Inc.*

The Whole Bit

Same as previous program, except the manual is on disk and can be printed out, if desired. \$24.95

Applied Technologies, Inc.

Word Writer

This word processor comes with two keyboard overlays. \$49.95 *Timeworks, Inc.*

The Works!

This productivity package includes Graphics Painter, Typing Teacher, Music Composer, Letter Writer, Stock Portfolio and others. \$49.95 *First Star Software, Inc.*

Write File

An integrated word processor and database. \$29.95 *Tri Micro*

Your Home Office

An integrated word processor and electronic spreadsheet. \$29.95 Tri Micro

Telecommunications

VIP Terminal XL

Replaces the VIP Terminal; transfers files to and from many information services. \$39.95 Softlaw Corp.

Dow Jones News/Retrieval

Offers financial and investment news, shopping, airline scheduling and MCI Mail services. \$75 registration fee *Dow Jones News/Retrieval*

People/Link

Provides entertainment and socializing activities for its members. \$30 sign-up fee American People/Link

PlayNet

National telecommunications and entertainment network; features E-Mail, BBS, file transfer, games. \$39.95 *PlayNet, Inc.*

QuantumLink

Telecommunications package gives subscribers access to news, education, entertainment, other QuantumLink users, shopping, customer service and information on Commodore computers. \$9.95 per month Quantum Computer Services, Inc.

Rockney Work Station

Communications software providing on-line printing, file uploading/downloading and XModem. \$49.95 Rockney Software

Sixth Sense

Gather and dispense information automatically and originate call to, as well as answer calls from, remote computers. \$89.95 *Microtechnic Solutions, Inc.*

Telemessage

A bulletin-board system software package that you can tailor to meet your own needs. \$79.50 *Tailored Solutions*

Viewtron

Receive up-to-the-minute news, weather forecasts, continuous sports scores, current stock prices and access to an up-todate encyclopedia. The Viewtron Software Starter Kit is \$9.95 Viewdata Corp. of America

Tutorials

ADA Training Course

Teaches the ADA language; includes editor, syntax checker, compiler, assembler, disassembler and handbook. \$39.95 *Abacus Software*

Basic Lightning, Machine Lightning and White Lightning

This series is designed to aid in the development of professionalquality games. \$40 each *Oasis Software*

Beginning Basic On the C-64

Includes over 30 ready-to-run programs that feature games, personal finance, record keeping, music and educational software. \$19.95

Alfred Publishing Co., Inc.

Clarinet Master

Comprehensive, self-paced tutorial with exercises and scales; includes lessons, \$49.95 *MasterSoft*

CodePro-64

Provides advanced programming instructions, including tutorials in Basic, a sprite generator and demonstrator and a music generator and demonstrator. \$59.95 *Systems Management Associates*

Compubridge

A bridge tutorial program that evaluates your actions, corrects mistakes or weak moves and suggests alternative strategies. \$24.95

Artworx Software Co., Inc.

Computer Preparation For the SAT

Tutorial passages and practice material; includes four fulllength practice exams. \$79.97 *Harcourt Brace Jovanovich, Inc.*

Constellations I

An astronomy tutorial designed to teach you about the stars. \$14.95

Morcon the Wizard Software

Dungeon Doom Typing Game

This arcade typing game provides drill in typing skills and includes a student management system. \$39.95; \$54.95 with backup disk *Gameo Industries, Inc.*

Easy Guitar

Beginning and intermediate guitar lessons; uses sound and graphics as teaching aids. \$29.95 DJ Software

Easy Tutor

Ten lesson plans for the beginner in Basic; includes assignments with explanations in subsequent lessons. \$14.95 *Tri Micro*

Everything You Can Do With Your C-64

Includes word processing, education, graphics; no programming required; features product reviews. \$19.95 Alfred Publishing Co., Inc.

Flute Master

Comprehensive, self-paced tutorial, with exercises and scales; includes lessons. \$49.95 *MasterSoft*

International Morse Code Trainer

For beginners or those wishing to increase their code speed (1– 25 wpm). \$19.95 AC3L Software

Keyboard Cadet

Teaches touch-typing and keyboarding skills; 3-D graphics. \$39.95 Mindscape, Inc.

Keyboard Chord/ Scale Master

Educational music package designed to enhance your keyboard abilities through sight-and-sound recognition of chords and scales. \$39.95

Valhala Software Keys to Typing

Thirty-two step-by-step typing lessons; manual included. \$39.95 Batteries Included

Learning Guitar Overnight

Teaches basic chord recognition. \$39.95 Chipware

Learn to Type

Aims to familiarize you with the typewriter and computer keyboards; for all ages. \$39.95 Arrays, Inc./ Continental Software

Mastering the SAT

Combines skill-building and practice-testing; developed in cooperation with the National Association of Secondary School Principals. \$79.95 CBS Software

MasterType's Writing Wizard

Designed for ages eight and up; features dual windows and multiple typefaces. \$79.95 *Scarborough Systems, Inc.*

Morse Coach

A complete Morse code tutor in a plug-in cartridge. \$49.95 *Microlog Corp*.

Musical Computer I and II

Introduces the basic fundamentals of music, including reading notes, understanding rhythm and reading signs and symbols. \$34.95 *Computer Applications*

Tomorrow

New Improved MasterType

This version adds new fingering chart and greater flexibility. \$39.95

Scarborough Systems, Inc.

The Perfect Score

Includes tutorials and practice on the principal types of questions on the verbal section of the SAT, verbal and math SAT practice test and a practice Test of Standard Written English. \$69.95 *Mindscape, Inc.*

Preparing for the SAT

Covers quantitative comparisons, antonyms and word analogies. \$69.95

Program Design, Inc.

The Professor

Designed to familiarize you with all the basic functions of the C-64. \$34.95

Progressive Peripherals & Software, Inc.

Smart Start

Provides access to the computing potential of your Commodore. \$39.95

Muse Software

State Driver's Test Study Guide

Prepares you for the motor-vehicle operator's test; covers safety tips, meanings of signs and rules of the road. \$44.95 *Sunset Software*

The Training Kit

An interactive, graphics simulation program that teaches you computer operation. \$22.95 *Kastel Technology*

Trumpet Master

Comprehensive, self-paced tutorial, with exercises and scales; includes lessons. \$49.95 *MasterSoft*

Type for Your Life

This typing teacher builds speed through practice and allows you to add your own text. \$14.95 *Apropos Technology*

Typing

Employs an arcade-style reward game to motivate students to practice their typing lessons, \$39.95

Gamco Industries, Inc.

Typing Tutor III

Touch-typing instruction program. \$34.95 Simon & Schuster

Electronic Publishing Group

The Visible Computer

Machine language teaching system; includes 150-page manual. \$39.95

Software Masters

Welcome Aboard

This tutorial uses Muppets characters to teach novices (both children and adults) in the use of their computers. \$24.95 Broderbund Software

Utilities

19-Disk Set

The first 19 Comal disks, all for Comal 0.14. \$94.05 Comal User's Group U.S.A., Ltd.

1541 Disk Drive Alignment Program, Version 2.0

A two-disk program and calibration package that allows you to align your disk drive. \$44.95 CSM Software, Inc.

1541 Disk Manager

Keeps your disks in order, sends most disk commands, copies files, backs up disks, performs multiple file-scratching and displays the load addresses of hidden machine language files. \$12 *Tidal Bore Software*

1541 Physical Exam

Detects disk drive misalignment in its early stages. \$39.95 Cardinal Software

ABL-64

Reloads and runs a program in the event of a power failure. \$39.95

Input Systems

CBUS

A cartridge backup system that lets you copy cartridges to disk. \$99.95

R.J. Brachman Associates, Inc.

C Language Compiler

Includes compiler (6510 code), editor (41K source file), library and linker. \$79.95 *Abacus Software*

MW-615 Data Logging Program

Records analog inputs from MW-611/311 universal I/O board. \$95 *Micro R&D, Inc.*

PTD-6510 Symbolic Debugger

A debugging aid for assembly language programs. \$49.95 Schnedler Systems

Achiever

Provides menu-driven commands designed to simplify disk drive operations. \$29.95 Software Intelligence Corp.

Advanced Kyan Pascal

Offers enhanced graphics, string handling and random-access files; runs 30 times faster than Basic. \$69.95 Kyan Software

Apsoft-64

Applesoft Basic for the C-64 computer. \$39.95 FS! Software

Assembler/Monitor-64

Supports all standard functions, plus floating-point constants; monitor supports bank switching, quick trace and single step. \$39.95

Abacus Software

Basic Compiler 64

Compiles complete Basic language into 6510 machine language or compact speedcode or both. \$39.95

Abacus Software

Basic-Tool 64

Expanded Basic command set, offering screen management utilities, hi-res graphics commands, data acquisition routines and editing utilities and a joystick management routine. \$19.95 Tri Micro

Best of Comal

A double-sided disk featuring the best Comal 0.14 programs from 1984. \$14.95 Comal User's Group U.S.A., Ltd.

Bits and Pieces

Disk utilities; sector copy, screendump hi-res graphics to any selected memory locations; multicolor sprite maker; track and sector error check. \$29.95 Applied Technologies, Inc.

Bricks Tutorials

An interactive beginner's learning system; this is an expanded version of the Tutorial Disk. \$14.95 Comal User's Group

U.S.A., Ltd.

Cartridge Backer

Allows you to make disk-based archival copies of most commercial cartridges; includes expansion board and manual. \$54.95 *CSM Software, Inc.*

Clone Machine

File backup and utility package. \$49.95

Micro-W Distributing, Inc.

Clone XL

Nibble copy programs, plus 30 other utilities. \$24.95 Educomp

Comal 2.0 Deluxe

Cartridge Pak 64K Comal system on a plug-in cartridge; includes two books and five disks. \$89.95 Comal User's Group U.S.A., Ltd.

Comal Startup Special

Includes Comal 0.14 system, Tutorial Disk, Auto Run Demo Disk with 26 programs and reference book. \$11 Comal User's Group U.S.A., Ltd.

Copy II 64

For archival backup of protected software, \$39.95 Central Point Software

. . .

Copy-Q Copy program. \$39.95 QR&D

Diagnose 64

A diagnostic cartridge that tests the functioning of 16 different ICs, including RAM and SID chips, color RAM and color ROM, and ports; pinpoints bad RAM chip when video doesn't work. \$169 Micro Doctor

Maro Doctor

Disk Nibbler

This disk nibbler copies all software, \$39.95 Ultrabyte

Disk Organizer

Includes faster backup, disk copy, directory sort, backup marker; prints out a listing of all programs contained on disks. \$24.95

Cardinal Software

ditto

Copies disks automatically; supports one or two 1541 disk drives; completely menu-driven. \$39.95

Cardinal Software

Fast Load

This cartridge-based disk utility speeds up many disk drive operations. \$39.95 *Epyx, Inc.*

The Font Factory

A printer utility program that reads any standard Commodore 1541 ASCII sequential file; it automatically formats and prints your document in any font desired. \$29.95

Micro-W Distributing, Inc.

Forth-64 Language

Supports hi-res graphics and sound synthesizer; full-screen editor, programming tools, assembler, samples and handbook. \$39.95

Abacus Software

Freedom-Assembler/ Monitor

This cartridge-based assembler is written in 1005 P machine code and is quickly activated with one command. \$39.95 Hughes Associates

Hard Copy

Screen dump utility. \$29.95 FS! Software

Help Master 64

Aids Basic programmers with Basic commands used by the C-64. \$24.95 Master Software

Mach 5

Loads disk-based programs at a faster rate of speed, adds 4K of memory to Basic and is 100% transparent. \$34.95 Access Software

The Machine Shop

A machine language development system. \$40 FS! Software

Maple

Music Applications Programming Language Extension utility program simplifies programming of sound and music notation. \$125

Electronic Courseware Systems, Inc.

MicolMon

Interfaces the programmer with the machine code in his or her computer. \$24.95 *Micol Systems*

Mr. Nibble

A full-disk, byte-for-byte nibbler; versions available for 1541 and MSD disk drives. \$49.95 *Full Circle Software, Inc.*

Nibble Notch I and Disk Surgeon Combo Package The Disk Surgeon disk utility

reads data from, edits and writes to, disk; includes the Nibbler Notch I disk tool. \$34.95 Nibble Notch Computer Products

Pascal-64

Provides a full compiler that supports a complete range of standard Pascal features. \$39 *Abacus Software*

Peek A Byte 64

A disk and memory utility that features a tract/sector and computer memory display and an editor with cursor control, allowing you to examine and modify disk sector data. \$29.95 Quantum Software

Peek A Byte 64, Version 2.0

A disk tract/sector editor, with read/write data under DOS header errors, fast format and erase with DOS errors; includes Disk Mechanic. \$35 Quantum Software

Pilot II

A Pilot-language interpreter with hi-res turtle graphics and full sprite support; includes full telephone support. \$40 EasyWare

Plus Extra

Utility package that offers sorting up to 60 times faster for database files; includes backup routine. \$14.97 *Tri Micro*

Power 64

This is a programming utility that features automatic line numbering, a command to dump active Basic variables, a Renumber command, a trace feature for program debugging and a Why command that helps you locate the specific cause of a program error, \$40.95

Pro-Line Software

Power Plus

Adds 40 commands to printer, including Unnew and Screendump. \$19.95 Educomp

Pro-Compiler

Skips the generation of P-code and, instead, compiles your Basic program directly into machine code. \$99 *Nanosec*

Promal

Features the ability to redirect input and output. \$49.99 Systems Management Associates

Quickcopy, Version 2.0

Copies entire disk in 2½ minutes on two 1541s or 3½ minutes on one 1541, \$19.95 Abacus Software

Rockney Disk Utilities

Provides backup and recovery of disk files. \$24.95 *Rockney Software*

Safeguard 64 Disks

Prevents unauthorized duplication of programs. \$1-\$5.50 each *Glenco Engineering, Inc.*

Screendump

Character dump of the screen; machine language allows for fast printer speed. \$19.95 Cardinal Software

Simple IF Demo Disk

Eight programs demonstrating ease of use of Simple Interface System. \$9.95 *Proteus Electronics, Inc.*

S'more

Allows you to use over 60K of RAM for Basic programming; can also be used for arrays and variables. \$69.95 *Cardco, Inc.*

Snapshot

This screen-dump utility program produces quarter- and fullpage printouts and reversed pictures. \$24.95

Computer Revelations, Inc.

Super C C language compiler development system. \$79.95 Abacus Software

Super Pascal

A development system that includes a compiler, source file editor, utility package and an assembler for coding in machine language routines. \$59.95 *Abacus Software*

Symbol Master

Multi-pass symbolic disassembler; allows you to see overall structure of program; generates source code files to disk for many assemblers. \$49.95 Schnedler Systems

System M2000

Macro Assembler package includes text editor and machine language monitor. \$59.95 *Micol Systems*

Ultrabyte Disk Nibbler

Uses proprietary revision of disk operating system to make a bitby-bit copy; copies the format, data and errors. \$39.95 Nibble Notch Computer Products

Utilities Disks

Includes six programs: C-64 Type-Right, a word processor; C-64 Typing Tutor; Finance; Super Budget; Super Checkbook and Sales/Expense. \$14.95 RAK Electronics

Utility File

Meter-reading data processing program displays, stores and calculates, including daily averages and cost projections. \$27.95 *Fabtronics*

Video Basic-64

Add over 50 graphics, sound and utility commands to your programs. \$39.95 *Abacus Software*

Windows

Features individual window color controls, window move commands, independent window scrolling and an unlimited number of windows. \$24.95 St. Mars Systems

Compiled by SUSAN TANONA

tically on the unit. This makes a compact threesome and provides an easy angle from which you can insert and remove cartridges.

The board itself protrudes about six inches out of the back of your C-64; this takes up a lot of desk space. Also, if you are using a bulky cartridge (such as an MSD IEEE interface), you probably won't want to use this expander board. It would be too risky having an oversized cartridge that protrudes straight up. For most people, however, this is no problem, because most software cartridges are quite small.

The Navarone Cartridge Expander is a versatile and worthwhile product that will prolong the life of your computer, as well as save you valuable time. If you use cartridges often, this would be a wise investment. (Navarone Industries, 510 Lawrence Expressway. #800, Sunnyvale, CA 94086. C-64/ \$24.95.)

HomeWriter 10

A Dot-Matrix, Commodore-Compatible Printer from Epson

It seems that for as long as there have been computers, there have been Epson printers. Entrenched in the offices of businesses everywhere, many have come to rely on Epson's quality, durability and reliability. For these and other reasons, Epson printers are often the standard by which all printers are judged. Unfortunately, the HomeWriter 10 does not live up to the Epson standard. Although many of its features make it seem like a great printer, it also has its share of drawbacks.

With its off-white, streamlined styling, this is a good-looking printer. When you buy the HomeWriter 10, you must also buy the custom PIC (printer interface cartridge) in order to connect the printer to your Commodore. With the interface, you receive the 34-page manual necessary to operate the printer. The interface works very well in emulating a Commodore printer, including successful graphics screen-dump printing (an area of Commodore emulation that many printers have difficulty with).

The HomeWriter 10 offers seven modes of printing: draft, NLQ (nearletter quality), expanded, reversed, compressed, emphasized and double-strike. Like the Commodore computer, the printer can form either upper-/lowercase or uppercase/graphics characters. The HomeWriter 10 can recreate all of Commodore's keyboard graphics.

Other features include 60×72 dots-per-inch graphics, page-length settings of 11 or 12 inches and a paper-ending signal. The printer uses friction-feed; you can also purchase a tractor-feed unit (\$39.95) or cut-sheet feeder (\$99.95). In the bidirectional printing mode (only in Draft mode), the print speed is a slow 100 cps; the print speed is a crawling 16 cps in the NLQ mode.

With so many features and the Epson name behind it, you would expect that the HomeWriter 10 would be a high-quality printer. Unfortunately, that is not the case. This

Cartridge Expander

Here's a Three-Slot Expander for a More Versatile C-64

Navarone Industries is one of several companies producing cartridge expanders for the C-64. A cartridge expander lets you keep more than one cartridge plugged into your C-64 at the same time, relieving the wear and tear on your computer's cartridge port from plugging and unplugging cartridges.

Navarone's cartridge expander is one of the more versatile expanders on the market. Its hardware features give you complete control over your most-used cartridges.

It can accommodate up to three cartridges, which can be any combination of software, interface or other cartridge-port hardware. This cartridge expander also has a reset button for restarting your computer without actually having to turn off the computer's power.

A very important feature, which sets this expansion board apart from others, is a selector switch that allows you to designate which of the three slots you want activated. This ensures that you can keep three cartridges in place all the time. Even with the power on, you can change the active cartridge slot by simply flipping the selector switch and then pressing the reset button. The computer will reset and re-boot the appropriate program.

The cartridge slots are situated ver-

Hardware Gallery

printer appears to be Epson's bid for the low-end, high-volume market. Aiming the printer at the home market, Epson seems to assume that home users don't need a sturdy, dependable printer.

The HomeWriter 10 is not very well built, especially considering its price. I found the print in the Draft mode to be of poor quality, and not much better in the NLQ mode. The friction-feed slips, and I think when it comes time to replace the ribbon cassettes, they are going to be difficult to find.

Although this printer offers many features and Commodore-1525 compatibility, its limitations make it somewhat overpriced. If you are looking for a speedy, solidly built printer, you may want to consider Epson's RX- or FXmodel printers instead. (Epson America, 2780 Lomita Blvd., Torrance, CA 90505. Printer, \$269; printer interface cartridge, \$60.)

THE MAIL RUN

Checksum for Old Programs

I have enjoyed your publication *ab initio*. Your checksum programs are especially welcome. Long sessions of typing that result in malfunctioning programs due to incorrect entry can now be avoided. This encourages me (and probably many readers) to again type in the longer programs.

Please consider publishing checksums for your previously published programs. This would enable us to finally reap the rewards of the heretofore wasted hours and would be greatly appreciated.

Finally, I would like to commend you for the excellent Datafile database series.

R. Martin Reiley Bedford, PA

I would like to suggest or have you explore the possibilities of providing the checksum values of previously published programs. These could be published in coming issues of *RUN* or in your yearly Special Issue. The alternative would be to release a supplement that could be purchased at a nominal cost to your readers.

Floyd L. Parks, Jr. Buffalo, NY

I am 12 years old and think that the Turtle Graphics that accompany Richard Holleran's article, "A High-Performance Turtle" (*RUN*, July 1985) sound really neat. I tried to type them in, but kept making errors, so I finally gave up.

in Mark Jordan's Sprite Artist program ("High-Spirited Sprites," *RUN*, October 1985). I now never need to hesitate starting another great program from *RUN*.

I am hoping that you will consider publishing the checksum for "A High-Performance Turtle."

Also, keep up the good work on utilities and Basic extensions such as Basic 4.5 and turtle graphics—they're great.

> Zoltan Hunt Ontario, Canada

Beginning next month, RUN will provide checksums for those programs that appeared in the magazine from January through August 1985. We hope this will enable our readers to enter and use those valuable programs.

Editors

Beware of Disk ID Change

In regard to Magic trick \$220 in your July 1985 issue: A word of caution should be issued about changing the cosmetic ID on track 18, sector 0. It appears that the potential problem of the DOS overwriting programs when swapping disks with identical IDs remains because of the following facts.

When the DOS formats a new disk, a block header and data header are written to each sector. The ID entered when formatting the disk is written to the header block of each sector and never *written* to again. During a "SEAK" (\$F3B1 in ROM), the header-block ID, and *not* that of track 18/sector 0, is copied to \$12 and \$13 of drive RAM as the reference "Master ID" of the current disk after initialization. Thus, if the Master IDs are identical and those of 18/0 are different, the DOS sees two identical disks and *scrunch*—gnarled programs! Therefore, cosmetic ID changes are potentially dangerous.

> Jack Boxer, M.D. Vancouver, BC Canada

Rescue Fund

As a follow-up to your article, "Commodore to the Rescue" (*RUN*, October 1985), I would like to inform your readers of David's Directory Designer, which allows you to redesign a disk's directory. This program, which I wrote, is being "sold" by the Catalina Commodore Computer Club for a tax-deductible donation of \$15. All proceeds go to the Search and Rescue Fund, which has been set up to buy needed computing equipment. None of the money goes to me or any other individual.

If any of your readers are interested in obtaining DDD, they should contact the Catalina Commodore Computer Club at 201Z Avenida Guillermo, Tucson, AZ 85710.

> David Lovelock Tucson, AZ

A Call to Readers

This page is your stage, so stand up and say a few words. Extend praise, air grievances or offer handson advice and information.

Send your letters to Mail RUN, 80 Pine St., Peterborough, NH 03458.

BACK ISSUES

January 1985-Create Your Own Games, How to select the right printer. Valuable disk tips for beginners

February 1985-Joysticks: which ones to buy and how to use them in your own programs. Learn how to start a Commodore user's group. Fly the Grand Canyon with your VIC.

March 1985-Shape Up with Your C-64: reviews of fitness and nutrition programs. Mini-Calc spreadsheet and Money Manager programs. Word processors reviewed.

April 1985-First installment of assembly language series. Favy to use scroll subroutine. Simon's Basic, Build your own computer sanctuary.

May 1985-First-hand look at the new C128. Keep track of your electricity expenses. Introducing a new series on tele communications. Datafile Update.

June 1985-Making music on the C61. Comparative reiew of the C.128. Prescriptions for your disks problems. Jurn your C61's eight function keys into 12.

July 1985-High-Performance Turtle, Datafile East Print. our drive's motor speed. Align your disk drive. Basic 1.5.

August 1985-Two articles on the 1511 disk drive. PlayNet and PeoplefLink Byte-Size Compiler, C-61 Screen Formatter.

September 1985-Meet the Amiga. Interview with Commodore's Manager of Educational Marketing. Reviews of SAT Programs. RUN's checksum program.

October 1985-Hi res drawing program. Sprite editor F.Mail Terminal. Combine creative designs with serious applications and text.

November 1985-Print both low and high resolution screens, Datafile Restructure Unlity, Hardware Buyer's Guide Eliminate your Data statement errors. Create your own tailored wedge

December 1985-Comparative review of popular mo dems. Part 1 of a professional-quality terminal program. Machine language checksum program. C-128 checksum program. Datafile Structure Utility, Software Buyer's Guide, Part 1

Each month RUN also brings you regular columns. reviews, programs and tutorials to help you get the most enjoyment and use out of your Commodore system

Each back issue costs \$3.50 plus \$1 for shipping and handling. On orders of 10 or more back issues, there is a flat \$7.50 shipping and handling fee. Quantities are limited and we cannot guarantee that all back issues are available. Send your orders to RUN, Attn: Back Issue Orders, 80 Pine St., Peterborough, N.H. 03458

NEW PRODUCTS RUNDOWN

Compiled by HAROLD R. BJORNSEN

Four from Free Spirit

la la

Q

Free Spirit Software (5836 S. Mozart, Chicago, IL 60629) introduces four new software products on disk for the C-64.

Technique! is a guide to programming graphics, animation, sound and music and includes 12 songs and an arcade game for \$29.95.

Basically Simple explains all commands and operators for the C-64 and teaches Basic programming. It's available for \$20.

Postmaster is a \$19.95 mailing list program that prints mailing labels, sorts addresses alphabetically and by zip code, stores phone numbers and recalls names and social security numbers.

Italy is a travel, adventure and educational game that includes instructions in Italian and familiar Italian melodies for background music. The package is available for \$15.

Check Reader Service number 400.

Business Pro-Pak

Business Pro-Pak, a new product from SourceView Software International (835 Castro St., Martinez, CA 94553), is a business statistics package for the C-128 (in CP/M mode).

Four different functions are performed: the first function calculates arithmetic averaging, regression analysis, exponential smoothing and futures analysis; the second function determines the economic order quantity for a given situation; the third function includes LIFO and FIFO inventory analysis; and the last function provides many vital business utilities, including amortization scheduling, a perpetual calendar, present value of a future sum and pricing merchandise to achieve a desired profit margin.

Business Pro-Pak is available on disk for \$99.

Check Reader Service number 404.

PaperClip for the C-128

Batteries Included (30 Mural St., Richmond Hill, Ontario, Canada L4B 1B5) has released the PaperClip word processing program for the C-128. The new version has all the same features and capabilities of the C-64 version, plus new enhancements to take advantage of the C-128's hardware advances, such as: faster processing speed, easier operation and automatic startup, and its document size is expandable to 999 lines of text. Also, the screen will hold up to 160 columns of readable print without scrolling and will preview up to 250 columns without scrolling.

The C-128 PaperClip/C-64 Paper-Clip dual pack is available on disk for \$89.95.

Check Reader Service number 402.

C-64 DMS

The Disk Management System includes three programs for the C-64 and 1541 disk drive.

The Utilities program allows you to list the directory on screen while executing disk commands; the Protection program features block-byblock data encryption, which ensures the secrecy of your confidential files; and the Cataloging program allows for easy creation and maintenance of your library database. These three programs have been combined into one menu-driven system, which is available for \$34.95 from Cursor Products, RR 71, Box 1858, Camdenton, MO 65020.

Check Reader Service number 401.

It's Coming!

CometWatch contains three programs to calculate orbits and the exact location of Halley's comet, for any date, time and location on earth, and also includes information on the physics of comets and how to observe and photograph them.

The package provides the history of Halley's comet and gives details of its 1985–1986 return. The program's main menu allows you to select activities and do orbit plotting and position calculations.

CometWatch is available on disk for the C-64 at \$29.95. Zephyr Services, 306 S. Homewood Ave., Pittsburgh, PA 15208.

Check Reader Service number 403.

Fleet System 2

Fleet System 2 (Professional Software, 51 Fremont St., Needham, MA 02194) is a word processor that takes full advantage of the C-128's 80-column mode, expanded memory and RGB color monitor capabilities. A fully integrated 90,000-word spelling checker included in the package checks your document in 60 seconds. In addition, you may add over 15,000 words and terms to the program's dictionary to meet your needs. The Printer Preview option lets you see in 80 columns what your document will look like prior to printing. It also

Rew Products **RUN**down

allows horizontal scrolling of up to 120 columns.

On the C·64, Fleet System 2 provides full horizontal scrolling for input of text in 40, 80 and 120 columns. Available on disk for \$79.95.

Check Reader Service number 405.

Investment Package

The Personal Portfolio Manager, a comprehensive software package for managing investments in stocks and bonds, is available for C-64 owners who want to organize their portfolios.

PPM allows you to manage stocks, bonds, mutual funds and treasury bills; record taxable or non-taxable dividends or interest income; reconcile each brokerage account cash balance with YTD transactions; produce reports for your analysis; and enter quotes manually or automatically through DJN/R or Warner. It is available on disk for \$39.95. Abacus Software, 2201 Kalamazoo SE, PO Box 7211, Grand Rapids, MI 49510.

Check Reader Service number 406.

C-128 Cable

Knight Software (Central Village, CT 06332) makes available to C-128 owners a cable that allows you to set a full 80-column monochrome display on most monochrome and composite monitors. It is priced at \$14.95. Check Reader Service number 408.

aneck Reader Service number 1

Double-O Funny

First Star Software (18 East 41st St., New York, NY 10017) has released Spy vs Spy II: The Island Caper. Based on the Spy vs Spy strip in *MAD* magazine, the two spies are in search of buried missile parts on an exotic tropical island. As spies, you and another player must dodge sharks, snares and coconut bombs while trying to avoid quicksand, cliffs and deadly lagoons. There are many booby traps, some of which you must construct yourself. Available on disk for the C-64 for \$29.95.

Check Reader Service number 409.

Flip-Flop Interface

Microvations (5333 Mission Center Road, Suite 345, San Diego, CA 92108) has released a C-128 40/80column flip-flop interface for the C-64. The interface allows you to switch between 40- and 80-column modes on your 1701, 1702 or color or monochrome composite monitor, and it eliminates the need for C-64 owners to update to the 1902 RGB monitor. It is available for \$14.95.

Check Reader Service number 412.

Day of the Dolphin

The Dolphin's Rune: A Poetic Odyssey, a game for the C-64, allows you to maneuver a dolphin through ocean perils to uncover encrypted messages containing the secret to solving the game's mystery.

As the dolphin, you must survive sharks and fishing nets and become adept at swimming through the game's color currents. As your skills improve, the ocean comes alive with dolphin sounds that can lead you to seabeds containing fragments of an epic poem composed in a runic alphabet.

Nine successful trips to the seabed yield nine encrypted stanzas of the poem that must be deciphered to reveal clues to the secret location somewhere on earth. When you've deciphered the ninth stanza, one of three additional stanzas is revealed. Only one of these extra stanzas provides more clues to the secret location. Available on disk for \$29.95. Mindscape, Inc., 3444 Dundee Road, Northbrook, IL 60062.

Check Reader Service number 411.

Learn to Tickle the lvories

The Keyboard/Chord Scale Master (Valhala Software, 205 E. Hazelhurst, Ferndale, MI 48220) is a tutorial designed to enhance your keyboardplaying abilities through sight-andsound reinforcements of chord and scale display modes, chord and scale review modes and a compare mode. Each mode allows you to choose up to 12 key signatures for reviewing.

The Chord Display and Scale Display modes allow you to view and sound the most commonly used chords and scales.

The Chord Review and Scale Review modes utilize drills, quizzes and a competitive game of challenge to help you in your study.

The Compare mode allows you to compare two chords in the same or different key signatures.

The package is available on disk for the C-64 for \$39.95.

Check Reader Service number 407.

More Print Shop Graphics

Broderbund Software (17 Paul Drive, San Rafael, CA 94903) introduces The Print Shop Graphics Library, Disk 3, the third follow-up graphics program to its original Print Shop.

The Graphics Library provides 120 additional designs, symbols and pictures for do-it-yourself graphics creations that include six categories: Christmas, business, international symbols, myth and fantasy, seasons and animals.

The program also includes a variety of typefaces, borders and graphics images and also lets you modify existing graphics or design your own original images. Available on disk for the C-64 for \$24.95.

Check Reader Service number 410.

Scenery Disks

SubLogic (713 Edgebrook Drive, Champaign, IL 61820) has released six different scenery disks to be used with the manufacturer's flight simulation products—Flight Simulator II and Jet.

Each disk covers a geographical region of the western U.S. and includes the major airports, radio-navigation aids, cities, highways, rivers and lakes located in that region. There is enough detail on each disk for either visual or instrument cross-country navigation.

Individual scenery disk packages are available for the C-64 for \$19.95. The Western U.S. six-disk set may be purchased for \$99.95.

How to Type in C-64 and C-128 Listings from RUN

To simplify your typing of *RUN*'s C-64 and C-128 program listings, we include checksum numbers. These numbers follow a REM statement at the end of each line (e.g., :REM*123). These checksum numbers necessitate your using RUN's Perfect Typist programs, listed below. Use 64 Perfect Typist for C-64 programs and 128 Perfect Typist for 128 Mode programs on the C-128.

Type in 64 Perfect Typist (Listing 1) or 128 Perfect Typist (Listing 2) and save it to either tape or disk before running. When you want to type in a 64- or a 128mode program, first load and run the appropriate Perfect Typist listing. Two SYS numbers will be displayed on your screen. Jot these down and keep them handy. They are the SYS numbers that you type in for deactivating and reactivating the checksum program.

After Perfect Typist has been loaded and run, start typing in the program listing from *RUN* as you normally do. The only difference is that now, after you press the return key to log in each line, a 1-, 2- or 3-digit number will appear below the line on the left margin. This is the checksum number, ranging from 0 to 255.

If this number matches the checksum number printed in the listing after the :REM*, then you know you have typed that line correctly. Then you type the next program line right over the previous line's checksum value. If the checksum numbers do not agree, analyze your line on screen for any typographic errors or omissions. Make the needed changes and press the return key again to log in

29Ø DATA 255,2Ø2,Ø16,247,164,Ø11,Ø96,145 3ØØ DATA Ø13,Ø32,Ø32 those changes. A new checksum number will appear in place of the old one. Compare this to the magazine's number and then proceed to the next line.

When you've finished typing in your program, disable the Perfect Typist by typing in the appropriate SYS number for either 64 or 128 mode, and press the return key. Now you can save your program as usual, to disk or tape. (Before you attempt to run your new program, turn your computer off and back on to completely clear out the Perfect Typist program.)

You may save an incomplete program any time and continue it later. You will have to reload and run the Perfect Typist program, then load the incompleted program that you were working on, list it, and continue where you left off.

The 128 Perfect Typist will work in either 40 or 80 columns. Also, it lets you use the C-128's automatic line-numbering. If Auto is on, the checksum will be printed below the line you just entered, and the C-128 will place the next line number below the checksum.

All listings in *RUN* have been translated so that the graphics and control characters are designated as understandable key combinations. When you see instructions inside curly brackets, such as {SHIFT L}, you should hold down the shift key and press the L key. What you see on your screen will look quite different from what is designated inside the brackets. Another example is {22 SPACEs}, which instructs you to press the space bar 22 times.

Manuscripts: Contributions in the form of manuscripts with drawings and/or photographs are welcome and will be considered for possible publication. *RUN* assumes no responsibility for loss or damage to any material. Please enclose a self-addressed, stamped envelope with each submission. Unsolicited manuscripts that cannot be accepted will be returned only if accompanied by an appropriately sized, adequately stamped, self-addressed envelope. Payment for the use of any unsolicited manuscripts that cannot be accepted will be returned only if accompanied by an appropriately sized, adequately stamped, self-addressed envelope. Payment for the use of any unsolicited material will be made upon acceptance. All contributions and editorial correspondence (typed and double-spaced, please) should be directed to *RUN* Editorial Offices, 80 Pine Street, Peterborough, NH 03458; telephone: 603-924-9471. Advertising Inquiries should be directed to Advertising Offices, CW Communications/Peterborough, Inc., Elm Street, Peterborough, NH 03458. Subscription problems or address changes: Call 1-800-645-9559 or write to *RUN*, Subscription Department, PO Box 954, Farmingdale, NY 11737. Problems with advertisers: Send a description of the problem and your current address to: *RUN*, Elm Street, Peterborough, NH 03458, ATTN.: Rita B. Rivard, Customer Service Manager, or call 1-800-441-4403.

RUN is a member of the CW Communications/Inc. group, the world's largest publisher of computer-related information. The group publishes 57 computer publications in more than 20 major countries. Nine million people read one or more of the group's publications each month. Members of the group include: Argentina's Computerworld/Argentina; Asia's The Asian Computerworld; Australia's Computerworld Australia, Australian PC World, Macworld and Directories; Brazil's DataNews and MicroMaudo; China's China Computerworld/Argentina; Asia's The Asian Computerworld; Australia's Computerworld Australia, Australian PC World, Macworld and Directories; Brazil's DataNews and MicroMaudo; China's China Computerworld; Denmark's Computerworld/Danmark, PC World and RUN (Commodore); Finland's Mikro, France's Le Monde Informatique, Golden (Apple), OPC (IBM) and Distributique; Germany's Computerworle, Microcomputerworld, IS Golden (Apple), OPC (IBM) and Distributique; Germany's Computerworle, Microcomputerworld Italia and PC Magazine; Japan's Computer Business, RUN and Apple's; Italy's Computerworld Italia and PC Magazine; Japan's ComputerWorld Japan; Mexico's Computerworld/Bapia's Gomputerworld Norge, PC World and RUN (Commodore); Saudi Arabia's Saudi Computerworld/Spain's Computerworld Norge, PC World and RUN (Commodore'), Saudi Arabia's Saudi Computerworld, Spain's Computerworld/Spana, Microsistemas/PC World and Commodore World; Sweden's ComputerSweden, Mikrodatora, and Svenska PC; the UK's Computer Management, Computer Neus, PC Business World and Computer Ibusiness Europe; the U.S: AmigaWorld, Computerworld, Focus Publications, HOT CoCo, inCider, InfoWorld, MacWorld, Micro Marketworld, On Communications, PC World, RUN, 73 Magazine, 80 Micro; Venezuela's Computerworld Venezuela.

RUN AMOK

Item: Three bugs have turned up in Robert Rockefeller's Basic 4.5 (June, July and August 1985). First, used alone, the Restore key crashed the program and also prevented RS-232 from working. Second, trying to list the program from one specified line to another resulted in the listing passing right by the ending line, so you had to list the entire balance of the program. Finally, the Vibrato command didn't work.

The following four Pokes should fix the bugs. It is first necessary to load and start Basic 4.5. After the Pokes have been executed, the corrected Basic 4.5 can be saved with BSAVE "BASIC 4.5", P\$8000 to P\$A000.

POKE \$862D,4 POKE \$82B0,\$1B POKE \$8171,\$47 POKE \$8172,\$FE

The RUNning Board

RUN invites you to contact its bulletin board (RUNning Board). In addition to up-to-date information about *RUN* and the Commodore industry, the RUNning Board now presents useful computing hints and tips, corrections and updates to published articles, user's group information, an up-to-date list of selections for ReRUN and sneak previews of upcoming articles.

The RUNning Board also features a menu format that makes it easier and faster for you to select a specific section of the bulletin board. We use a standard protocol, 300 baud, one stop-bit, no parity, full duplex and a word length of eight bits.

The RUNning Board is definitely worth a call. You can get on-line anytime, 24 hours a day, seven days a week, by dialing 603-924-7632.

F-16 High-G Pullout over Detailed Wargame Scenery (Rear View)

From the author of Flight Simulator II comes a new dimension in realism. Jet simulates two fast and maneuverable supersonic jet fighters, a land-based F-16 or a carrier-based F-18. The simulator includes modern electronic flight instrumentation and the most advanced weaponry available. Jet's simulation sophistication, combined with excellent visual attitude references, makes it truly enjoyable to fly.

Easy aircraft control coupled with ballistic thrust gives you the kind of aerobatic maneuverability only a modern jet fighter can provide. Jet's attitude indicator is easy to read no matter what your orientation. A fullscreen out-the-window view helps you get the most out of Jet's excellent flight controls. And that's a major consideration when flying at speeds in excess of 1300 MPH. With Jet you can fly through either structured or non-structured environments. Engage in a deadly variety of combat missions. Explore the wargame territory, or relax by practicing precision aerobatic maneuvers. Load in scenery from optional United States Scenery Disks. You can even load in scenery off the Flight Simulator II disk.

New high-performance graphic drivers provide beautifully detailed scenery in either day or night-flight modes. You can look forward, left, right, rearward, or straight up out of the cockpit with a single keypress. The Jet simulator even includes a special view-magnification feature that lets you zoom-in to identify objects or details at a distance.

Jet will run on any Commodore 64 or Commodore 128 computer with one disk drive and either color or monochrome monitor.
